**Phone:** (850) 414-4355

**Email:** Rick.Jenkins@dot.state.fl.us

### COMMENTARY

FDM 230.4 states to place retroreflective strip on static WWD sign column. The MUTCD Section 2A-21 “it shall be placed for the full length of the support from the sign to within 2 feet above the edge of the roadway...” An update to Standard Specification 700 is required to clarify the use of the retroreflective strip.

### COMMENTS AND RESPONSES

**BLACK** = Industry Review Comments   **BLUE** = Standard Plans Response   **GREEN** = Change Made to Index

**Name:** Yael Rivera

**Date:** 7/13/2023

**COMMENT:** I am failing to understand why restrict the implementation of the reflective strip to static WRONG WAY signs (excluding highlighted WRONG WAY signs). If the intent is to provide maximum visibility to the wrong way signage for WWVDSs, then a reflective strip (5' in length) should be proposed on the highlighted sign assemblies.

**RESPONSE:** The MUTCD requires the reflective strip on static signs only. The thought is that the highlighted signs bring attention to the sign and the reflective strip is not needed.

**CHANGE MADE TO INDEX:** No.
