COMMENT: Can a standard spread footing foundation option be added to this Index, similar to how Index 715-002 sheet 5 of 9 has for the standard aluminum lighting? If that spread footing foundation from 715-002 can actually be used on the utility conflict pole, then a simple note referencing it would help out for Index 715-003.

RESPONSE: This comment is outside the scope of revisions for this cycle. A spread footing is logged for consideration in future publications.

CHANGE MADE TO INDEX: No.
