COMMENTARY

Water-filled barriers were removed as an option for purchase starting in 2020, so this barrier type is no longer being supported on the Standard Plans sheet.

COMMENTS AND RESPONSES

COMMENT: The water filled barriers are currently still listed on the APL with three product options. Shouldn't these be removed as well to prevent confusion or can they still be utilized in projects with a special pay item?

RESPONSE: The water filled barriers are still on the APL for inspection of existing NCHRP-350 compliant product inventory only. They can not be used as temporary barrier.

CHANGE MADE TO INDEX: No.
