Traffic Control Devices For Movable Span Bridge Signals

ORIGINATION**Date:** 6/9/2026**Name:** Ron Meyer**Phone:** 850-580-7840**Email:** Ronald.meyer@dot.state.fl.us**COMMENTARY**

The TERL requests that 508-T01 be modified to depict signals with tunnel or full circle visors. Only tunnel or full circle visors are listed on the APL due to requirements for circular traffic signals in sections 650 and 995-4. Signals and beacons typically use tunnel visors due to this specification content as well as depictions of signals and sign beacons throughout other Standard Plans (e.g. 700-120, Sheet 10 of 13 depicting a RR sign with a beacon, etc.).

COMMENTS AND RESPONSES

BLACK = Industry Review Comments **BLUE** = Standard Plans Response **GREEN** = Change Made to Index

COMMENT: General comment for future consideration – In Sheet 3 of this index, consider deleting the details for the "DRAWBRIDGE SIGNAL" sign and adding this sign to Index 700-102 (Special Sign Details).

RESPONSE: This sign will be considered for a future addition to Standard Plans Index 700-102 as a special sign.

CHANGE MADE TO INDEX: No

Response Date: 8/19/2026
