

The Final Plans Processing Module

The main purpose and function of the Final Processing module is for the District's Final Plans Engineer to track certifications and alternate contracting, such as Lump Sum projects.

A user must be granted privileges for the 'Final Processing' module in order to manage functions related to the Final Processing. The privilege allows the user to Add, Edit or Remove a Final Processing Item. The Project Manager identified on the project is automatically given the privileges of managing the 'Final Processing' module.

To request Privileges for managing Final Plans Processing Module

As a Project Suite Enterprise Edition User, you may request access/privilege to the Final Processing Module through PSEE. This request will be sent to the District Administrators. (The District Administrators are listed in the footer of every PSEE page.) For information on how to request access to specific activities within a Module, see [User Profile – Privileges and Notifications](#).

Below are the activities that can be granted privilege in the Final Processing module. Place a check in the box beside the activity access/privilege being requested in the column appropriate for your District. Select the Request button to send the request to the District Administrator for action.

Request Privileges

View Document -

An attached document related to the Final Processing Item Type can be viewed.

1. Select the **View Document** link to retrieve the document.
2. The document will be opened in its original format.

The screenshot shows a web application interface for 'Project Info [430670-1]'. The main content area is titled 'Final Plans Processing' and contains a table of 'Final Processing Item Type' and 'Received Date'. The 'Construction' item type, received on 6/12/2013, has a 'View Document' link highlighted with a red box. Other item types include Environment, Peds./Bicycle Ways, Permit, Permit Transmittal Memo, Preliminary Engineering, Rail Road, Right of Way, and Utility. There is also an 'Electronic Deliverables' section with an '[Add]' link. At the bottom, there is a 'Final Plans Comment' field with an '[Edit]' link.

Editing a Final Processing Item in PSEE

The users with appropriate privileges may edit the details of a Final Processing Item.

1. Select the **[Edit]** link next to the Final Processing Item Type.

The screenshot shows the same web application interface as above. In this view, the '[Edit]' link for the 'Construction' item type is highlighted with a red box and a red arrow pointing to it. The 'View Document' link is also visible. The 'Final Plans Comment' field now contains the text 'this is a test by cfw' and has an '[Edit]' link.

Final Processing Item Type	Received Date		[Edit]	[Mark N/A]
ADA			[Edit]	[Mark N/A]
Construction	6/12/2013	View Document	[Edit]	[Mark N/A]
Environment			[Edit]	[Mark N/A]

Final Plans Comment: this is a test by cfw [\[Edit\]](#)

2. You may edit Received Date field and Upload document as desired then select the **Save** button.

Edit Final Processing Item

Final Processing Item Type: ADA

Received Date: 06/18/2013

Document: PSEE Design Package Document.docx

Select File 100 % Upload Complete

Save Cancel

- **Final Processing Item Type (Read-only)** - It is not allowed to change.
- **Received Date (Editable)** – It is the date when Final Processing Item Type was received.
- **Document** - Allows user to attach a new document related to the Final Processing Item Type.

Business Rules and Key Functionality:

- A document attachment is required if a 'Received Date' is entered.
- Received Date cannot be a future date.
- Uploading a new document will replace the existing document.

Mark N/A a Final Processing Item Type

The users with appropriate privileges may mark Final Processing Item Type as 'N/A'.

1. Select the **[Mark N/A]** link next to the Final Processing Item Types

Dashboard - Project - Search - Scheduling - Create Project - Assignments - Other Tools - Reports - Help

Go To Project [] - []
