Group Notes – What do we like about the new site?

ETAT Tools & Reports

- Much more streamlined and efficient (easier to find things)
- Love that we can use the new EST in Chrome (vs. IE)
- We like the Table of Contents
- Very user friendly and intuitive
- Easy to see how far along you are in the review
- Project Information Package

PROJECT: Planning Screen ETAT Review (State) - For KMM Use

ETAT Review Tasks

 - [Preliminary Environmental Discussion Report](#)
 - [Sociocultural Data Report](#)
 - [Cultural Resources Reports](#)
- 3. Provide Comments**
 - [Review Purpose and Need](#)
 - [Review Project Effects](#)

Group Notes – What do we like about the new site?

Map Viewer

- Layer search is good
- Save map is good
- Utilize the URL links, when available
- Can turn on/off previously reviewed projects
- Excited USACE Jurisdiction for 404 permitting data layer and UF historical maps have been added
- Birds layer is great!

Group Notes – What can we do better?

- Print Topic Name at the top of the reviewer confirmation page
- Side-by-side comparison of old EST/new EST to see where items are located
- Quick cheat sheet to find different map layers
- Hard copy maps – symbology is sometimes lost and doesn't scale well
- Change to not see all projects on Map Viewer by default
- Show street names on top of aerial base maps
