

PREFERRED ALTERNATIVE BENEFITS

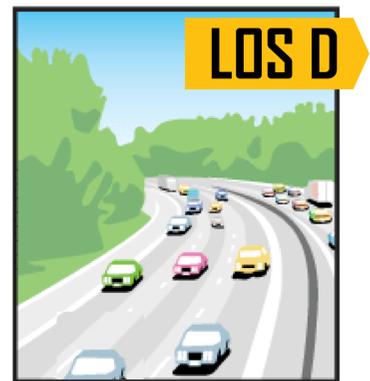

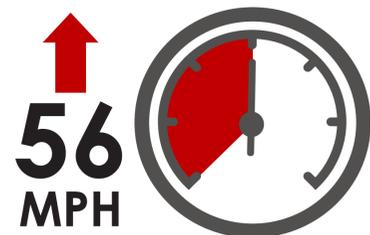

ROADWAY GEOMETRY

- Adds ramp lanes that remove traffic from the I-95 mainline
- Adds additional exclusive turn lanes at the ramp terminals

OPERATIONS

- Combines ramps improving interchange spacing
- Reduces the number of weaving movements
- Reduces speed differentials between the mainline and ramps
- Increases operating speeds
- Provides acceptable levels of service
- No off-ramp spillovers to the I-95 mainline

SAFETY

- Reduces the number of entrances and exits to and from I-95
- Reduces long-term crashes and total number of crashes
- Provides more off-ramp storage when exiting I-95
- Provides additional lanes for emergency response and during evacuation events
