First replacement deck concrete pour completed for Pensacola Bay Bridge

Pensacola, Fla. – Florida Department of Transportation (FDOT) contractors poured concrete for the first new bridge deck needed to repair the Pensacola Bay Bridge Wednesday, January 13. Bridge decks are the portion of the structure that connect two pier locations to form what is referred to as a bridge span.

Repairing the bridge requires repair or replacement of eight full spans and 14 partial spans. Each full span is 150-feet long, 59-feet wide, and weighs approximately two million pounds. The Pensacola Bay Bridge has a targeted re-opening date of March 2021. Once repairs are complete, all four lanes will be open with no load restrictions.

Details on the detour routes, including graphics, FAQs, and regular updates can be found online at fdot.gov/PensacolaBay. Members of the public wishing to receive these updates can choose to subscribe by providing their email address on this website as well.

The Florida Department of Transportation's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of the state's environment and communities. The department is committed to building a transportation system that not only fits the current needs of Florida's residents and visitors, but also enhances mobility throughout the state to accommodate its consistent and rapid growth. The unique nature of the Sunshine State and its year-round warm climate provides numerous opportunities to achieve the department's mission through multiple transportation modes including highways/streets, air, rail, sea, spaceports, transit, and the ever-expanding deployment of bicycle & pedestrian facilities.
