Roosevelt Bridge Traffic Advisory and Update

TALLAHASSEE, Fla. – The right northbound lane of Roosevelt Bridge will be closed overnight on Thursday, July 16 from 10 p.m. to 5 a.m. to patch locations where samples were previously taken on the outside of the bridge. It is important to seal these areas, so they are not left exposed to elements, such as rain and wind. One lane will remain open for northbound traffic and southbound traffic will not be impacted. Dixie Highway remains open for both northbound and southbound traffic.

This week, the Florida Department of Transportation (FDOT) is continuing to collect samples from southbound Roosevelt Bridge and sending them to the FDOT materials lab for further examination. The collection of samples is a very methodical process and is taking place along the entirety of the nearly mile-long bridge. FDOT is actively working on repair plans to allow the Roosevelt Bridge to return to normal operations (three lanes of traffic in each direction) and will provide additional updates as soon as they are available.

Intermittent lane closures are possible while work is ongoing at the bridge. These closures will be communicated as soon as possible. FDOT continues to monitor traffic in and around the area and will make every effort to not impact traffic during peak travel times.

For additional real-time updates on the Roosevelt Bridge, follow FDOT District Four on social media:
