TRANSPORTATION & PUBLIC WORKS

- FDOT is working with state and local officials to assess the current situation and needs and holding teleconferences with the FDOT district offices.
- Florida's 511 Traveler Information System is one of the most effective ways drivers can keep informed about the state's roadways during severe weather.
- Contractors on all construction projects have secured work sites, clearing traffic control devices that are not actively being used to direct traffic, and continue to check drainage systems.
- All available lanes will remain open on the interstate system.
- FDOT is operating the I-595 Express lanes in the westbound direction until Hurricane Dorian has passed. Eastbound traffic will continue to use the general-purpose eastbound lanes throughout this period.
