## **Media Advisory: FDOT Transmits Final M-CORES Task Force Reports to Governor Ron DeSantis and Legislative Leadership**

**TALLAHASSEE, Fla.** – Following 15 months of Task Force meetings and extensive public engagement opportunities, the Florida Department of Transportation (FDOT) submitted the final M-CORES Task Force reports for the proposed Suncoast Corridor, Northern Turnpike Corridor, and the Southwest-Central Florida Corridor today to Governor Ron DeSantis and legislative leadership.

The Task Forces were comprised of a very diverse group of subject matter experts, including environmental groups, water management districts, community organizations, metropolitan planning organizations, regional planning councils, local governments, and state agencies. In addition, the Task Forces conducted extensive outreach to the public in each jurisdiction, as required, and the actionable feedback received from the public shaped the Task Force recommendations within their final report.

The three final reports will guide FDOT in its subsequent study phases through the implementation of high-level needs, guiding principles, and instructions.

The final Task Force reports are now available on [FloridaMCORES.com](http://FloridaMCORES.com).
