

FLORIDA DEPARTMENT OF TRANSPORTATION - DISTRICT FOUR

Central Railroad Corridor Greenway Pedestrian Overpass

From west of I-95 to North County Regional Park
Financial Project ID Number: 432574-2-52-01

Central Railroad Corridor Greenway Pedestrian Overpass

The Florida Department of Transportation (FDOT), District Four, completed the Central Railroad Corridor Greenway Pedestrian Overpass Project on June 28, 2018. This project was a critical link in the Indian River County and City of Fellsmere's greenway system, creating a shared use connection and encouraging alternative modes of travel. The new off-road trail using the old **Trans-Florida Central Railroad** right-of-way connects the City of Fellsmere with the City of Sebastian from west of I-95 to North County Regional Park, offering safe, convenient access for pedestrians and bicyclists. The goal of the greenway system is to increase environmental benefits while supporting wildlife protection and enhancing quality of life.

FDOT and TranSystems began the design for this project in July 2014, working very closely with the City of Fellsmere and Indian River County on the architectural details of this bridge. On April 26, 2017, Infrastructure and Industrial Constructors USA began the construction of this 2 mile trail, with FDOT & Johnson-Adams & Associates, LLC (now part of Target Engineering Group) overseeing the project.

PROJECT IMPROVEMENTS

- Constructed a 12-foot-wide, 2-mile shared use path and a pedestrian overpass over I-95, providing pedestrians and bicyclists with convenient access to area parks, conservation areas, recreational and educational facilities
- Maintained an open drainage system with swales and minor culvert crossings
- Installed lighting, architectural towers, and specialty signage
