MATERIALS BULLETIN NO. 07-19

DCE MEMORANDUM NO. 08-19

(FHWA Approved: 6/4/2019)

**TO: DISTRICT MATERIALS AND RESEARCH ENGINEERS
DISTRICT CONSTRUCTION ENGINEERS**

FROM: Timothy Ruelke, P.E., Director, Office of Materials
Dan Hurtado, P.E., Director, Office of Construction

COPIES: Will Watts, Amy Tootle, Ananth Prasad, Jim Warren, Chad Thompson, Nick Finch

**SUBJECT: SAMPLING FREQUENCY OF ASPHALT MIXTURES FOR
RECOVERED BINDER TESTING**

The sampling frequency of asphalt mixtures for recovered binder testing is being changed to the same frequency as asphalt binder sampling. Department personnel should obtain the binder and mixture samples at the same time. The mixture should contain binder from the same tank that was sampled for the binder.

Binder & Mixture Sampling Frequencies

Unmodified Binders & Mixtures: One sample/binder grade/project/calendar year
Modified Binders & Mixtures: Two samples/binder grade/project/calendar year

For RAP mixtures being produced for the first time, obtain a mixture and binder sample within the first 1,000 tons of production.

Additional samples may be obtained as needed.

All samples should be delivered to the State Materials Office immediately.

For questions regarding this memo, please contact Howie Moseley (352) 955-2905 or Greg Sholar (352) 955-2920.
