

What does a company look like in MAC?

Companies have a Company Profile in MAC. The Company Profile is used to assign elements of MAC to a company. The Company Profile has users, production facilities, laboratories, and mix designs, if applicable. Some companies will not have all elements. Through the user, MAC assigns other elements to the Company such as the Job Guide Schedule Template and the Contractor QC Plan Template entered by a Company's data entry person. Based on company profile, users can access data to for a specific company, regardless of their lab, as long as they have the appropriate role.
