## Mix Design Submitters and Mix Design Reviewers

Mix Design Submitters who work for a specialty company and not necessarily the company of the mix design should add a filter in the User Who Create Record field of their name. Any other filters might inadvertently stop you from getting notifications you may want.

The screenshot shows a web form titled "Update" with the following fields and options:

- User:** Susan Musselman
- Opt In/Opt Out?:** Opt In (dropdown)
- Send Type:** Both Email and Dashboard (dropdown)
- Filters?:**
- Managing Districts:** (dropdown)
- Projects:** Type Item/Item Segment (text input)
- Mix Design Types:**  Asphalt  Concrete
- Companies:** Start typing Company name to get a list of (text input)
- Users Who Created Record:** Start typing user name to get list of users (text input, highlighted in yellow)
- Save:** (button)

Mix Design Reviewers should not filter. If you are a Mix Design Reviewer you are automatically opted in and MAC filters based on the company on the mix design so you don't have to filter. You can opt out if you don't want the notifications.

A notification bar with the text "Can Opt Out #" on the left and a checkmark followed by a hash symbol "#" on the right.

If you are an in-house Mix Designer with roles, you will want to filter on Mix Design Submitter filters shown above. MAC will automatically filter the Mix Design Reviewer notifications.

### Mix Design has Expired

This is triggered when MAC expires a mix design based on the expiration date.

### Mix Design Will be Deleted Soon

This notification lets users know when a mix design that is In Progress is about to be deleted due to inactivity. In progress mix designs that were created but are not updated or submitted after 30 days are deleted from MAC.

#### Additional Mix Design Info Requested

This is triggered when the DMRO or SMO returns a submitted mix design for additional information.

#### Mix Design Submitted for DMO Review

The Mix Design Submitter/Reviewer triggers this notification so they do not need to subscribe.

#### Mix Design Submitted for SMO Review

This notification gets triggered by the DMRO, Mix Design Submitter or Mix Design Reviewer submitting a mix design to SMO. Sometimes the mix design is submitted to SMO directly from the Mix Design Submitter/Reviewer and sometimes, the mix design goes to the DMRO before going to SMO. Mix Design Submitters and Reviewers can subscribe if they want to.

#### Mix Design has been Accepted

This notification gets triggered by the DMRO or SMO accepting a mix design. Mix Design Submitters and Reviewers can subscribe if they want to.

#### Mix Design has been Rejected

This notification gets triggered by the DMRO or SMO rejecting a mix design. Mix Design Submitters and Reviewers should subscribe to it so they can act on the rejected entry if needed.

#### Mix Design's Product not Approved

This notification is triggered when a DMRO or SMO user changes the status from approved to any other status on a production facility (thereby changing the status on all the products) or changes the product status that is used as a component on a mix design.
