

FLORIDA COUNTY-TO-COUNTY MIGRATION FLOWS

Based on 2014-2018 American Community Survey (ACS) Data

Forecasting and Trends Office

April 2021

INTRODUCTION

Purpose

This document presents the county-to-county migration flow patterns for all 67 counties in Florida based on the 2014-2018 American Community Survey (ACS) data released by the US Census Bureau in September 2020. For each county, this document shows:

- The top five (5) counties in Florida where it receives the highest number of migrants
- Total number of migrants moving from other states
- Top five (5) counties in Florida where it loses the highest number of migrants
- Total number of migrants moving to other states

The ACS Migration Flow Estimates

The ACS covers the entire population residing in the United States and Puerto Rico, both in housing units and group quarters facilities. The U.S. Census Bureau has been releasing county-to-county and county/minor civil division (MCD)-to-county/MCD migration flow estimates periodically based on the ACS data since 2012. This summary is based on the latest ACS County-to-County Net and Gross Migration files, which report four types of migration flow estimates for each county:

- In-Migration to one county from another
- Out-Migration from one county to another
- Net migration (difference between In-Migration to and Out-Migration from)
- Gross migration (sum of In-Migration to and Out-Migration from)

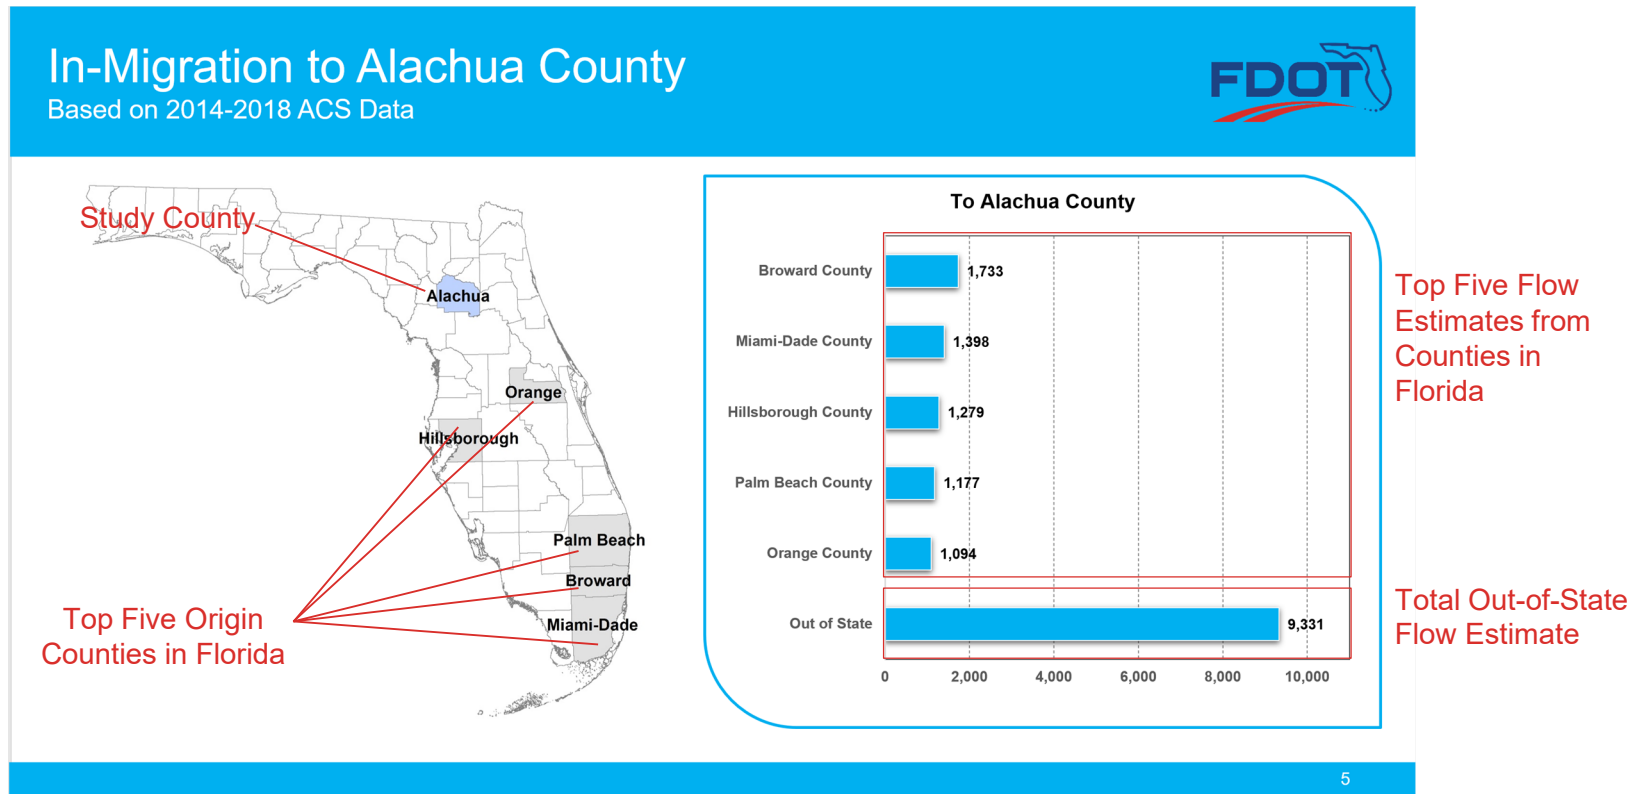

For more details about ACS migration flow data, please click [here](#) to visit the United States Census Bureau webpage.

INTRODUCTION

Guide to Read the Document

The county-to-county migration flows for each county are presented with two slides. The first slide entitled “In-Migration to (County Name)” shows the top five (5) counties in Florida where most of the migrants moved from. The total number of migrants from out-of-state is also identified. The second slide entitled “Out-Migration from (County Name)” shows the top five (5) counties in Florida where most of the residents moved to. It also shows the total number of residents moving out-of-state.

Each slide presents the number of migrants in a bar chart (right) and highlights the locations of the study county as well as top five (5) origin or destination counties in a map (left). The figure on the right shows the migration flows for Alachua County as an example.

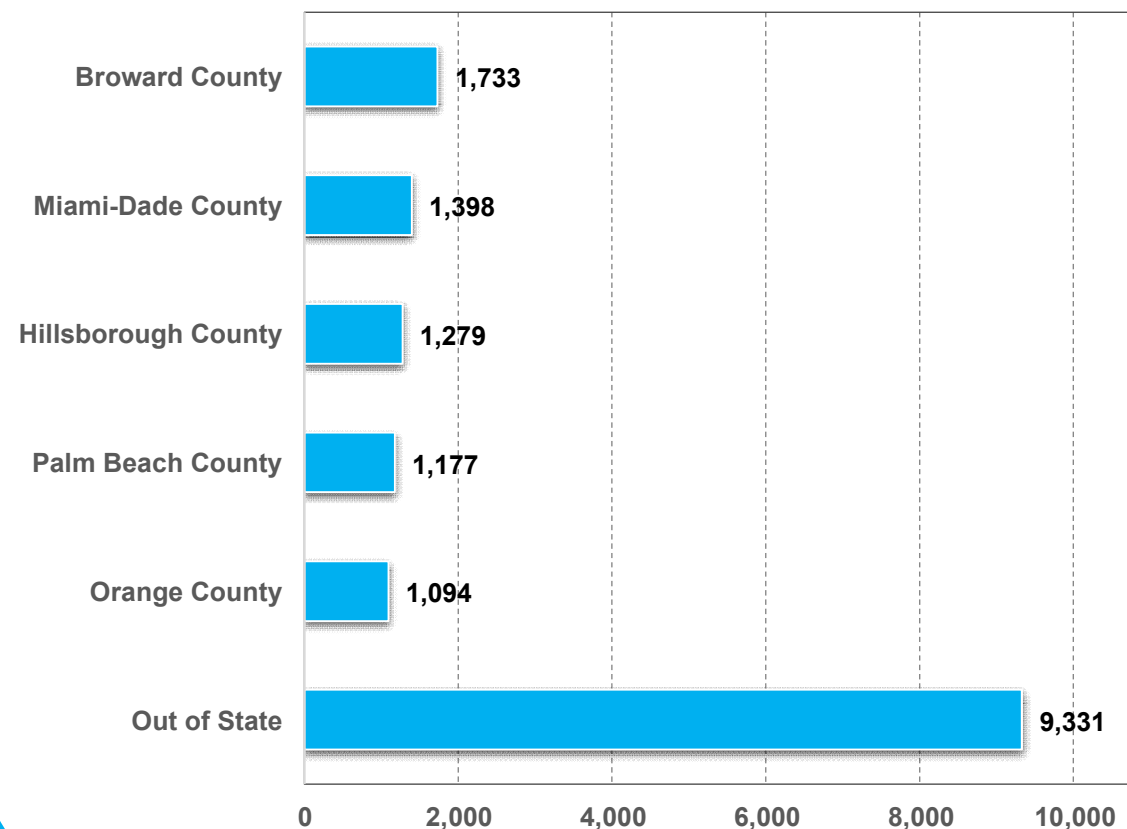

ALACHUA COUNTY

In-Migration to Alachua County

Based on 2014-2018 ACS Data

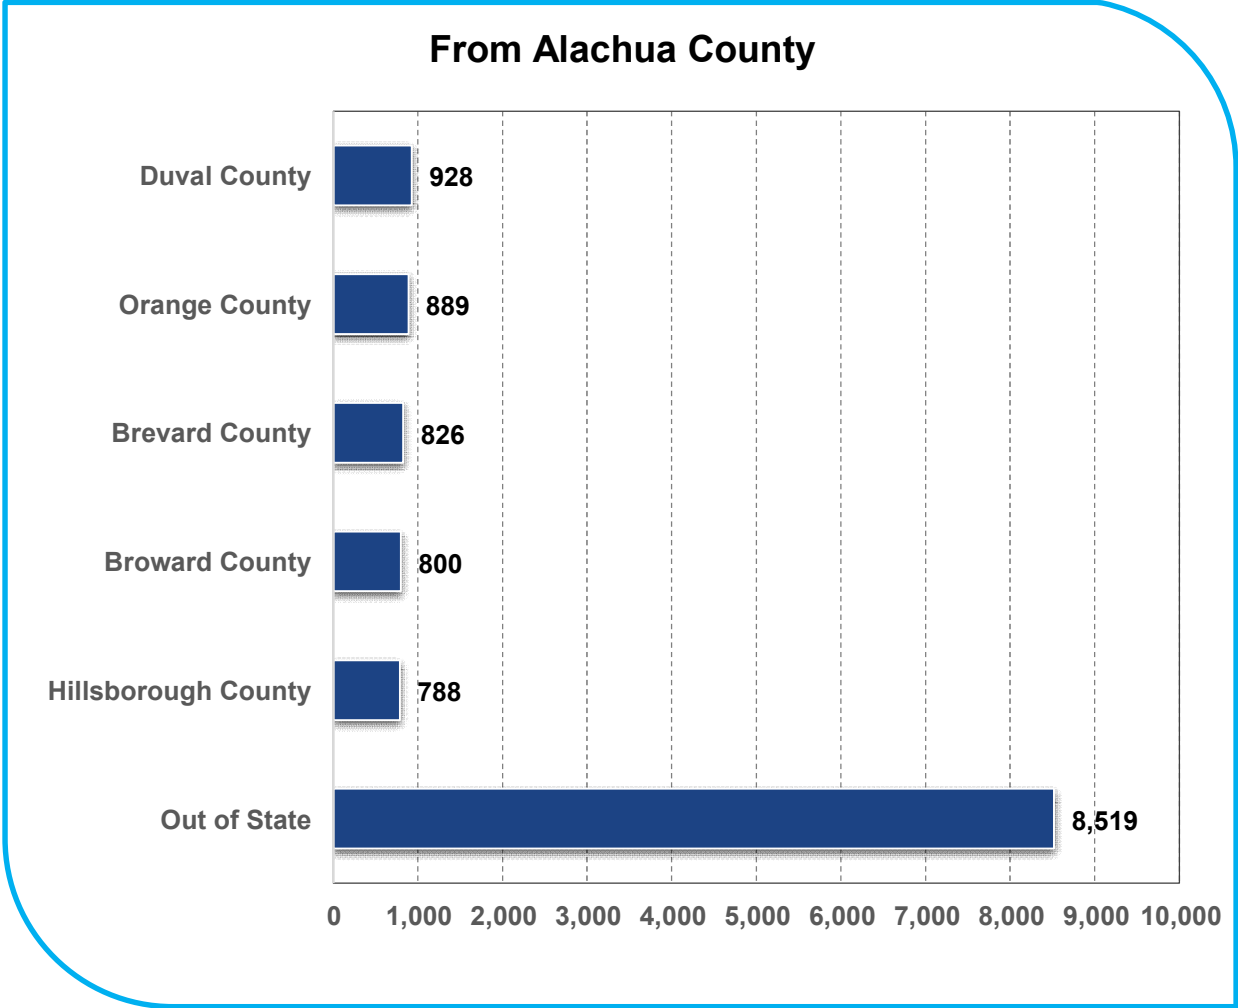

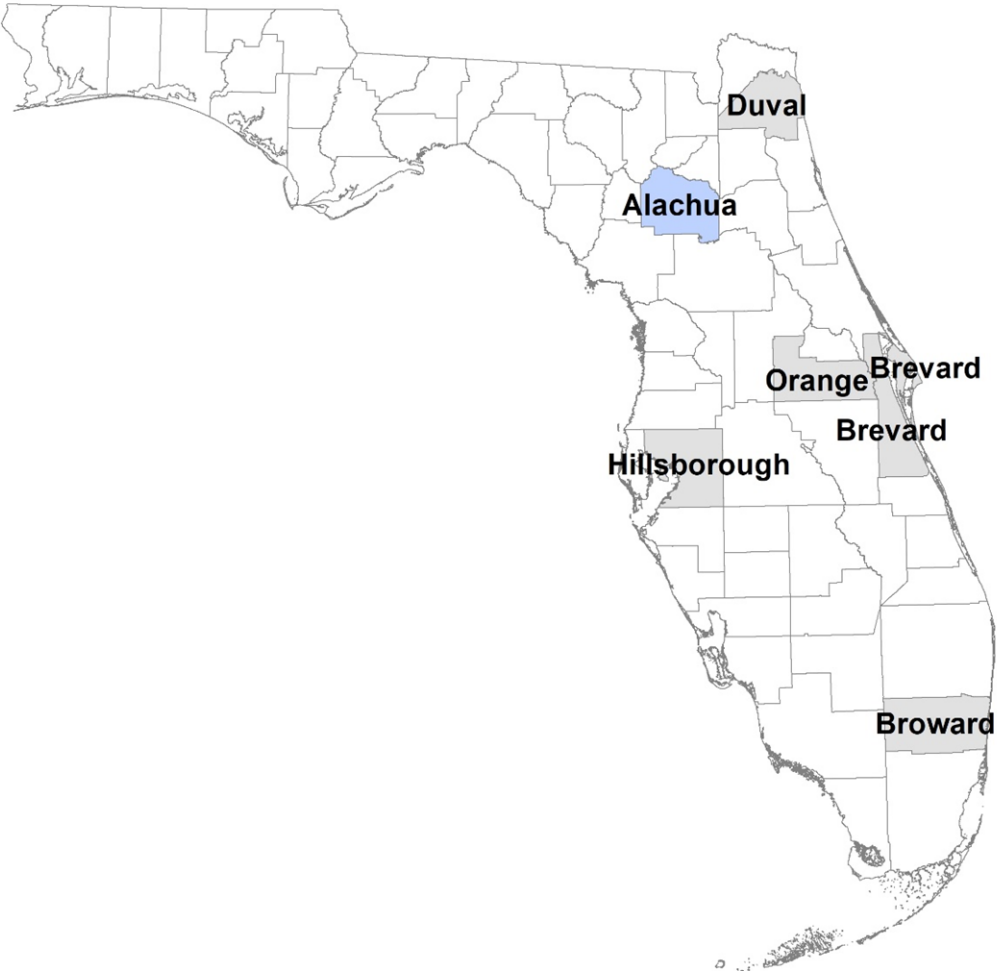

To Alachua County

Out-Migration from Alachua County

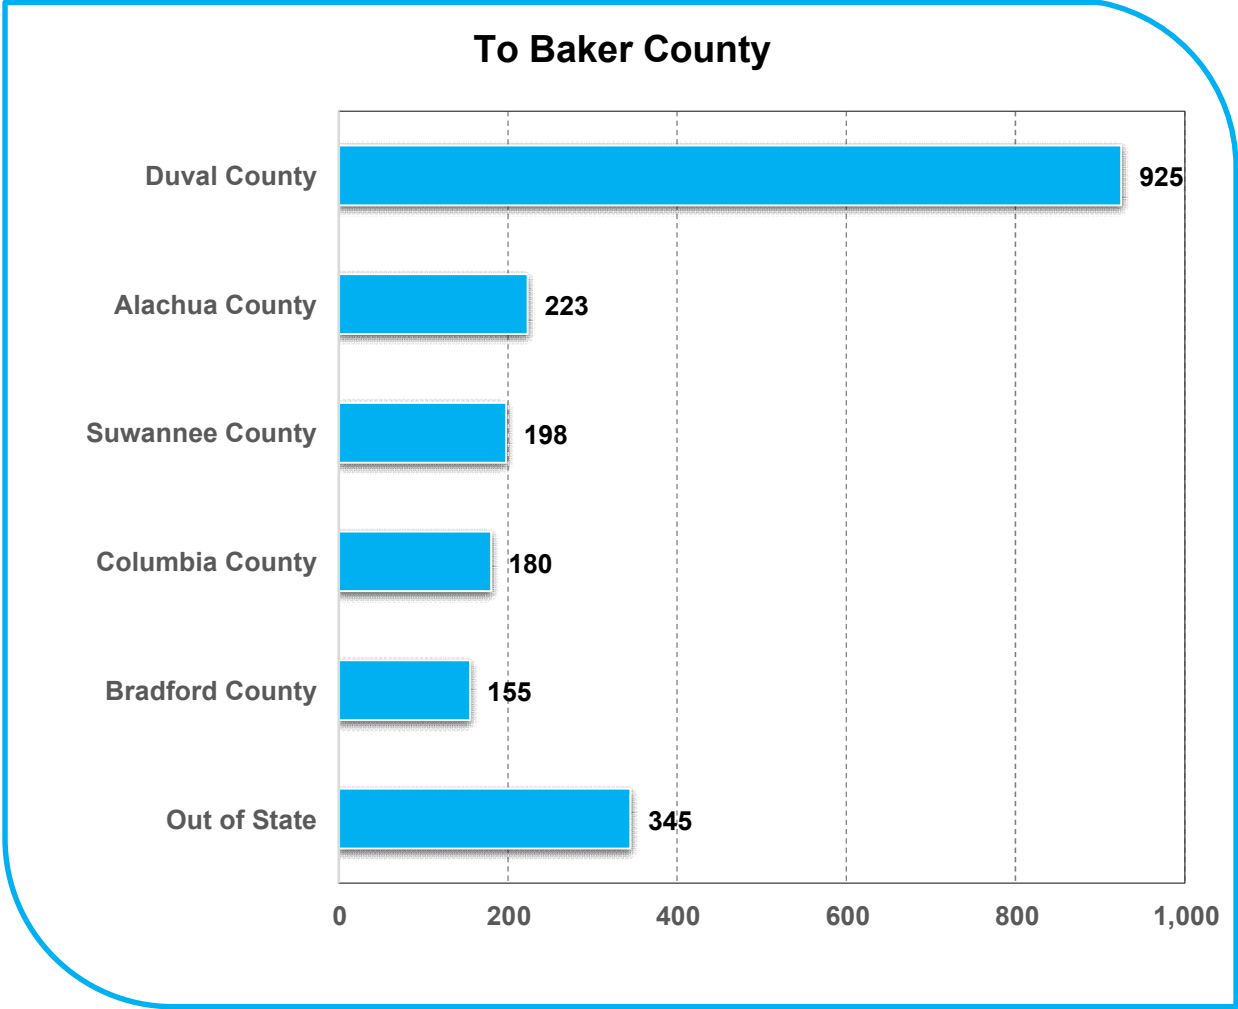

Based on 2014-2018 ACS Data

BAKER COUNTY

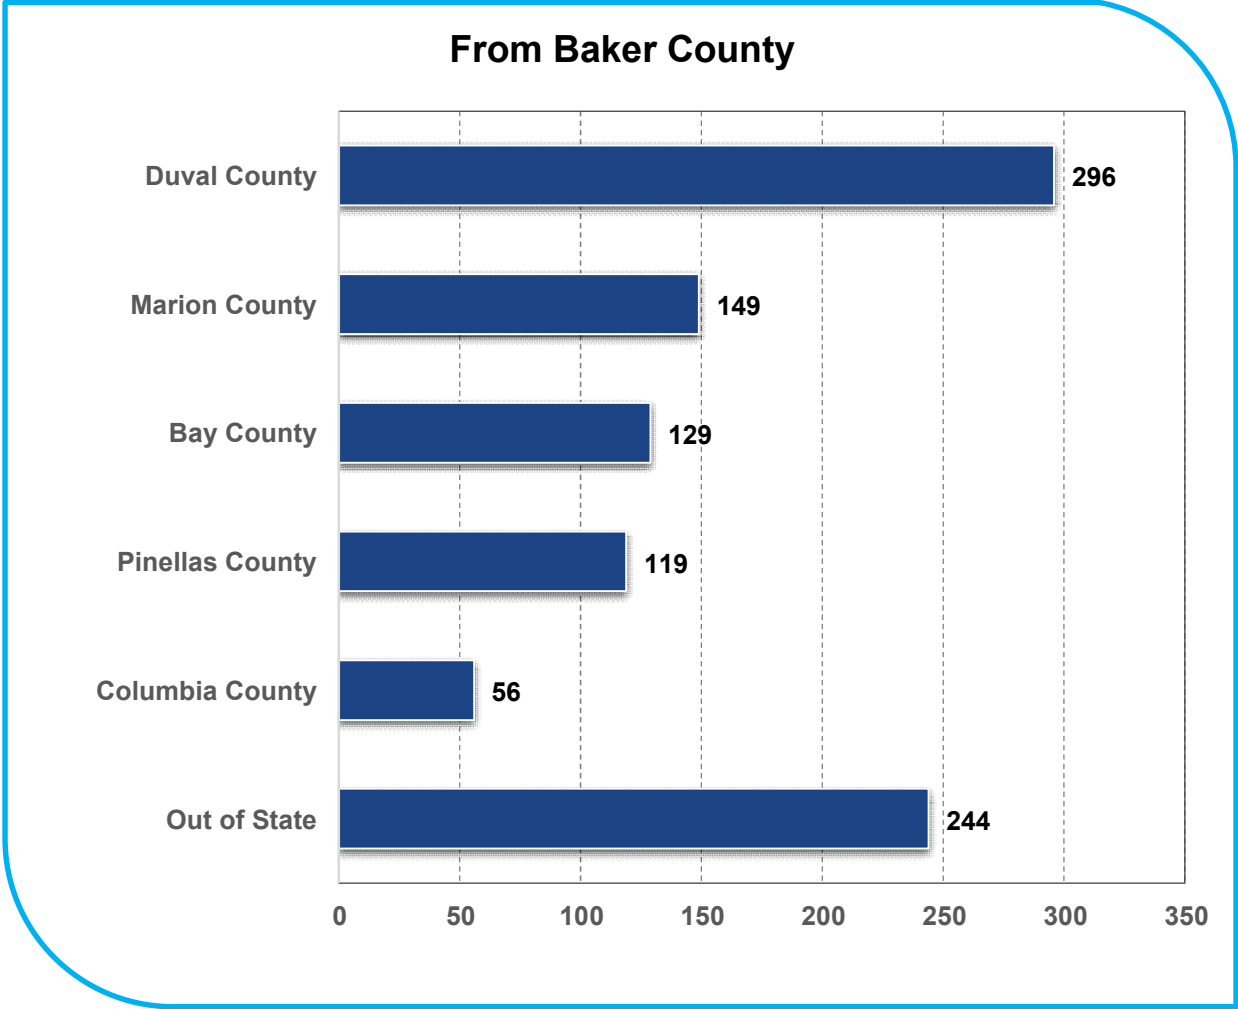

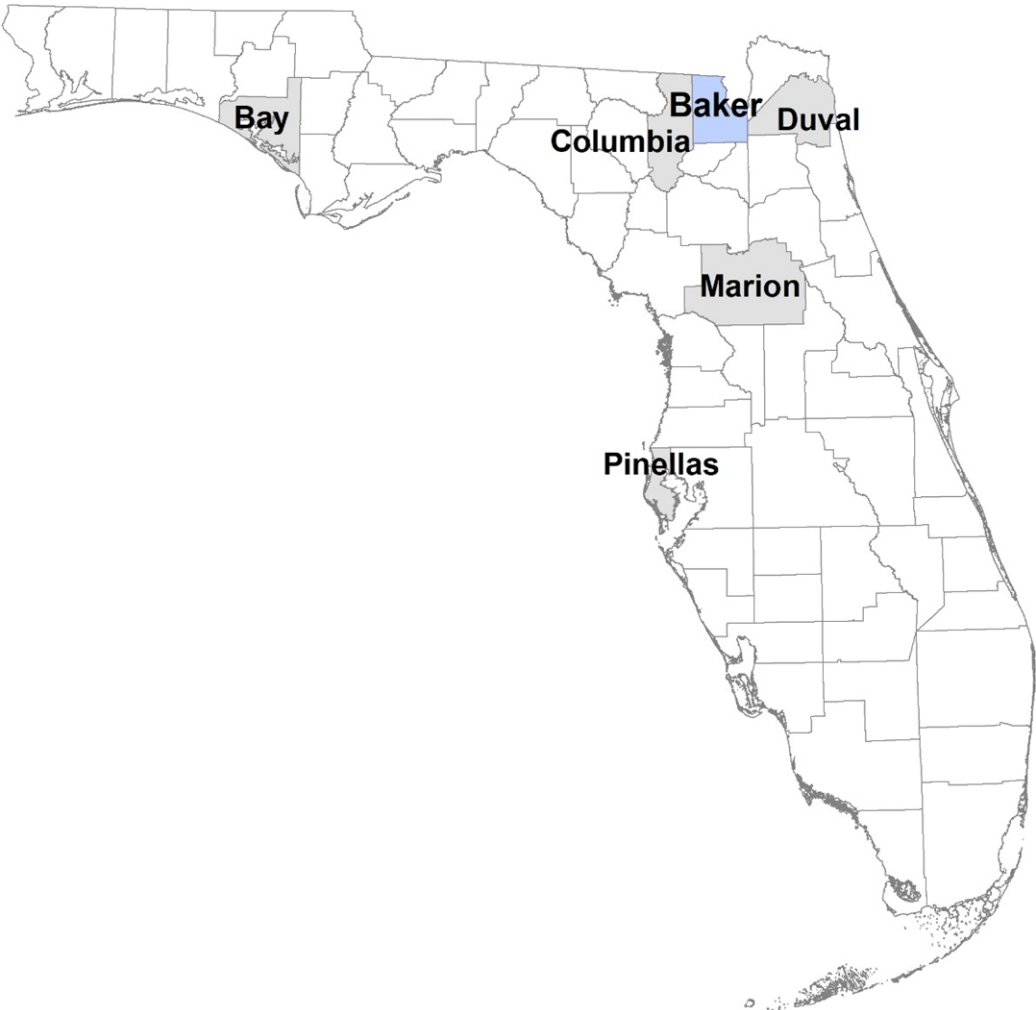

In-Migration to Baker County

Based on 2014-2018 ACS Data

Out-Migration from Baker County

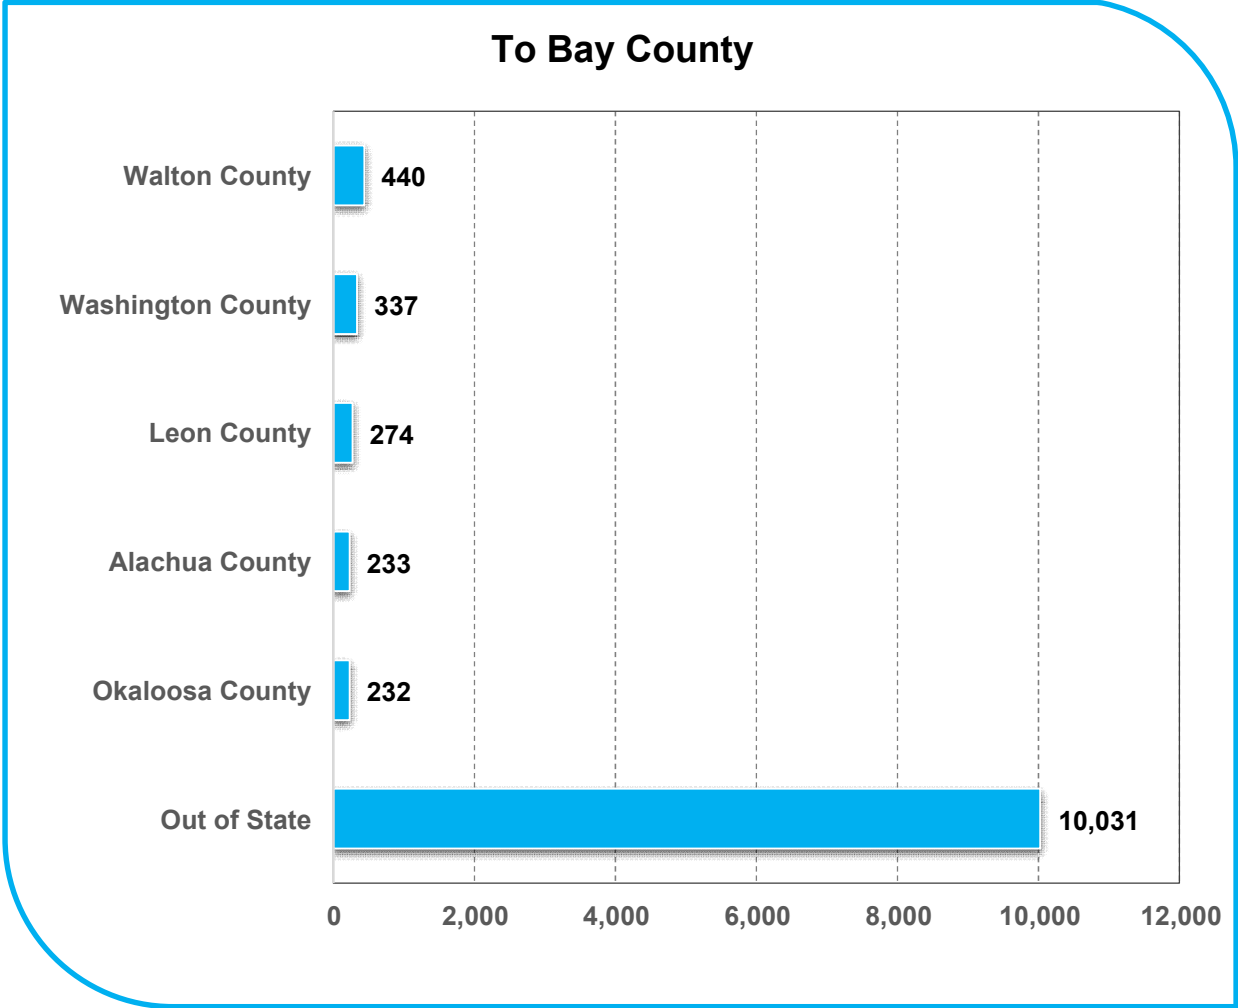

Based on 2014-2018 ACS Data

BAY COUNTY

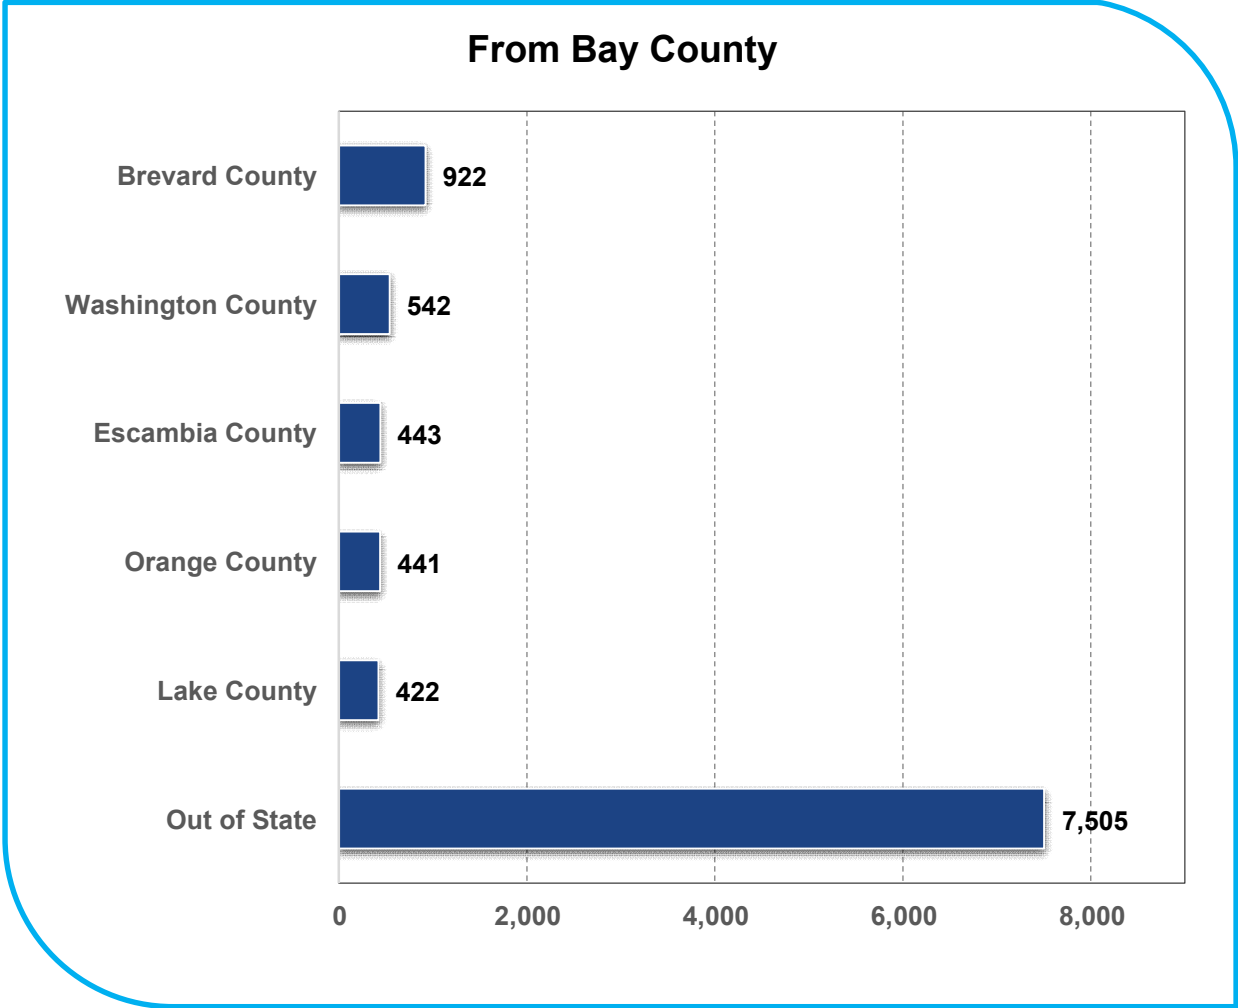

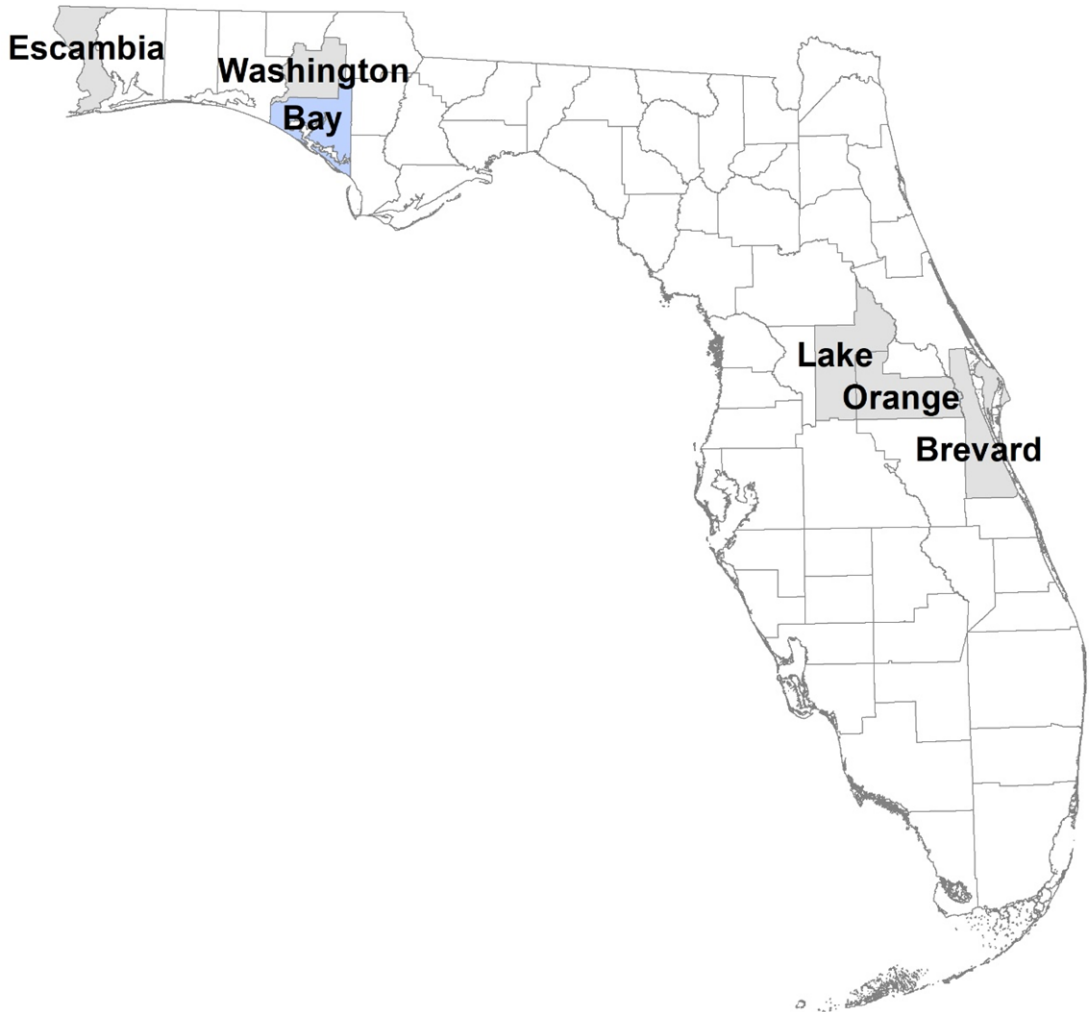

In-Migration to Bay County

Based on 2014-2018 ACS Data

Out-Migration from Bay County

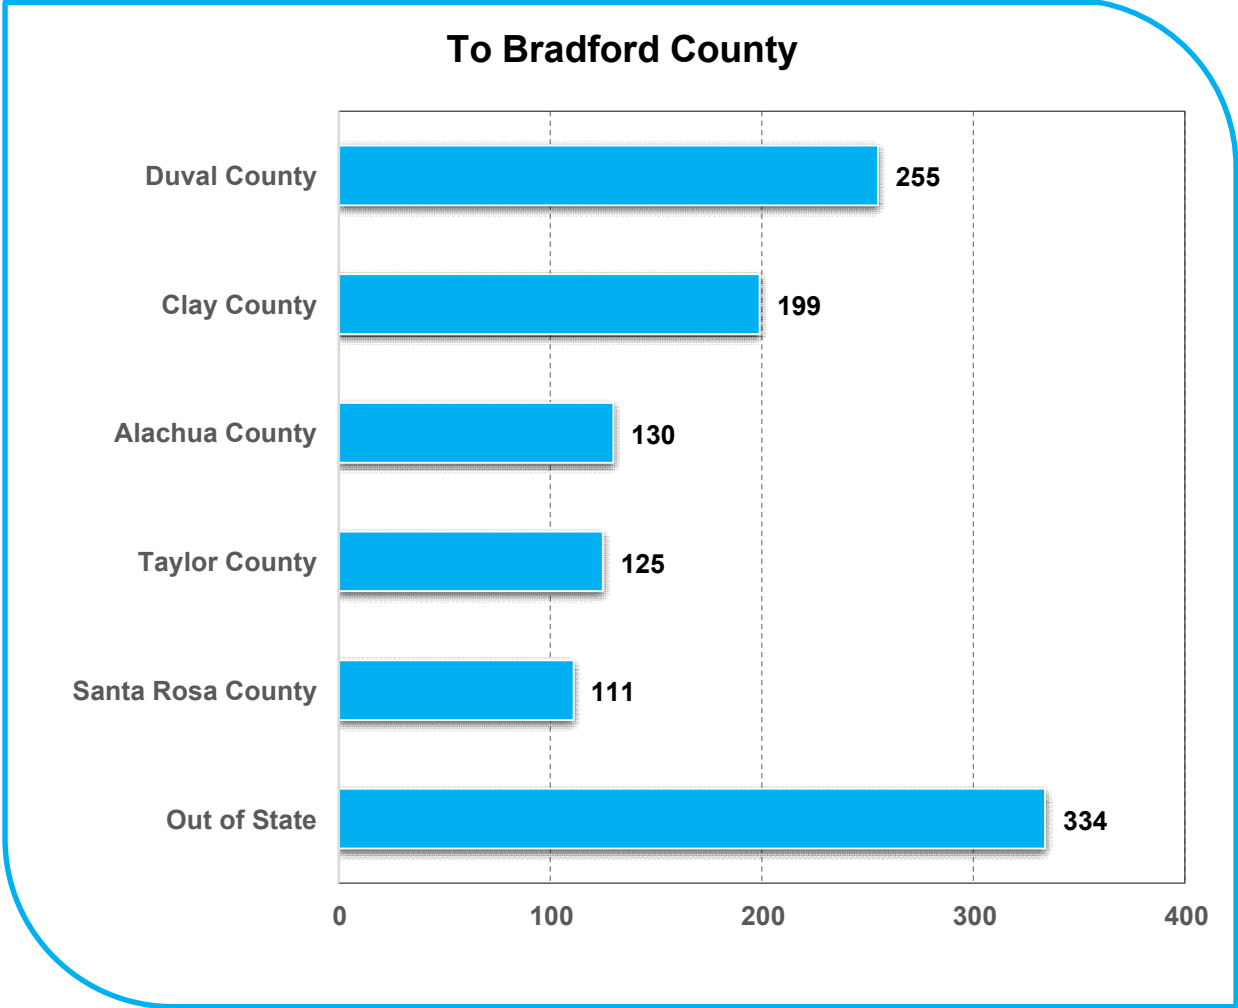

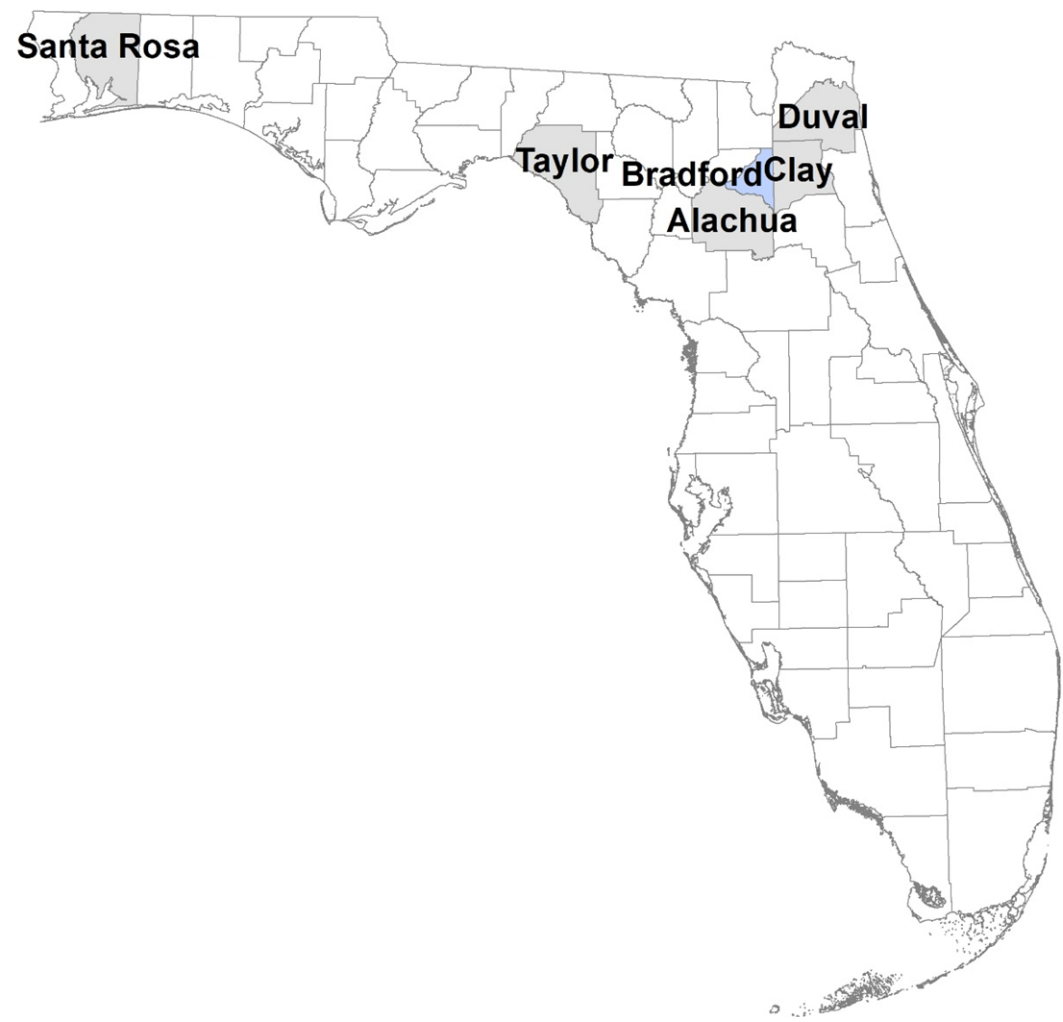

Based on 2014-2018 ACS Data

BRADFORD COUNTY

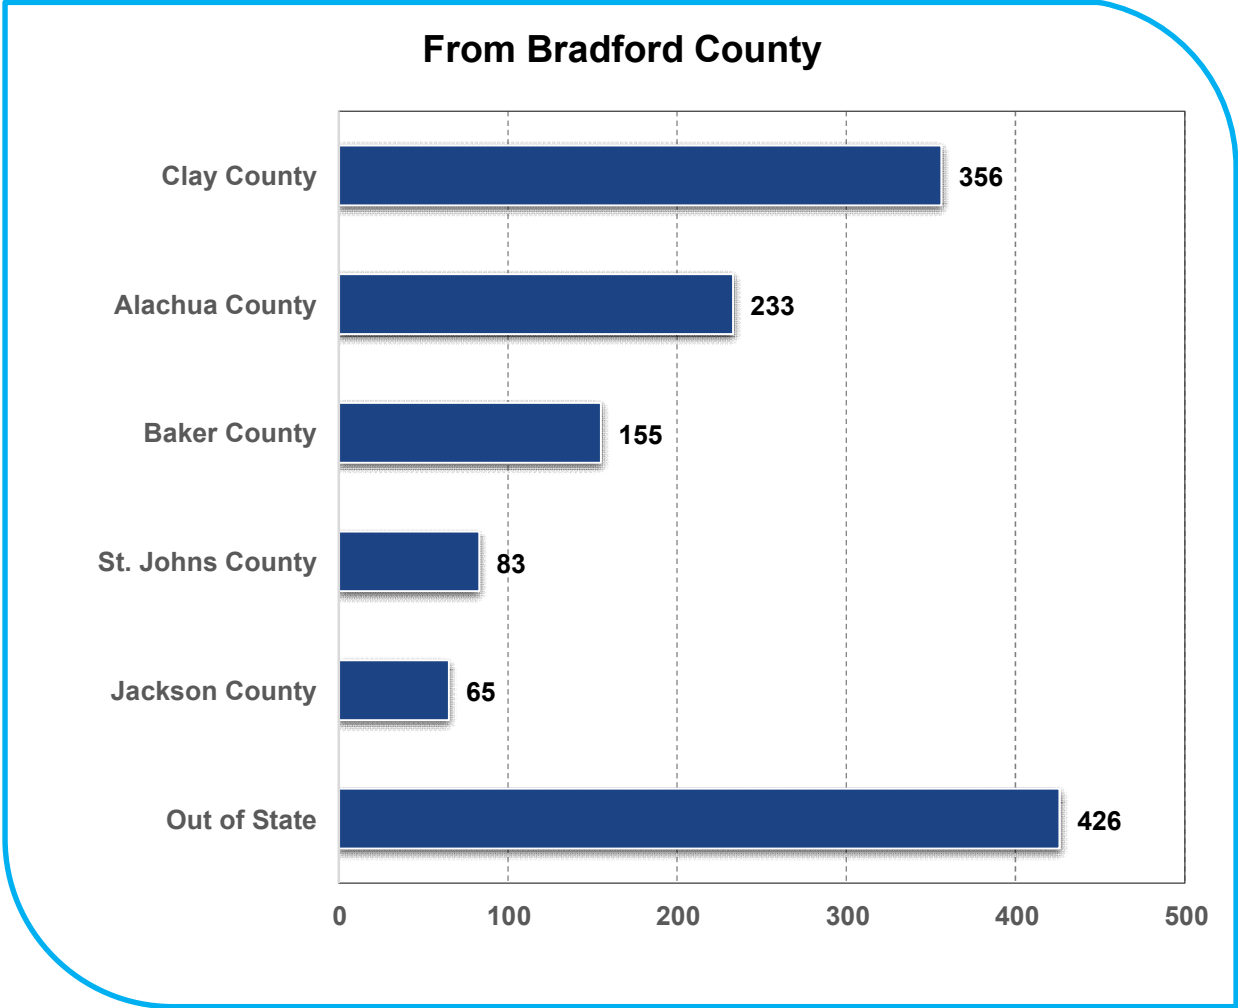

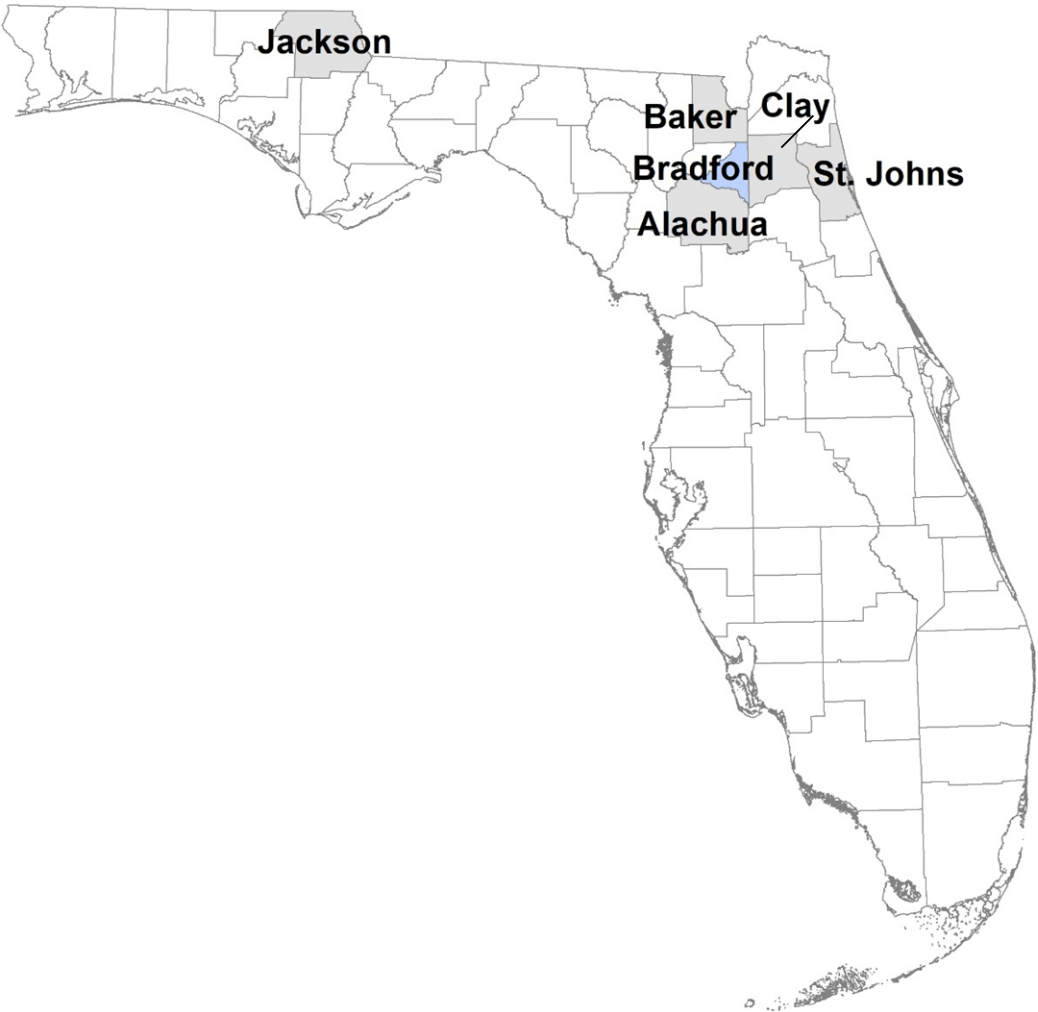

In-Migration to Bradford County

Based on 2014-2018 ACS Data

Out-Migration from Bradford County

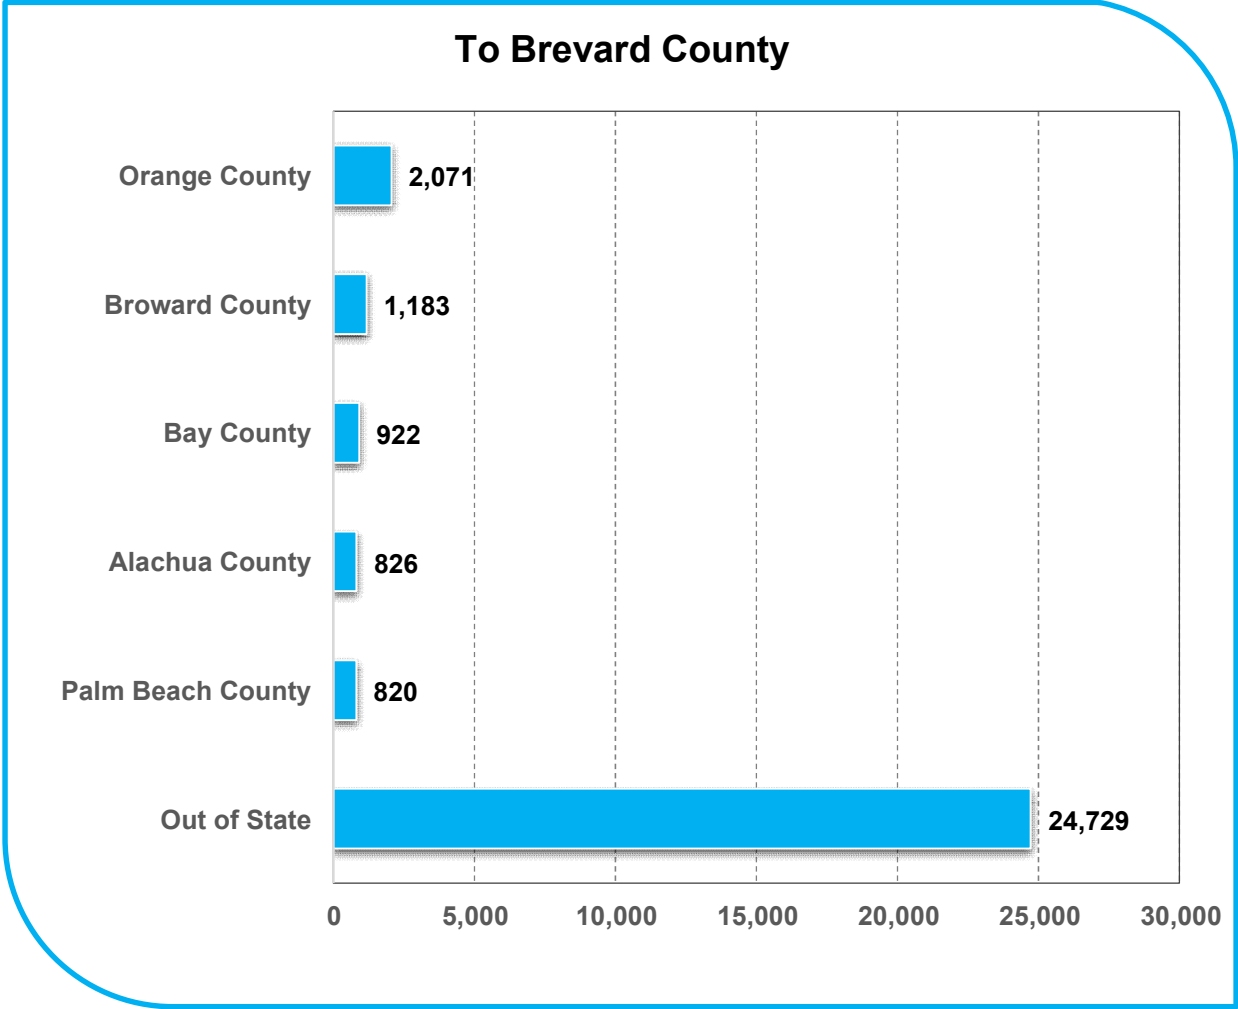

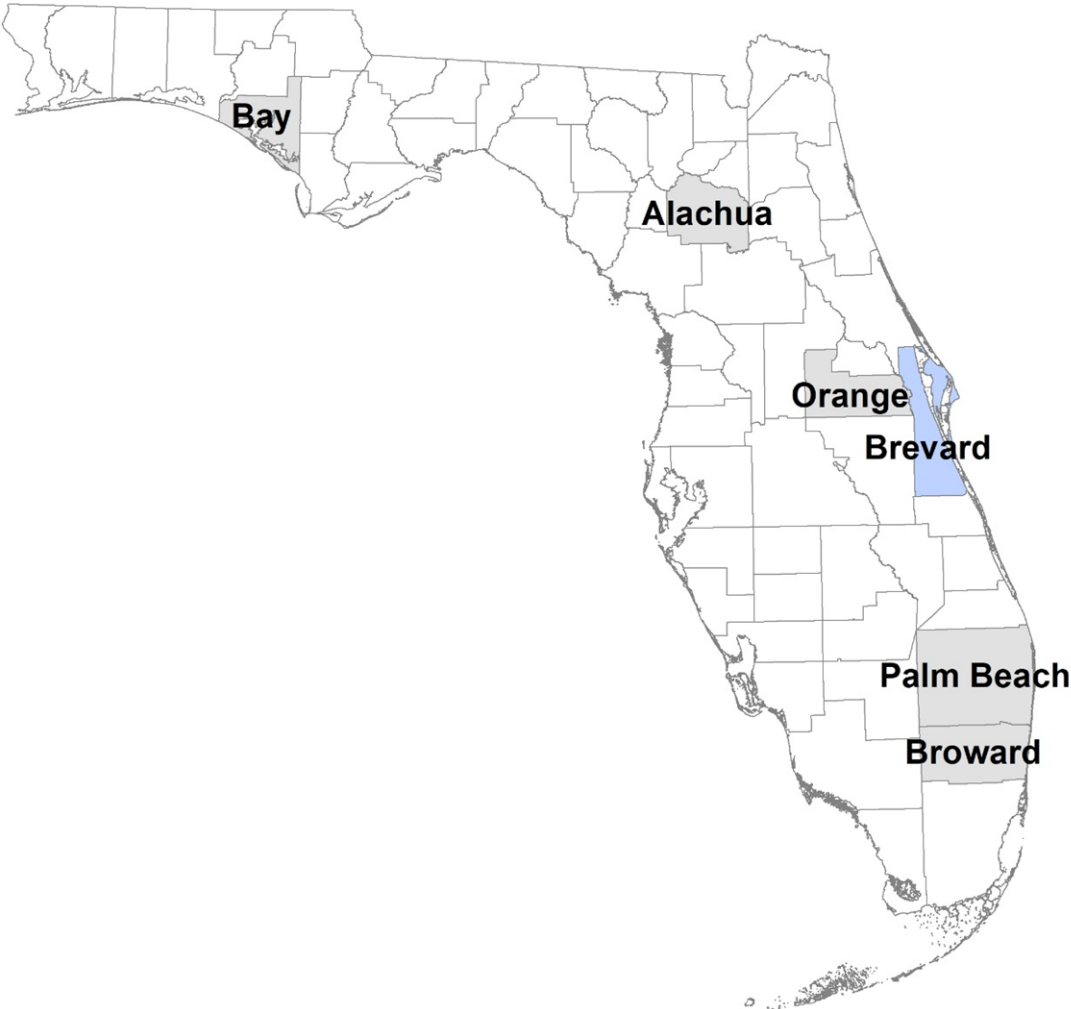

Based on 2014-2018 ACS Data

BREVARD COUNTY

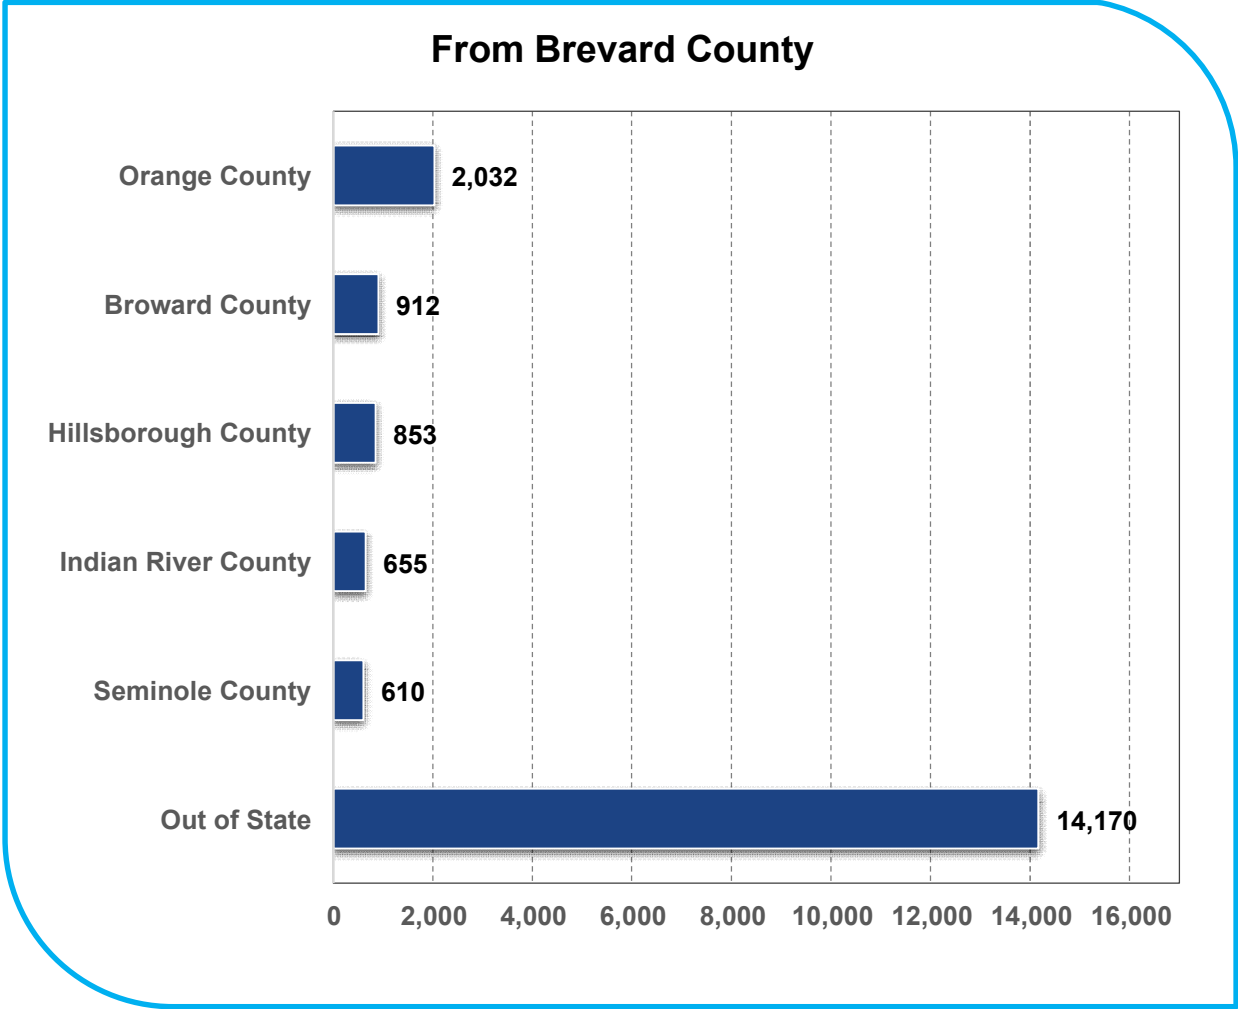

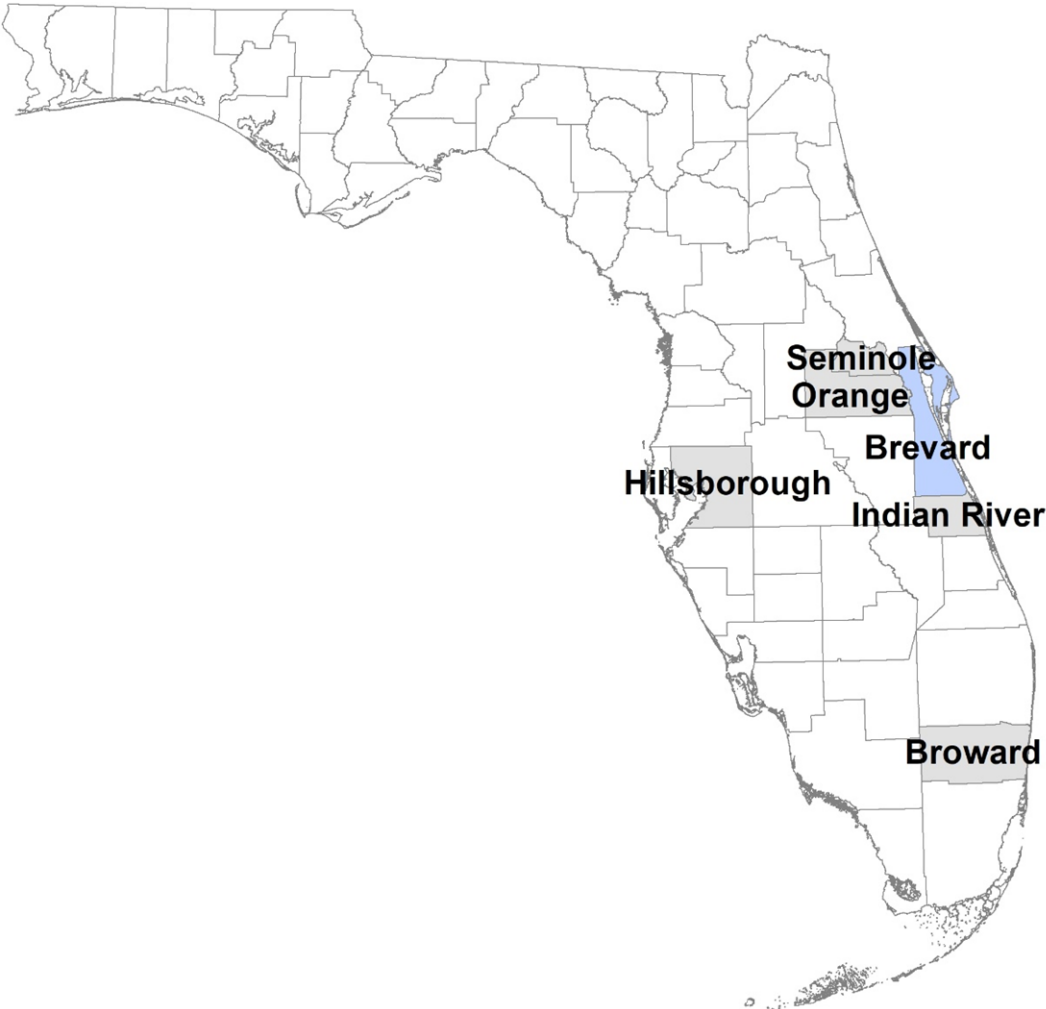

In-Migration to Brevard County

Based on 2014-2018 ACS Data

Out-Migration from Brevard County

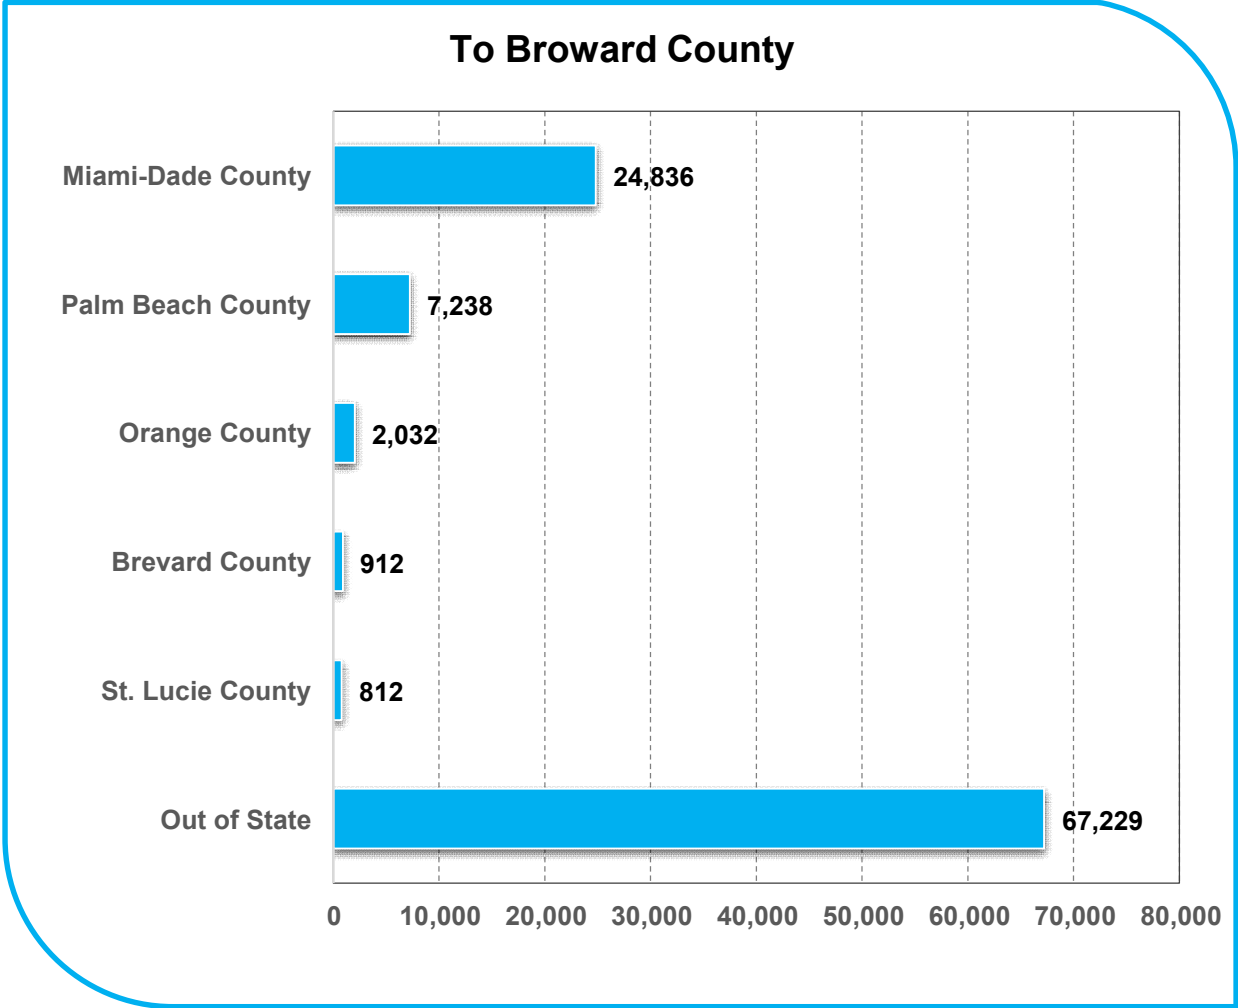

Based on 2014-2018 ACS Data

BROWARD COUNTY

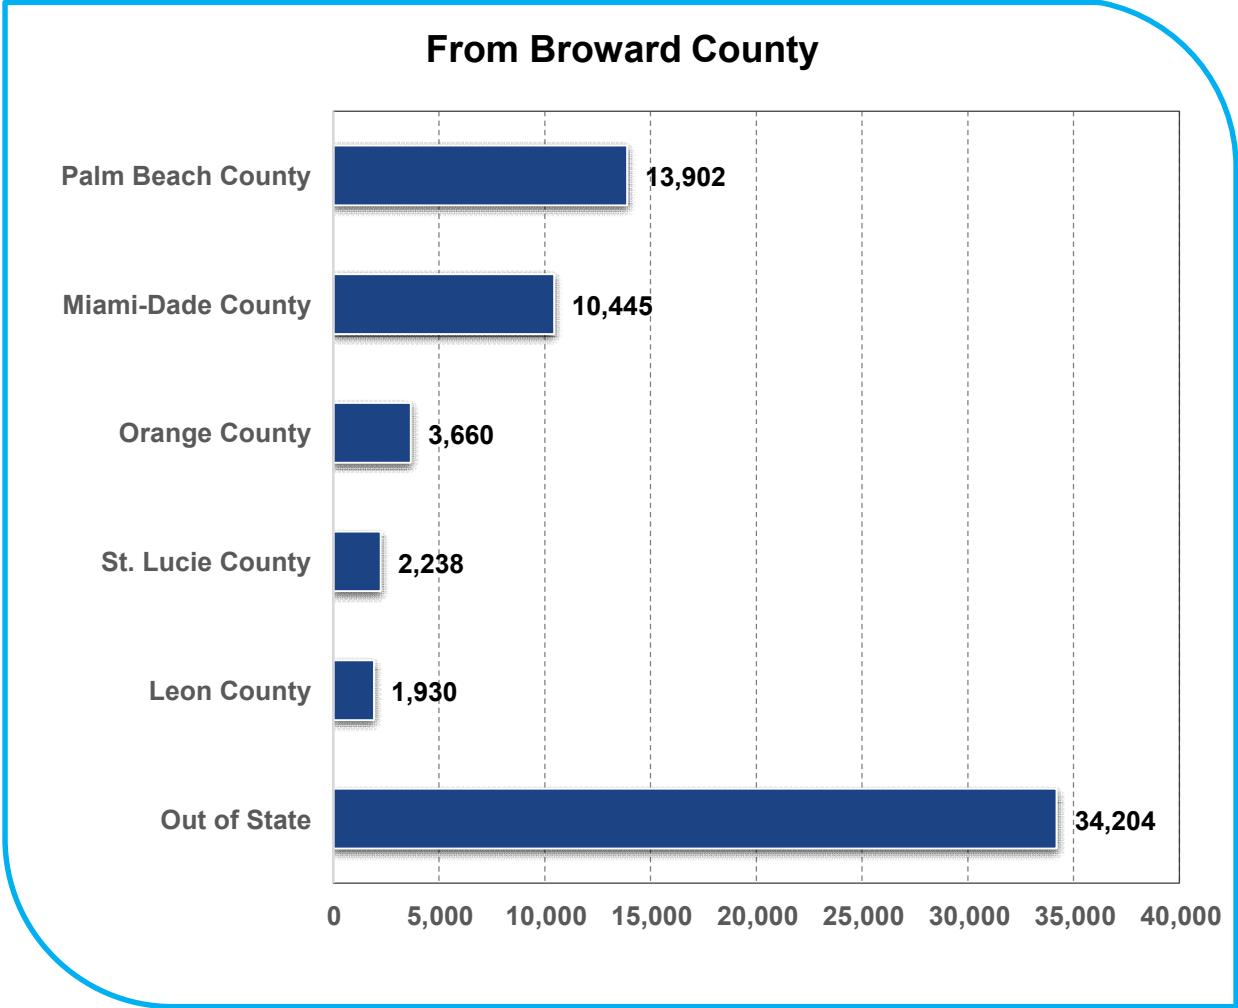

In-Migration to Broward County

Based on 2014-2018 ACS Data

Out-Migration from Broward County

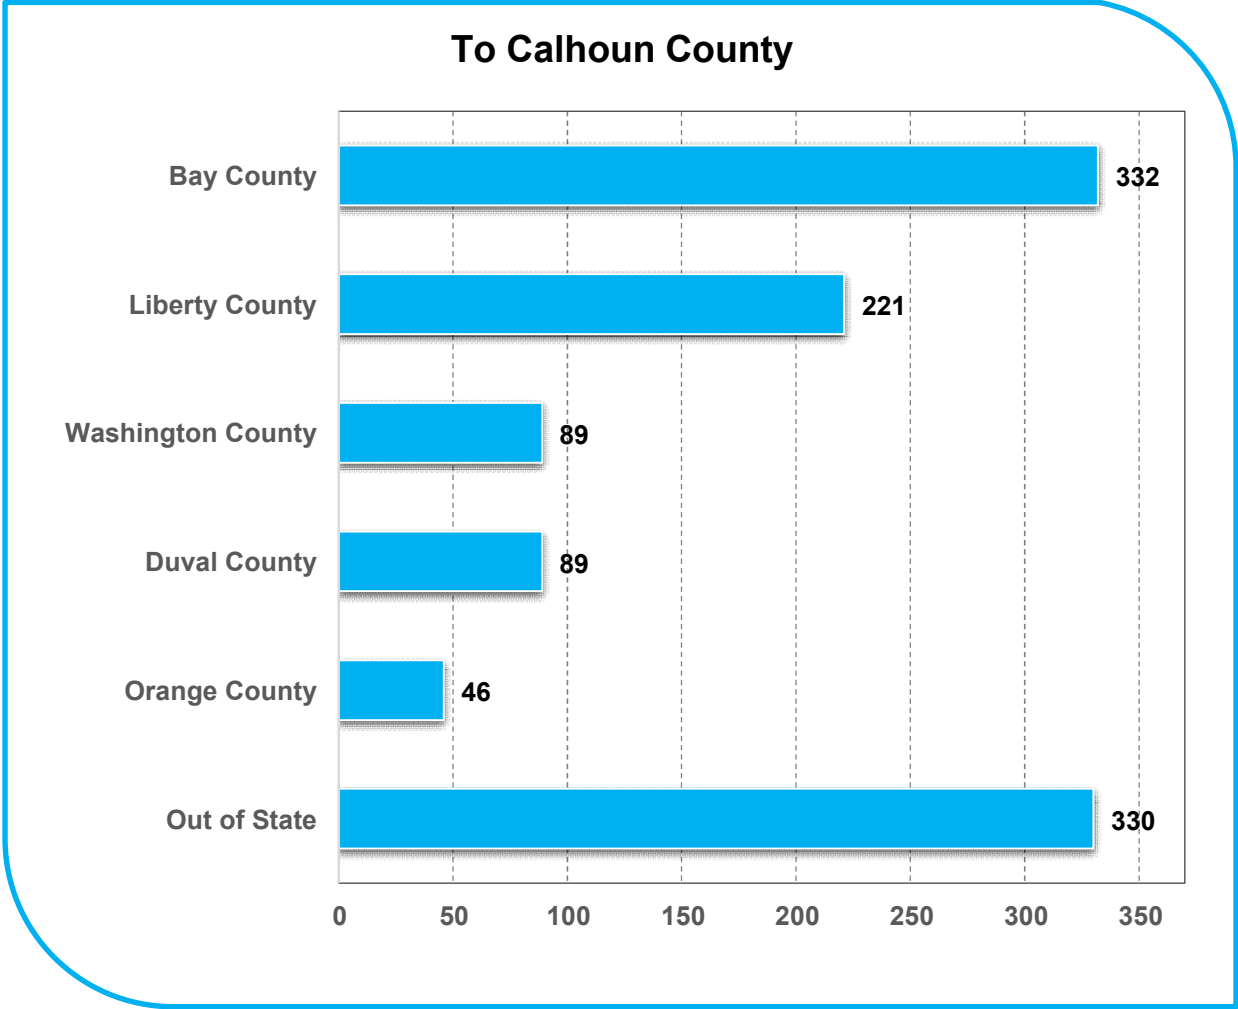

Based on 2014-2018 ACS Data

CALHOUN COUNTY

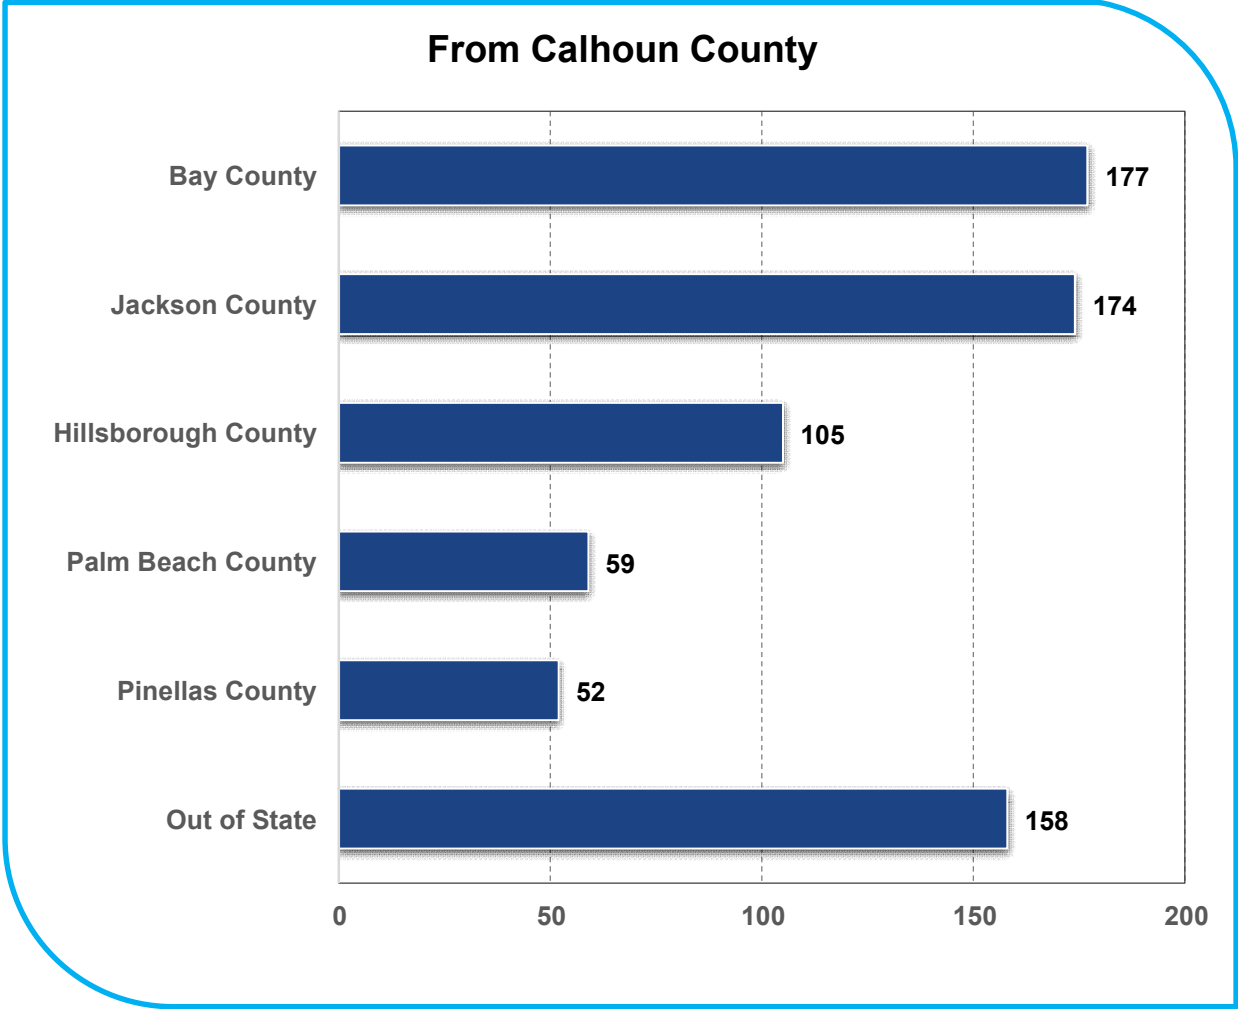

In-Migration to Calhoun County

Based on 2014-2018 ACS Data

Out-Migration from Calhoun County

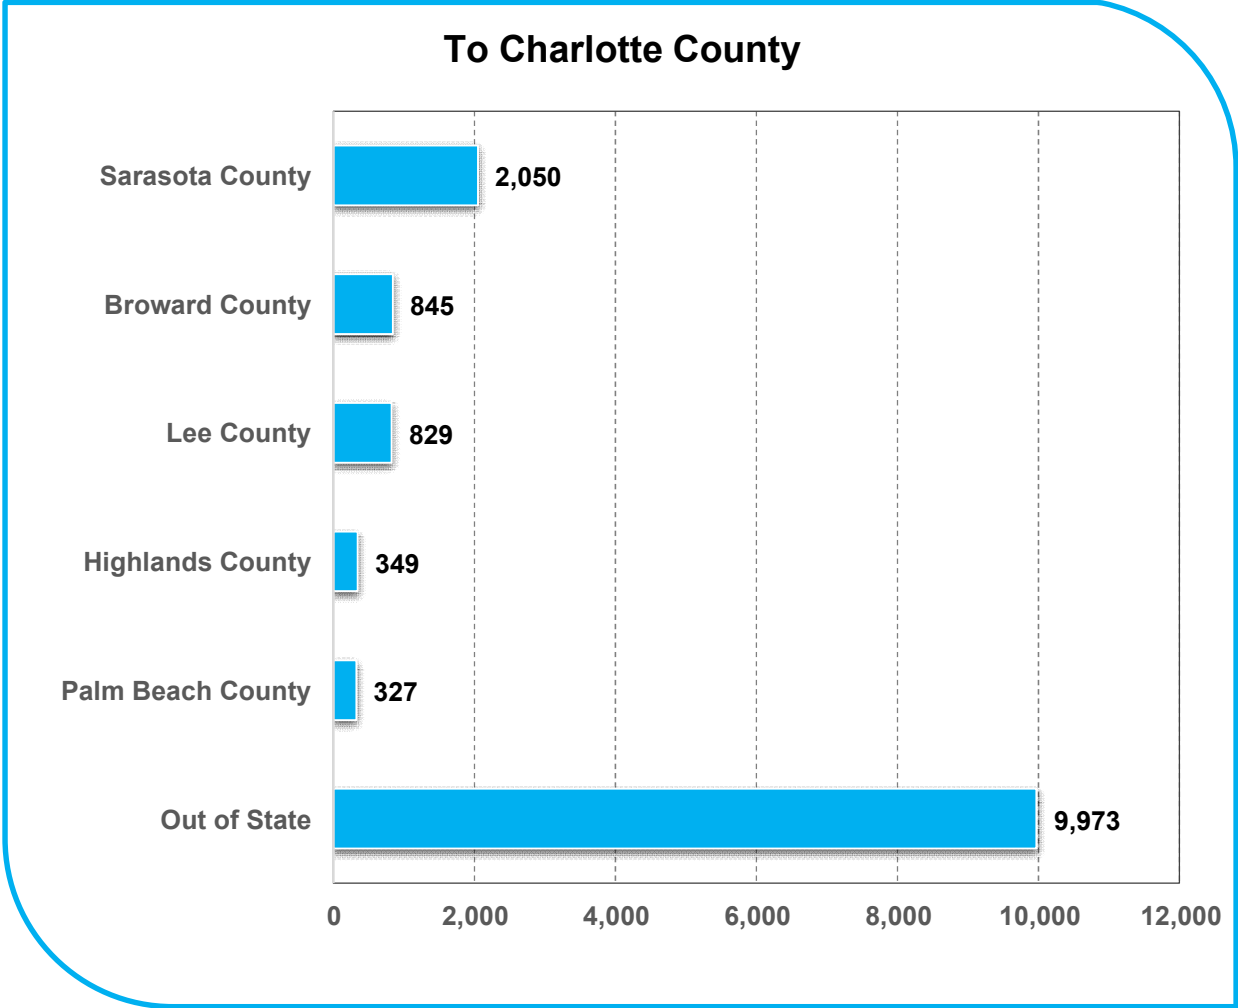

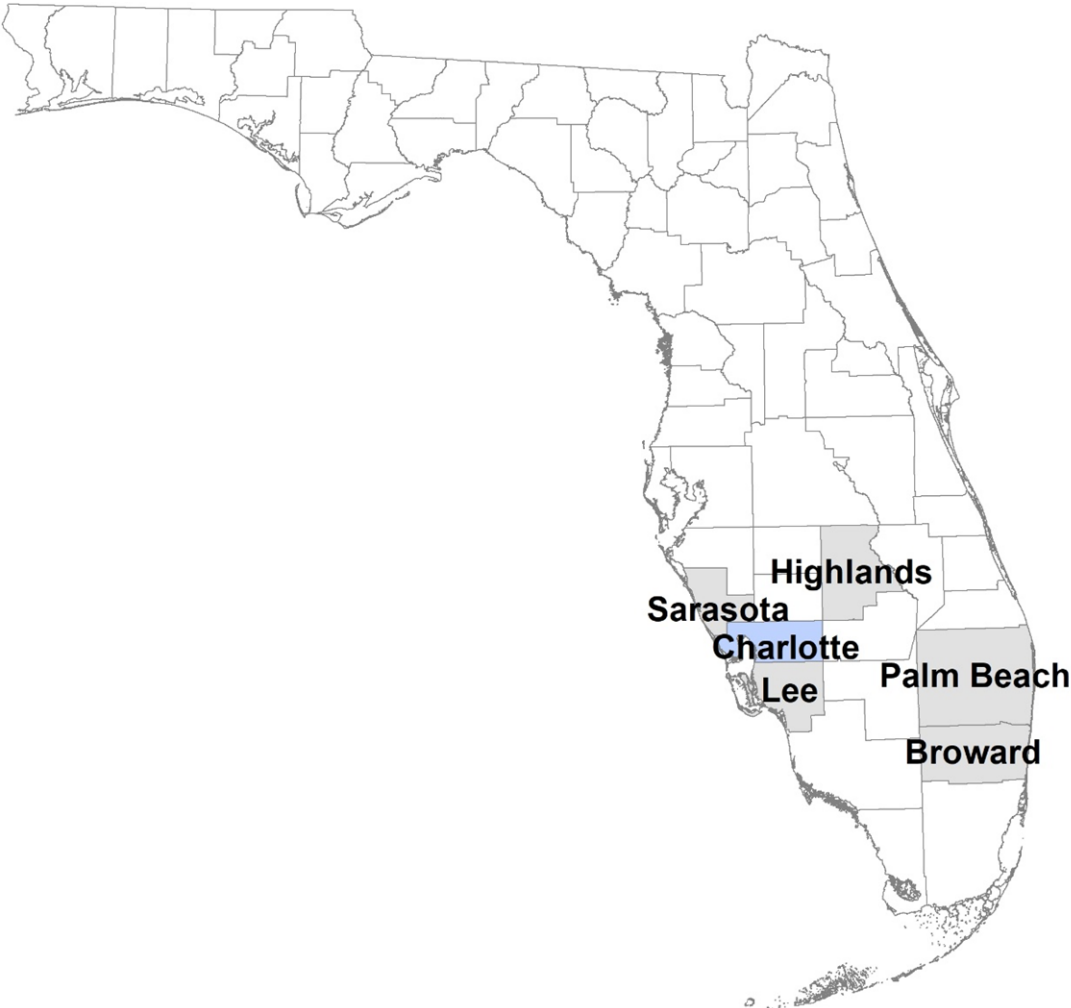

Based on 2014-2018 ACS Data

CHARLOTTE COUNTY

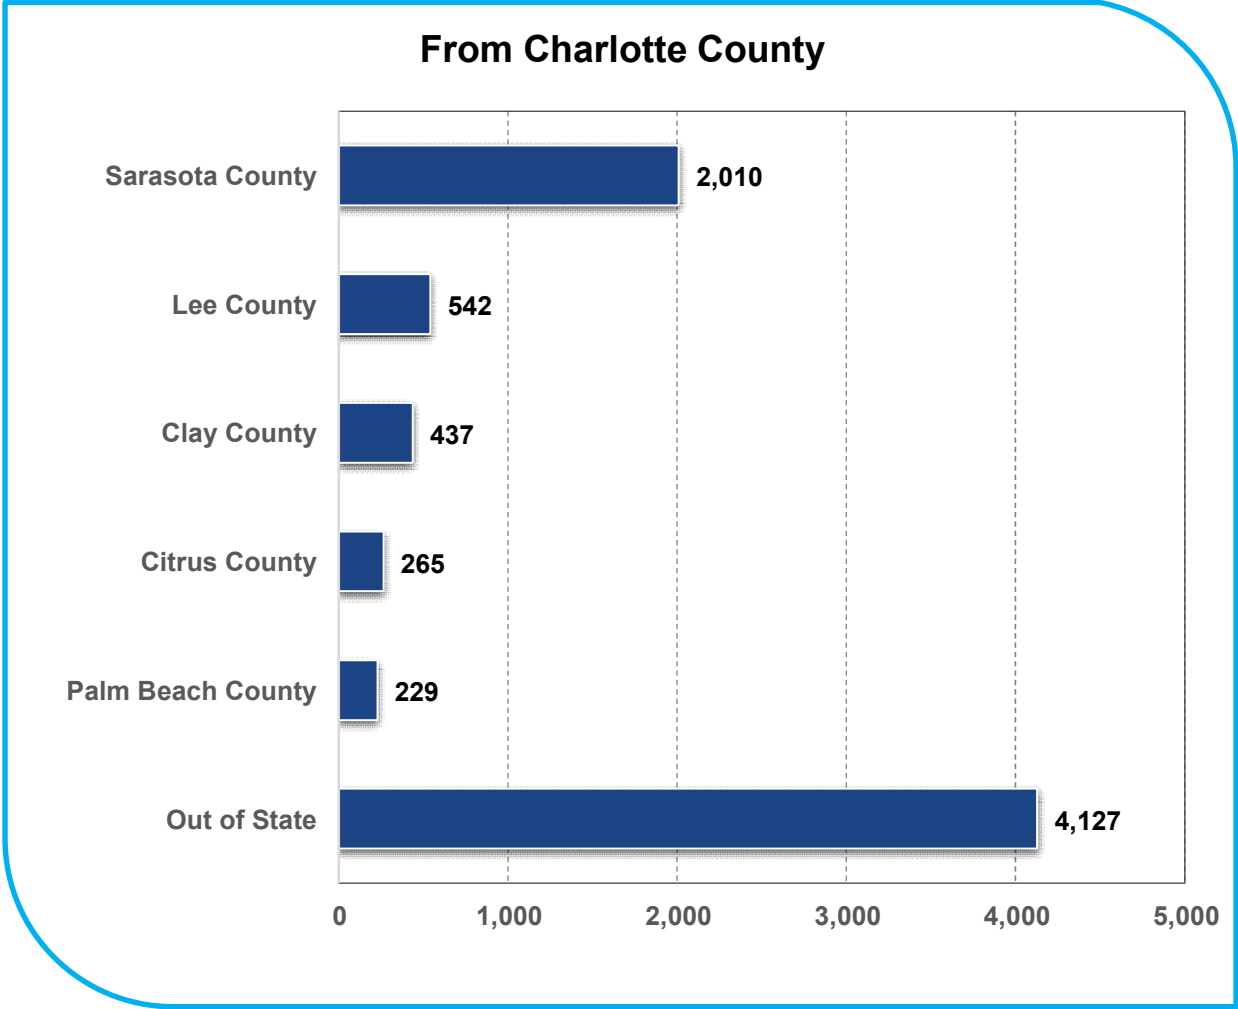

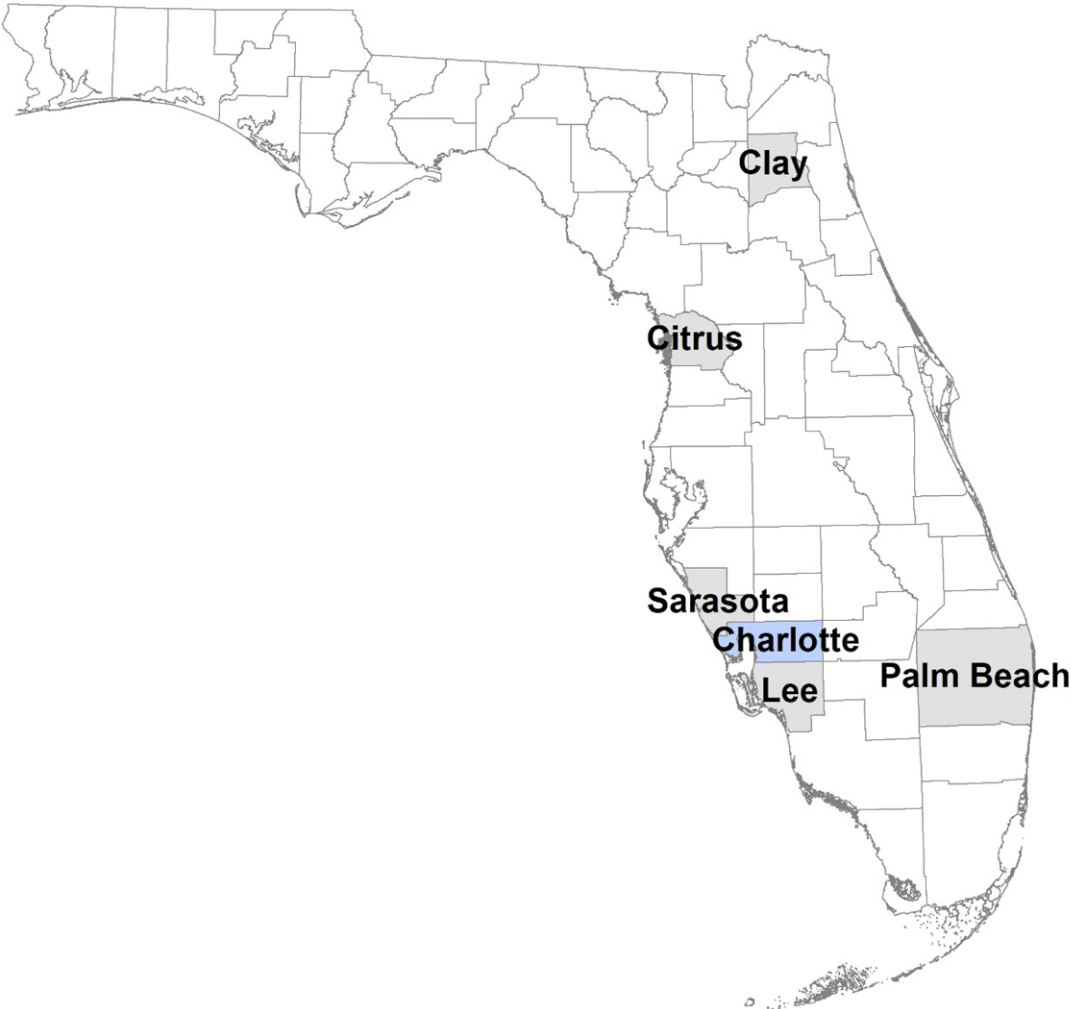

In-Migration to Charlotte County

Based on 2014-2018 ACS Data

Out-Migration from Charlotte County

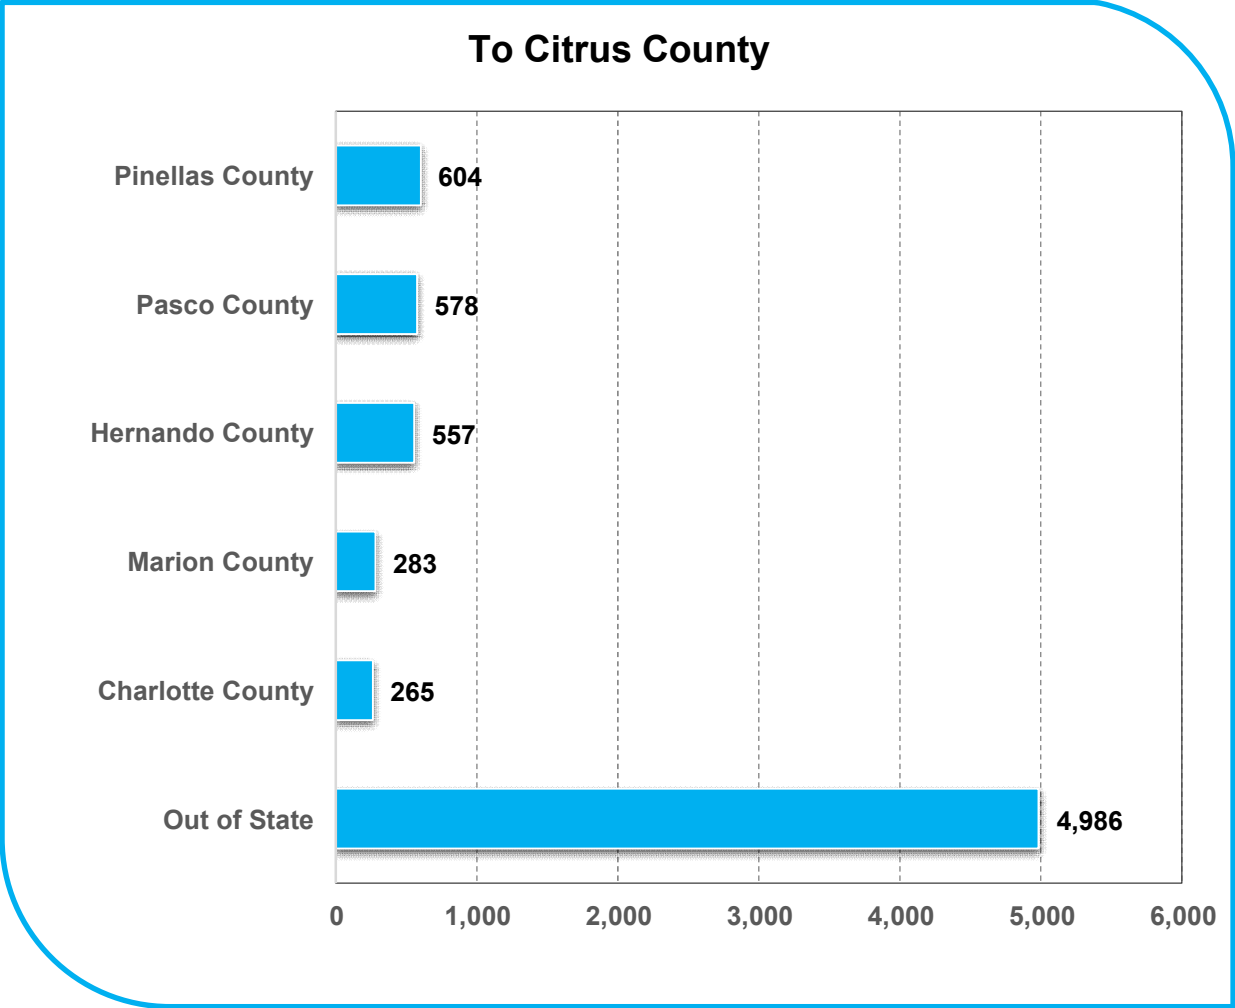

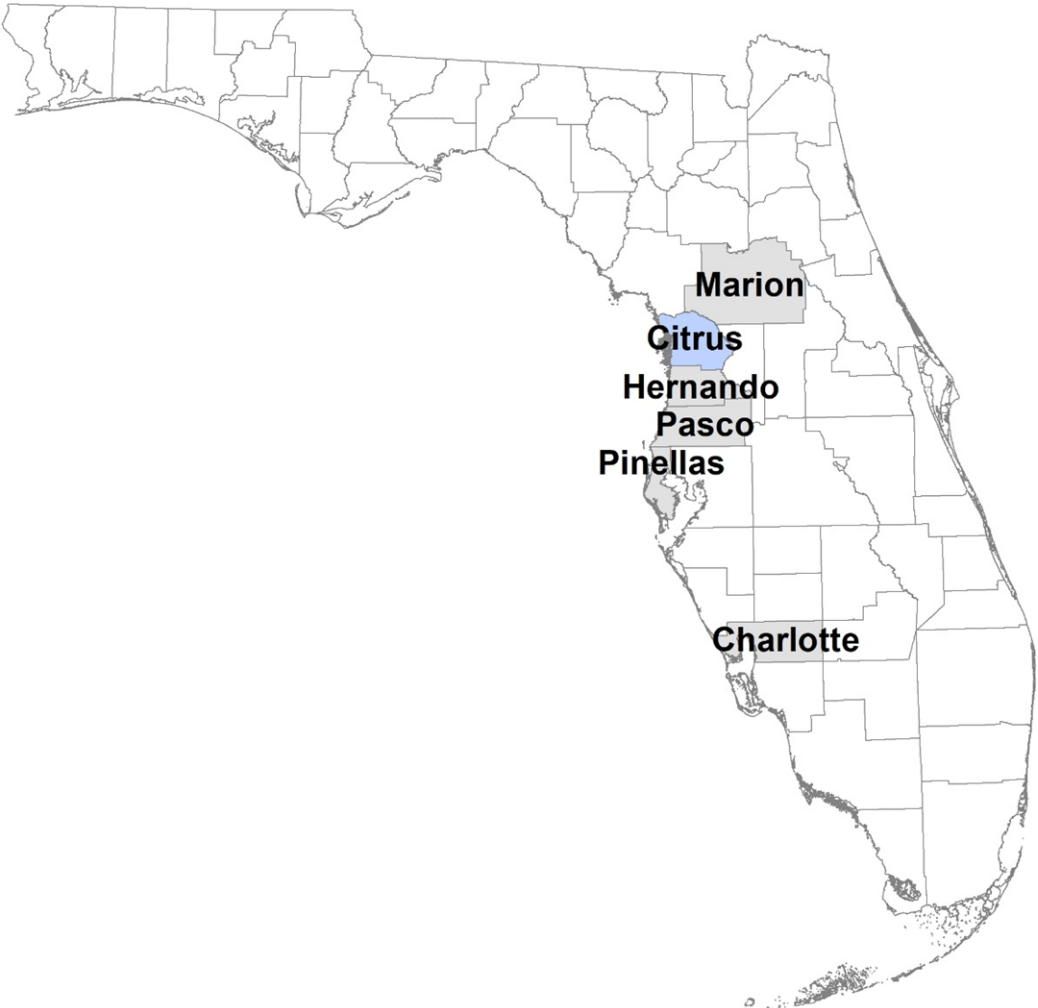

Based on 2014-2018 ACS Data

CITRUS COUNTY

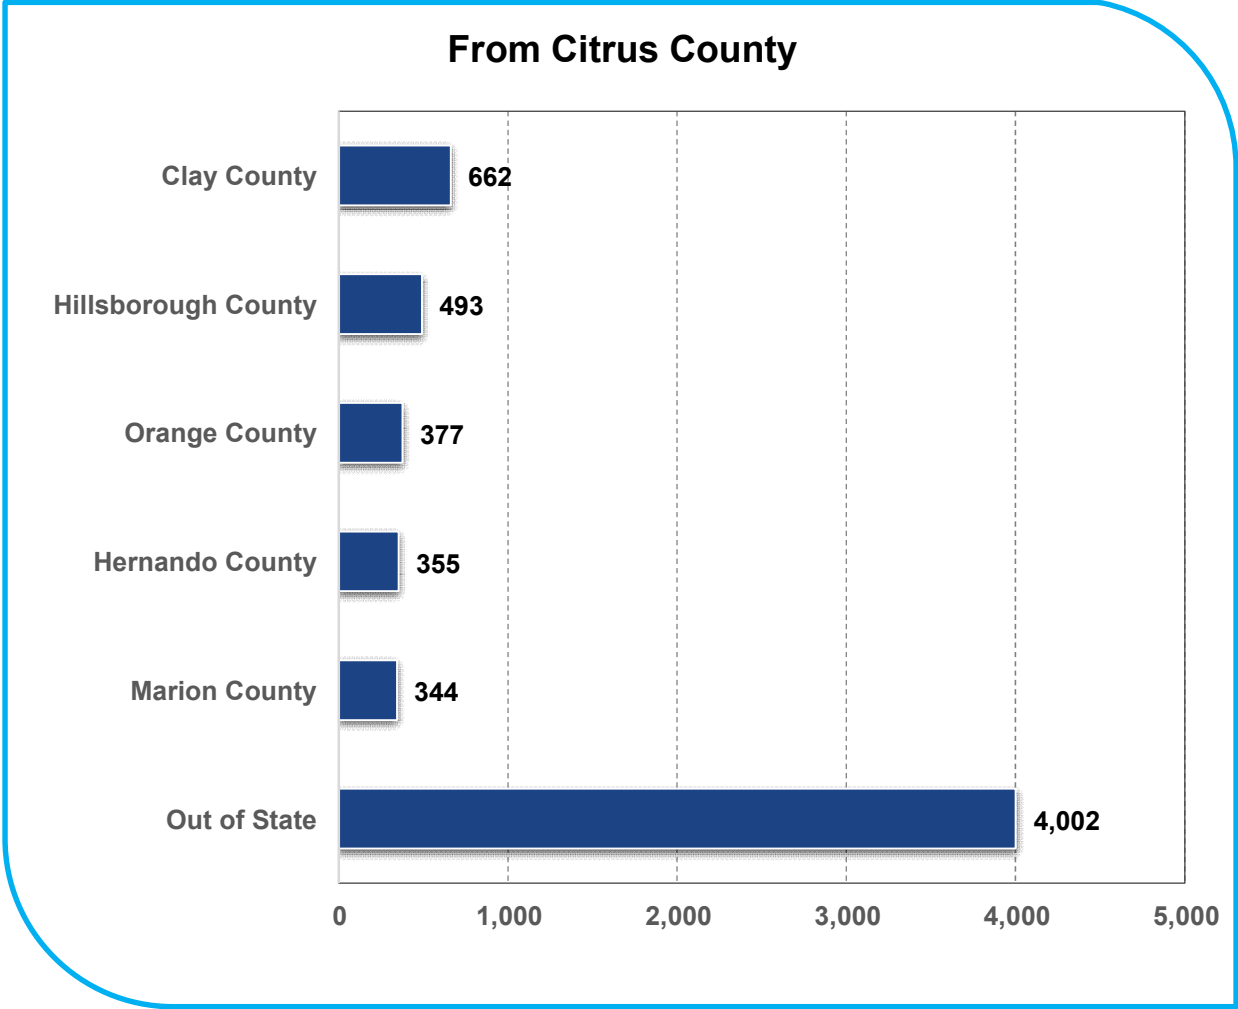

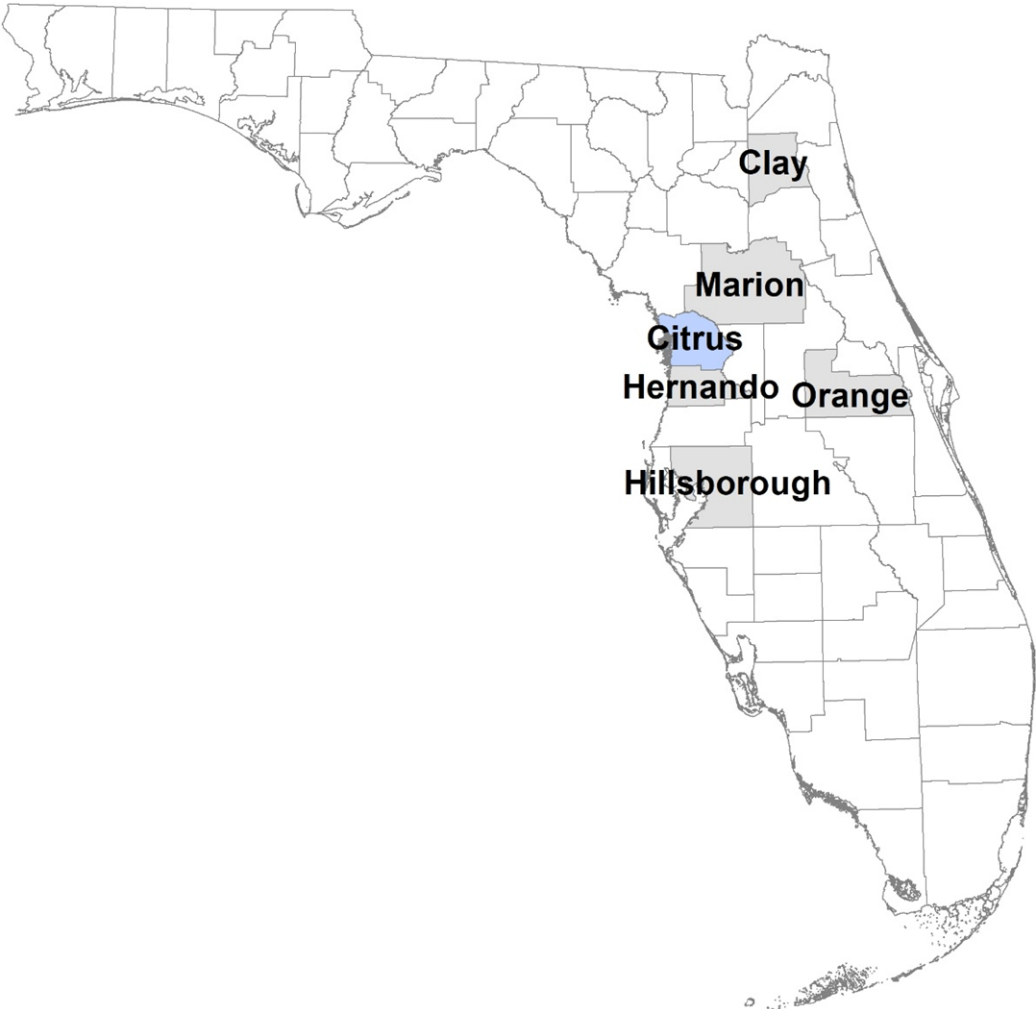

In-Migration to Citrus County
