Systems Forecasting & Trends

The Systems Forecasting & Trends (SFT) Office curates transportation data and distills business insights that drive planning decisions and infrastructure investments. SFT's three divisions track transportation trends, establish targets and monitor performance, and forecast future demands to support the planning and design of transportation projects.

Divisions

Systems Performance

TRACKING THE PULSE OF THE SYSTEM

Monitors infrastructure conditions and travel patterns across all modes, delivers analysis and insights that drive streamlined and effective project implementation.

Forecasting & Modeling

MODELING TOMORROW'S TRAVEL DEMANDS

Advances travel demand modeling knowledge, facilitates partnerships, and delivers guidance and support for forecasting activities.

Transportation Performance Management

ACCOUNTABILITY YOU CAN MEASURE

Sets data-driven targets and tracks progress toward Statewide and Federal goals, driving accountability and outcomes.
