

## Turnpike - Suncoast Parkway 2, Phase 2

- Suncoast Parkway 2, Phase 2 extends the parkway three miles north from SR 44 to CR 486, adding a tolled roadway, new interchange, and extending the Suncoast Trail to enhance local trail connections.
- Extensive coordination with Citrus County and local residents led to relocating the CR 486 interchange traffic light away from neighboring communities, reflecting community concerns and preferences.
- The project aims to improve regional connectivity, reduce congestion, and support emergency evacuation efforts, addressing future traffic needs in Citrus County.
- As part of the Statewide Intermodal System, this project supports Florida's Transportation Plan by prioritizing safety, resiliency, and economic development through better transportation infrastructure.
- Visit the [project website](#) for more information.
