

SUN Trail Funding Fact Sheet

Dale Avenue Trail

In just over a year from proposing the project, the city of Edgewater was host to the first ground breaking and subsequently the first opening of a Shared-Use Nonmotorized (SUN) Trail funded construction project. Extending from the intersection of Dale Avenue and West Park Avenue, north to 10th Street, this 1.2-mile project provides transportation options around Daytona State College's New Smyrna/Edgewater Campus, and New Smyrna Beach Middle and High Schools. The bridges crossing the Turnbull Hummock are highlights of this nearly \$1.1 million project. The city of Edgewater manages this trail which connects to the East Central Regional Rail Trail.

Established during the 2015 legislative session and administered by the Florida Department of Transportation, the SUN Trail program receives \$25 million annually, from new vehicle tag fees, to expand the statewide system of paved multi-use trails (SUN Trail network) for bicyclists and pedestrians. The

SUN Trail network aligns to the statewide Florida Greenways and Trails System Plan's Land Trail Priority network. Location of this project is integral to transportation in Florida, it is along major networks including:

- **St. Johns River-to-Sea Loop, which is a developing 260-mile regional trail system that will link the Tri-County Agritourism Corridor to the Space Coast.**
See: sjr2c.org
- **East Coast Greenway, which is a developing 3,000-mile national trail system that will link communities along the eastern seaboard from Key West, Florida to Calais, Maine.**
