

Florida Department of Transportation

FDOT offers a free Job Cost Accounting System Review for:

- 1) Consultants in business for less than one year;**
- 2) Consultants who have reorganized to the extent that their most recent audit is no longer valid; or**
- 3) Consultants who have established and operated a job cost accounting system for a period of less than one year**

Technically qualified firms that wish to pursue projects with fees of any amount (including \$500,000 or greater) **that meet one of the criteria noted above and do not have a CPA issued audit to submit** may request a Job Cost Accounting System (JCAS) Review, to be conducted by the FDOT Procurement Office.

In order to qualify for the accounting system review, you must provide certification of the establishment of an accounting system that separates and accumulates direct and indirect costs, and identifies and records labor charges and expenditures for specific projects or jobs. Certification of job cost accounting system is included in the attached Accounting System Requirements Checklist.

To request a Job Cost Accounting System Review in lieu of submitting a CPA issued audit, you must:

- 1) Have established an adequate job cost accounting system;
- 2) Read and certify the Accounting Systems Requirements Checklist; and
- 3) Forward the Checklist (below), along with a projected overhead, direct expense, and FCCM rate, to the FDOT Professional Services Qualification Administrator, Carliayn Kell, at carliayn.kell@dot.state.fl.us.

The projected overhead, direct expense, and FCCM rates must be supported by an estimate of direct labor, fringe benefits, general overhead, and direct expense costs for the first, upcoming fiscal year of operation. The Department's Procurement Office will initiate the Job Cost Accounting System Review and assess the capability of the consultant's accounting system to meet the Department's audit requirements and to support potential billings made to the Department and other clients. Based on a determination of accounting system adequacy, the Procurement Office will review the cost estimates, make appropriate disallowances if necessary, and establish interim reimbursement rates for use during the consultant's first year of operation. After completion of the first fiscal year of operation, the consultant is required to submit a Reimbursement Rate Audit Report prepared by an independent Certified Public Accountant as part of the annual renewal Request for Qualification package submission.

Consultants requesting technical qualification only, subconsultants pursuing contracts with fees of less than \$500,000, or consultants qualifying solely to perform appraisal services or to prepare or review business damage estimates under Work Group 22, are not required to submit an audit report or to request an accounting system review.
