What if there is not enough night time traffic to equal 150 vehicles?

660-4.4.2 False Positive Testing: Conduct this test on a ramp open to the traveling public. Test the WVDS by monitoring a minimum of 300 total vehicles traveling in the correct direction of travel passing through the WVDS detection zones. At least 150 vehicles shall be monitored during daylight hours and at least 150 vehicles shall be monitored at night.
