Comments: (5-20-19)

I request that the following language replace the final paragraph in Section 450-8.2.1, concerning the delineation between production and quality control personnel for tensioning operations. Production personnel will perform tensioning operations under supervision of personnel possessing a certificate of completion of PCI Quality Control Personnel Certification Level II, and Section 450 Specification examination, or certified personnel may perform tensioning operations directly.

Response: Agreed. Change made.
