Comments: (6-10-19)
The spec may be rephrased using bullets for better clarity to read as (K.C.Jose) 639-3.3 Electrical Service Wire:
• Signal and ITS service points- Use No. 6 AWG stranded copper wire with XHHW (cross-linked polyethylene (XLPE) high heat-resistant, water-resistant) insulation, rated at 600 V in dry and wet conditions, no smaller than No. 6 AWG for connections between service disconnect and traffic and ITS cabinets, unless otherwise shown in the Plans. • Lighting service points- use single-conductor cable Type THWN-2 no smaller than No. 6 AWG for connections between service disconnect and load center.
