There are several references to section 9-2.3.2. There is not a section 9-2.3.2 for the Lump Sum SP0090201LS. It appears to be a typo and the section is actually 9-2.2.2?

Response: Thank you for the correction. This has been revised.

S102-0400 is our current QPL number. I'm trying to update this but the link is broken when I click on it. We want to make sure our system stays on the QPL with the proper updates.

Response: The proposed specification changes do not apply to QPL numbers. Please confirm this comment was intended for SP0090201LS.

For surface applied products that are resin adhered can we have a 48 hour window once the concrete has been placed?

Response: The proposed specification changes do not apply to resin applied products. Please confirm this comment was intended for SP0090201LS.
