Comments: (6-30-21)

Spec 110-12.4 Remove " is provided and no applicable item of excavation or embankment covering such work (as provided in 120-13.1)" and remove "of clearing and grubbing or" add "pay item". 110-12.4 Removal of Existing Concrete: Price and payment will be full compensation for performing and completing all the work of removal and satisfactory disposal. When no separate item for this work (delete-is provided and no applicable item of excavation or embankment covering such work (as provided in 120-13.1)) is included, the Contractor shall include the costs of this work in the Contract price for the (Add - Pay) item (delete of clearing and grubbing) or for the pipe or other structure for which the concrete removal is required. Comment – It's suggested to modify this as - 110-12.4 Removal of Existing Concrete: Price and payment will be full compensation for performing and completing all the work of removal and satisfactory disposal. When no separate item for this work is provided and no applicable item of excavation or embankment covering such work (as provided in 120-13.1) is included, the Contractor shall include the costs of this work in the Contract price for the Pay item of clearing and grubbing or for the pipe or other structure for which the concrete removal is required. Read as - 110-12.4 Removal of Existing Concrete: Price and payment will be full compensation for performing and completing all the work of removal and satisfactory disposal. When no separate item for this work is included, the Contractor shall include the costs of this work in the Contract price for the Pay item for the pipe or other structure for which the concrete removal is required.

Response:

This is standard approved spec language. No change at this time.
