

# EXPECTED IMPLEMENTATION JANUARY 2022

## 330 HOT MIX ASPHALT GENERAL CONSTRUCTION REQUIREMENTS (REV 5-3-21) (FA 7-14-21) (1-22)

SUBARTICLE 330-7.1 is deleted and the following substituted:

### 330-7 Compacting Mixture.

**330-7.1 General Requirements:** When density testing for acceptance is required, select equipment, sequence, and coverages of rolling to meet the specified density requirement. Regardless of the rolling procedure used, complete the final rolling before the surface temperature of the pavement drops to the extent effective compaction may not be achieved or the rollers begin to damage the pavement.

No vibratory compaction in the vertical direction will be allowed for layers one inch or less in thickness or, if the Engineer or Contract Documents limit compaction to the static mode only. Compact these layers in the static mode only. Other non-vertical vibratory modes of compaction will be allowed, if approved by the Engineer; however, no additional compensation, cost or time, will be made.
