3340104 Superpave Asphalt Concrete 334-1.4.1 Layer Thicknesses: Type SP-9.5 - Do not use on Traffic Level D and E applications. change ON with FOR Comment : Type SP- 9.5- Do not use on for Traffic Level D and E applications. Reasoning- word on may be replaced with for since it gives more clarity/ directive.

Response: Deborah: Thank you for the review. 'On' and 'in' have been changed to 'for'.

Type SP-9.5 - Do not use ~~on~~for Traffic Level ~~D and~~ E applications.

Type SP-19.0 - Do not use ~~in~~for the final (top) structural layer below FC-5 mixtures. Type SP-19.0 mixtures are permissible ~~in~~for the layer directly below FC-9.5 and FC-12.5 mixtures. Do not use ~~in~~for the final (top) layer of shoulders.
