Comments: (Industry 5-28-21)

Remove "Bituminous" from title of 706-3.

Response:

Subarticle 706-3 speaks specifically to equipment used during RPM application with bituminous adhesive. No change made.

Comments: (Industry 6-4-21)

District One have experienced significant loss of RPM's applied with bituminous adhesive on several projects within our District as the reason for the request. Please consider adding language to this specification to state: Use an epoxy adhesive to place RPM's on concrete pavement.

Response:

Change Made.
