What does these changes mean? Do they still have to be on the test deck for 3 years?

Response:

Yes, you are correct, 3 year field testing is still the requirement for Patterned Pavement. When I consulted with the technical expert, they did not want that changed. We added the friction test, everything else was moved from 523 to 974.

SECTION 974 SURFACE TREATMENTS- Comment- This is a new section and introduced 5 tables to the spec; Tables, 974-1, 974-2, and 974-4 etc. Please verify the numbering of Tables since table 974-3 is not seen.

Response:

Thank you for your attention to this. Corrections made.
