Comments: (11-9-18)

How does the term "traveled way" apply to lane closures. On many projects there are daytime lane closure restrictions that apply only to travel lanes. This allows contractors to shut down or close off turn lanes and/or acceleration lanes that sometimes have bicycle lanes in them. The verbiage could cause confusion or additional costs to taxpayers mandating more night work.

Response: This revision does not change the ability to close lanes. That is addressed by the lane closure restrictions in the Plans. This definition is primarily used for clear zone and lateral offsets. No change made.
