430-4.8.1 - references use of "DVD, flash drives, and online digital distribution"

Recommend discussing with OIT Office - FDOT has moved away from DVD drives, flash drives could be used if rejecting the encryption, online digital distribution such as DropBox is not allowed by FDOT

Response: Department CEIs and staff will have to address the IT issues on a case by case basis. Most CEIs will not have Department IT issues since they are not on the network. If they are on the network or the contractor is submitting the files directly to Department staff, they will need to coordinate the use of the Department File Transfer Appliance (FTA).
