The second sentence “Hot-Dip galvanize structural steel after fabrication and galvanize bolts, nuts, and washers in accordance with Section 962. Hot-Dip galvanize structural steel after fabrication and galvanize bolts, nuts, and washers in accordance with Section 962.” Should be shortened to “Hot-Dip Galvanize structural steel after fabrication and galvanize bolts, nuts, and washers in accordance with Section 962.” The extra language gives the impression the something extra is required above and beyond Section 962.
