Please clarify how the Contractor is compensated (pay item) for this work.

Response: We do not normally have any pay items associated with Division 1 specs (Sections 1-9). For the Section 7 spec, no payment is needed.

Is it possible to require contractor to contact District Environmental Management regarding the re-installation of the exclusion devices? It is not something I am comfortable having a roadway contractor do.

Response: Considered but no change made. To avoid construction delays, we will require the contractor to have appropriate personnel to make repairs. If other circumstances warrant, the district can modify the language through an MSP to allow a district-wide contract personnel to repair the exclusion devices.
