Comments: (12-3-19, Internal)

I assume Art's suggestion on 933 attached would also apply to 932-3.4?

**933-5.2.2.1 Material Acceptance:** Submit to the Engineer a certificate of analysis for each production LOT from the producer of the CFRP strand, **confirming compliance with the requirements of this Section.**

**Response: (Specification Office Response) Change was made before Industry Review.**
