Comments: (11-10-20, Internal)

It is my understanding that railroad dynamic envelope markings are not installed as linear lines, they are installed as pieces of a cross shape similar to an interstate shield. This method of payment may cause more confusion. You may need to reach out to manufacturers of these products to verify.

711-9.1- Reasoning: This section notate the method of measurement of transverse, diagonal, chevrons etc. Whereas no reference is seen for measurement of special emphasis markings. Therefor the section (2) need to include special emphasis markings, so as to read as: Need to add Special emphasis markings- 2. The length, in linear feet, of transverse lines, diagonal lines, chevrons, parking spaces, special emphasis markings and railroad dynamic envelope markings.
