Comments: (8/1/22, Internal)

Using this one sentence as an example, “For the closed--circuit television (CCTV) camera, complete FDOT Form Number 750-040-08 for all installed CCTV cameras **or other procedure approved by the Engineer**”. This basically removes all the hard work we did to standardize ITS test plans. This language would allow CEI’s to again start providing additional comments on what was supposed to be standardized. I feel this is a step backward. The highlighted portion above should be removed from all references to FDOT forms that are for ITS standalone tests.

Response: Agreed. Specification has been updated as suggested to remove highlighted language.
