Removes the requirement for products currently listed on the APL for Tubular Markers to be tested by NTPEP by June 30, 2024 to remain on the APL.

Suggest adding language to reference Dev703CC** for “SECTION 703 Channelizing Curb”. Usage Note: Use for Hardened Centerlines or Separated Bicycle Lanes when Channelizing Curb is called for in the Plans.

Response: Disagree. We do not want to reference a developmental specification in the standard specifications. When the developmental status is removed then modifications to 991 can be made to cover channelizing curb.

Action(s): No action taken.
