Change insure to ensure. Otherwise it look great! Super glad to see the pay items being added into the specifications!
Response: Revised

575-4, 2. The area in square yards + 25%, of pegged or lapped sodding. For locations adjacent to unpegged locations, How are these measured, form peg to peg?

Response: No change to the existing language; no changes needed.

575-4 Method of Measurement. 4. The (area) quantity or volume, in cubic yards, for imported soil layer material. If measuring an area, the unit should be square feet, square yards, etc. Suggest changing to quantity or volume.

Response: Revised.
