METRIC ENGINEERING

January 2008

State Road 710
Project Development and Environment Study
From County Road (CR) 714 to CR 609 (Allapattah Road)
Martin County, Florida

The Public Involvement Program for the State Road (SR) 710 Project Development and Environment (PD&E) Study is in compliance with the PD&E Manual, Florida Statutes (F.S.) Sections 286.0105 and 286.011, and 339.155, Executive Orders 11990 and 11988, Council of Environmental Quality (CEQ) Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (NEPA), and Department of Transportation Order 5610.1C, and Parts 23 and 40 of the Code of Federal Regulations (CFR).

The Florida Department of Transportation (FDOT) recognizes that the success of any transportation improvement is dependent upon a successful public outreach effort. As such, the FDOT is committed to conducting a public involvement program that focuses on soliciting community interaction and incorporates an extensive evaluation of community impacts and opinions throughout the public involvement process. It is believed that the positive value of implementing a strong public involvement effort will result in public awareness of and support for the project.

The Public Involvement Plan will be updated and amended throughout the project development process to incorporate the latest public involvement policies and techniques as they evolve during the life of the project. The program indicates the public involvement approach to be taken with the project and generally lists the contact persons: officials, agencies, interested parties, and media; and the means used to involve them in the process. The FDOT will prepare responses to public inquiries as a result of the public involvement process. The collection of public input will occur throughout the project duration.

I. DESCRIPTION OF THE PROPOSED IMPROVEMENT

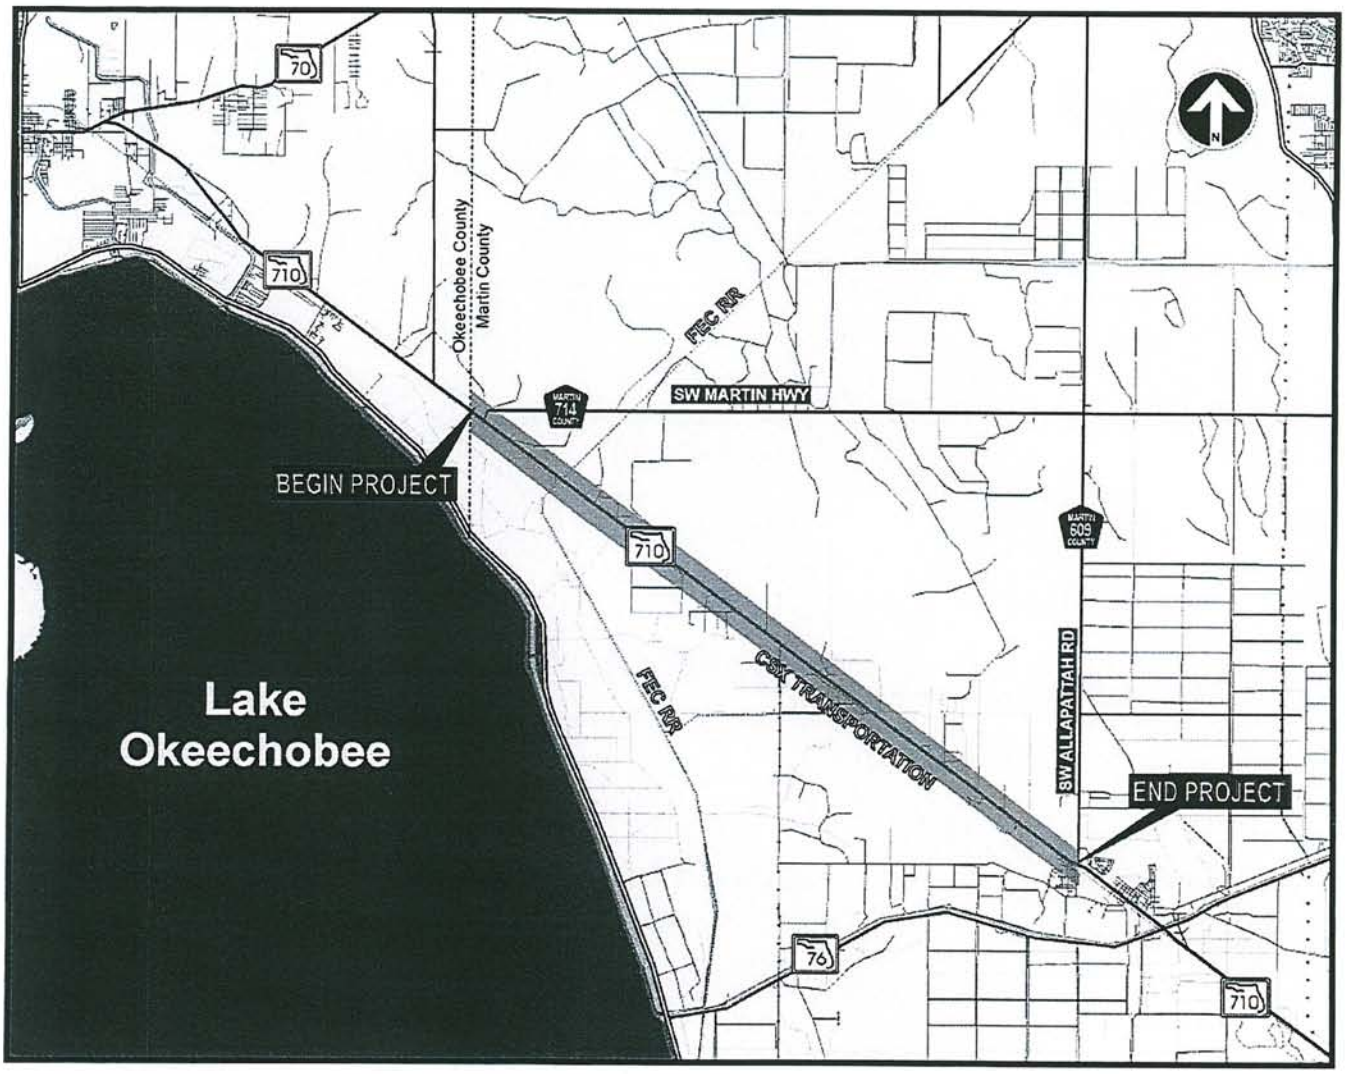

Project Name: SR 710
Project Development and Environment Study

FPID: 419344-1-22-01

Project Limits: The highway project limits include SR 710 from CR 714 to CR 609 (Allapattah Road) in Martin County. The total project length is 15 miles.

The limits for traffic, survey and transit are from SR 70 in Okeechobee County to CR 609 in Martin County, approximately 25 miles.

Project Location Map

Proposed Activity:

The general objective of this PD&E Study is to provide and document information necessary for the FDOT to reach a decision on the type, design, and location of improvements for the SR 710 corridor.

The study will consider those engineering services required for location/design studies including consideration of all social, economic, environmental effects, and mitigation as required by the Federal Highway Administration (FHWA) and/or the PD&E Manual, along with the required

environmental documents, engineering, reports, preliminary plans and public involvement.

All alternatives will be subjected to a comprehensive evaluation to determine the best viable option. Engineering, environmental, socioeconomic factors and costs will be considered in arriving at a preferred alternative. The approach to this project will be to thoroughly assess the safety, mobility and community needs of the corridor, develop alternatives to address those needs, and evaluate them according to regulatory agency requirements, and community values. As part of this study and of the alternative selection process, a comprehensive public involvement program will be conducted.

Class of Action: Categorical Exclusion (Cat Ex) Type II

Project Need: The widening of SR 710 from CR 714 to CR 609, just west of Indiantown in Martin County, is identified as a Needs Project in the 2030 Martin and St. Lucie Metropolitan Planning Organization's (MPOs) adopted Regional Long Range Transportation Plan (RLRTP). The RLRTP identifies the SR 710 corridor in Martin County as part of the regional multimodal transportation network and regional freight corridor. This improvement is also recognized in the Florida Department of Transportation's Strategic Intermodal System (SIS) as a funded Growth Management Project.

The multimodal capacity improvement of SR 710 includes roadway widening from two to four lanes. The project is anticipated to reduce congestion created by anticipated population and employment growth in the county and wider region. The project has independent significance, therefore is usable and a reasonable expenditure even if no additional transportation improvements are made in the area.

As this corridor is expected to grow, additional coordination will be needed with any future residential development along the project corridor as it could affect noise studies conducted as part of this PD&E.

The project will enhance mobility, safety, emergency access, and truck movement within and through Martin County. SR 710 serves as a designated emergency evacuation route and a primary arterial road for Martin County.

This project also requires the public outreach to determine a suitable transit component, while keeping consistent with other transit planned for the overall SR 710 corridor. Outreach may include meetings that would present the different alternatives and inform the public of options that may already exist.

The project's identified objectives meet the provisions of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU).

II. IDENTIFICATION OF CONCERNED PUBLIC

The following list identifies the state, federal, regional, or local agencies having a potential interest in this project due to jurisdictional review or expressed interest. These agencies have been identified and will be contacted directly by the FDOT through the Advance Notification (AN) coordination process at the outset of the project in accordance with Part 1, Chapter 2 of the PD&E Manual. Other concerned public agencies will be listed and contacted as they are identified throughout the study.

STATE:

- Florida Department of Transportation District IV, District Planning and Environmental Management Engineer, Gus Schmidt
- Florida Fish & Wildlife Conservation Commission, Office of Environmental Services, Director
- Florida Inland Navigation District, c/o David Roach
- South Florida Water Management District, Executive Director, Carol Wehle
- Florida Department of Environmental Protection, Florida State Clearinghouse, Environmental Consultant, Lauren Milligan
- Florida Department of Environmental Protection, Southeast District Office, District Director, Kevin Neal
- Florida Transportation Commission, Chairman, James Holton
- Federal Insurance and Mitigation Division, DHS/FEMA Region IV, Senior Natural Hazards Program Specialist, Susan Wilson

FEDERAL:

- Federal Highway Administration, Division Administrator, David Gibbs
- Federal Emergency Management Agency, Region IV Director, Mitigation Division, Todd Davidson
- Federal Railroad Administration, Regional Administrator, L. Fred Dennin
- U.S. Department of Interior, Director, Eastern States Office, Bureau of Land Management, Mike Need

- U.S. Department of Housing and Urban Development Region IV, Regional Director, Bob Young
- U.S. Department of Housing and Urban Development, Regional Environmental Officer, Harry Walls
- U.S. Department of Interior, Director, Review Unit, U.S. Geological Survey Chief, P. Patrick Leahy
- U.S. Environmental Protection Agency, Regional Administrator Region IV, J.I. Palmer, Jr.
- U.S. Fish & Wildlife Service, Field Supervisor, South Florida Ecological Services Field Office, Paul Souza
- U.S. Army Corps of Engineers, Division Chief, Regulatory Branch, Lawrence Evans
- U.S. Army Corps of Engineers, District Engineer, Regulatory Branch
- National Marine Fisheries Service, Area Supervisor, Habitat Conservation Division
- U.S. Department of Interior, Regional Director, Southeast Regional Office, National Park Service, Patricia Hooks
- U.S. Department of Commerce, Director, National Marine Fisheries, Gary Reisner
- Federal Aviation Administration, Manager, Dean Stringer
- U.S. Department of Health and Human Services, National Center for Environmental Health, Centers for Disease Control and Prevention
- U.S. Coast Guard, Commander (oan), Seventh District
- U.S. Coast Guard, Seventh District, Rear Admiral David Kunkel
- U.S. Department of Agriculture, State Conservationist, Florida State Office Program Services, Natural Resource Conservation Service, Niles Glasgow
- Federal Transit Administration, Regional Administrator Region IV

REGIONAL:

- Treasure Coast Planning Council, Executive Director, Michael Busha
- South Florida Water Management District, Director, Natural Resource Management, Chip Merriam
- U.S. Department of Housing and Urban Development, Field Environmental Officer, Ubaldo Cozzoli
- U.S. Army Corps of Engineers, South Permits Branch Office, Branch Chief, John Studt
- Florida Fish & Wildlife Conservation Commission, Regional Director, Chuck Collins

LOCAL:

- Martin County Metropolitan Planning Organization (MPO), Administrator, Ann Perrotta
- U.S. Department of Agriculture, Natural Resources Conservation, Partnership Office, Martin County, Soil Conservationist

Local elected and appointed officials:

Federal Delegation

- United States Senate
  - Senator Mel Martinez
  - Senator Bill Nelson

- United States House of Representatives
  - Congressman Alcee L. Hastings, District 23
  - Congressman Tim Mahoney, District 16

State Delegation

- Florida Senate
  - Senator Ken Pruitt

- Florida House of Representatives
  - Representative Richard A. Machek, District 78
  - Representative Gayle B. Harrell, District 81
  - Representative Joe Negron, District 82

Martin County

- Martin County Administrator, Duncan Ballantyne
- Martin County Engineering Department, Don Donaldson, PE
- Martin County Growth Management Department, Director, Nicki Van Vonno
- Emergency Services for Martin County, District Fire Chief, Cliff Appe
- Martin County Sheriff's Department, Ron Cucchiara
- Martin County Fire Rescue Chief, Thomas Billington
- Martin County School District, Superintendent, Dr. Sara Wilcox
- Martin County School District, Transportation Director, Willie Sauls
- Commissioner Doug Smith, District 1
- Commissioner Susan L. Valliere, District 2
- Commissioner Lee Weberman, District 3
- Commissioner Sara Heard, District 4
- Commissioner Michael DiTerlizzi, District 5

Okeechobee County

- County Administrator, George Long
- Road and Bridge Department, Anthony Sweet
- Okeechobee County School District, Superintendent, Dr. Patricia Cooper
- Okeechobee County School District, Transportation Supervisor, Louise Piper
- Okeechobee County Fire Rescue Chief, Nick Hopkins
- Okeechobee County Sheriff's Department, Paul C. May

- Mayor James E. Kirk
- Councilmember Clayton Williams
- Councilmember Roscoe Lowry Markham
- Councilmember Dowling R. Watford, Jr.
- Councilmember Jean Williams
- Commissioner Ray Domer, District 1
- Commissioner Cliff Betts, Jr., District 3
- Commissioner Elvis Posey, District 5
- Commissioner Noel Chandler, District 2
- Commissioner Marvin Wherrell, District 4

The following local, state, and national public interest groups having a direct or expressed interest in the project study will be identified and contacted by the FDOT.

Public Interest Organizations

- Florida Power & Light Company, Manager, Bill Hester
- ITS Telecommunications Systems, Inc.
- MCI Telecommunications, Virgil Springer
- BellSouth Telecommunications, Frank Veneziano
- Adelphia Cable, Bob Grant
- Adelphia Cable, Wayne Ingram
- Indiantown Branch Library, Manager, Renita Presler
- New Hope Community (Housing Assistance)
- Seagull Industries (Senior Services)
- Martin County Audubon Society, Greg Braun
- Sierra Club Florida Chapter, Jonathan Ullman
- Sierra Club Florida Chapter, John Glenn
- Sierra Club Florida Chapter, Barbara Curtis
- Save the Manatee Club, Executive Director, Patrick Rose
- Nature Conservancy Florida Chapter
- Village of Trinity Farms, Rose Degnan
- Friends of Martin County, Inc., Director, Mary Dawson
- Sustainable Martin Alliance, Executive Director, Sharon Lippisch
- Lucido and Associates, Steven Garrett
- Martin County Conservation Alliance, Donna Melzer
- United Way, Carol Hodnett

III. PUBLIC NOTIFICATION

The public involvement process for the SR 710 PD&E Study will be as inclusive and conclusive as possible. The study team will use several techniques to maximize existing public information resources in Martin County as well as those additional techniques listed in this plan to provide for a high level of public participation, and constructive recommendations to be used by the engineering team in developing the alternatives.

Media Relations Group, LLC (MRG) will serve as the public involvement coordinator for the project. MRG currently maintains the lists being developed for public and agency notification and will be in charge of advising the team that all interested organizations and stakeholders are involved in the process. MRG will arrange for meetings with elected officials, community group leadership, property owners, businesses, and agencies.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. This project is being developed in accordance with Title VI of the Civil Rights Act of 1964, as amended and Title VIII of the Civil Rights Act of 1968, as amended.

The following public notification techniques will be utilized in the project development process:

- Invitational letters
- Informational newsletters
- News releases to the media
- Public notices—legal and display ads for public meetings and hearings
- Public announcements
- Direct mailing list—A direct mailing list will be established and updated throughout the project. At a minimum, the following individuals/groups will be contacted in order to provide project information and obtain public input into the project development process. The mailing list will include:
  a) Those whose property lies, in whole or part, within 500 feet of the centerline of roadway.
  b) Martin County/Indiantown elected and appointed public officials
  c) Florida State Senators
  d) Florida State House of Representatives
  e) US Senators
  f) US House of Representatives
  g) Local elected and appointed officials
  h) Individuals who request to be placed on the mailing list for this project
  i) Public and private groups, organizations, agencies, or businesses that request to be placed on the mailing list for this project.
  j) Homeowners associations and business groups impacted by the project.

The following mass media will be utilized to carry public notices, news releases, public service announcements, news items, and interviews:

Project Website

The Consultant will create and maintain a project website if requested by the FDOT Project Manager. The website will be updated as requested.

The Consultant will tap into existing websites of local community organizations and municipalities affected by the project to request project information be added to their site. This will serve as an additional resource of information for the community. During the proposal phase of this project, we received confirmation that the community would welcome the links and the organizations would be happy to provide it.

IV. PUBLIC MEETINGS

The following public information meetings will be held to involve the public, local officials, media and interested agencies in the process and to inform the interested parties of the project's current status. The meetings will be fully advertised and all efforts will be made to inform the public of the upcoming meetings.

A. Elected Official/Agency Kickoff Meeting – A project kickoff meeting will be held with local officials/agencies to notify them of the commencement of the project. The kickoff meeting will outline the project process, scope and schedule. This is beneficial in

establishing all agency and elected official contact personnel and to allow the project team to convey all necessary documentation and information related to the project. Elected Officials will receive calls to confirm receipt of invitation.

B. Public Kickoff Meeting – The first public workshop will be the Public Kickoff Meeting, which will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. It would be beneficial to the community if the Public Kickoff Meeting were conducted on the same day and at the same place as the Elected Official/Agency Kickoff Meeting.

C. Unscheduled Public and Agency Meetings – A presentation will be made to the Martin County MPO and the Martin County Technical Advisory Committee (TAC) prior to the Public Hearing to apprise local officials of the project status, specific location and design concepts and to receive their input. Additional MPO coordination may be required following the Public Hearing.

D. Public Information Workshops – The next public workshop will serve as the Alternatives Meeting. This meeting will present viable project alternatives. A minimum of two alternatives will be recommended: one Build alternative and one No Build alternative. The No Build Alternative will be explained at the meeting and the public hearing as a viable alternative. The Project Team will be present to answer any question posed by the public at these workshops. Information stemming from these workshops will be documented, summarized and presented in the newsletter.

E. Small Group Meetings – Small group meetings may be held with nearby neighborhoods, homeowners associations, or civic organizations, as approved by the Department. The intent of these meetings is to present the latest project information and to provide opportunities to discuss specific issues. Whenever possible, FDOT will provide a presentation to the group at its prearranged meeting.

F. Public Hearing – A Public Hearing will be conducted as required by federal regulation and state law, subsequent to the draft environmental documents approval by FHWA, or as directed by the District Office of Planning and Environmental Management. Details about the public hearing process are available in Section VI.

G. Meeting Location – All public meetings will held as close to the project corridor as possible. There are several sites available to FDOT that will be evaluated based on the agreed upon dates and desires expressed by the community. The building will meet Americans with Disabilities Act (ADA) requirements and be recognized as a popular meeting place for residents. Locations under consideration at the time include the Indiantown Branch Library and Indiantown Civic Center. Public schools will not be considered for these meetings due to the recent regulations implemented with the Jessica Lunsford Act.

At each meeting, a copy of the updated Project Involvement Binder will be available for review. This binder, which will serve as the project record, will be updated throughout the life of the project and be reviewed periodically.

V. COORDINATION WITH MARTIN AND OKEECHOBEE COUNTIES

Copies of maps depicting all alignments and design concepts under consideration, along with draft copies of any engineering and environmental study documentation, will be furnished to the Martin County Engineering office for review and comment. Updated information will also be provided for display twenty-one (21) days prior to the Public Hearing.

As the project proceeds, coordination will be needed between Florida Department of Transportation Districts 1 and 4 (Okeechobee County District 1; Martin County District 4), as well as the Martin and Okeechobee counties Metropolitan Planning Organizations. It will also be necessary to communicate and coordinate with the other projects currently under way and planned for the entire SR 710 corridor.

VI. PUBLIC HEARING

In compliance with the Project Development and Environment (PD&E) Manual, 23 CFR 771 and Section 339.155, Florida Statutes (F.S.) a Public Hearing will be conducted. A Public Hearing Checklist will be prepared prior to the Public Hearing. A similar checklist may also be used for other public meetings as needed.

PUBLIC HEARING SITE: Several locations already identified will be visited well in advance of the Public Hearing in order to locate and reserve a facility that will accommodate the anticipated public and meet all requirements outlined in the Americans with Disabilities Act (ADA).

PUBLIC ADVERTISEMENT: Public Advertisement will be accomplished with a quarter page legal display advertisement published 21 days prior to the Public Hearing and 15 days prior to the public workshops. The advertisement will be repeated for the public hearing seven days prior to the meeting. The advertisements will appear in the following newspapers:

The Stuart News
PO Box 9009
Stuart, FL 34995
Phone (772) 221-4221

Okeechobee News
107 S.W. 17 Street
Okeechobee, FL 34974
Phone (863) 763-3134

The hearing notices will also be published in the:

Florida Administrative Weekly
Division of Elections
Florida Department of State
The Capitol
Tallahassee, Florida 32399-0250
The display advertisements will be sent via e-mail to the Office of General Counsel at least 35 days prior to the hearing date.

LETTERS OF INVITATION: Letters of invitation will be mailed 21 days prior to the Public Hearing to all property owners within boundary limits determined and set by the FDOT (Section 339.155 requires that property owners within 300 feet be notified) and 25 days prior to the hearing to all local government officials (elected and appointed). In addition, notification letters will be sent to everyone on the project mailing list, flyers will be distributed throughout the corridor. Additionally, these flyers will be available at the office of those elected officials representing the corridor.

HEARING PREPARATION: The hearing will be conducted by the District Planning and Environmental Management Engineer or his/her representative. A Power Point presentation outlining the project, graphic displays, handouts, speaker cards, and comment forms will supplement the public hearing presentation.

TRANSCRIPT: A verbatim transcript of the Public Hearing will be developed to include any letters received by FDOT as part of the public record as well as affidavits of publication of legal ads. Speaker cards, sign in sheets and other comment sheets filled out at the Public Hearing will be part of this record. A Public Hearing Summary will also be prepared as part of the transcript package. The Consultant will provide copies of the transcript for the Department's use and a copy of the *Public Hearing Transcript* will be forwarded to the FHWA Division office.

DOCUMENTATION FOR PUBLIC INSPECTION: Documentation for public inspection will include all draft environmental documents, Draft Preliminary Engineering Report and project alternatives.

LOCATION OF DOCUMENTS FOR PUBLIC REVIEW: Public notice will be provided in the public hearing advertisement and by mail as to where the study documents are located for public review. The locations of these documents for inspection will include:

Location:

Florida Department of Transportation
District IV Office
3400 West Commercial Boulevard
Fort Lauderdale, Florida 33309-3421

Martin County Metropolitan Planning Organization
2401 SE Monterey Road
Stuart, Florida 34996

Elisabeth Lahti Library 15200 S.W. Adams Avenue Indiantown, Florida 34956 (772) 597-4200	Monday 10am - 5:30pm Tuesday 10am - 5:30pm Wednesday Noon - 8:00pm Thursday 10am - 5:30pm Friday 10am - 5:30pm Saturday 10am - 5:30pm Sunday CLOSED
Okeechobee County Public Library 206 S.W. 16 Street Okeechobee, Florida 34974 (863) 763-3536	Monday 9:30am - 6:00pm Tuesday 9:30am - 8:00pm Wednesday 9:30am - 8:00pm Thursday 9:30am - 8:00pm Friday 9:30am - 6:00pm Saturday 9:30am - 5:00pm Sunday CLOSED

TITLE VI AND TITLE VIII CIVIL RIGHTS ACTS: Notification of the Title VI and Title VIII Civil Rights Act will be provided in the Public Hearing presentation, by handout, signage and through availability of personnel on Title VI Program and the Relocation Assistance Program which complies with Title VIII.

AMERICANS WITH DISABILITIES ACT COMPLIANCE: Notification of the Department's intent to comply with the Americans with Disabilities Act will be provided in the public advertisements for the public hearing, by invitational letters to property owners and local officials, by handout, newsletters, and by selection of a public hearing site that meets all ADA requirements.

VII. PUBLIC HEARING FOLLOW-UP

The following procedures will occur after the Public Hearing:

PUBLIC HEARING DEBRIEFING: A Public Hearing debriefing will be held with all project team members to identify all issues that require additional correspondence and/or development. This meeting will assign responsibility for the issues that need to be further addressed.

RESPONSES TO QUESTIONS AND COMMENTS: Questions and comments received from the public, but not answered at the hearing will be followed up after the hearing. The study team will prepare all letters of response for review and concurrence by the FDOT. The FDOT will mail the responses to the person or group who posed the questions or comment. A copy of all responses will be included in the project files and within the Comments and Coordination Report.

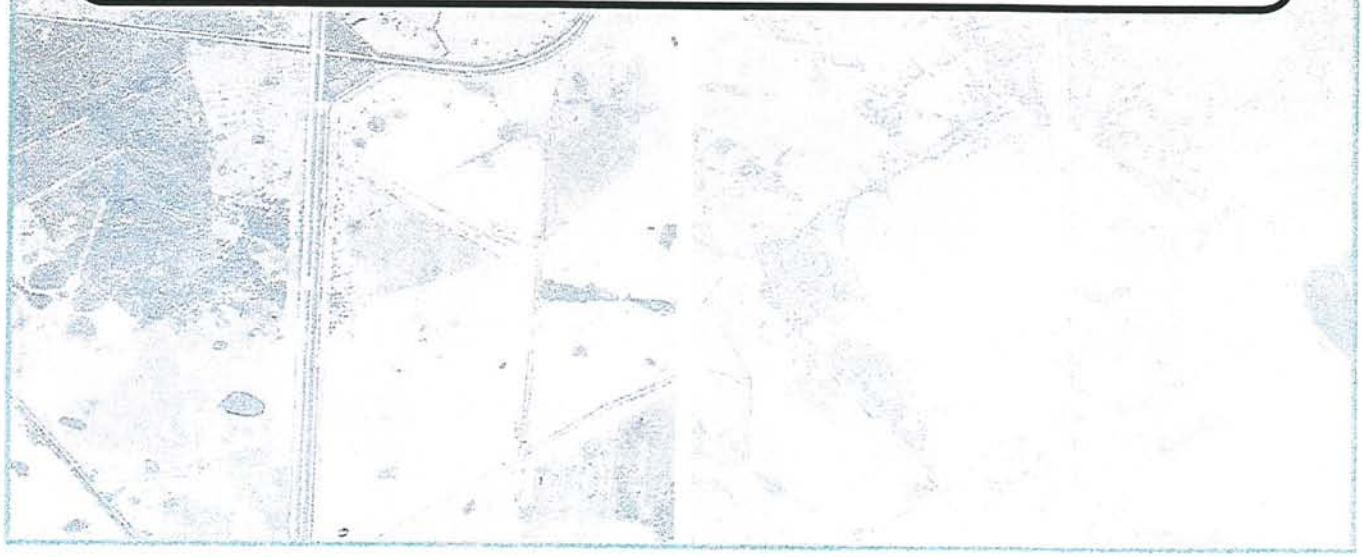

RECOMMENDATION NOTICE: A legal recommendation notice announcing the FHWA's approval of the final document and recommendations will be published in *The Stuart News* and the *Okeechobee News*.

PUBLIC HEARING TRANSCRIPT PACKAGE: A transcript package will be prepared in booklet form, with cover, containing the verbatim transcript, proof of hearing notification, sign-in sheets, Public Hearing Certification, and all public comments received within 10 days after the Public Hearing.

STEPHANIE C. KOPELOUSOS
SECRETARY

February 18, 2008

The Honorable Bill Nelson
Senator
U.S. Senate
225 East Robinson Street
Orlando, FL 32801

Dear Senator Nelson:

SUBJECT: **State Road 710 Project Development and Environment (PD&E) Study**
Elected Officials and Agency Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled an Elected Officials and Agency Kickoff Meeting to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule. The Elected Officials and Agency Kickoff Meeting will be conducted on Wednesday, March 12, 2008, at 2 p.m., at the Blake Library, 2351 S.E. Monterey Road in Stuart. Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

Sincerely,

Gustavo Schmidt, P.E.
District Planning and Environmental Engineer

Elected Officials and Agency Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled an Elected Officials and Agency Kickoff Meeting to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule. The Elected Officials and Agency Kickoff Meeting will be conducted on Wednesday, March 12, 2008, at 2 p.m., at the Blake Library, 2351 S.E. Monterey Road in Stuart. Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

Sincerely,

Gustavo Schmidt, P.E.

Elvis Posey
Vice Chairman
Okeechobee County Commission, District 5
304 North West 2nd Street, Room #106
Okeechobee, FL 34972

Dear Vice Chairman Posey:

SUBJECT: **State Road 710 Project Development and Environment (PD&E) Study**
Elected Officials and Agency Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled an Elected Officials and Agency Kickoff Meeting to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule. The Elected Officials and Agency Kickoff Meeting will be conducted on Wednesday, March 12, 2008, at 2 p.m., at the Blake Library, 2351 S.E. Monterey Road in Stuart. Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

February 18, 2008

David Gibbs
Division Administrator
Federal Highway Administration
545 John Knox Road, Suite 200
Tallahassee, FL 32303

Dear Mr. Gibbs:

SUBJECT: **State Road 710 Project Development and Environment (PD&E) Study**
Elected Officials and Agency Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled an Elected Officials and Agency Kickoff Meeting to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule. The Elected Officials and Agency Kickoff Meeting will be conducted on Wednesday, March 12, 2008, at 2 p.m., at the Blake Library, 2351 S.E. Monterey Road in Stuart. Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

SUBJECT: **State Road 710 Project Development and Environment (PD&E) Study**
Elected Officials and Agency Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled an Elected Officials and Agency Kickoff Meeting to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule. The Elected Officials and Agency Kickoff Meeting will be conducted on Wednesday, March 12, 2008, at 2 p.m., at the Blake Library, 2351 S.E. Monterey Road in Stuart. Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

Chuck Collins
Regional Director, South Regional Office
Florida Fish and Wildlife Conservation Commission
8535 Northlake Boulevard
West Palm Beach, FL 33412

Dear Mr. Collins:

SUBJECT: **State Road 710 Project Development and Environment (PD&E) Study**
Elected Officials and Agency Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled an Elected Officials and Agency Kickoff Meeting to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule. The Elected Officials and Agency Kickoff Meeting will be conducted on Wednesday, March 12, 2008, at 2 p.m., at the Blake Library, 2351 S.E. Monterey Road in Stuart. Enclosed is a Project Location/Meeting Location Map.

There will also be a Public Kickoff Meeting at 5:30 p.m., on Wednesday, March 12, 2008, at the Indiantown Civic Center, 15675 SW Osceola Street. The Public Kickoff Meeting will introduce the project, establish the need and explain to the public how they can be a part of the project's public involvement process. Enclosed is a second Project Location/Meeting Location Map for the Public Kickoff meeting.

A copy of the Advance Notification for this project was sent to your office on January 31, 2007. The Project Development and Environment (PD&E) phase of the project will further study the corridor, which is about 15 miles long.

The Elected Officials and Agency Kickoff Meeting will allow representatives an opportunity to provide input and participate in the PD&E process. Your attendance to become acquainted with the proposed project and study team is encouraged and appreciated. You are also welcome to attend the Public Kickoff meeting if you desire.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

Sincerely,

Gustavo Schmidt, P.E.
District Planning and Environmental Engineer

Subject: MARCH 12th CHANGE OF MEETING LOCATION NOTIFICATION - SR 710 ELECTED OFFICIALS AND AGENCY MEETING - NEW LOCATION: Cummings Library, 2551 S.W. Matheson Avenue in Palm City

SUBJECT: March 12, 2008 - State Road (SR) 710 ELECTED OFFICIALS AND AGENCY MEETING

CHANGE OF MEETING LOCATION NOTIFICATION

Project Development and Environment (PD&E) Study
Limit: SR 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road)
County: Martin

The Florida Department of Transportation (FDOT) District 4 sent a letter to your office announcing the upcoming Elected Officials and Agency Kickoff Meeting for State Road 710 (Beeline Highway). The scheduled meeting on Wednesday, March 12, 2008 starting at 1 p.m. has been moved to a new location. The new meeting location will be at the **Cummings Library, 2551 S.W. Matheson Avenue** in Palm City. Attached please find an updated Project Location/Meeting Location Map.

The meeting has been scheduled to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule.

We apologize for the inconvenience and should you require further information concerning this project, please contact me at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. You may be contacted me via e-mail at gregor.senger@dot.state.fl.us.

Please confirm receipt of this email. You will receive a reminder email and phone call one week before the meeting.

Subject: Thank you for contacting Senator JD Alexander

Thank you for contacting my office. I appreciate the time and effort you have taken to contact us. All correspondence sent via email will be read with great interest and your opinions will be registered with our office. We gladly respond to the constituents of Senate District 17 with specific needs. All other emails will be reviewed and kept in mind for their valued opinions and information.

If you are a constituent of Senate District 17, and need assistance, please include your address and telephone number if you would like to be contacted by a staff member.

Thank you,

Senator JD Alexander

District 17

Subject: Thank you for sharing your views with Senator Pruitt.

Dear Friends,

Thank you for contacting my office to share your concerns. It is heartwarming to know how many of my constituents take an interest in their government.

It is my pleasure to represent the citizens of the State of Florida, and it is only with your participation that I can correctly represent your views at the state capitol.

Because of the volume of e-mails I receive on a daily basis, combined with the workload that comes with my position, I may not be able to respond to your concerns immediately. Although it may take some time, please be assured that I have taken note of your comments and am grateful for your input.

If you are in need of immediate assistance, please contact my office at the address listed below that is most convenient for you. My staff and I are always here to assist you.

Sincerely,

Main District Office:
1850 SW Fountainview Blvd.
Suite 200

The Florida Department of Transportation (FDOT) District 4 sent a letter to your office announcing the upcoming Elected Officials and Agency Kickoff Meeting for State Road 710 (Beeline Highway). The scheduled meeting on Wednesday, March 12, 2008 starting at 1 p.m. has been moved to a new location. The new meeting location will be at the **Cummings Library, 2551 S.W. Matheson Avenue** in Palm City. Attached please find an updated Project Location/Meeting Location Map.

The meeting has been scheduled to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule.

We apologize for the inconvenience and should you require further information concerning this project, please contact me at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. You may be contacted me via e-mail at gregor.senger@dot.state.fl.us.

Please confirm receipt of this email. You will receive a reminder email and phone call one week before the meeting.

Hi Heather,

I am the NOAA-NMFS liason to FDOT and the Florida Turnpike for the east coast of FL and the Keys. Could you please replace Audra's name with my name for FDOT and Turnpike Projects?

Thanks,

Brandon Howard

NOAA-NMFS

SUBJECT: March 12, 2008 - State Road (SR) 710 ELECTED OFFICIALS AND AGENCY MEETING

CHANGE OF MEETING LOCATION NOTIFICATION

Project Development and Environment (PD&E) Study
Limit: SR 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road)
County: Martin

The Florida Department of Transportation (FDOT) District 4 sent a letter to your office announcing the upcoming Elected Officials and Agency Kickoff Meeting for State Road 710 (Beeline Highway). The scheduled meeting on Wednesday, March 12, 2008 starting at 1 p.m. has been moved to a new location. The new meeting location will be at the **Cummings Library, 2551 S.W. Matheson Avenue** in Palm City. Attached please find an updated Project Location/Meeting Location Map.

The meeting has been scheduled to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule.

We apologize for the inconvenience and should you require further information concerning this project, please contact me at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. You may be contacted me via e-mail at gregor.senger@dot.state.fl.us.

Please confirm receipt of this email. You will receive a reminder email and phone call one week before the meeting.

SUBJECT: March 12, 2008 - State Road (SR) 710 ELECTED OFFICIALS AND AGENCY MEETING

CHANGE OF MEETING LOCATION NOTIFICATION

Project Development and Environment (PD&E) Study
Limit: SR 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road)
County: Martin

The Florida Department of Transportation (FDOT) District 4 sent a letter to your office announcing the upcoming Elected Officials and Agency Kickoff Meeting for State Road 710 (Beeline Highway). The scheduled meeting on Wednesday, March 12, 2008 starting at 1 p.m. has been moved to a new location. The new meeting location will be at the **Cummings Library, 2551 S.W. Matheson Avenue** in Palm City. Attached please find an updated Project Location/Meeting Location Map.

The meeting has been scheduled to discuss proposed improvements to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The meeting will outline the project process, scope and schedule.

We apologize for the inconvenience and should you require further information concerning this project, please contact me at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. You may be contacted me via e-mail at gregor.senger@dot.state.fl.us.

Please confirm receipt of this email. You will receive a reminder email and phone call one week before the meeting.

Martin County, Florida
FM#: 419344-1-22-01

Comment Sheet

FDOT may want to consider the wildlife that currently cross this road. Large alligators & hogs have been observed dead on the roadway - a safety concern as well as a wildlife issue. Maybe oversize some some culverts

SR-710 Project Development & Environment Study

From CR 714 to CR-609 in Martin County

Financial Project ID:
419344-1-22-01

Elected Officials & Agency Kick-off Meeting

March 12, 2008

Prepared by:

In Association with:
C3TS
Cambridge Systematics
Quest Ecology

Understanding the Scope

Project Description

- PD&E Study Limits:
  From the Okeechobee/
  MartinCounty Line
  to CR-609 (15 Miles)
- SIS/FIHS Facility
- Rural Principal Arterial
- Significant Intrastate Traffic
- Significant Truck Traffic
  (over 25%)
- Hurricane Evacuation Route
- Connects to the Port of Palm Beach

METRIC ENGINEERING

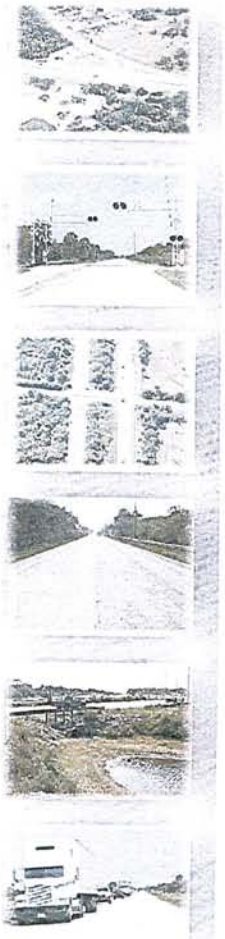

Understanding the Scope

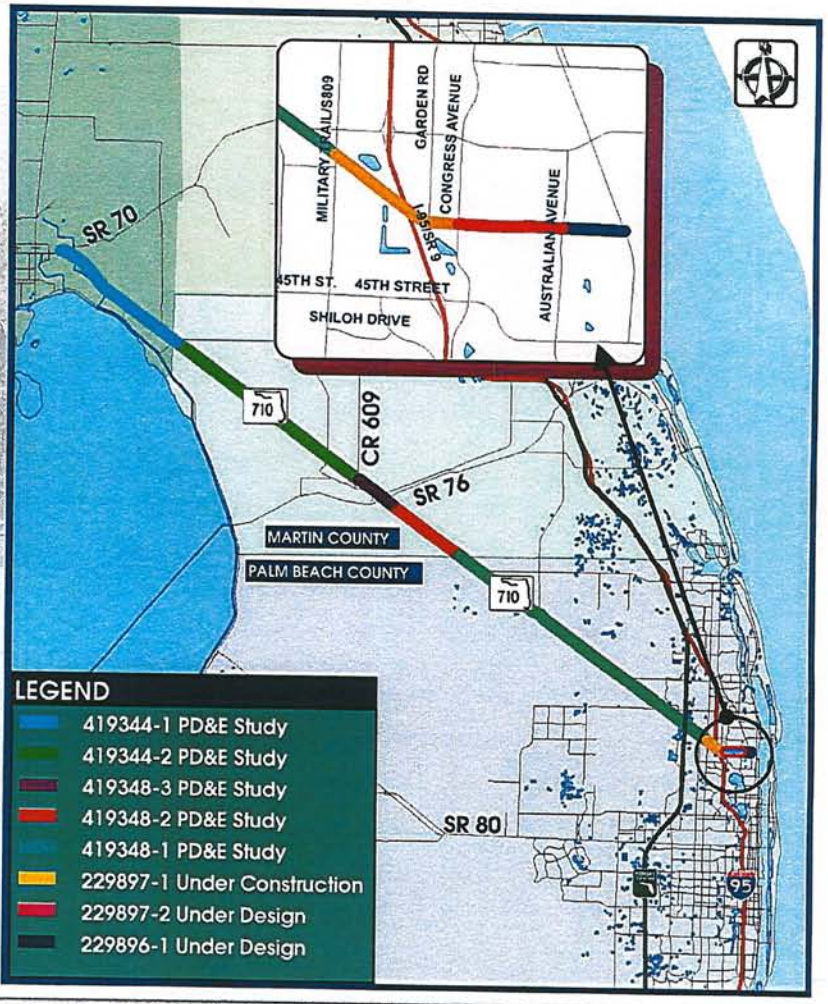

Strategic Intermodal System (SIS)

- System of Transportation Facilities of Statewide and Interregional Significance
- Focused on the Efficient Movement of Passengers and Freight
- Carries 68% of All Truck Traffic and 29% of all Traffic

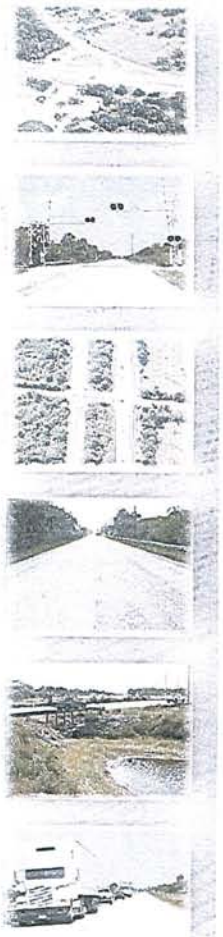

Projects in the Vicinity

Numerous on-going projects along the entire SR 710 corridor from SR 70 (Okeechobee County) to A1A in Palm Beach County

Project Consistency

- 2030 Martin and St. Lucie Metropolitan Planning Organizations (MPOs) adopted Regional Long Range Transportation Plan (RLRTP)
- Draft Strategic Intermodal System (SIS) Cost Feasible Plan
- Martin County Comprehensive Plan
- Indiantown Community Redevelopment Area (CRA) Master Plan
- Indiantown Community Development Plan

Need for the Project

- Safety
- Mobility of Passengers & Freight
- Emergency Access
- Evacuation Route
- Reduce Congestion
  - Created by anticipated population & employment growth
- Multimodal Accommodations

Engineering Issues & Approach

DRIs/Major Developments

- Consider existing land use and potential future land use changes
  - **Martin County**
    - Venture Park PUD
    - Quillen DRI
    - Indiantown DRI
    - Indiantown Commerce and Technology Park
    - Osceola Pines
    - Sandy Oaks
    - Owen Grove PUD
  - **Okeechobee County**
    - NE Northshore Village
    - Elementary School
    - SE Conrad
    - SE Sherman Wood Ranches
    - SE Daniel
    - SE Eagle Landing (1)
    - SE Eagle Landing (2)

**** Consider the different project stages to determine the additional trip generation for each design horizon.***

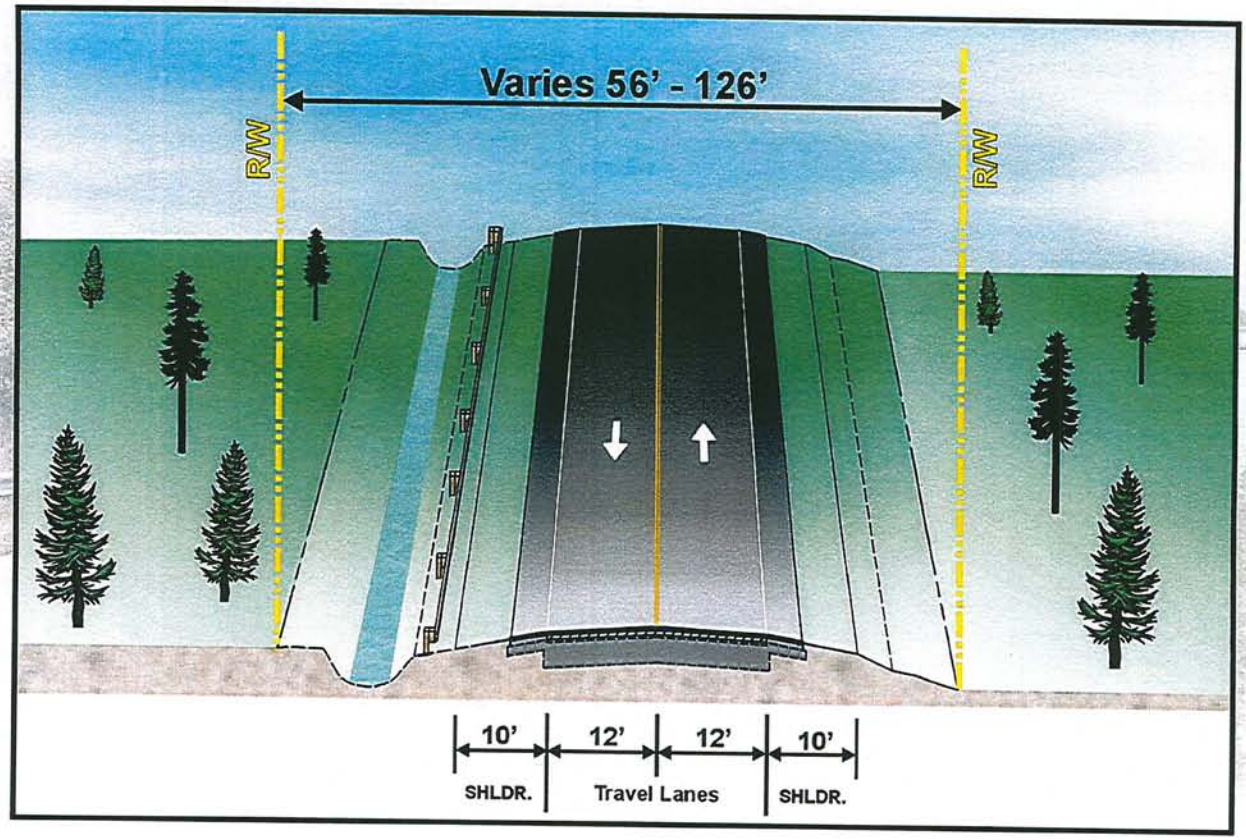

Engineering Issues & Approach (Roadway)

Existing Typical Section

Engineering Issues & Approach (Roadway)

Martin County

	AADT		
	2005	2025	2035
CR-714 (Martin Hwy.) to Fox Brown Rd.	6,000	10,200	12,500
Fox Brown Rd. to CR-609	9,000	28,200	40,400

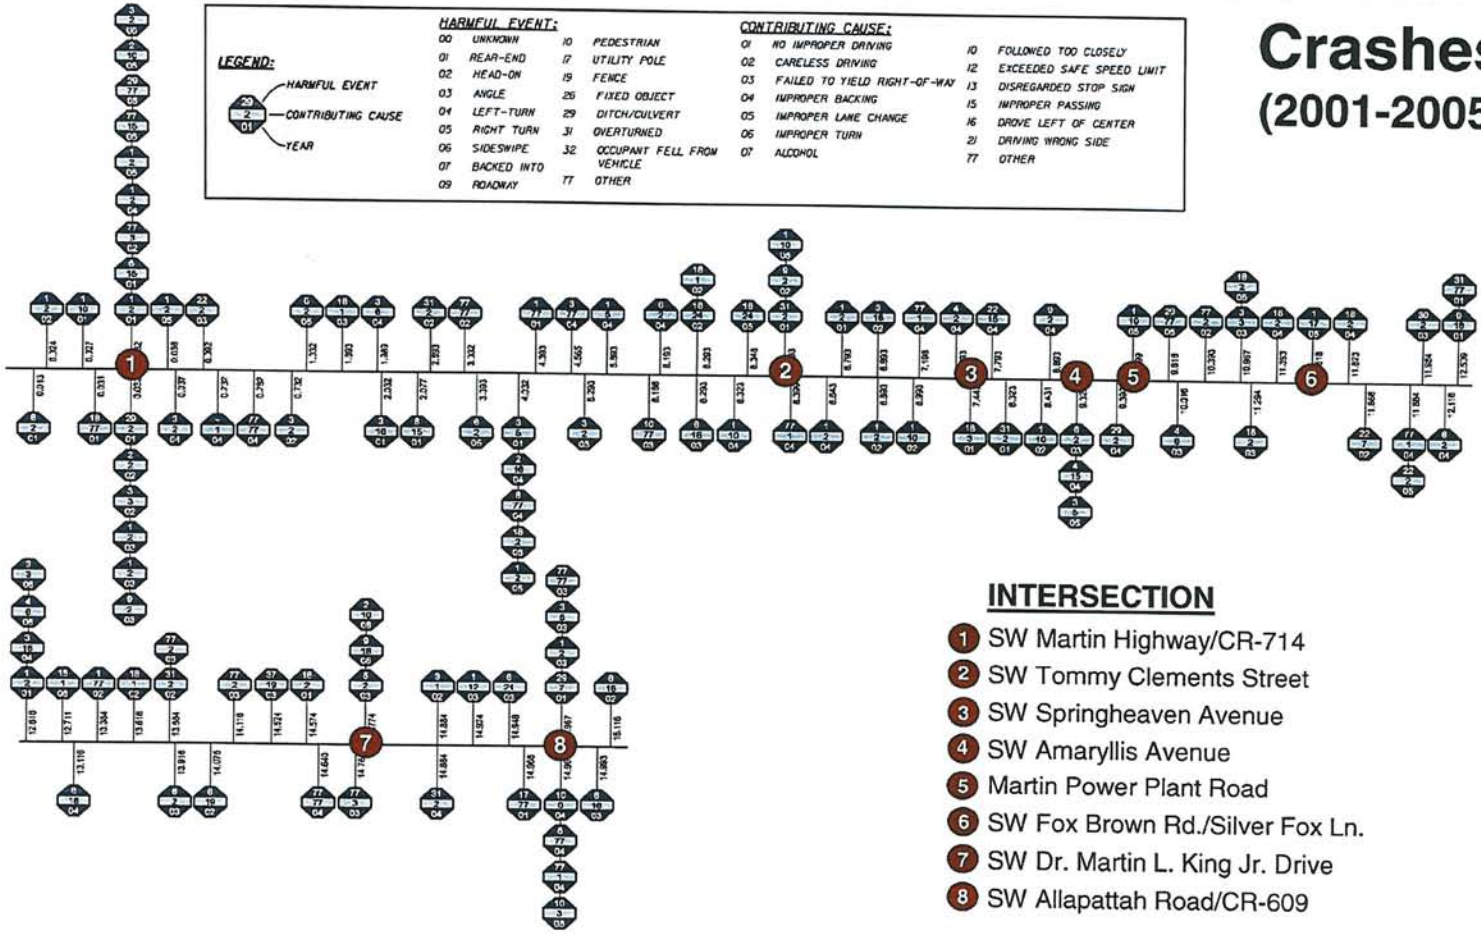

Engineering Issues & Approach (Roadway)

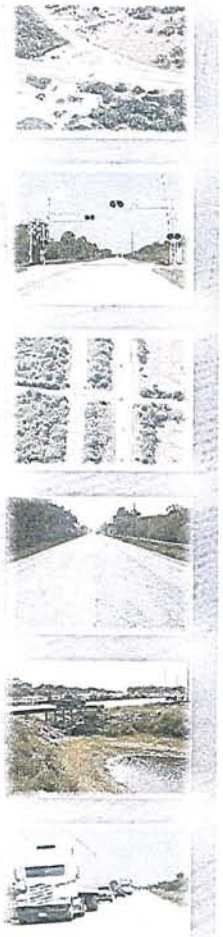

Crashes (2001-2005)

INTERSECTION

1. SW Martin Highway/CR-714
2. SW Tommy Clements Street
3. SW Springheaven Avenue
4. SW Amaryllis Avenue
5. Martin Power Plant Road
6. SW Fox Brown Rd./Silver Fox Ln.
7. SW Dr. Martin L. King Jr. Drive
8. SW Allapattah Road/CR-609

Engineering Issues & Approach (Roadway)

Typical Section Concept Development

- Meet FIHS (PPM) Criteria
- Minimize Crashes
- Sufficient Capacity
- Minimize R/W Impacts
- Minimize Wetland Impacts
- Minimize Cost
- Avoid Utility Conflicts (FP&L, FGS Company)
- Avoid Impacts to Railroads (CSX & FEC)
- Phased Approach
  - Passing Lane Sections
  - Ultimate Widening

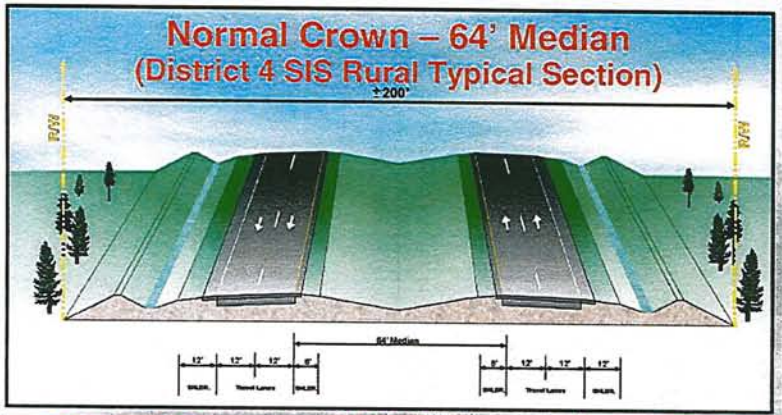

Engineering Issues & Approach (Roadway)

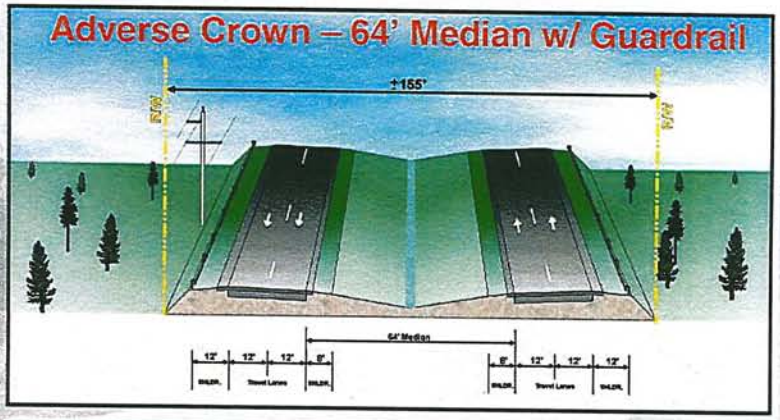

Proposed Typical Sections

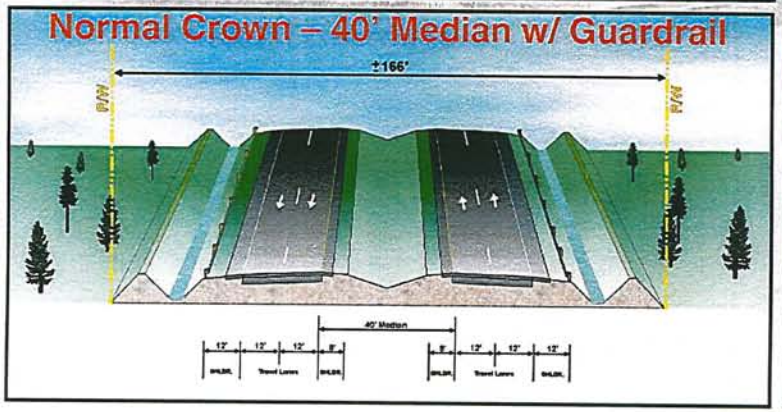

Normal Crown – 64' Median
(District 4 SIS Rural Typical Section)

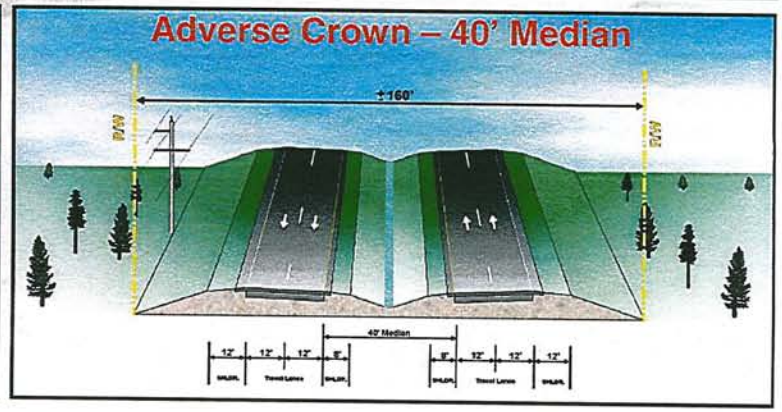

Adverse Crown – 64' Median w/ Guardrail

Normal Crown – 40' Median w/ Guardrail

Adverse Crown – 40' Median

Engineering Issues & Approach (Roadway)

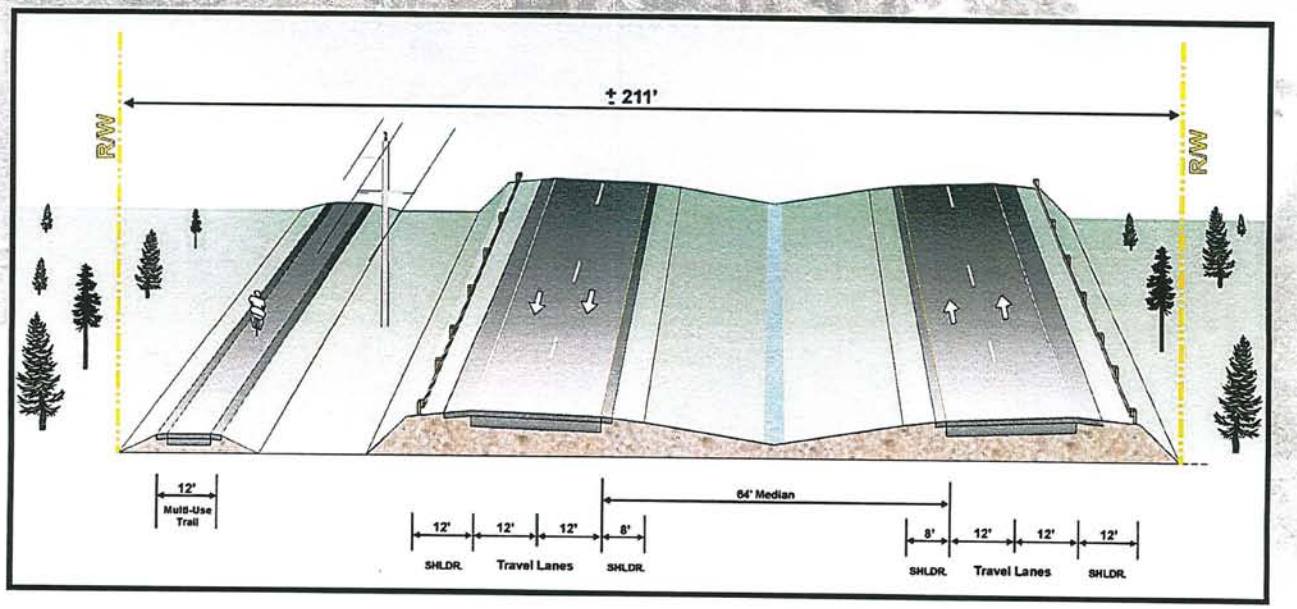

Proposed Typical Sections(Multi-Modal)

Department Procedure No. 525-030-250, Development of the Florida Intrastate Highway System (FIHS), gives the following guidance relating to the provision of bicycle and pedestrian facilities on the FIHS.

… Separate, offside, and/or parallel facilities, shall be used where practical and feasible.

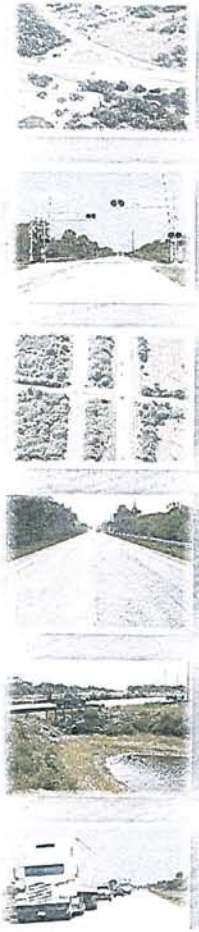

Engineering Issues & Approach (Roadway)

Utilities

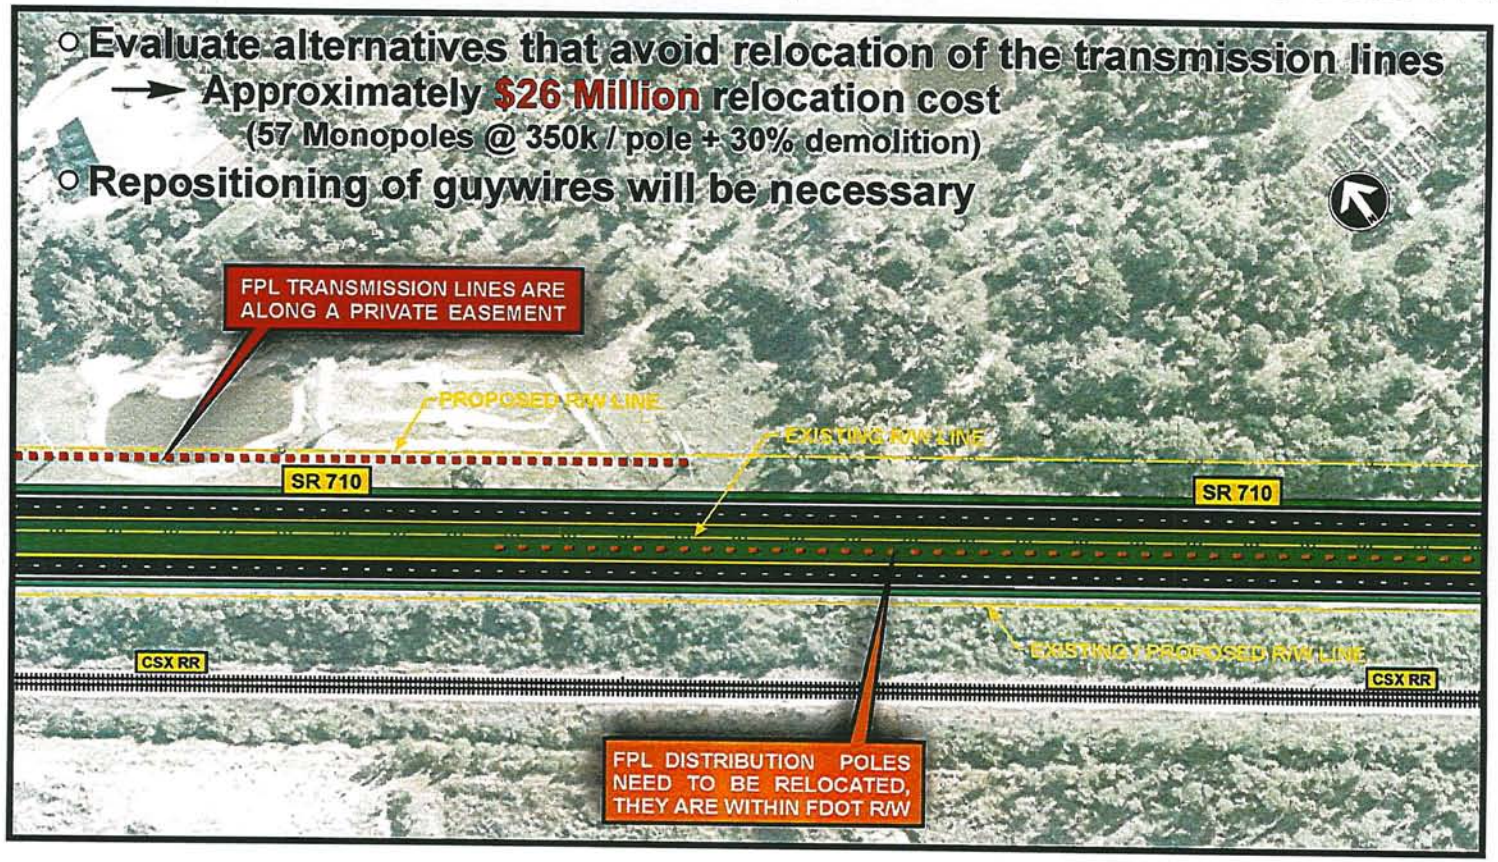

- FP&L Transmission
  - Facilities run along the North side and parallel to SR-710 in a private easement.
- FP&L Distribution Lines
  - Facilities attached to Transmission poles along the North side and parrallel to SR-710
- Gulfstream Natural Gas System
  - 30" High Pressure Natural Gas crosses SR-710 at M.P. 1.8
  - No conflict anticipated – Line is at a depth of 10 ft. below ground
- Indiantown Gas Company
  - 6 in. gas main runs parallel and on the south side of SR-710 approximately 8 to 10 ft. from EOP
- Indiantown Telephone Systems
  - Burried fiber optic on the south side and parallel to SR-710

Engineering Issues & Approach (Roadway)

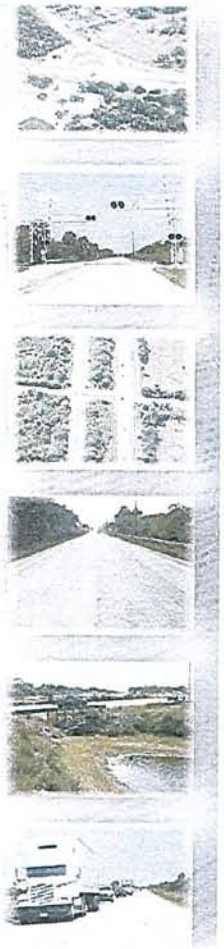

Special Areas of Concern

- Evaluate alternatives that avoid relocation of the transmission lines
  - → Approximately **$26 Million** relocation cost
    (57 Monopoles @ 350k / pole + 30% demolition)
- Repositioning of guywires will be necessary

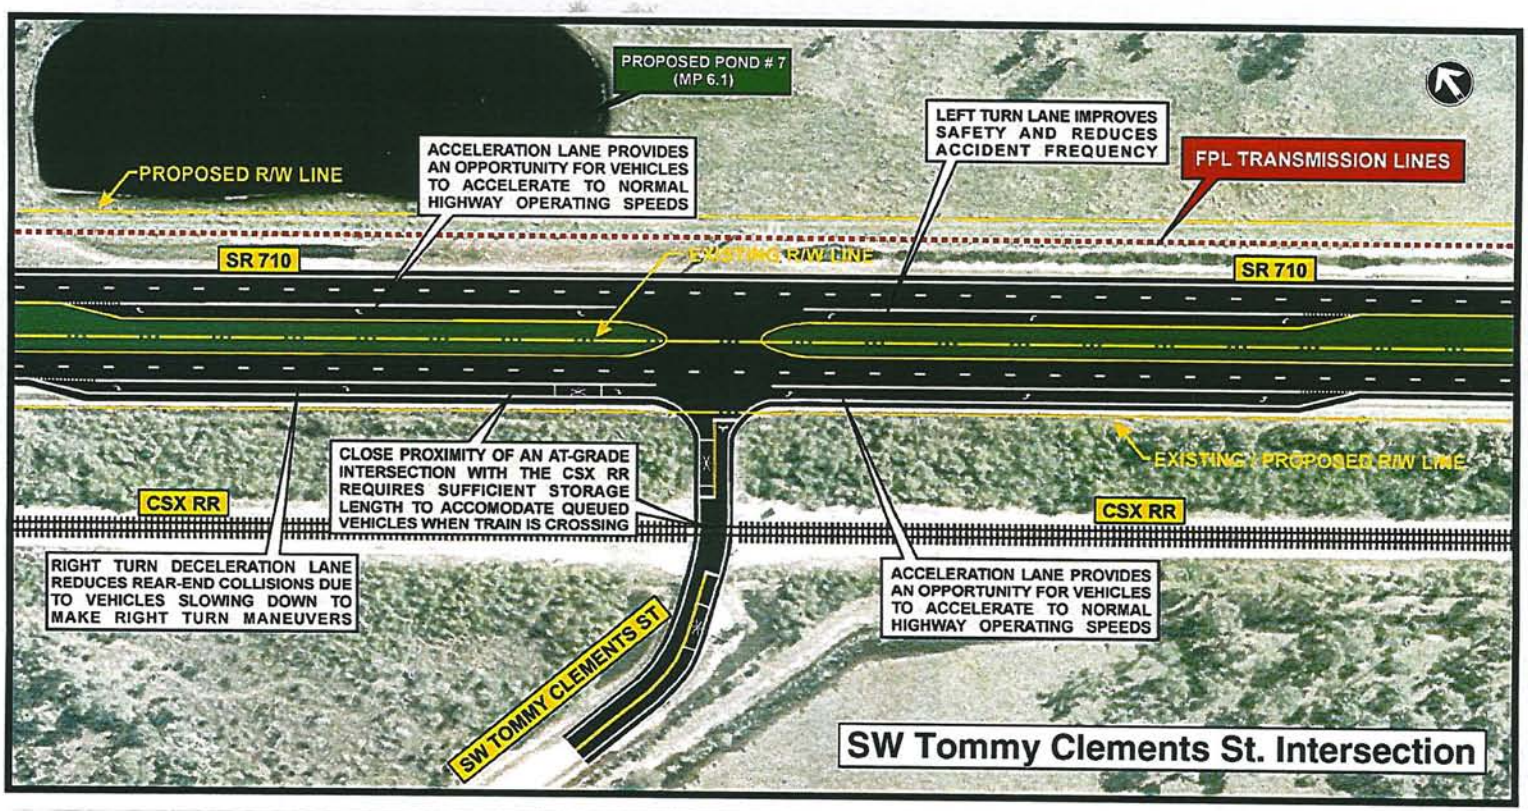

Engineering Issues & Approach (Roadway)

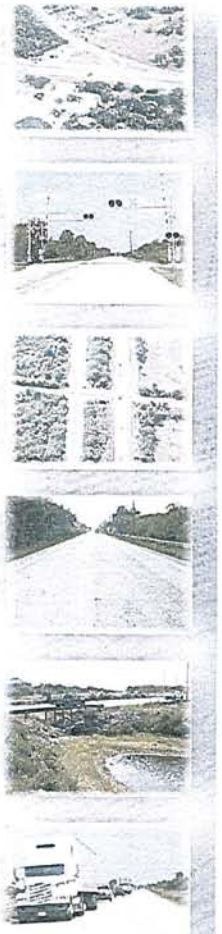

Special Areas of Concern

- High Speeds vs. Slow Truck Acceleration

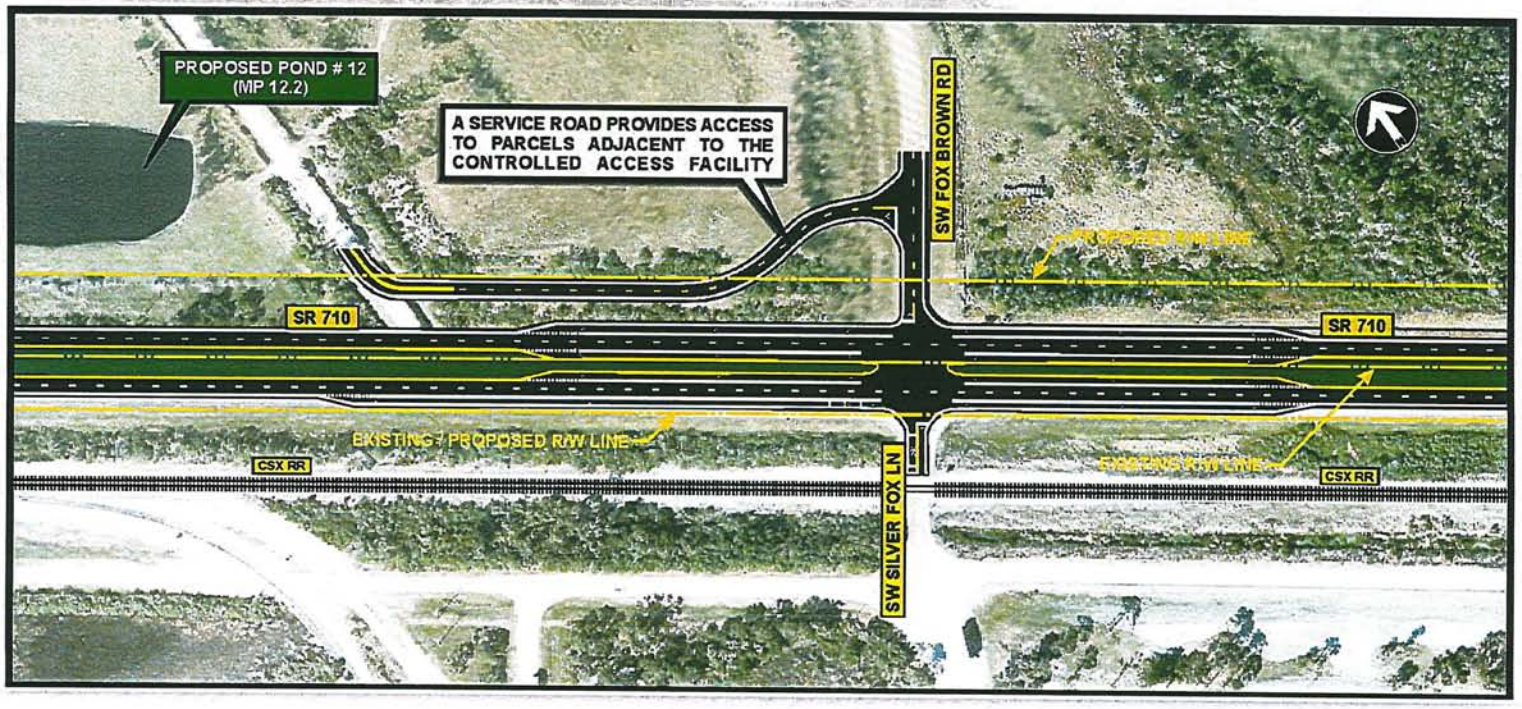

Engineering Issues & Approach (Roadway)

Access Management

ARTERIAL ACCESS MANAGEMENT CLASSIFICATIONS & STANDARDS						
Access Class	Median Type	Connection Spacing (feet)		Median Opening Spacing (feet)		Signal Spacing (feet)
		>45 mph	≤ 45 mph	Directional	Full	
2	Restrictive w/Service Roads	1,320	660	1,320	2,640	2,640
3	Restrictive	660	440	1,320	2,640	2,640

Engineering Issues & Approach (Roadway)

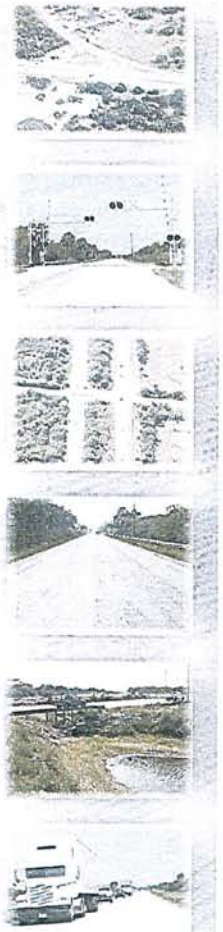

Operational Concerns

- Approaching Indiantown
  - Changing Speeds
  - Driver Expectancy
  - Situation worsen by horizontal curves at the entrance to Indiantown

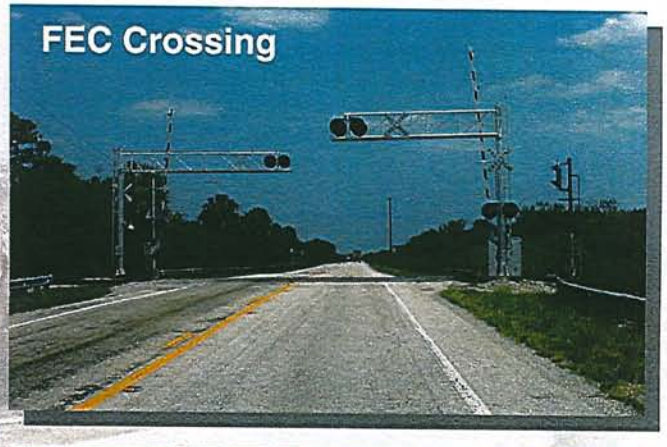

Engineering Issues & Approach (Bridge)

Railroads

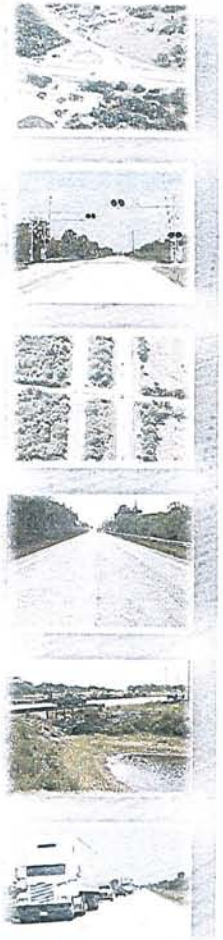

- FEC Railroad
  - One at-grade crossing with SR-710 (Crossing 272271F)
  - Typical train Speed: 10 to 40 mph
  - Train Movements: 1day/1Night thru
  - 10 Year Accident History
    - 3 Crashes with Highway User (2003, 2002, 1996)

- CSX Railroad
  - No at-grade crossing with SR-710
  - Numerous side streets highway-rail crossings
  - Typical train Speed: 5 to 79 mph
  - Train Movements: 3day/17Night thru

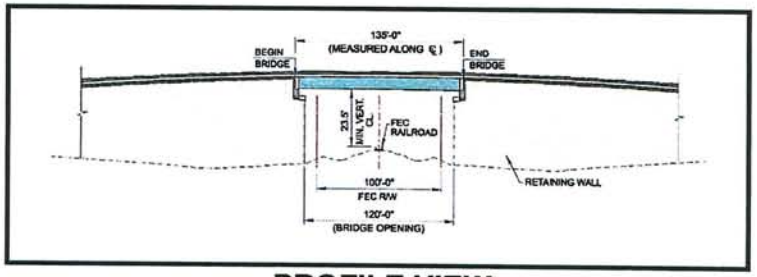

Engineering Issues & Approach (Bridge)

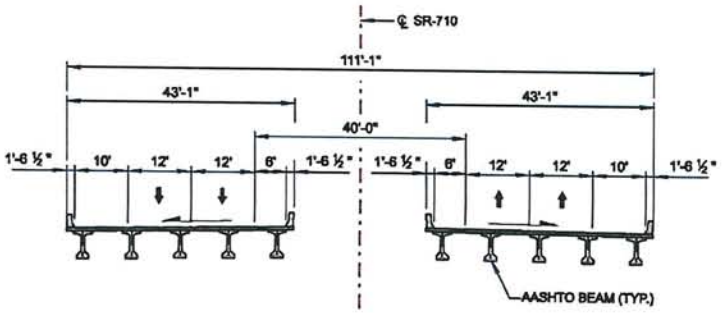

PLAN VIEW

PROFILE VIEW

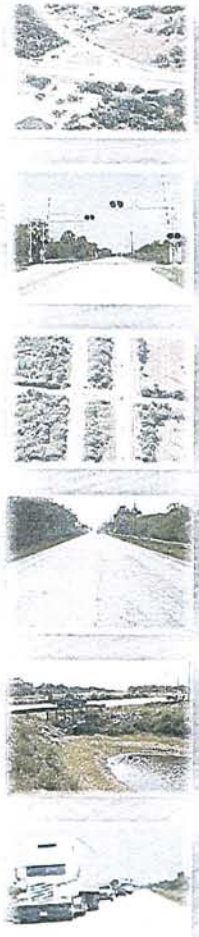

FEC Overpass

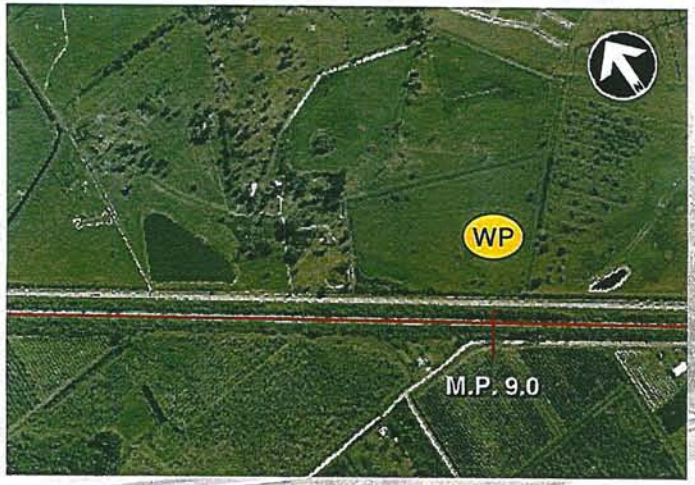

BRIDGE TYPICAL SECTION

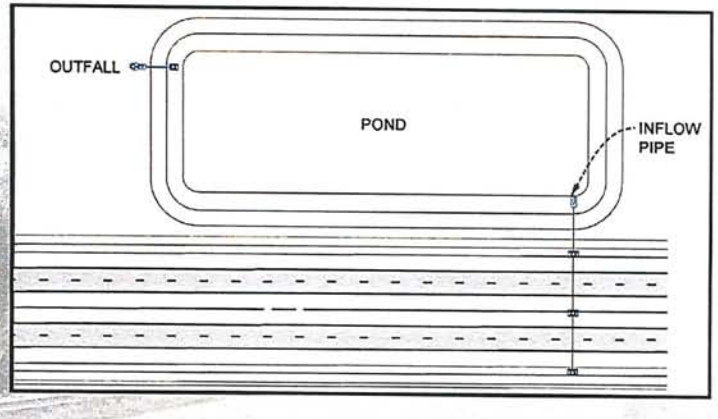

- BRIDGE OVERPASS VS AT GRADE CROSSING COST BENEFIT AND SAFETY ANALYSIS
- BRIDGE ANALYSIS REPORT
- NEW BRIDGE OVER FEC R/R
- MIN. VERTICAL CL. 23.5'
- PIER / BENT OUTSIDE FEC R/W
- BRIDGE TO BE CONSTRUCTED IN STAGES
- COORDINATE CONSTRUCTION WITH FEC & CSX R/R

Engineering Issues & Approach (Drainage)

Example Stormwater Pond Site

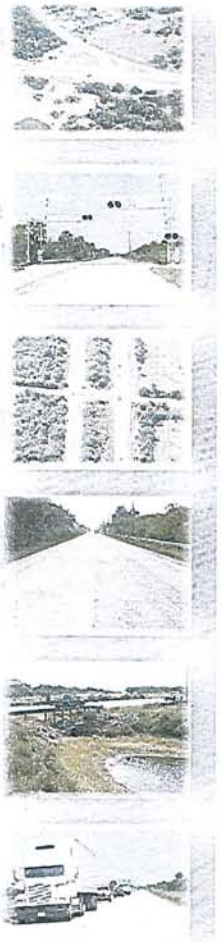

- Water quality and quantity requirements will need to address additional impervious areas.
- Corridor consideration for wet ret / detention ponds at available vacant upland parcels.
- Address Pre versus Post requirements.
- Address Floodplain encroachment issues.

WATER TREATMENT EVALUATION							
POND/ BASIN NUMBER	POND LOCATION	BASIN LIMITS			REQUIRED WATER TREATMENT (Ac-ft)	POND RIGHT OF WAY (Acre)	RECEIVING WATER BODY
		FROM MP	TO MP	LENGTH (Mile)			
1	MP 0.0	0.00	1.00	1.00	2.21	2.32	WETLAND
2	MP 1.0	1.00	1.95	0.95	2.11	2.24	RR CROSS DRAIN
3	MP 2.5	1.95	2.50	0.55	1.23	1.48	WETLAND
4	MP 3.5	2.50	3.50	1.00	2.21	2.32	MYRTLE SLOUGH
5	MP 3.6	3.50	4.10	0.60	1.34	1.58	MYRTLE SLOUGH
6	MP 5.0	4.10	6.00	1.90	4.16	3.91	WETLAND
7	MP 6.1	6.00	6.90	0.90	2.00	2.14	WETLAND
8	MP 7.0	6.90	8.10	1.20	2.65	2.68	BARLEY BARBER SWAMP
9	MP 9.0	8.10	9.00	0.90	2.00	2.14	WETLAND
10	MP 10.0	9.00	11.00	2.00	4.36	4.08	WETLAND
11	MP 11.0	11.00	12.00	1.00	2.21	2.32	WETLAND
12	MP 12.2	12.00	13.10	1.10	2.43	2.51	WETLAND
13	MP 13.9	13.10	14.80	1.70	3.73	3.57	WETLAND
			TOTAL	14.80	32.67	33.29	

ENGINEERING ISSUES & APPROACH (DRAINAGE)

Environmental Permitting – SFWMD and USACOE

- ENVIRONMENTAL RESOURCE PERMIT (ERP) by SFWMD

  Individual permit
  - Project area > 100 acres
  - Requires WMD Board approval
  - Process time: 2 to 6 months anticipated

- DREDGE AND FILL PERMIT BY USACOE

- GO EARLY FOR PERMITS AND MODIFY AS NEEDED

Environmental Issues & Approach

Agency Comments

- **ETDM Summary Report**
  - Preliminary Evaluation of Direct Effects
    - **Substantial**
      - Contamination
      - Wildlife Habitat
    - **Moderate**
      - Water Quality & Quantity
      - Wetlands
      - Historic and Archaeological Sites
      - Land Use
      - Secondary & Cumulative Effects

Environmental Issues & Approach

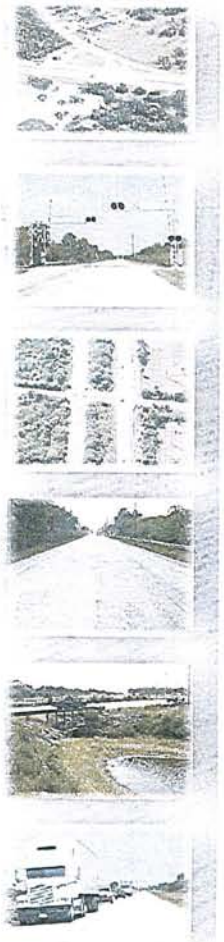

Awareness of Environmental Issues

- Wetlands
- Protected Species
- Wildlife Habitat
- Secondary Impacts
- Essential Fish Habitat
- Water Quality
- Contamination
- ETDM
- Public Lands
- Noise
- Air Quality
- Cultural Resources

Environmental Issues & Approach

Wetlands

- Identification and Mapping
- Evaluation of Impacts
- Assessment of Representative Wetlands
- Alternatives Analysis
- Agency Coordination
- Mitigation
- Wetland Evaluation Report

Environmental Issues & Approach

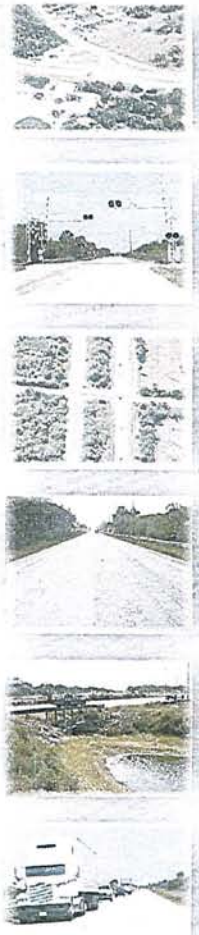

Wildlife and Habitat

- Potentially Occurring/ Documented Species:
  - Bald Eagle
  - Crested Cara-Cara
  - Woodstork Rookeries
  - Wading Bird Species
  - Eastern Indigo Snake
  - Sherman's Fox Squirrel
  - Florida Panther
- Field Surveys
- Database/Record Searches
- Impact Assessments
- Agency Coordination
- Wildlife Crossings
- Endangered Species Biological Assessment

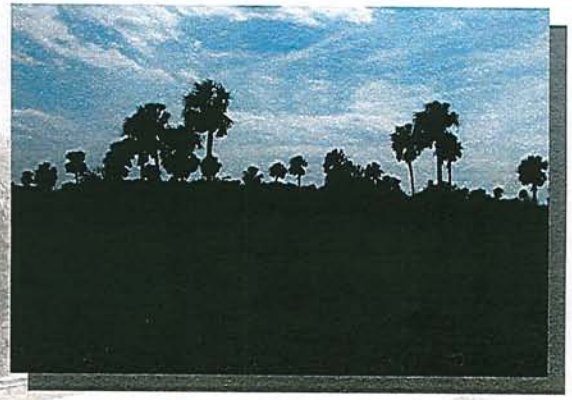

Approach to Environmental Issues

- Coordination with ETAT on Project Issues/Permitting
- Combine Aerial Interpretation and groundtruthing for maximum efficiency and early evaluation
- Avoidance and minimization of wetland impacts by providing input on the formulation of alternatives
- Coordination with USFWS, FFWCC, SFWMD and USACE
- Conduct studies according to current methodologies
- Early investigation of mitigation requirements and available options

Environmental Issues & Approach

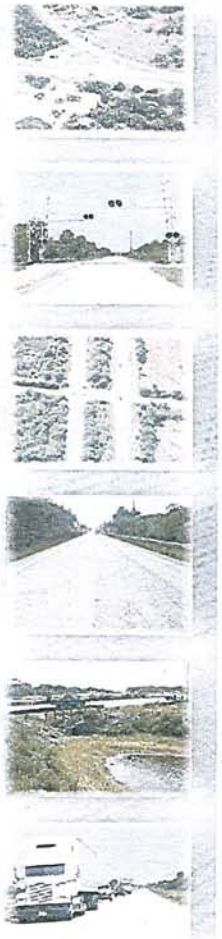

Environmental Documents

- Advance Notification (AN) Package
  - Distributed
- Categorical Exclusion – Type 2
- Wetlands Evaluation Report
- Endangered Species Biological Assessment
- Contamination Evaluation Screening Report
- Cultural Resource Assessment Survey Report
- Noise Study Report
- Air Quality Technical Memorandum
- Public Involvement Plan
- Public Hearing Transcript

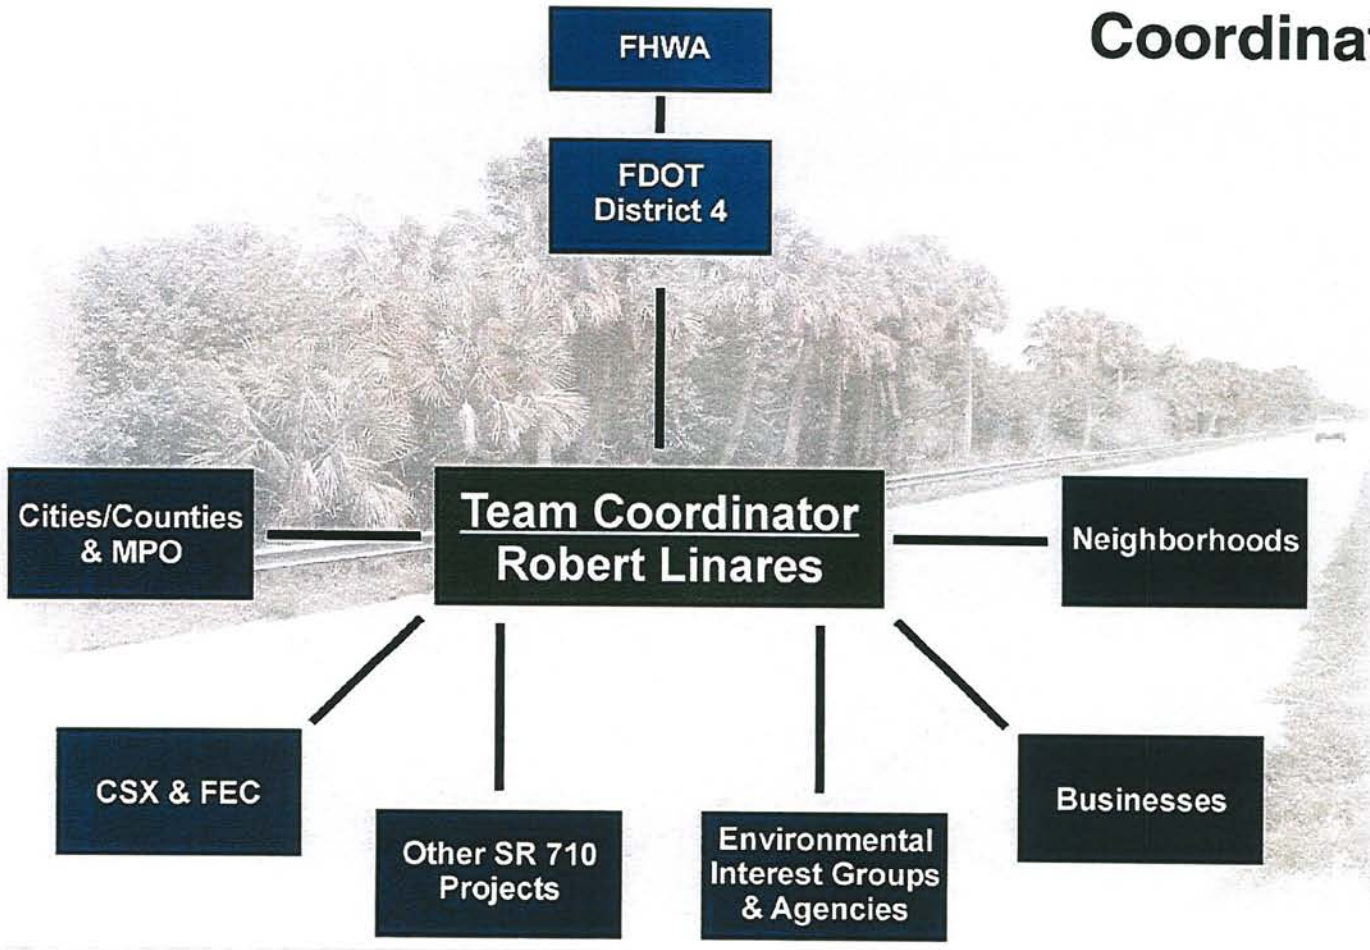

Prepare the necessary Environmental documents In accordance with the Department's PD&E Manual with ETDM input as appropriate

Public Involvement Issues & Approach

Coordination

Public Involvement Issues & Approach

Community Involvement

- Meetings:
  - Agency/Elected Officials Kick-off Meeting
  - Public Kick-off Meeting
  - County Commissioners Presentation
  - Public Alternatives Workshop
  - Public Hearing
- Ways of engaging the community:
  - Fact sheets
  - Newsletters
  - Project website
  - Public meetings
  - Preparing responses to inquiries

Questions?

SR-710 Project Development & Environment Study

From CR 714 to CR-609 in Martin County

Financial Project ID:
419344-1-22-01

Elected Officials & Agency Kick-off Meeting

March 12, 2008

Prepared by:

CAMBRIDGE SYSTEMATICS

In Association with:
Metric Engineering
C3TS
Quest Ecology

Transit Study Outline

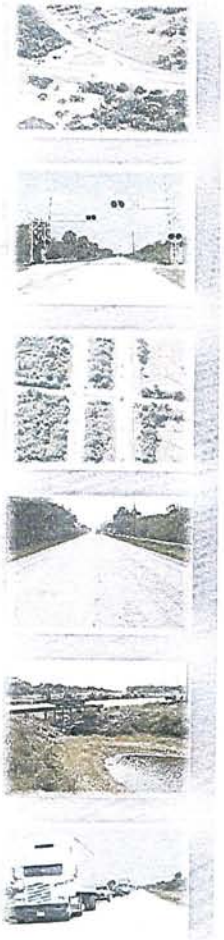

- Study Objective
- Existing Condition
- Opportunities
- Florida's Rail Vision Plan
- Transit Vision
- National Examples

Project Objectives

- Identify NEED for transit into SR 710 corridor
- Develop CONCEPTS for providing transit service
- Identify future RIGHT-OF-WAY needs for transit service

Not your Typical Transit corridor?

Existing CSX tracks parallel to SR 710 – major advantage!

⇨Opportunity to create a sustainable transportation corridor for the future

What can it look like?

- **Green corridor: WPB to Orlando**
  - Reduced auto dependence
  - Economic development benefit
  - Greenway
  - Emissions
  - Oil dependence

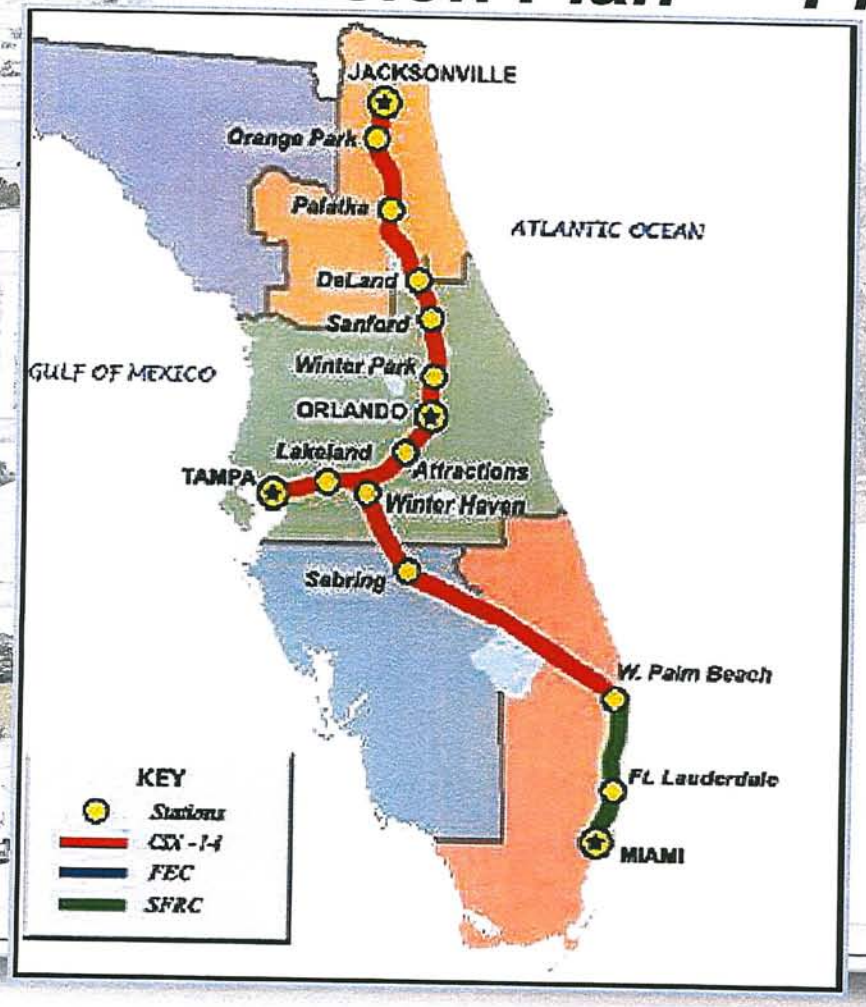

"Vision Plan" – GOALS

- **Connect all major urban areas not commonly served by air or rail.**
- **Use a combination of FEC and CSX rights-of-way as well as segments of highway corridors.**
- **Be eligible for Federal funding by meeting FRA's requirements.**

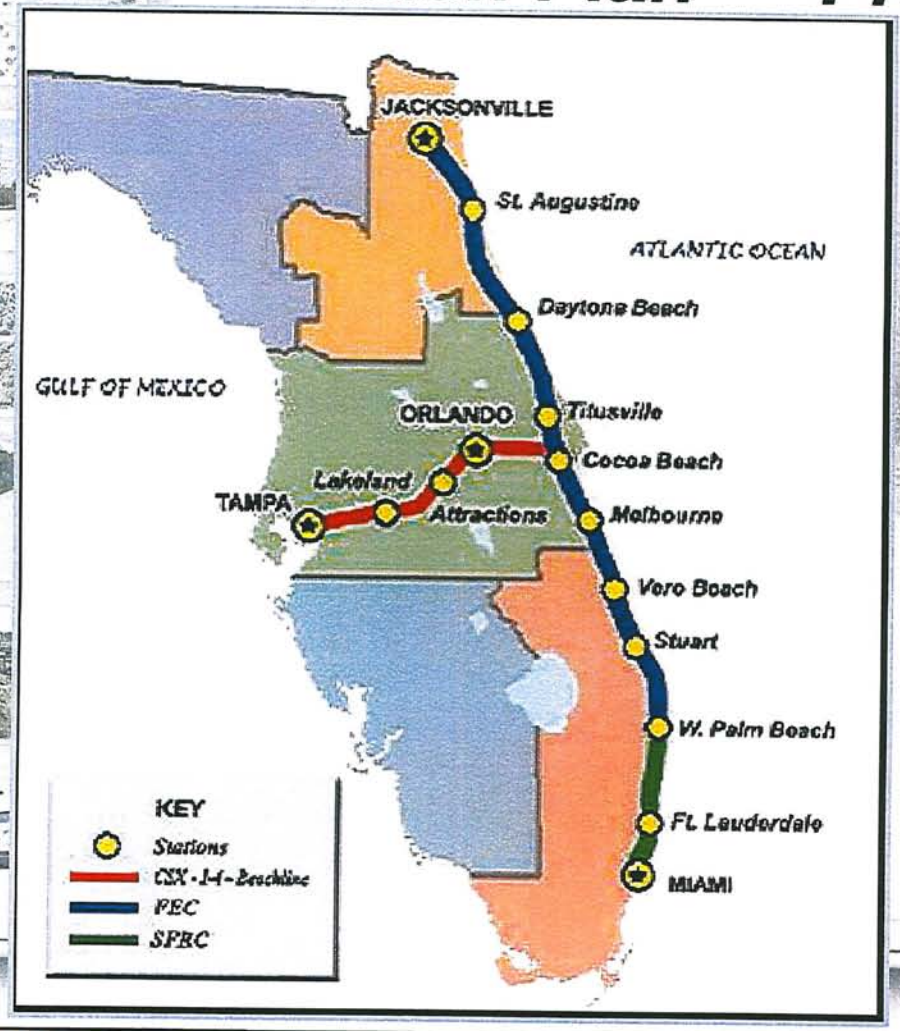

"Vision Plan" – Proposed Routes

- **Inland Route:**
  - CSX, SFRC and I-4 rights-of-way
  - CSX partnership
  - Lower-cost option to incrementally build-up system
  - Phase 1 (2010) - Phase 4 (2020)

Florida Intercity Passenger Rail

"Vision Plan" – Proposed Routes

- **Coastal Route:**
  - SFRC, FEC, I-4, and Beachline Exp rights-of-way
  - FEC partnership
  - More expensive but higher demand and better financial performance
  - Phase 1 (2010) - Phase 4 (2020)

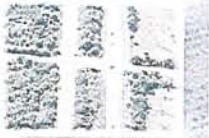

"Vision Plan" – SR 710 Implications

- **Inland Route:**
  - **Parallel to SR710**
  - **CSX right-of-way**
  - **Connecting West Palm Beach to Sebring**
- **No stations Indiantown & City of Okeechobee.**
- **Speed 110 mph.**
- **Indiantown & City of Okeechobee connection options:**
  - **Intercity buses**
  - **Local urban train**
  - **Bus transit service**

Builds on Existing Infrastructure

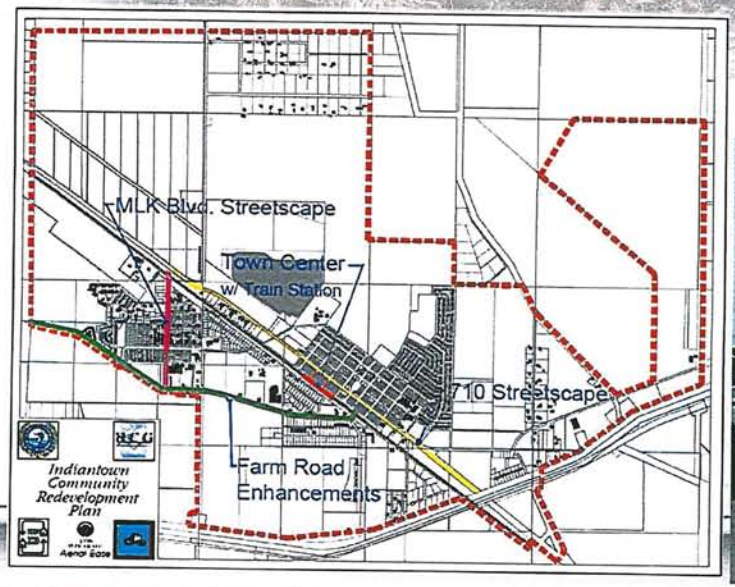

- CSX right of way
- Amtrak service
- Amtrak stations
- City / County Plans

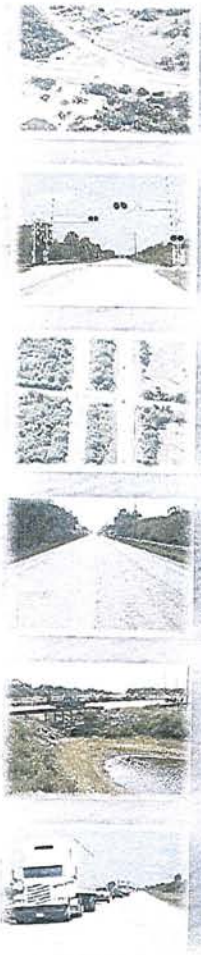

CAMBRIDGE SYSTEMATICS

Transit Vision for SR 710 Corridor

- **Modern passenger trains:**
  - Fast service
  - Reliable
  - Safe
  - Wireless enabled
  - Comfort and convenience

Future Capital MetroRail train design

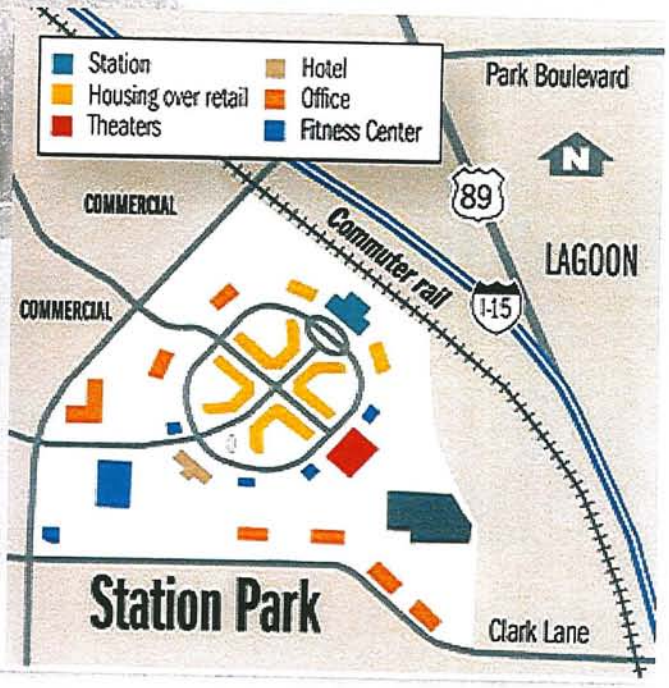

Benefits of Transit Oriented Development (TOD)

- Create livable communities
- Higher property values
- Increased commercial activity
- Increased tax revenue

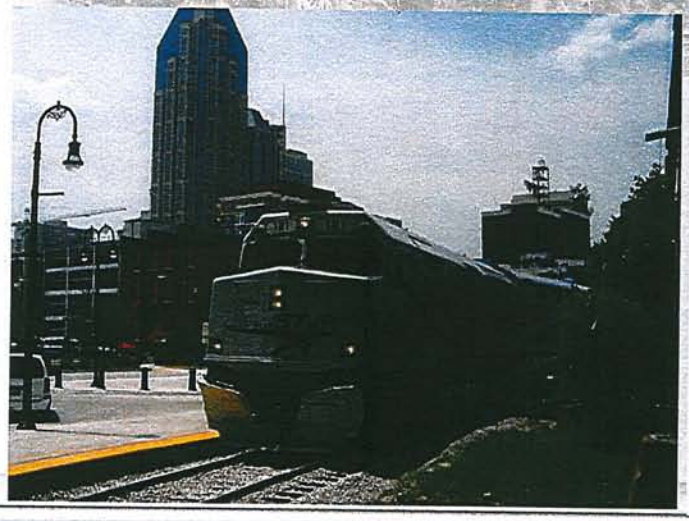

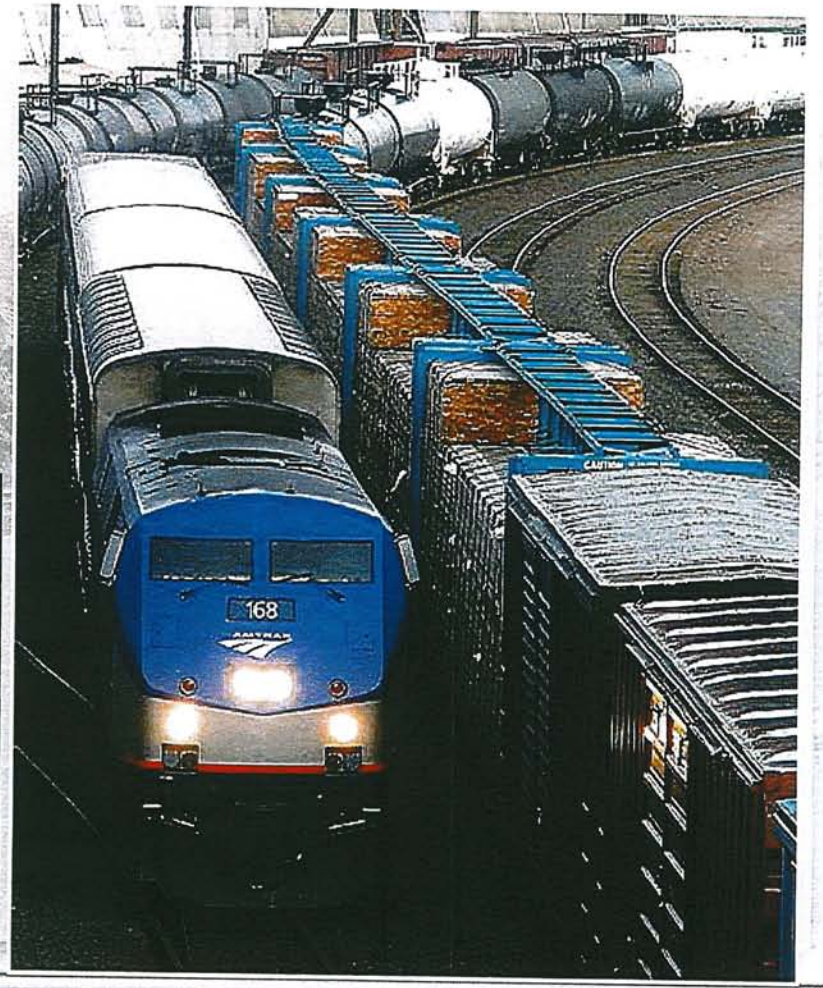

Case Studies

- Austin
- Portland
- Nashville

Capitol MetroRail Austin, Texas

- 32-miles
- Fall 2008
- Use existing freight tracks
- Initial service 30 min in AM & PM peaks
- Connecting shuttle buses

CAMBRIDGE SYSTEMATICS

Capitol MetroRail – Austin, Texas

- Sleek new trains with comfort and style
- High-back seats, bicycle and overhead racks, and Wi-Fi connections

Capitol MetroRail – Austin, Texas

- Transit Oriented Development (TOD) near stations - pedestrian-friendly
- Park & ride sites
  Bus, bike or foot accessibility
  Kiss & ride

Download HiRes

M. L. King Jr.

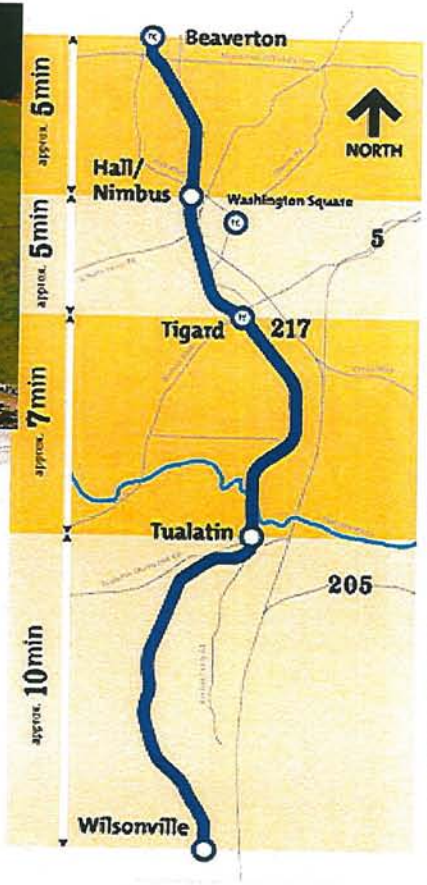

M. L. King Jr.

Westside Commuter Rail – Portland, Oregon

- 27 minutes from Wilsonville to Beaverton
- Free parking at four stations
- Free Wi-Fi internet access on board
- Comfortable seats and a smooth ride
- TransitTracker™ displays at all stations
- Ticket machines at all stations

I-205 MAX Light Rail – Portland, Oregon

- "Transitway" created in the 1970s when I-205 built
- Construction March 2007
- Open in Fall 2009

I-205 MAX Light Rail – Portland, Oregon

- Connects two counties in SE Portland
- Coordinated transit access
- Public art in stations

Funding Options

- **Subsidy Minimization (Capital Costs)**
  MAX Airport Extension
  - First public-private project in Oregon (Sept 2001)
  - Developer paid 23% ($28M) for rights to 120-acre mixed use parcel
  - Reduced public subsidy

Funding Options

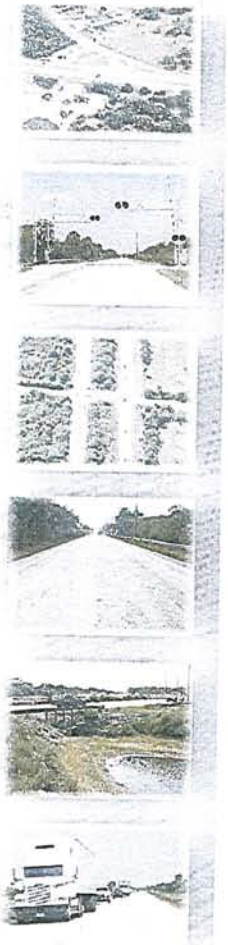

- **Special Assessment (Operating Costs)** ***Tampa Streetcar***
  - Open October 2002
  - Revitalize Ybor City
  - Operations funded by:
    - Special Assessment District
    - Endowment
    - Farebox
    - Advertising Revenue

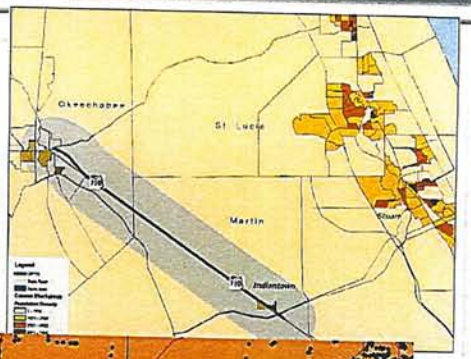

Study Activities

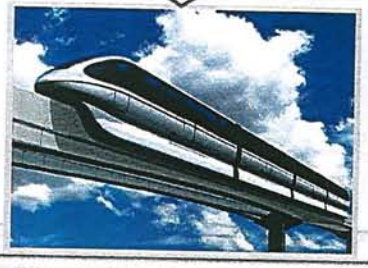

- Existing Transit Services
- Existing Demographic Conditions
- Planned Growth, DRIs
- Traffic Growth
- Transit Technologies
- Technology Assessment

STEPHANIE C. KOPELOUSOS
SECRETARY

February 20, 2008

Dear Property Owner:

SUBJECT: **State Road 710 Project Development and Environment (PD&E) Study**
Public Kickoff Meeting
Financial Project Number: 419344-1-22-01
County: Martin
Highway Limits: County Road 714 to County Road 609

The Florida Department of Transportation (FDOT) District 4 has scheduled a Public Kickoff Meeting for the above referenced project. This project is in the Project Development and Environment (PD&E) phase, which includes the evaluation of improvement alternatives proposed to State Road 710 (Beeline Highway) from County Road 714 (SW Martin Highway) to County Road 609 (Allapattah Road) in Martin County. The Public Kickoff Meeting will be held on Wednesday, March 12, 2008, at 5:30 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street. Enclosed is a Project Location/Meeting Location Map.

Section 339.155(6), Florida Statutes, requires the FDOT to give notice to those whose property lies, in whole or in part, at least 300 feet on either side of the centerline of any alternative for the proposed facility even though they may not be directly affected.

If you require further information concerning this project, please contact the Project Manager, Mr. Gregor Senger at (954) 777-4141 or toll free at (866) 336-8435 ext. 4141. Mr. Senger may be contacted via e-mail at gregor.senger@dot.state.fl.us.

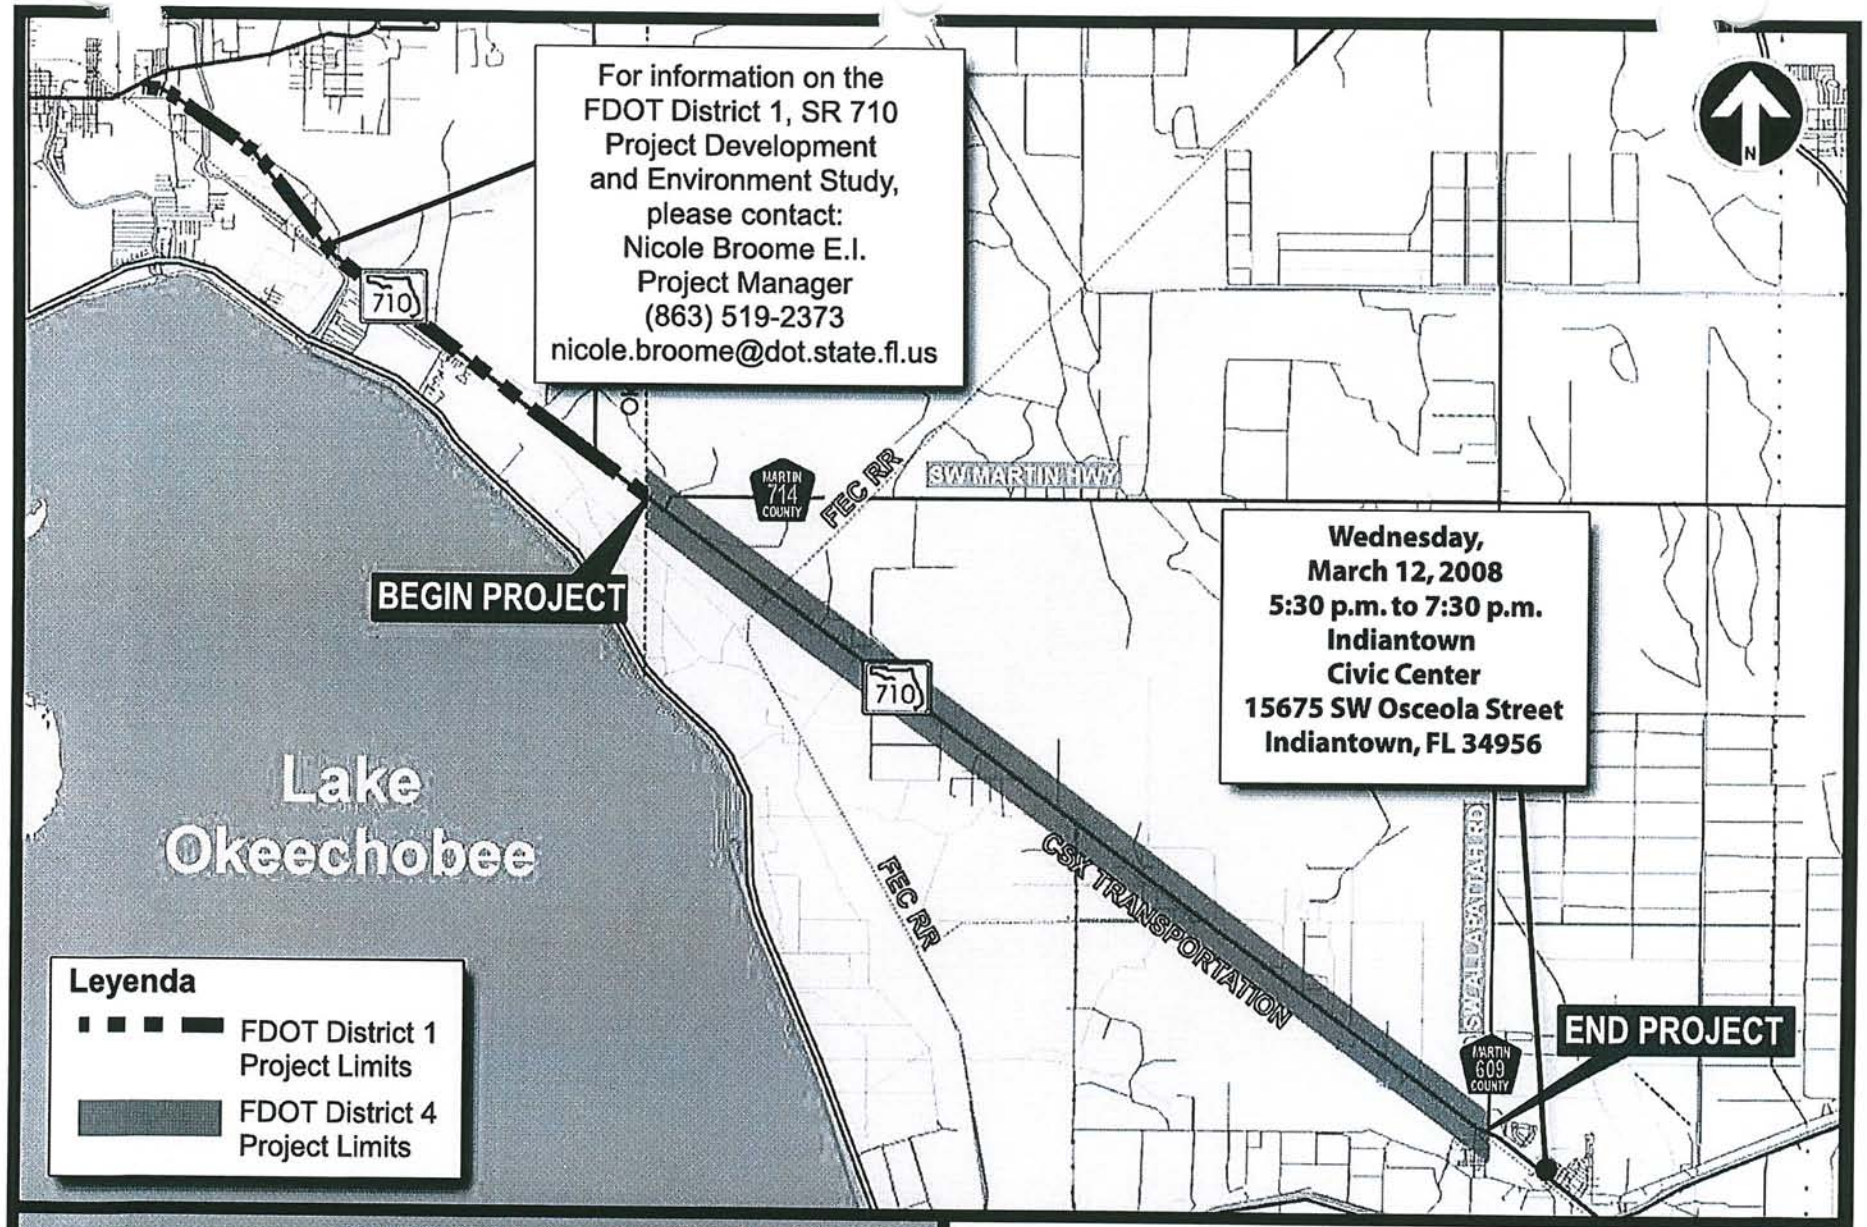

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact the Project Manager at least seven days prior to the meeting.

Sincerely,

Paul A. Lampley, P.E.
District Project Development Engineer

Fort Pierce may have to trim up to $6M

BY ALEXI HOWK
alexi.howk@scripps.com

FORT PIERCE — Just as many government officials elsewhere have been saying all along, Fort Pierce officials say fewer property tax revenues might mean less grass being mowed, fewer code enforcement officers on the road and parks being neglected.

Over the next five months, city officials will evaluate the potential effects property tax reform might have on the city's revenues, and as a worst-case scenario, officials are projecting trimming $6 million from next year's budget.

City Manager Dennis Beach asked department heads in a Feb. 27 memo to prepare for the possibility of having to eliminate employees. Local governments are faced with cutting expenditures in light of 64 percent of the state's voters calling for a reduction in their property taxes.

"The most challenging element of this direction is that Governor Crist and the Florida Legislature repeatedly told the voting public that they could reduce taxes and not impact services," Beach wrote. "Our proposals that reflect decreased service or increase tax rate will be met with surprise and shock."

Beach will present city commissioners with at least four budget proposals during a budget workshop on March 25.

Ex-track coach pleads guilty to sex with teens

BY TYLER TREADWAY
tyler.treadway@scripps.com

FORT PIERCE — A former track coach accused of having sex with girls on his team faces 16 months to 25 years in prison after he pleaded guilty Tuesday morning to five counts of attempted child abuse.

Several former members of the Treasure Coast Track Club told authorities their coach, Franklin Roosevelt Harris, 62, of the 1700 block of Southeast Blockton Avenue in Port St. Lucie, either touched them inappropriately or had sex with them between 2003 and 2006.

At the hearing Tuesday, Assistant State Attorney Daryl Krauza told Circuit Court Judge Robert Belanger that in November 2006, authorities caught Harris on tape attempting to have sex with a team member.

The state agreed to drop several charges of sexual activity with a minor in exchange for the guilty plea; but Krauza said after the hearing he intends to seek the maximum prison sentence, which he said probably would keep Harris off the streets for the rest of his life.

Airport tower may be danger to planes

BY DEREK SIMMONSEN
derek.simmonsen@scripps.com

ST. LUCIE COUNTY — An aircraft pilots association is concerned a communications tower at the St. Lucie County International Airport might be a danger to planes.

The Federal Aviation Administration and county officials said they'll take a close look at the tower, which serves the airport's aircraft rescue and firefighting unit, because of questions raised in a letter sent last week to County Commission Chairman Joe Smith.

"A number of local pilots have contacted us with complaints that this structure's height and location is a significant safety hazard to operations," wrote Bill Dunn, vice president of the Aircraft Owners and Pilots Association. The Maryland-based group represents about 415,000 pilots throughout the country.

According to the FAA, the tower is about 842 feet from Runway 27; Dunn's group lists the distance as about 785 feet. Dunn wrote that the 125-foot tower might not be seen by departing or arriving aircraft flying by instruments alone, without the aid of visual navigation.

The tower's height may conflict with federal regulations, the letter states.

Obituaries

WEST PALM BEACH

Charles Shepherd

Charles A. Shepherd, 46, died March 3, 2008, at Good Samaritan Medical Center in West Palm Beach.

He was born in Brooklyn, N.Y., and lived in West Palm Beach for five months, coming from Port St. Lucie.

He was an automotive salesman for All Wholesale in Fort Pierce.

He was a former member of Morningside Church in Port St. Lucie.

Survivors include his wife of eight years, Diane Shepherd of West Palm Beach; mother, Ruth Shepherd of Saratoga Springs, N.Y.; father, Edward Shepherd Sr. of Livonia, Ga.; brothers, Tom Shepherd of Kendall and Edward Shepherd of Port St. Lucie; and stepsister, Wendy.

SERVICES: There will be a memorial gathering from 6 to 7 p.m. March 6 with a service at 7 p.m. at the Byrd, Young and Prill Port St. Lucie Funeral Home. A guest book may be signed at www.byrdyoungandprill.com

PORTLAND, Ore.

Evelyn Smith

Evelyn Smith, 84, died Feb. 29, 2008.

She was born in Millville, N.J., and lived in Portland, Ore., moving from Hobe Sound.

Prior to retirement, she worked for Aetna as a claims adjuster.

She attended Hobe Sound Presbyterian Church.

Survivors include her sons, Dean Marriott of Portland and Robert Marriott of Chapel Hill, N.C.; and three grandchildren.

She was preceded in death by her husband, David Smith.

Memorial contributions may be made to the American Red Cross, 2750 S. Kanner Highway, Stuart, FL 34994.

SERVICES: A memorial service will be this summer in Cape May, N.J. Arrangements are by Caldwell's Hennessey, Goetsch, McGee Funeral Home in Portland.

VERO BEACH

Ernest Walker

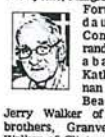

Ernest Weldon Walker, 80, died March, 3, 2008, at his daughter's home in Vero Beach.

He was born in Penoak, W.Va., and lived in Fort Pierce for 49 years, coming from Northfork, Va.

Prior to retirement, he worked for 18 years as a batch mixer for Rinker Materials in Vero Beach and Fort Pierce. He had been a coal miner in West Virginia.

He was a member of North Side Christian Fellowship Church in Fort Pierce.

Survivors include his wife of 61 years, Margie Walker of

Fort Pierce; daughters, Connie Durand of Malabar and Kathy Brennan of Vero Beach; son, Jerry Walker of Sarasota; brothers, Granvel Shelby Walker of Clinton, Md., and Landon Elwood Walker of Tappahannock, Va.; sister, Jewel Akel of Wadesboro, N.C.; stepbrothers, James Bailey, Eugene Bailey, Harold Bailey and Jackie Bailey; stepsister, Virginia Phillip; eight grandchildren; and 13 great-grandchildren.

He was preceded in death by a son, Randall Walker; seven brothers; three sisters; and one stepbrother.

Memorial contributions may be made to the North Side Christian Fellowship Church, 3100 St. Lucie Blvd., Fort Pierce, FL 34946.

SERVICES: Visitation will be from 5 to 8 p.m. March 5 at Aycock Funeral Home in Fort Pierce. A service will be at 11 a.m. March 6 at the funeral home, with the Revs. James Biles and Marvin Jones officiating. Interment will follow at Hillcrest Memorial Gardens in Fort Pierce.

STUART

Rita Wintercorn

Rita Wintercorn, 86, died Feb. 20, 2008, at Parkway Health and Rehabilitation Center in Stuart.

She was born in Chicagoand lived in Florida, primarily in Jupiter, for 50 years, coming from her birth place.

She worked as a secretary in a plumbing business for almost 15 years.

She was church organist for many years at St. Jude's parish in Jupiter.

Survivors include her son, Gary Wintercorn of Stuart; daughters, Carol Wintercorn of Olympia, Wash., and Susan Chafin of Stuart; sister, Dolores Wintercorn of Auburn, Ala.; and seven grandchildren.

She was preceded in death by her husband, Robert Wintercorn.

Memorial contributions may be made to treasure Coast Hospices 1201 S.E. Indian St., Stuart, FL 34997.

SERVICES: A memorial Mass will be celebrated at 10:30 a.m. March 14 at St. Christopher's Catholic Church in Hobe Sound. Interment will be in Riverside Memorial Park in Tequesta. Arrangements are by Veterans Cremation & Burial Society in Stuart.

FORT PIERCE

Does you child dream of being an astronaut?

St. Lucie County's Parks and Recreation staff will entertain your children with "Wannabe Nights" while you enjoy an evening out.

Conducted at the Fort Pierce Community Center, 600 N. Indian River Drive, the program entertains and educates children ages 7 to 11 with hands-on experiences, pretend play, props and more.

"I Wannabe An Astronaut" will be the theme from 6 to 10 p.m. March 14 as children learn about space, rockets and astronauts. Cost is $20 per child, with a $5 discount for each additional in family, and includes the activities, dinner and a movie.

Pre-registration is required. For information, call the community center, at (772) 462-1792.

TREASURE COAST

Wildlife viewing contributes $3B

The Florida Fish and Wildlife Conservation Commission says wildlife viewing in 2006 contributed more than $3 billion in total economic impact throughout the state.

A recently released a report, "The 2006 Economic Benefits of Wildlife-Viewing Recreation in Florida," prepared by Southwick Associates Inc., uses data from the "2006 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation" from the U.S. Fish and Wildlife Service and the U.S. Census Bureau.

According to the report, 3.3 million Floridians viewed wildlife at or near their homes, and 1.6 million Floridians and tourists traveled throughout Florida for the sole purpose of wildlife viewing.

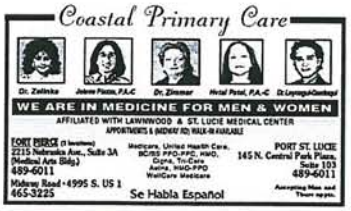

The commission provides opportunities for wildlife viewing through projects such as the Great Florida Birding Trail, a 2,000-mile, self-guided highway tour, unifying 445 birding sites throughout Florida. Free guidebooks with directions and maps make wildlife viewing a simple task for residents and visitors alike.

The annual economic impact of recreational hunting, fishing and wildlife viewing in Florida tops $11 billion, according to the commission.

From staff reports

NOTICE OF

SPECIAL CITY COMMISSION

MEETING

Notice is hereby given that the City of Stuart City Commission will conduct a Special Meeting on Monday March 10, 2008 beginning at, 3:30 pm, at 121 SW Flagler Avenue, Stuart Fl. 34994, City Hall Commission Chambers; to discuss the following:

- Impact of Mandatory Water Restrictions.
- Utility Rates.
- Water Conservation Rates.

The public is invited to attend. Any person deciding to appeal any decision made at the hearing will need to ensure that a verbatim record of the proceedings is made.

All interested parties may attend said meeting and offer comment. In compliance with the Americans with Disabilities Act (ADA), anyone who needs a special accommodation for this meeting should contact the City's ADA coordinator at 288-5306 at least 48 hours in advance of the meeting, excluding Saturday and Sunday.

State

Legislators to discuss state university amendment

BY SCOTT TRAVIS
Sun-Sentinel

A proposed constitutional amendment would give Florida's state university system its third major shake-up this decade, and some fear it could bring more instability to an already financially challenged system.

State Senate budget chief Lisa Carlton, R-Osprey, has proposed abolishing the Board of Governors, the policy-making board for the state university system, and reconstituting it as a less powerful body. If three-fifths of the Legislature passes the bill, it would go before voters as a constitutional amendment this fall. The Legislature expects to discuss the proposal this week.

The proposed reorganization comes as the university system is facing $49 million in budget cuts this year and possibly more next year.

The amendment would settle an issue now in court who has the authority to set tuition for Florida's 11 state universities. The Board of Governors voted in January to raise tuition at universities by 8 percent for next fall, but legislators say the Board has no such authority. The Legislature would retain control of tuition under the amendment.

"We are going to allow the people to have a clear and transparent vote on the issue," said Senate President Ken Pruitt, R-Port St. Lucie, a champion of the amendment. "Do they want an un-elected board to set tuition, or do they want their Legislature, a body elected by the people, to set it?"

Chancellor Mark Rosenberg said in a conference call Tuesday that he fears this measure would create a "brain drain" because university faculty would leave to work in a state with a more stable higher education governing system. Less-accomplished faculty could mean a weakened education for students.

Lonnie Ingram, a microbiology professor at the University of Florida, wrote the Board of Governors a letter voicing similar concerns.

"It is likely that the numerous re-organizations, budget and declining academic climate has hurt our ability to hire in some cases," and persuaded others to leave the state, he said.

Alceste T. Pappas, a Connecticut consultant who drafted a report last year on the future of the state's higher education system, told the Board of Governors that other states are looking at Florida to "poach faculty and presidents." She said the current structure needs another three to five years to mature.

Under the proposed amendment, the new Board of Governors would be an eight-member administrative body, with five members appointed by the governor, a faculty member, a student member and a newly created, elected commissioner of education. Right now, there is an appointed education commissioner who oversees the K-12 and community college system and an appointed university chancellor.

The new Board of Governors would lead the university system through the Legislature and would have less autonomy, state officials said. Critics say it could allow politics to enter decisions affecting the state's colleges and universities.

For 30 years, the Board of Regents controlled Florida's public universities. That changed in 2001 when the Legislature abolished the board and created Boards of Trustees with local control at individual universities.

Then in 2002, voters approved a constitutional amendment to create a statewide Board of Governors to oversee the university system. But the Boards of Trustees remained, creating confusion over control.

Norman Tripp, chairman of the Florida Atlantic University Board of Trustees, said he hasn't studied the Legislature's proposal closely. He supports elected officials setting tuition.

"At the end of the day, when we talk about the people's concerns, in our form of government the people are represented by the Legislature," he said.

Modesto "Mitch" Maldique, president of Florida International University, said the issue of who governs the university system is secondary to ensuring schools have enough money to operate.

"Fund us competitively and we will perform, regardless of the structure," he said.

Mother, daughter guilty of keeping teen as slave

BY JENNIFER KAY
The Associated Press

Evelyn Theodore and her daughter, Maude Paulin, were convicted of conspiring to violate Simone Celestin's Thirteenth Amendment rights.

FORT LAUDERDALE — A mother and daughter were found guilty Tuesday of keeping a Haitian teen as their slave for six years in their South Florida home.

Evelyn Theodore and her daughter, Maude Paulin, were convicted of conspiring to violate Simone Celestin's Thirteenth Amendment rights to be free from slavery and forcing her to work for them.

Paulin also was convicted of harboring an illegal alien for financial gain.

Paulin's ex-husband and her mother, Theodore, were found not guilty of harboring an illegal alien for financial gain, but were convicted on a lesser charge of harboring an illegal alien.

Claire Telasco, Paulin's sister, was acquitted of conspiracy and forced labor charges.

The jury of six men and six women deliberated for a little more than five hours before returning a verdict Tuesday afternoon.

Paulin's biological daughter ran from the courtroom crying as the verdicts were read. Other relatives gasped in relief when Telasco's not guilty verdicts were read.

Celestin was not present for the verdict, though she testified last week.

Celestin, now 22, testified Wednesday that she considered suicide after years of beatings and intimidation. She tearfully described sleeping on the floor, rummaging through cast-off clothes in the garage for something to wear, bathing from a bucket or a garden hose and scrubbing floors when she should have been in school.

She said Theodore and Maude Paulin often struck her with their hands, shoes or objects such as a curling iron or a mortar if she didn't finish the work to their satisfaction.

Defense attorneys argued during trial the Celestin's allegations of abuse were motivated by her desire to be a permanent legal resident of the U.S.

The jury also was asked to consider whether Paulin should forfeit her home and other property used to keep Celestin working and out of school.

Red Sox scout accused of lewd act

BY WILL GREENLEE
will.greenlee@scripps.com

PORT ST. LUCIE — A scout for the Boston Red Sox accused of committing a lewd act in a hotel room that overlooked the pool where two teenage sisters saw him was arrested Monday, police said Tuesday.

Jesse Levis, 39, faces two felony counts of committing lewd and lascivious acts in the presence of children less than 16. Police and a U.S. Marshals task force arrested him at a Melbourne hotel after he was kicked out of the Springhill Suites in St. Lucie West where the incidents reportedly happened.

Levis, of Pennsylvania, is accused of committing the act on Sunday in the view of sisters, 13 and 14 years old, before hotel management was notified.

Police identified Levis as a scout for the Boston Red Sox. The Philadelphia native, who bats left, throws right and attended the University of North Carolina, also played catcher for the Cleveland Indians and Milwaukee Brewers beginning in 1992.

Two adult sisters also saw Levis during the act, and prosecutors are expected to soon file charges corresponding to these victims, said Officer Robert Vega, police spokesman.

Levis declined to speak with investigators Monday, but told an officer Sunday that he got undressed as the curtains were open and walked into the bathroom and took a shower. He then walked to his clothes, which were hanging by the window, and got dressed before going to dinner at a nearby restaurant.

John Blake, vice president of media relations for the Red Sox said, "the Red Sox are taking this very seriously and we're looking into all the facts."

Levis was released Tuesday morning from the St. Lucie County jail on $50,000 bail, a jail official said.

Obituaries

WEST PALM BEACH

Charles Shepherd

Charles A. Shepherd, 46, died March 3, 2008, at Good Samaritan Medical Center in West Palm Beach.

He was born in Brooklyn, N.Y., and lived in West Palm Beach for five months, coming from Port St. Lucie.

He was an automotive salesman for All Wholesale in Fort Pierce.

He was a former member of Morningside Church in Port St. Lucie.

Survivors include his wife of eight years, Diane Shepherd of West Palm Beach; mother, Ruth Shepherd of Saratoga Springs, N.Y.; father, Edward Shepherd Sr. of Livonia, Ga.; brothers, Tom Shepherd of Kendall and Edward Shepherd of Port St. Lucie; and stepsister, Wendy.

SERVICES: There will be a memorial gathering from 6 to 7 p.m. March 6 with a service at 7 p.m. at the Byrd, Young and Prill Port St. Lucie Funeral Home. A guest book may be signed at www.byrdyoungandprill.com

PORTLAND, Ore.

Evelyn Smith

Evelyn Smith, 84, died Feb. 29, 2008.

She was born in Millville, N.J., and lived in Portland, Ore., moving from Hobe Sound.

Prior to retirement, she worked for Aetna as a claims adjuster.

She attended Hobe Sound Presbyterian Church.

Survivors include her sons, Dean Marriott of Portland and Robert Marriott of Chapel Hill, N.C.; and three grandchildren.

She was preceded in death by her husband, David Smith.

Memorial contributions may be made to the American Red Cross, 2750 S. Kanner Highway, Stuart, FL 34994.

SERVICES: A memorial service will be this summer in Cape May, N.J. Arrangements are by Caldwell's Hennessey, Goetsch, McGee Funeral Home in Portland.

VERO BEACH

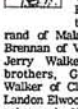

Ernest Walker

Ernest Weldon Walker, 80, died March, 3, 2008, at his daughter's home in Vero Beach.

He was born in Penoak, W.Va., and lived in Fort Pierce for 49 years, coming from Northfork, Va.

Prior to retirement, he worked for 18 years as a batch mixer for Rinker Materials in Vero Beach and Fort Pierce. He had been a coal miner in West Virginia.

He was a member of North Side Christian Fellowship Church in Fort Pierce.

Survivors include his wife of 61 years, Margie Walker of Fort Pierce; daughters, Connie Durand of Malabar and Kathy Brennan of Vero Beach; son, Jerry Walker of Sarasota; brothers, Granvel Shelby Walker of Clinton, Md., and Landon Elwood Walker of Tappahannock, Va.; sister, Jewel Akel of Wadesboro, N.C.; stepbrothers, James Bailey, Eugene Bailey, Harold Bailey and Jackie Bailey; stepsister, Virginia Phillips; eight grandchildren; and 13 great-grandchildren.

He was preceded in death by a son, Randall Walker; seven brothers; three sisters; and one stepbrother.

Memorial contributions may be made to the North Side Christian Fellowship Church, 3100 St. Lucie Blvd., Fort Pierce, FL 34946.

SERVICES: Visitation will be from 5 to 8 p.m. March 5 at Aycock Funeral Home in Fort Pierce. A service will be at 11 a.m. March 6 at the funeral home, with the Revs. James Biles and Marvin Jones officiating. Interment will follow at Hillcrest Memorial Gardens in Fort Pierce.

STUART

Rita Wintercorn

Rita Wintercorn, 86, died Feb. 20, 2008, at Parkway Health and Rehabilitation Center in Stuart.

She was born in Chicagoand lived in Florida, primarily in Jupiter, for 50 years, coming from her birth place.

She worked as a secretary in a plumbing business for almost 15 years.

She was church organist for many years at St. Jude's parish in Jupiter.

Survivors include her son, Gary Wintercorn of Stuart; daughters, Carol Wintercorn of Olympia, Wash., and Susan Chafin of Stuart; sister, Dolores Wintercorn of Auburn, Ala.; and seven grandchildren.

She was preceded in death by her husband, Robert Wintercorn.

Memorial contributions may be made to treasure Coast Hospices 1201 S.E. Indian St., Stuart, FL 34997.

SERVICES: A memorial Mass will be celebrated at 10:30 a.m. March 14 at St. Christopher's Catholic Church in Hobe Sound. Interment will be in Riverside Memorial Park in Tequesta. Arrangements are by Veterans Cremation & Burial Society in Stuart.

PD&E ISSUES

State Road 710 (Beeline Highway)
Project Development and Environment Study (PD&E)

From CR 714 (S.W. Martin Highway) to CR 609 (Allapattah Road)
Martin County, Florida
FM#: 419344-1-22-01

PROJECT DESCRIPTION AND PURPOSE

The Florida Department of Transportation (FDOT) District 4 has initiated a Project Development and Environment (PD&E) Study for State Road 710 (Beeline Highway) from County Road 714 (S.W. Martin Highway) to CR 609 (Allapattah Road), just west of Indiantown in Martin County. The total project length is 15 miles. The PD&E Study is in its early stages and is expected to continue through 2009.

The purpose of this multimodal capacity project is as follows:

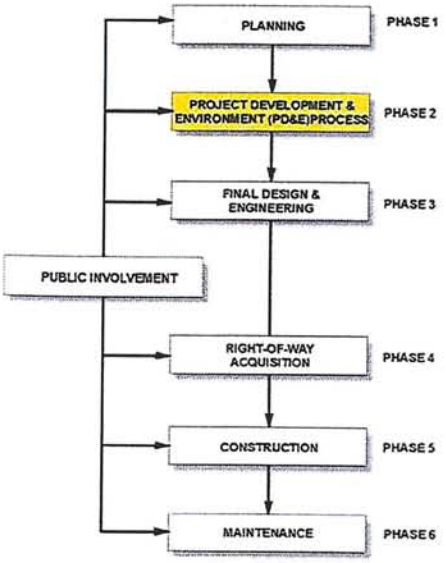

- Roadway widening from two to four lanes
- Reduce congestion created by anticipated population and employment growth in the county and wider region
- Enhance mobility, safety, emergency access and truck movement within and through Martin County.
  - SR 710 serves as a designated emergency evacuation route and a primary arterial road for Martin County.
- Study regional transit opportunities along the SR 710 corridor.

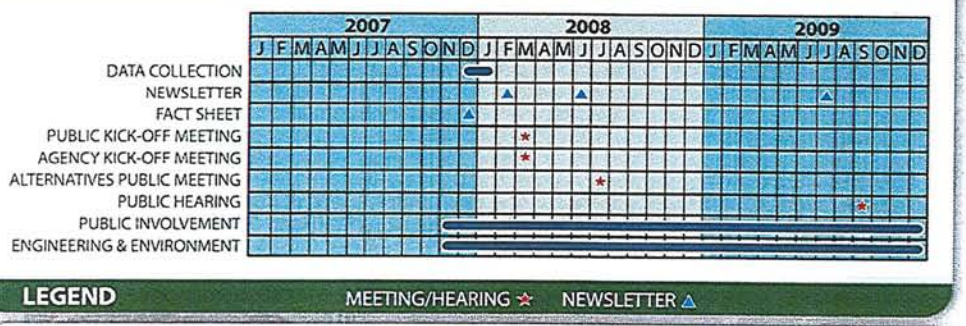

FDOT PARTNERS WITH PUBLIC IN STUDY

FDOT has embarked on a public involvement program as a part of the SR 710 PD&E Study. The public involvement began in 2007 and will continue throughout the study. The public involvement process is designed to ensure public input in the development of the project alternatives by actively encouraging and facilitating the involvement of the general public, citizen groups, interest groups, elected and appointed officials, environmental resource agencies, and other stakeholders. Opportunities to comment include communication with project staff and attending public meetings.

Public Kickoff Meeting
Wednesday, March 12, 2008
5:30 p.m. to 7:30 p.m.
Indiantown Civic Center
15675 S.W. Osceola Street
Indiantown, FL 34956

Engineers lay out State Road 710 widening plans

BY VERONICA HOLT
Thursday, March 13, 2008

INDIANTOWN — Planning officials had a kickoff meeting Wednesday to help members of the community understand the workings of a proposal to widen the main road through this rural community.

Florida Department of Transportation officials plan to widen State Road 710, also known as the Beeline Highway and Warfield Boulevard, from two to four lanes along a 15-mile of stretch between County Road 714 and County Road 609. About 15 residents attended the hearing.

This project, headed by contractor Metric Engineering, is supposed to ease the effects of growth in the area. More than 6,500 houses, hundreds of thousands of square feet of commercial space and millions of square feet of industrial space are either under construction or in the planning stage in Indiantown.

"There is a massive amount of increase in employment and population that are projected for this area of Indiantown and surrounding Indiantown, so this is looking at addressing the future need of capacity and safety improvements along the corridor," said Robert Linares, vice president of transportation planning for Metric Engineering.

The plans are still in the preliminary stages, and Linares said he doubts the project will be completed until 2015.

The Martin Metropolitan Planning Organization decided in December to ask for community input on plans to widen bothS.R. 710,and C.R. 609 and bypass S.R. 710/Warfield Boulevard around Downtown Indiantown.

"As far as community involvement, this is the time we really need to hear from the community," Linares said.

He said this route is an important one for carrying traffic and freight. Project Manager Gregor Senger predicts that the widening should cost between $100 million to $200 million.

"With construction costs constantly going up, it's very difficult to know how much this project will cost," Senger said.

One of the obstacles the planners foresee in this project is the road goes by some wetlands, although it is still unclear what the scope of the impact will be.Vivienne Handy, principal ecologist for the project said her company, Quest Ecology, is tracking the different types of wildlife along the route."There are a number of wetlands along the corridor. We map those and then we determine what potential impact may occur," Handy said.The team hopes to gain the support of residents.

"They've been very good about requesting public input," Indiantown resident Kevin Powers said. "Now's your time to put your two cents in."

#1 Posted by renaisance on March 13, 2008 at 6:01 a.m. (Suggest removal)

Why does it cost 100 - 200 million to build 2 lanes for 15 miles. Contractors are out of work and the Right of Way has been cleared for the most part. Plus, the most expensive cost (the expansion of the bridge) has already been designed and budgeted? DOT also has to look at doing the same amount of work for a lower cost.

#2 Posted by hayzus on March 13, 2008 at 6:17 a.m. (Suggest removal)

Costs are costs. Road contractors aren't *that* crazy to do work for less than cost. Most are bidding work at a nominal fee, usually less than 10%. I don't know many industries that would be happy with as little profit as what roadway contractors make. In fact, most other industries would declare bankruptcy at that little projected profit.

I'm sure this design isn't all that simple either; there currently are roadside ditches for drainage. These all need to be filled in and drainage systems put in place; then acquisition of

...e made as well. Add into the equation the costs aren't any material suppliers near this area, so ...nd expensive, especially with the cost of gas and ...etched and is pretty reasonable.

...on.)

SR 710 (Beeline Highway)
Project Development and Environment (PD&E) Study
Public Kickoff Meeting
Meeting Minutes
March 12, 2008 at 5:30 p.m.
Indiantown Civic Center
15675 S.W. Osceola Street
Indiantown, FL 34956

Between 5:30 and 6:10 p.m., the meeting was conducted as an information workshop. Attendees were welcome to ask project team members questions and study project boards and the fact sheet. At 6:10 p.m., the presentation portion of the meeting began. A copy of the meeting agenda is attached.

FDOT Project Manager Gregor Senger opened the meeting and introduced FDOT team members. He then introduced the consultant Project Manager Robert Linares.

Robert Linares introduced the project team members and began describing the PD&E process and this study's objective and description. A copy of the presentation is attached. During the presentation, Vivienne Handy and Peter Haliburton also reviewed environmental and transit issues.

After the presentation, Robert Linares opened the floor for questions or comments.

Martin County MPO Administrator Ann Perrotta commented that she was excited to see the transit component of the study begin to materialize.

A representative of the Indiantown Lyons Club asked about the milling and resurfacing project that was set for SR 710 through Indiantown. Pat Glass said that project was set to start in August or September.

A member of the Indiantown NAC encouraged residents to attend future meetings and to bring neighbors with them. He said FDOT listens to the community and additional feedback is necessary to ensure the residents' needs are met.

Indiantown resident Cathy Deninger asked whether it was possible to begin the meetings later as many people were unable to attend the meeting from its start because they were still at work. Also, it's important when advertising, to let people know they still have a chance to attend for the entire two-hour period of the meeting.

Ann Perrotta suggested that the project team make presentations to the Martin County Commission and MPO as these are televised meetings.

A property owner requested FDOT have meetings with the larger landowners along the corridor and asked whether game fencing had been considered. Vivienne Handy responded that wildlife crossings will be evaluated. She said one issue with fencing is that there is debate over fencing public versus private lands. The property owner said most of the land is public and there are conservation easements available. Vivienne Handy encouraged residents to work with the project team in letting them know of specific areas with wildlife.

Another attendee asked how coordination works between all the SR 710 project segments as the improvements can become confusing for residents. Robert Linares responded that all District 4 SR 710 projects meet together to discuss progress and coordination. This study's project team also conducts monthly progress meetings with the District 1 project in Okeechobee County to coordinate. He said coordination is a critical issue on this project. Beatriz Caicedo also said the FDOT District 4 is planning a corridor-wide website where information will be presented for each of the segments and viewers will be able to monitor progress on all the projects.

After the question and comment session, the formal part of the meeting was adjourned and attendees had another hour for informal questions and to review the project boards and materials.

The meeting was adjourned at 7:30 p.m.

October 24, 2008

The Honorable Bill Nelson
Senator
U.S. Senate
225 East Robinson Street, Suite 410
Orlando, FL 32801

Dear Senator Nelson:

SUBJECT: **Public Alternatives Meeting Notification**
State Road No.: 710 (Beeline Highway)
Financial Project ID.: 419344-1-22-01
Description: Project Development and Environment (PD&E) Study
SR 710 from County Road 714 to County Road 609 in Martin County, Florida

This letter is to inform you that the Florida Department of Transportation (FDOT) will be conducting a Public Alternatives Meeting for the above-referenced transportation improvement project. The Public Alternatives Meeting will be held on Wednesday, November 19, 2008 from 6:00 to 8:00 p.m. at the Indiantown Civic Center, 15675 SW Osceola Street, Indiantown, Florida 34956 (see attached location map).

The Public Alternatives Meeting will be an open-house forum where all viable alternatives that have been developed will be on display. The goal of the workshop is to collect and evaluate the public's comments on these alternatives before selecting a preferred alternative. The preferred alternative would then proceed to the next step of the PD&E process where conceptual plans are developed and studied in greater detail before proceeding to a Public Hearing.

If you desire further information concerning this project, please contact Gregor Senger, Project Manager, at (954) 777-4141 or toll free at 1-866-336-8435, ext. 4141. If you need project information or public meeting information, you may also visit our website at: www.sr710.com.

Sincerely,

Gustavo Schmidt, P.E.

Okeechobee, Florida 34973

Dear Council Member Williams:

SUBJECT: **Public Alternatives Meeting Notification**
State Road No.: 710 (Beeline Highway)
Financial Project ID.: 419344-1-22-01
Description: Project Development and Environment (PD&E) Study
SR 710 from County Road 714 to County Road 609 in Martin County, Florida

This letter is to inform you that the Florida Department of Transportation (FDOT) will be conducting a Public Alternatives Meeting for the above-referenced transportation improvement project. The Public Alternatives Meeting will be held on Wednesday, November 19, 2008 from 6:00 to 8:00 p.m. at the Indiantown Civic Center, 15675 SW Osceola Street, Indiantown, Florida 34956 (see attached location map).

The Public Alternatives Meeting will be an open-house forum where all viable alternatives that have been developed will be on display. The goal of the workshop is to collect and evaluate the public's comments on these alternatives before selecting a preferred alternative. The preferred alternative would then proceed to the next step of the PD&E process where conceptual plans are developed and studied in greater detail before proceeding to a Public Hearing.

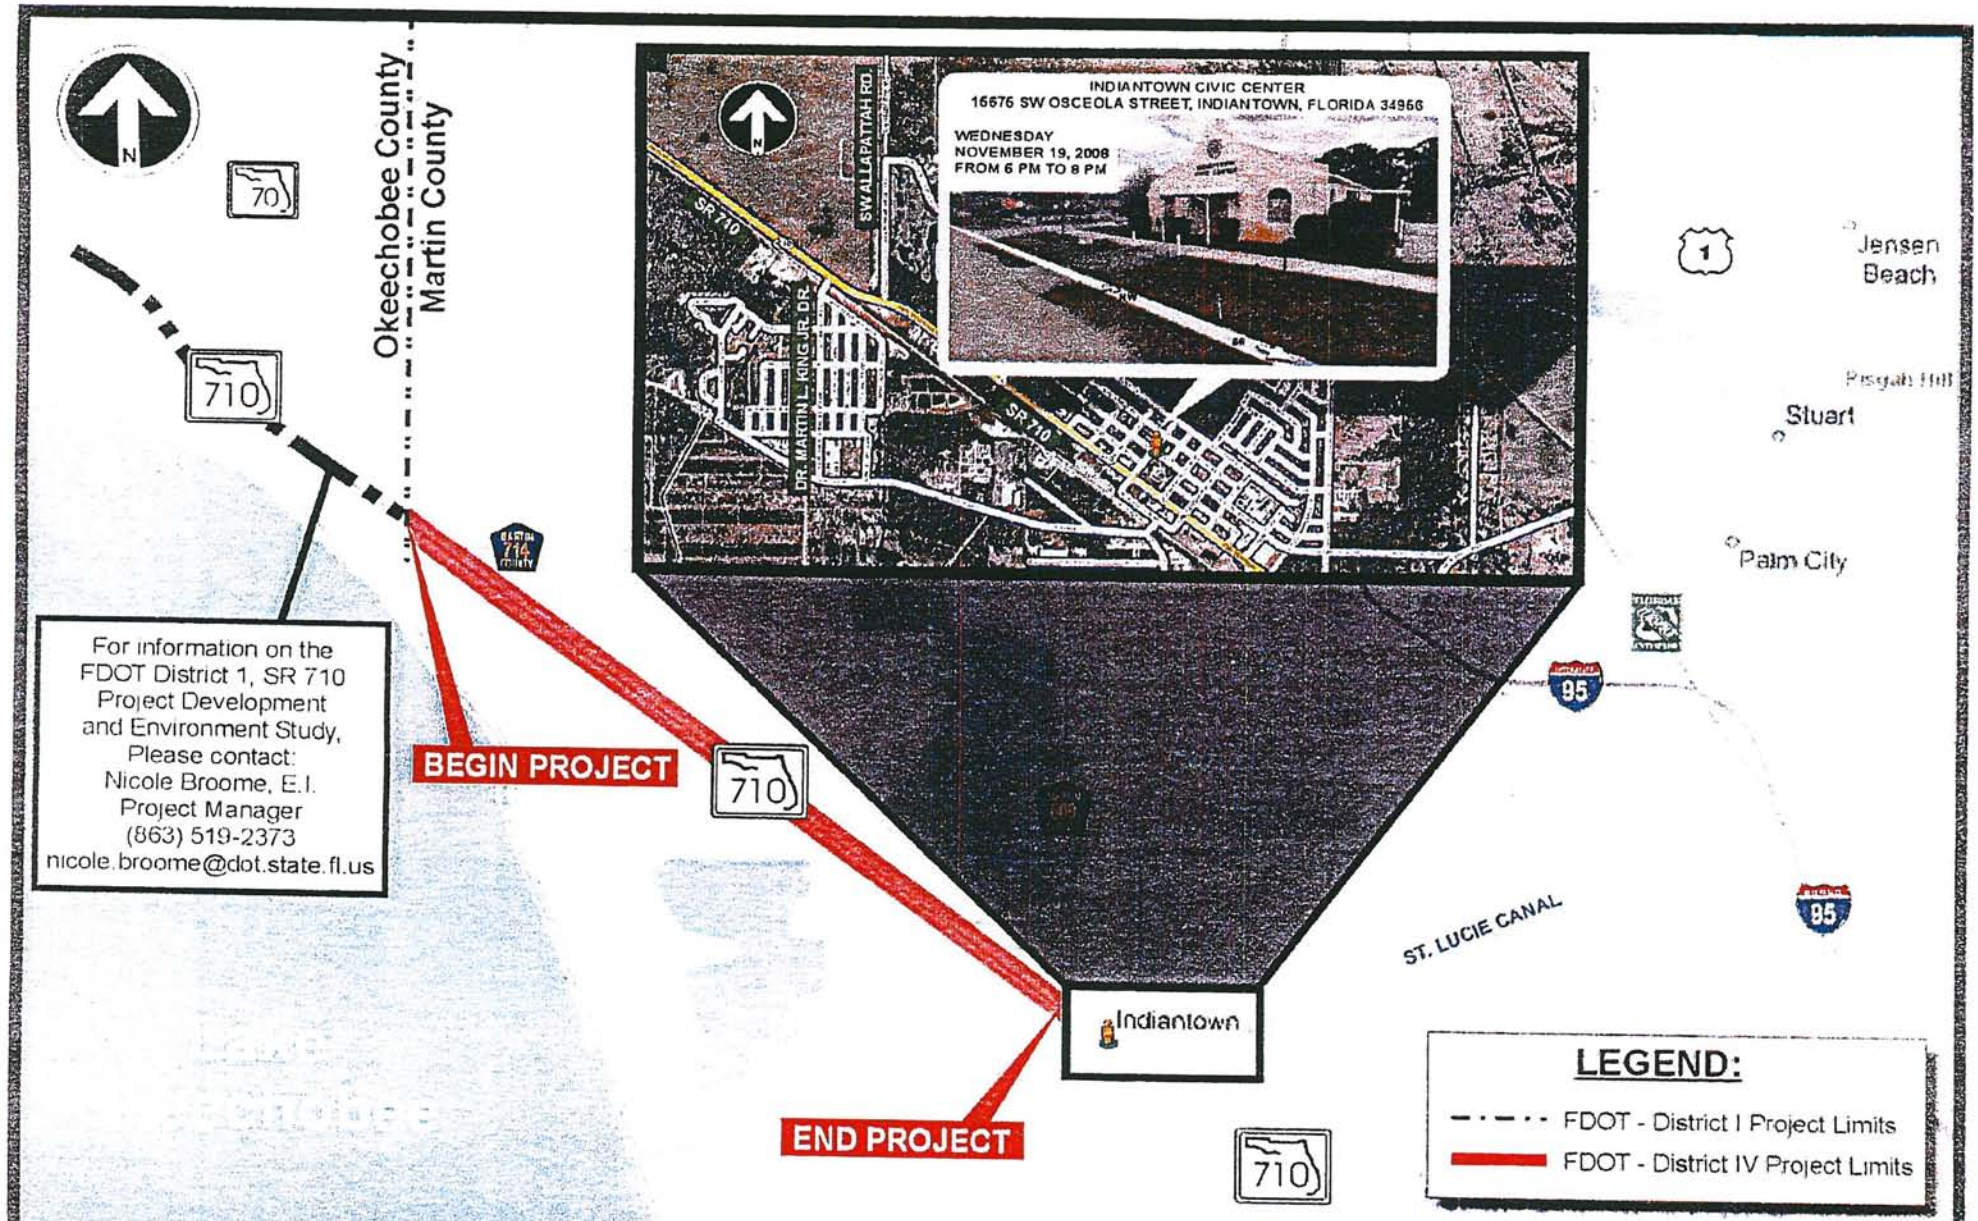

If you desire further information concerning this project, please contact Gregor Senger, Project Manager, at (954) 777-4141 or toll free at 1-866-336-8435, ext. 4141. If you need project information or public meeting information, you may also visit our website at: www.sr710.com.

Sincerely,

Gustavo Schmidt, P.E.
District Planning and Environmental Engineer

Dear Mr. Frederick:

SUBJECT: **Public Alternatives Meeting Notification**
State Road No.: 710 (Beeline Highway)
Financial Project ID.: 419344-1-22-01
Description: Project Development and Environment (PD&E) Study
SR 710 from County Road 714 to County Road 609 in Martin County, Florida

This letter is to inform you that the Florida Department of Transportation (FDOT) will be conducting a Public Alternatives Meeting for the above-referenced transportation improvement project. The Public Alternatives Meeting will be held on Wednesday, November 19, 2008 from 6:00 to 8:00 p.m. at the Indiantown Civic Center, 15675 SW Osceola Street, Indiantown, Florida 34956 (see attached location map).

The Public Alternatives Meeting will be an open-house forum where all viable alternatives that have been developed will be on display. The goal of the workshop is to collect and evaluate the public's comments on these alternatives before selecting a preferred alternative. The preferred alternative would then proceed to the next step of the PD&E process where conceptual plans are developed and studied in greater detail before proceeding to a Public Hearing.

If you desire further information concerning this project, please contact Gregor Senger, Project Manager, at (954) 777-4141 or toll free at 1-866-336-8435, ext. 4141. If you need project information or public meeting information, you may also visit our website at: www.sr710.com.

Sincerely,

Gustavo Schmidt, P.E.
District Planning and Environmental Engineer

CHARLIE CRIST
GOVERNOR

3400 West Commercial Boulevard
Fort Lauderdale, FL 33309-3421

STEPHANIE C. KOPELOUSOS
SECRETARY

October 27, 2008

Dear Property Owner/Interested Party:

SUBJECT: **Public Alternatives Meeting Notification**
State Road No.: 710 (Beeline Highway)
Financial Project ID.: 419344-1-22-01
Description: Project Development and Environment (PD&E) Study
SR 710 from County Road 714 to County Road 609 in Martin County, Florida

This letter is to inform you that the Florida Department of Transportation (FDOT) will be conducting a Public Alternatives Meeting for the above-referenced transportation improvement project. The Public Alternatives Meeting will be held on Wednesday, November 19, 2008 from 6:00 to 8:00 p.m. at the Indiantown Civic Center, 15675 SW Osceola Street, Indiantown, Florida 34956 (see attached location map).

The Public Alternatives Meeting will be an open-house forum where all viable alternatives that have been developed will be on display. The goal of the workshop is to collect and evaluate the public's comments on these alternatives before selecting a preferred alternative. The preferred alternative would then proceed to the next step of the PD&E process where conceptual plans are developed and studied in greater detail before proceeding to a Public Hearing.

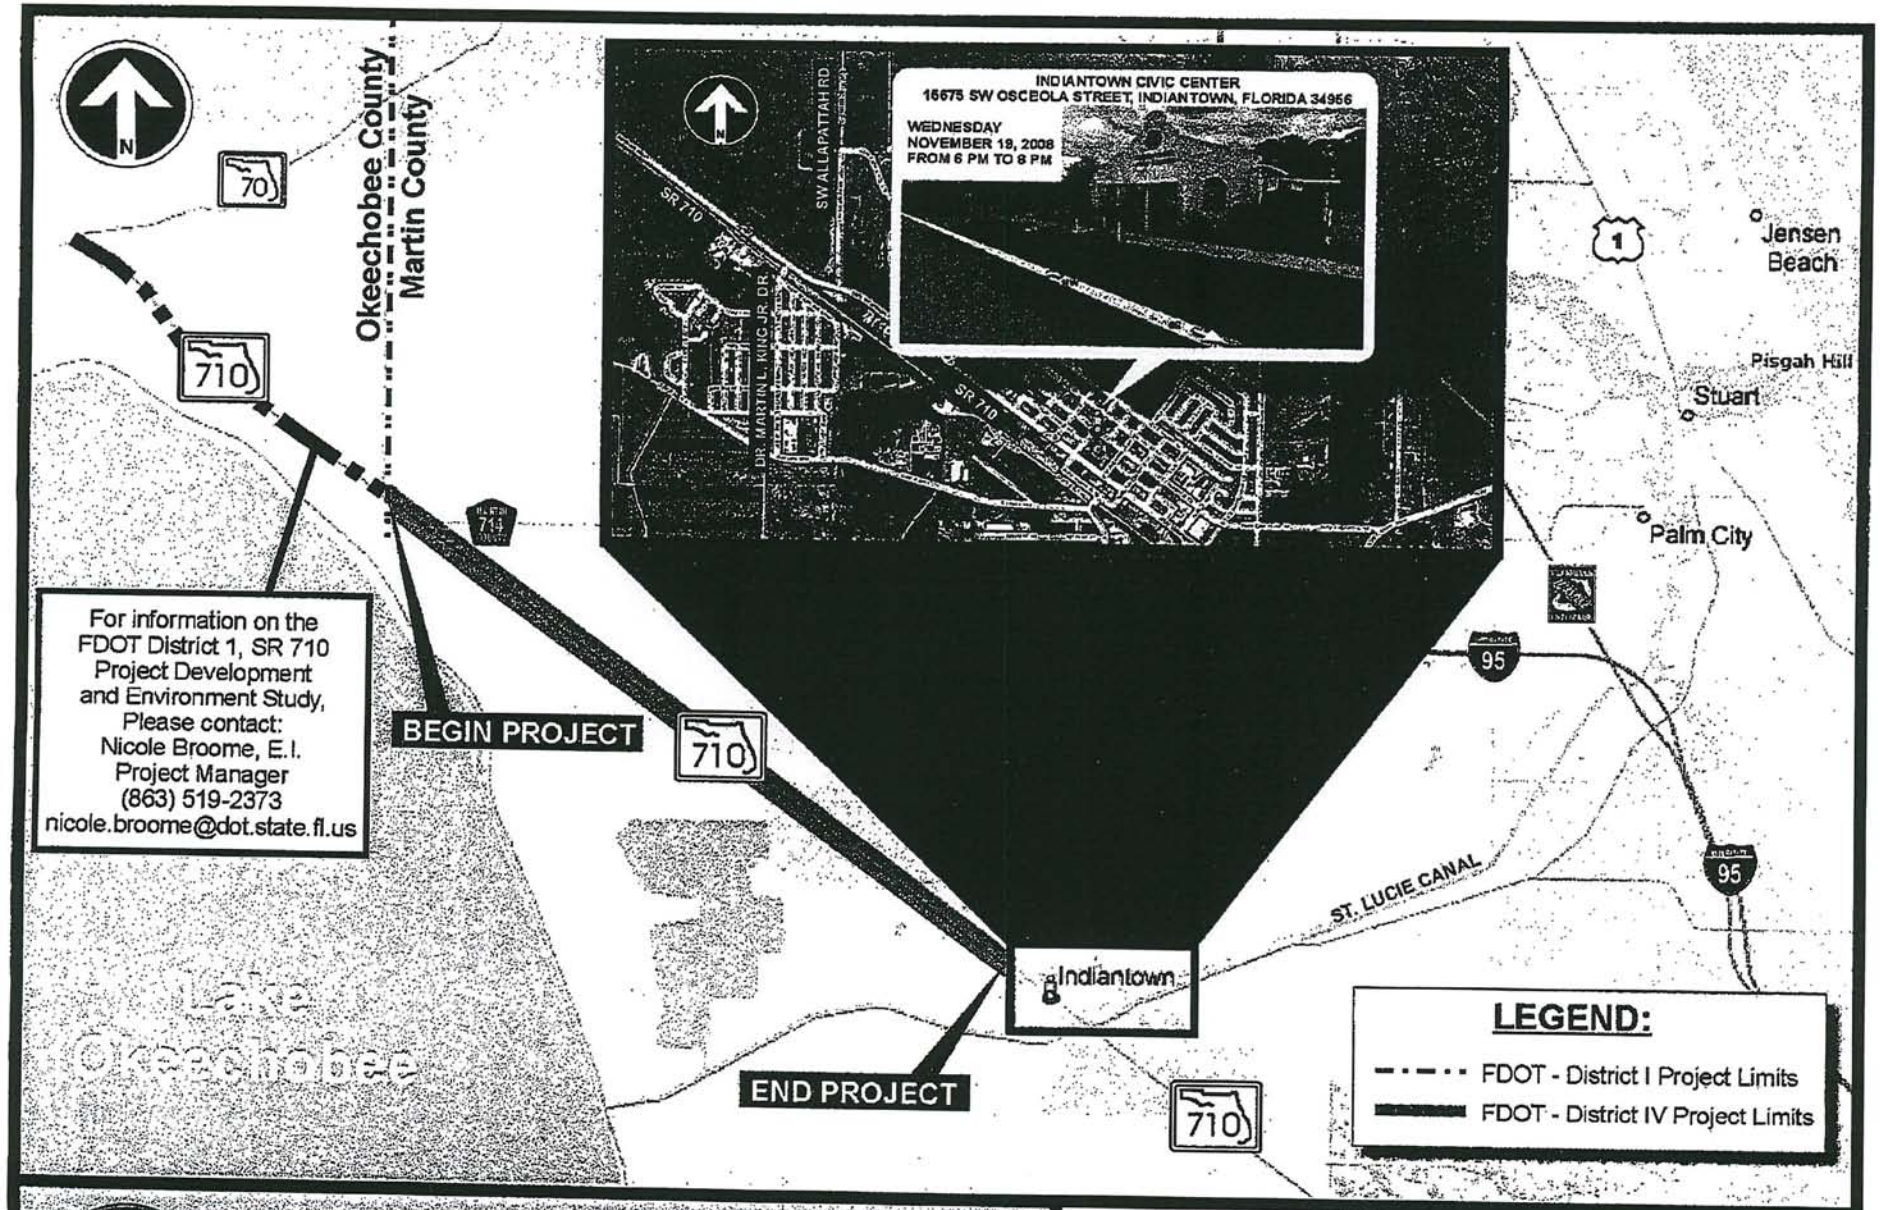

Please contact Gregor Senger, Project Manager, at (954) 777-4141 or toll free at 1-866-336-8435, ext. 4141. If you need project information or public meeting information, you may also visit our website at: www.sr710.com. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act, or persons who require translation services (free of charge), should contact Gregor Senger, Project Manager, at 3400 West Commercial Boulevard, Fort Lauderdale, Florida 33309-3421, or call the telephone number provided above. Special accommodation requests under the Americans with Disabilities Act should be made at least seven days prior to the public meeting. Hearing impaired citizens can call the toll free TDD number and relay service at 1-800-955-8771. Your attendance at this public meeting is encouraged and any comments you wish to make will be appreciated.

Sincerely,

Paul A. Lampley, P.E.
District Project Development Engineer

Florida Department of Transportation District 4 to hold State Road 710 (Beeline Highway) Public Alternatives Meeting

FORT LAUDERDALE – The Florida Department of Transportation (FDOT) District 4 will hold a Public Alternatives Meeting for the State Road 710 (Beeline Highway) Project Development and Environment (PD&E) Study on **Wednesday, June November 19, 2008, from 6:00 p.m. to 8:00 p.m.** The Public Alternatives Meeting will be held at the **Indiantown Civic Center, located at 15675 SW Osceola Street in Indiantown.**

The Public Alternatives Meeting will be an open-house forum where all viable alignment alternatives that have been developed will be on display. The goal of the workshop is to collect and evaluate the public's comments on the alternatives before selecting a preferred alternative. The preferred alternative would then proceed to the next step of the PD&E process where conceptual plans are developed and studied in greater detail prior to proceeding to the Public Hearing. The project extends from County Road (CR) 714 (S.W. Martin Highway) to CR 609 (Allapattah Road), just west of Indiantown in Martin County.

For more information on the Public Alternatives Meeting, please feel free to contact Project Manager Mr. Gregor Senger at (954) 777-4681 or call our toll free number at (866) 336-8436 ext. 4141 or by e-mail at gregor.senger@dot.state.fl.us.

SR 710 (Beeline Highway) PD&E STUDY

Financial Management No. 419344-1-22-01
November 2008

Study Objective

The general objective of SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study is to provide and document information necessary for the Florida Department of Transportation (FDOT) to reach a decision on the type, design and location of improvements for the SR 710 (Beeline Highway) corridor. This project is in the PD&E phase, which includes the evaluation of alignment alternatives proposed to SR 710 from County Road (CR) 714 (S.W. Martin Highway) to CR 609 (Allapattah Road), just west of Indiantown in Martin County. The length of the segment is approximately 15 miles. The study will consider those engineering services required for location and design studies including consideration of all social, economic and environmental affects, and mitigation as required, along with the required environmental documents, engineering, reports, preliminary plans, and public involvement. These factors and costs will be considered in arriving at a preferred alternative.

The project is in its early stages and is expected to continue through 2009. The purpose of this multi modal capacity project is to widen the roadway from two to four lanes and reduce congestion created by anticipated population and employment growth in the county and wider region. It will also enhance mobility, safety, emergency access and truck movement within and through Martin County, which serves as a designated emergency evacuation route and a primary arterial road for the area.

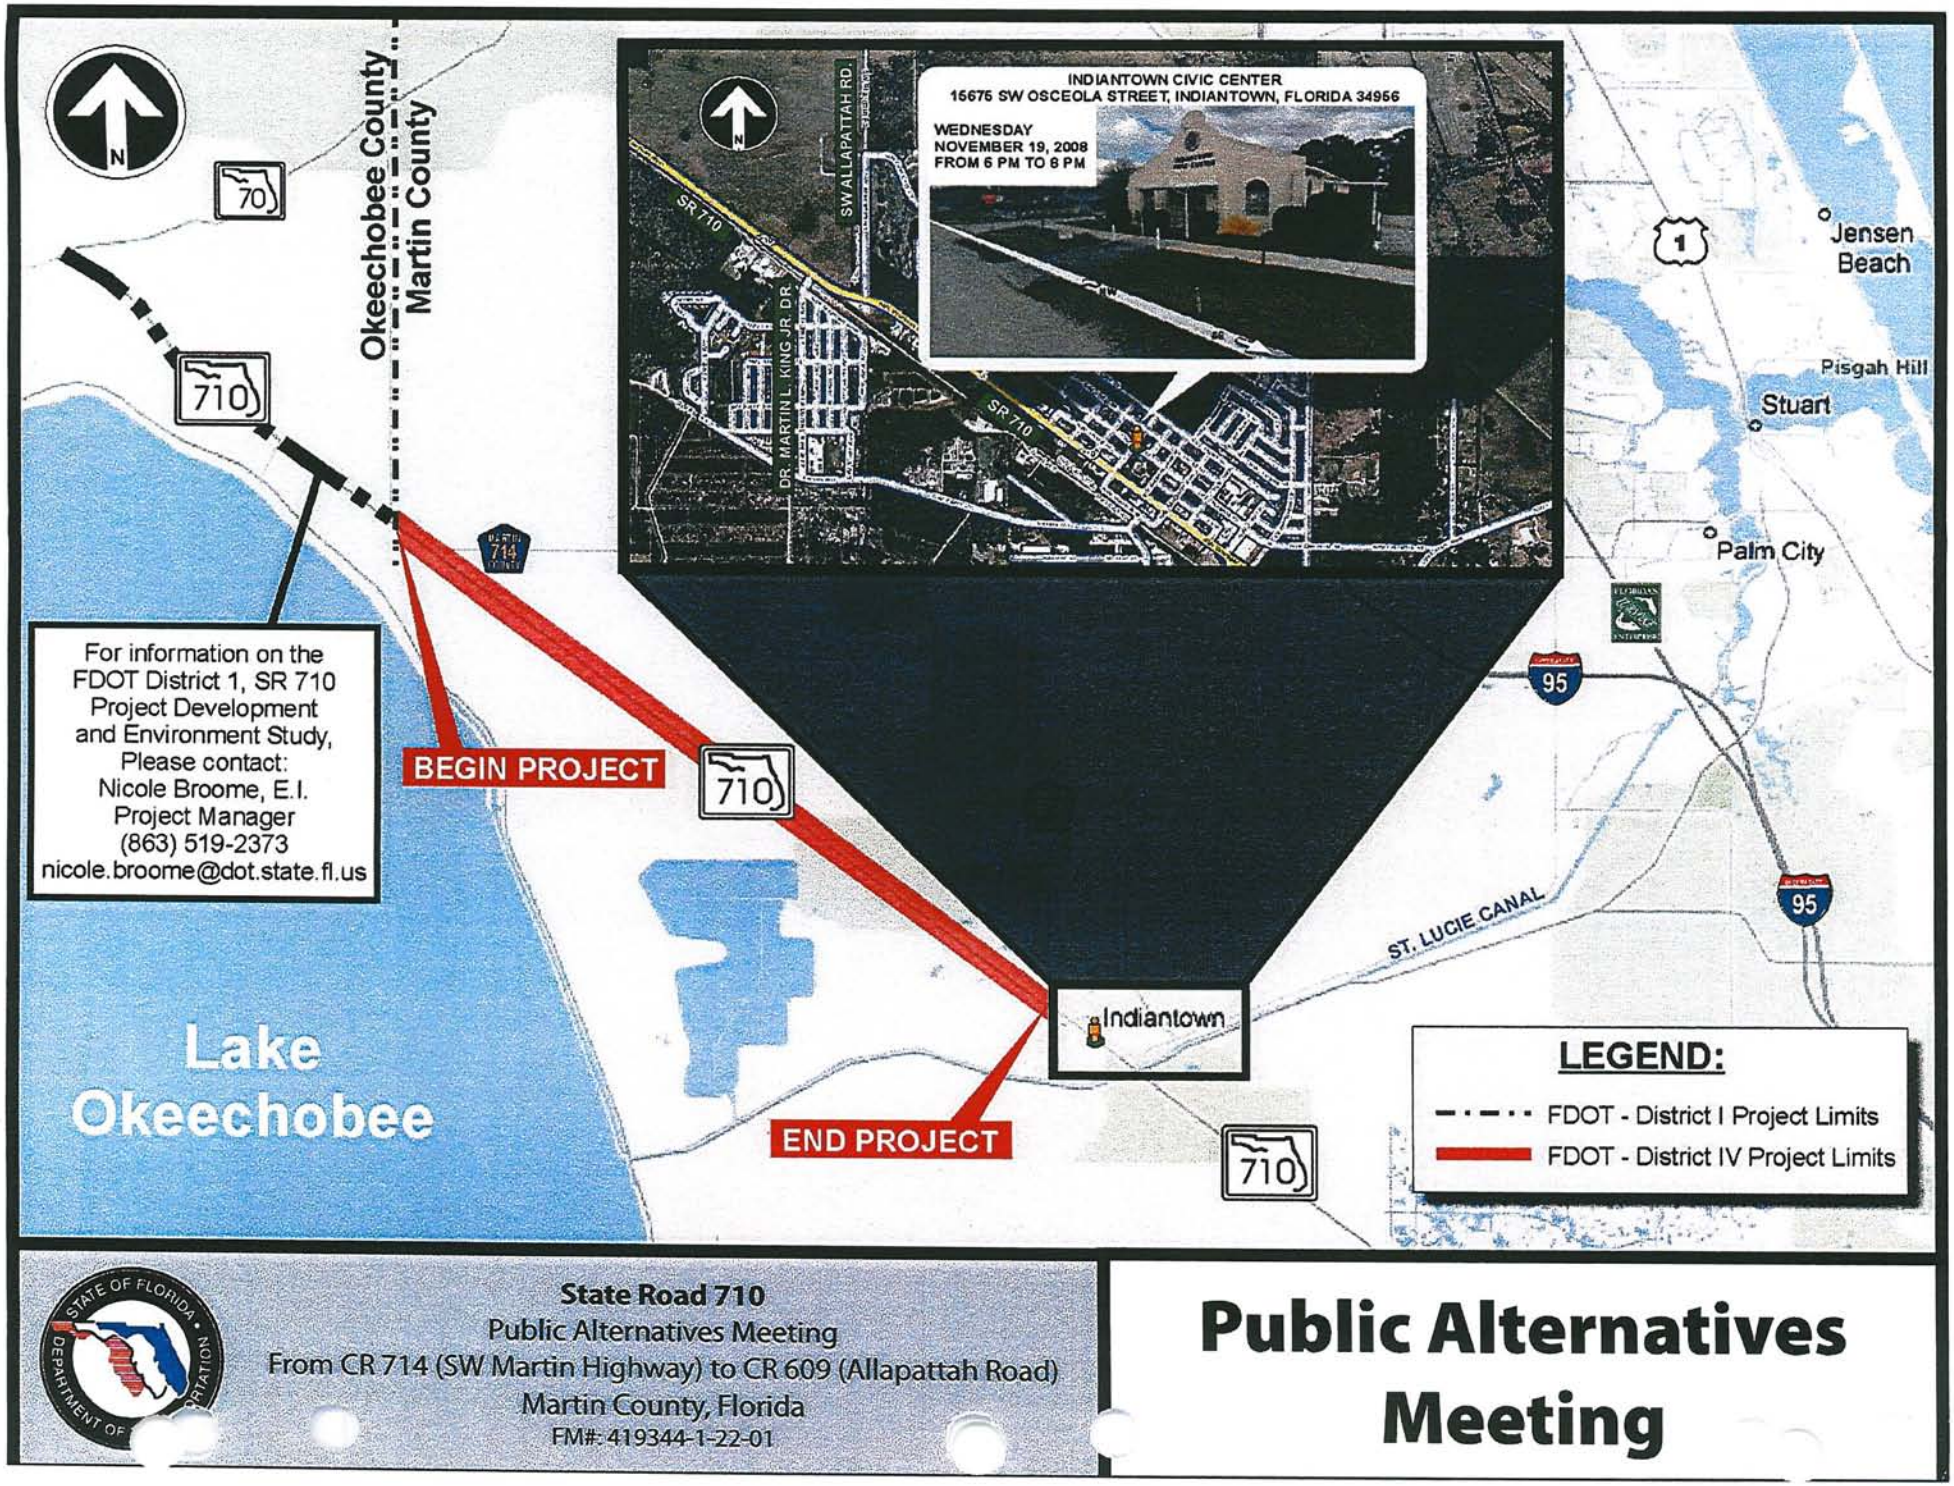

Transit Study

As part of this study, a transit analysis will be conducted. The analysis will extend along SR 710 from US1 (Riviera Beach) to downtown Okeechobee. This will include the areas of Magnolia Park, the Veteran's Affairs Hospital, Indiantown and Okeechobee. The study will address the feasible transit technologies and infrastructure needs for short-term and long-term implementation, including identifying right-of-way requirements relative to what is available today. It will also address lessons learned in transit project development, particularly in South Florida in the last 20 years, including Tri-Rail development and double-tracking.

Ultimately, the SR 710 corridor could potentially reduce automobile and oil dependence as well as vehicle emissions and provide an economic development benefit to the area. Modern passenger trains would be utilized, providing fast service, safe and reliable transportation, wireless capabilities and a comfortable and convenient method of travel. FDOT strives to ensure that this particular corridor fits in line with its Vision Plan for the Florida Intercity Passenger Rail, which connects all major urban areas not commonly serviced by air or rail.

Many benefits have been identified with the project, including higher property values, increased commercial activity, increased tax revenue and the development of livable, accessible communities.

Public Alternatives Meeting

SR 710 (Beeline Highway)
Project Development and Environment (PD&E) Study
FM#: 419344-1-22-01
Public Alternatives Meeting
November 19, 2008, at 6 p.m.
Indiantown Civic Center, Indiantown

The Florida Department of Transportation (FDOT) District 4 conducted a Public Alternatives Meeting to present alternative roadway improvement concepts along SR 710 in Martin County for the public's review. The meeting was conducted on Wednesday, November 19, 2008, from 6 p.m. to 8 p.m. at the Indiantown Civic Center, 15675 SW Osceola Street, in Indiantown, Florida.

This meeting provided an opportunity for neighbors, corridor users and other interested persons to review and comment on the potential improvements for SR 710 from CR 714 (SW Martin Highway) to CR 609 (Allapattah Road). About 23 people attended the event, including Hugo Carter from the South Florida Water Management District and Ann Perrotta from the Martin County Metropolitan Planning Organization. FDOT project representatives were available to discuss the project and answer individual questions, as were members of the consultant team. A copy of the sign-in sheet is attached. Numerous exhibits and project information was provided for review, including alternative typical sections, access management analysis, drainage and environmental impacts and the vision for transit along the overall SR 710 corridor. In addition, project newsletters and frequently asked questions were provided as handouts for all attendees. No comment sheets were submitted at the meeting.

FDOT and consultant members of the SR 710 (Warfield Boulevard) Bridge Replacement PD&E Study were also available to answer questions.

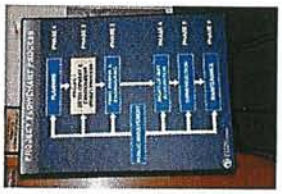

All items provided for display will be available for viewing and downloading on the corridor website, www.sr710beelinepde.com.

Public Hearing and Access Management Reclassification Announcement

Dear Senator Nelson:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Senator LeMieux:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

Public Hearing and Access Management Reclassification Announcement

Dear Representative Rader:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

The Honorable Adam Fetterman
Representative
Florida House of Representatives, District 81
121 SW Port St. Lucie Boulevard, Building B
Port St. Lucie, FL 34984

Reference:	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Representative Fetterman:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

Public Hearing and Access Management Reclassification Announcement

Dear Commissioner Heard:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Commissioner Smith:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Commissioner Garrard Helton:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Vice Chairman Chandler:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Public Hearing and Access Management Reclassification Announcement

Dear Council Member Watford:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Okeechobee, FL 34974

Reference:	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Council Member O'Connor:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

Public Hearing and Access Management Reclassification Announcement

Dear Chairman Cypress:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Principal Chief Harjo:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven (7) days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Project/Hearing Location Map

PUBLIC NOTICE

HIGHWAY LOCATION AND DESIGN CONCEPT PUBLIC HEARING
SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study
From CR 714 (SW Martin Highway) To CR 609 (SW Allapattah Road)
Martin County, Florida
FM#: 419344-1-22-01

The Florida Department of Transportation, District Four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM #: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681 at least seven days prior to the meeting. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Powers:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Sincerely,

Patrick Glass

FM#: 419344-1-22-01

The Florida Department of Transportation, District Four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM #: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681 at least seven days prior to the meeting. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Property Owner/Interested Person:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.,** at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

This letter is being sent to all property owners within 300 feet of either side of the proposed alignment.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the project or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Terry:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Loar:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Souza:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Kinard:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Stringer:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Ms. Cobb:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Ms. Carol Ann Wehle
Executive Director
South Florida Water Management District
3301 Gun Club Road
West Palm Beach, FL 33406

Reference:	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Ms. Wehle:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. 	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Busha:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Name of Project:	State Road (SR) 710 (Beeline Highway) Project Development and Environment (PD&E) Study
	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Strowd:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Chief Smith:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Chief Davis:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. 	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Sheriff May:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Ms. Kryzda:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Public Hearing and Access Management Reclassification Announcement

Dear Ms. Kline:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Polley:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. 	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Steele:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Ms. Deere:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. 	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Hannah:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, PE, at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the projects or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

Sincerely,

Patrick Glass

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear Mr. Matson:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.**, at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed. Notices are being sent to all property owners located within at least 300 feet on either side of the proposed alignment and to other public officials, organizations, and individuals interested in the project. The hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Project/Hearing Location Map

PUBLIC NOTICE

HIGHWAY LOCATION AND DESIGN CONCEPT PUBLIC HEARING
SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study
From CR 714 (SW Martin Highway) To CR 609 (SW Allapattah Road)
Martin County, Florida
FM#: 419344-1-22-01

The Florida Department of Transportation, District Four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM #: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681 at least seven days prior to the meeting. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

	Project Limits:	From County Road (CR) 714 (SW Martin Highway) to CR 609 (SW Allapattah Road)
	County/State:	Martin County, Florida
	Financial Management Number:	419344-1-22-01

Public Hearing and Access Management Reclassification Announcement

Dear ETAT Member:

The Florida Department of Transportation District Four will conduct a public hearing for the above referenced project. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles. The hearing will be held on **Tuesday, October 5, 2010, at 6:00 p.m.,** at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. A copy of the project display ad and a copy of the project/hearing location map are enclosed.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

This letter is being sent to all property owners within 300 feet of either side of the proposed alignment.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at least seven days prior to the hearing.

If you have questions about the project or scheduled public hearing, contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

MEDIA ADVISORY

Florida Department of Transportation District 4 to hold State Road 710 (Beeline Highway) Project Development and Environment (PD&E) Study Public Hearing FM # 419344-1-22-01

INDIANTOWN – The Florida Department of Transportation (FDOT) District 4 will hold a public hearing for the State Road 710 (Beeline Highway) Project Development and Environment (PD&E) Study, Financial Management Number: 419344-1-22-01, on **Tuesday, October 5, 2010, at 6 p.m.** The hearing will be held at the **Indiantown Civic Center, located at 15675 SW Osceola Street in Indiantown.**

The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road) in Martin County, for a distance of approximately 15 miles.

This hearing is being held as part of a current Project Development and Environment (PD&E) Study that is being conducted to evaluate proposed transportation solutions for this segment of SR 710 (Beeline Highway) and to provide documented information necessary for FDOT to reach a decision on the type, design, and location of the improvements. The project consists of replacing the existing two-lane roadway with a new four-lane highway that includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). Indiantown Middle School News

Indiantown Middle School would like to celebrate the students of the week for August 27 and September 3, 2010. We are so proud of all of you **Isaias Constantino, Emani Hamilton, Eduardo Hipolito, Isabela Juan, Guillermo Perez, Mark Fierros, Darnat Martin, Steven Toussaint, Ryan Rawlinson, Denise Cortez, Ayrianna Jones, Alicia Rodriguez-Lopez, Arron Gonzales, Reyna Guadalupe Vela, Edilson Mendez-Mendez, Baltazar Tomas, Jony Luna, Nancy Bravo, Bianca Cruz, Troy Freeman, Hojana Velasquez, Luis Resendiz-Ramirez, Osvaldo Manuel, Alicia Rodriguez-Lopez, Zacari Lee, Tatiana Taylor, Tyrie Dowling, Abrahan Porcayo, Alicia Rodriquez, Christy Largent, Isaac Gaspar, Nicholas Mills, Evely Gonzalez, Ramirez Baltazar.**

They are chosen by their teachers for any number of reasons that can be found in good behavior, positive attitude, and kindness. Students who are well-balanced, principled, and open-minded have the opportunity to attain student of the week. For students to attain success at Indiantown Middle School, the possibilities are endless.

A reminder to parents: The SES Fair for free tutoring will take place at Indiantown Middle School on September 13, 2010 at 6:00 P.M.

Children's Book Endowment Fund created at The Robert Morgade Library

With an initial contribution of $15,000 the Friends of the Robert Morgade Library, Inc. has launched a children's book endowment fund.

The purpose of the fund is to use 100% of the income generated from the fund to purchase children's books at the Robert Morgade Library. There is nothing taken out for administration and the principal of the fund cannot up used for any purpose other than to generate income for the purchase of children's books.

In light of the dwindling state contributions and the continuing county budget problems, the Friends group believes that this fund provides a mechanism for providing a sustainable and recurring source of revenue from which to augment the library collection. Initially, the revenue from the fund is expected to be quite small due to low interest rates and a relatively small start-up fund, but it hoped that size of the endowment fund and the revenue generated will increase over time.

It is also hoped that this initial contribution will encourage others to make donations to this fully tax deductible Children's Book Endowment fund. Donations should be dropped off at Robert Morgade Library off Salerno Road or mailed to the Friends of the Robert Morgade Library, Inc., 5851 SE Community Drive, Stuart, Fl 34997. Any such donations should specify that the funds are to be used for the Chirldren's Book Endowment Fund in the memo line of the check. For more information contact Eric Buetens, Pres. of the Friends of the Robert Morgade Library, Inc. at 772-546-6633.

Ninth-Anniversary Blue Mass to Honor Those Who Lost Their Lives On 9/11

Press release

St Martin de Porres Catholic Church will host our fifth annual Memorial Blue Mass to honor and remember those who lost their lives in the devastating terror attacks on our nation on September 11, 2001. The Mass will be celebrated by Most Rev. Gerald M. Barbarito, Bishop of Palm Beach. The Blue Mass refers to the blue uniforms worn by so many public safety personnel. It is meant to honor those who daily protect and serve us. At the Mass we will remember law enforcement officers, firefighters and emergency rescue personnel who have fallen in the line of duty and pray for the safety of all officers.

Our tribute will begin at 3:30 PM with a Solemn Video and Poetry Presentation which will include Posting of Colors by Honor Color Guards of law enforcement and fire/rescue personnel. The stirring memorial video, "Angels Over America," will be shown preceding the Mass. This uplifting tribute to 9/11 heroes and victims, written and produced by Carolyn Long, celebrates the courage and resilience that are the hallmarks of the American Spirit, while providing perspective, healing and hope. Bishop Barbarito will celebrate the Solemn Blue Mass at 4:00 PM. Immediately following Mass, we will proceed to a designated area outdoors for "21 Gun Salute" and "Taps". All participants are invited to the San Mart' Inn located on Parish grounds for dinner.

St. Martin de Porres Catholic Church is proud to offer the St. Martin the Charitable Scholarship to a child of a Law Enforcement Officer, Firefighter or Emergency Rescue First Responder who will be attending a post-secondary educational institution. Children of New York City emergency personnel who took part in the September 11th rescue efforts are also eligible. The applicant must be a senior graduating from a local high school and will be judged on academic achievement, community service and financial need. The offerings taken during Mass will be used to fund the St. Martin the Charitable Scholarships and to help support the September 11th Memorial to be constructed at Jock Leighton Park in Palm City.

Palmetto Berries reported stolen from Wildlife area

By Staff reporter
Indiantown News

Two Indiantown men were charged with misdemeanor taking of palmetto berries after an incident at he Hungryland Wildlife Environmental Area near Stuart last week.

Domingo Vargas-Lopez, 46, of SW Lee Avenue, and Pascual Francisco-Miguel, 31, of SW Lee Avenue, were arrested by the Florida Fish and Wildlife Conservation Commission on August 30.

They were allegedly caught in possession of bags of palmetto berries at the Wildlife area. Bond was set at $500.

WARFIELD SCHOOL NEWS

Warfield School Digest – September 9th

Warfield is proud to announce the top six spellers in our school. They are **Joshua Quintero, Denny Juan Matias, Joana Amaya, Yoanita Sanchez, Raneisha Callejas, and Chloe Kikivarakis-Trimble.** These students will be preparing with Mrs. Wardell to compete in the County Spelling Bee to be held later this month. Congratulations to all of you!

Interims will be going home on Wednesday September 22nd. Kindergarten will be the only class not to receive interims this quarter. They will start receiving them second quarter. Conferences will be held on Thursday, September 30th. Please call the school to make an appointment to see your child's teacher.

Curriculum nights went very well at Warfield last week. We hope that all of the parents were able to make it and that what you heard and saw was helpful.

Please be sure to check your child's communication folder and backpacks for important information.

Burglaries reported during the week of Friday August 27-September 3

Compiles from Police reports
Indiantown News

Martin County Sheriff Deputies investigated the report of an attempted burglary in the 8900 block of SW Hopwood Drive on August 27.

About $20 in property damage was done. No entry was reported to the home. The suspect or suspects reportedly damaged a screen window and a dryer vent in an effort to enter the home.

The homeowner had four large dogs inside the residence which might have scared off the would be burglars.

Deputies investigated a burglary and grand theft reported in the 14800 block of SW Okeechobee Drive on August 30.

Deputy Doug Cruz reported about $450 in items that included game systems, and $15 in coins in a ceramic cup were taken.

The burglary occurred sometime between 6:30 am and 4:30 pm. Authorities continued to investigate this crime.

Amtrak upsets Martin County Deputies

By Staff writer
Indiantown News

A 54 year old Lakeland woman was removed from an Amtrak Train for allegedly causing a disturbance on August 18.

Martin County Deputy Amanda Gregory said the woman was accused of taking money from a tip jar at a bar on the train.

Deputies were unable to investigate the matter as the train pulled away while they were talking to the woman.

"Our attempt to investigate the crime of theft was greatly incumbered by the female conductor in that she possesses the authority to delay the train but chose not to," the report read.

Gregory added that the conductor displayed an arrogant demeanor throughout our contact and appeared agitated by our required attempts to investigate the incident. She further impeded our investigation by allowing the train to depart without allowing us access to any and all witnesses.

The woman was assisted to her home by a Pastor who volunteers for the Sheriff's Office.

Suspicious incident on Warfield leads to arrest of California man

By Staff reporter
Indiantown News

A 49 year old Los Angeles, California man was charged with resisting arrest without violence after an incident on September 2 on SW Warfield Blvd.

Deputy B. Tison's report stated he was dispatched to a traffic crash report but found a vehicle only stuck in the ditch. When he approached the scene he saw an unknown man hiding in the woods near the vehicle.

The suspect, Jaime Aguirre, refused to come out of the woods. Deputies removed him by force and seized thousands of dollars worth of gold jewelry. The property was turned into evidence for safe keeping.

Two Indiantown men were detained for questioning but later released. The vehicle was towed by Stuart Auto because the owner could not be located.

PUBLIC NOTICE

HIGHWAY LOCATION AND DESIGN CONCEPT PUBLIC HEARING

SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study From CR 714 (SW Martin Highway) To CR 609 (SW Allapattah Road) Martin County, Florida FM#: 419344-1-22-01

The Florida Department of Transportation, District Four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM #: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681 at least seven days prior to the meeting. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

MARTIN COUNTY

Schools prepare for musicians

The Education Foundation of Martin County, in partnership with the Lyric Theatre, has its first artist residency program of the year.

Project Trio will be working with and performing for students and teachers Wednesday through Friday at Felix A. Williams Elementary, Jensen Beach Elementary, Murray Middle School and South Fork High School.

There will be a concert at the Lyric Theatre at 7 p.m. Saturday.

Project Trio's musicians, Greg Pattillo (flute), Eric Stephenson (cello) and Peter Seymour (bass) honed their craft as students at the Cleveland Institute of Music. Their resumés include stints with the Houston Symphony and the Cleveland Orchestra.

This residency is an extension of the Education Foundation of Martin County's efforts to integrate the arts throughout the curriculum by bringing high-quality professional artists into the classroom to work with students and teachers.

MARTIN COUNTY

Arts Council seeking school volunteers

The Arts Council is seeking volunteers interested in presenting art prints to third grades in the Martin County elementary schools this new school year.

A training session will be at 9:30 a.m. Sept. 30 at the Court House Cultural Center, 80 E. Ocean Blvd., Stuart.

For more information, call (772) 287-6676, ext.11.

PORT ST. LUCIE

CASTLE fundraiser to feature auctions

CASTLE'S 14th annual Holiday Magic and 30th Anniversary Celebration is set for Nov. 20 at 6:30 p.m. at the PGA Education Center in Port St. Lucie. Sponsors are Diamonds by Terry and Scripps Treasure Coast Newspapers.

Guests may participate in auctions, sample gourmet recipes from area restaurants and enjoy wine and beer tasting.

Items to be auctioned include golf outings, vacation packages, weekend getaways, designer trees and CASTLE's Wine Tree filled with more than 75 bottles of wine.

One person will win a specially designed piece of jewelry valued at $8,500. All proceeds will benefit CASTLE's programs for the prevention of child abuse.

For reservations and prices, call Pam Madden at CASTLE at (772) 465-6011, ext. 228, or e-mail pmadden@castletc.org. For further information, visit www.castletc.org.

PUBLIC NOTICE

HIGHWAY LOCATION AND DESIGN CONCEPT PUBLIC HEARING

SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study From CR 714 (SW Martin Highway) To CR 609 (SW Allapattah Road)
Martin County, Florida
FM#: 419344-1-22-01

The Florida Department of Transportation, District Four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM #: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681 at least seven days prior to the meeting. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

NEIGHBORHOOD ADVISORY COMMITTEE VACANCIES

The Martin County Board of County Commissioners is seeking applications from individuals interested in volunteering to serve on the Golden Gate or Indiantown Neighborhood Advisory Committees (NAC). The Committees make recommendations to the Martin County Community Redevelopment Agency (CRA) regarding implementation of each area's Community Redevelopment Plan.

To qualify, you must be a resident, property owner, business owner or senior manager of a business located within or contiguous to the Neighborhood Planning or CRA, or a resident of Martin County who owns property within the particular CRA.

Golden Gate meetings are held quarterly on the first Monday of the month at 6pm at the Cassidy Community Center at Golden Gate. The next meeting is scheduled for November 1.

Indiantown meetings are held quarterly on the first Wednesday of the month at 6pm at the Indiantown Civic Center. The next meeting is scheduled for December 1.

All individuals serve without compensation and are requested to submit an Application for Appointment to Martin County Administration by September 30, 2010. For an Application, please call Martin County Administration at 288.5756 or send email to dgordon@martin.fl.us.

PARKS & RECREATION ADVISORY BOARD VACANCY

The Martin County Board of County Commissioners is seeking applications from individuals interested in being considered for appointment to fill a vacancy on the Parks and Recreation Advisory Board. All individuals serve without compensation and are requested to submit an Application for Appointment to Martin County Administration by September 30, 2010. For an Application, please call Martin County Administration 288.5756 or send email to dgordon@martin.fl.us.

VACANT POSITION: At-large member who must be a Martin County resident. The term will expire in October 2011.

It shall be the function of the Board to provide an ongoing process allowing public access to the planning, development, and programming of the County parks and recreation system.

Meetings are generally held on the third Thursday of each month at 5:30 pm at the Administrative Center, 2401 SE Monterey Road, Stuart.

TOURIST DEVELOPMENT COUNCIL VACANCY

The Martin County Board of County Commissioners is seeking applications from individuals interested in being considered for appointment to fill a vacancy on the Tourist Development Council. All individuals serve without compensation and are requested to submit an Application for Appointment to Martin County Administration by September 30, 2010. For an Application, please call Martin County Administration 288-5756 or send email to dgordon@martin.fl.us.

The next meeting is scheduled for November 10.

Vacant Position - owner or operator of a motel, hotel, recreational vehicle park, or other tourist accommodation that is subject to the tourist development tax. All members must be registered Martin County voters. This term will expire in April 2013; terms may be renewed at the decision of the County Commission.

POWERS & DUTIES OF THE COUNCIL:
Conduct public hearings to receive information from the public with respect to the effectiveness of the existing tourist development efforts by both public and private agencies, organizations and businesses and the need for additional or different tourist development efforts. Recommend a method of coordination of existing tourist development efforts by both public and private agencies, organizations and businesses and of new or additional tourist development efforts to obtain maximum economy, efficiency and effectiveness of the tourist development efforts in and for Martin County. Create, prepare, and submit to the Board of County Commissioners a Tourist Development Plan in the manner meeting the requirements of F.S. 125.0104 and, from time to time thereafter, make recommendations to the Board of County Commission for changes to the Tourist Development Plan.

Meetings are held quarterly on the second Wednesday of the month at 9:00 am in the Commission Chambers (Administrative Center, 2401 SE Monterey Road, Stuart).

WIC Office at the Indiantown Health Department to re-open this Monday

Renovations are now complete at the WIC Program office in Indiantown, with upgrades designed to serve clients more efficiently.

Beginning Monday, September 27, the WIC office will re-open at the Health Department at 16401 SW Farm Road, Indiantown.

Clients can access WIC Program services, Monday, Wednesday and Thursday, 8:00 am – 5:00 pm and Tuesday 9:00 am – 6:00 pm. The WIC office is closed on Friday.

WIC is a federally funded nutrition program and is available to pregnant and post partum women, infants and children under age 5 who meet eligibility requirements.

More information about the WIC program is available at: www.martincountyhealth.com/WIC_and_Nutrition.html

PUBLIC NOTICE

HIGHWAY LOCATION AND DESIGN CONCEPT PUBLIC HEARING

SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study
From CR 714 (SW Martin Highway) To CR 609 (SW Allapattah Road)
Martin County, Florida
FM#: 419344-1-22-01

The Florida Department of Transportation, District four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM#: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m. at the Indiantown Civic Center, 15675 SW Osceola Street, Indiantown, Florida. The hearing format will be an open house style with a formal presentation at 6:30 p.m. The proposed improvement includes SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road) for a distance of approximately 15 miles.

The public hearing is being conducted to give citizens, property owners, and other interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and to consider any effects of Executive Orders 11990 and 11988. The project consists of replacing the existing two lane roadway with a new four lane highway which includes a median divider. Other improvements involve lateral swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 5 foot paved use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification SM-3 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class will be changed to establish uniformity in future spacing standards per Rule 14-97.003, F.A.C., and 9J-5.019 Florida Administrative Code. A restrictive median means a median or painted centerline which does not provide a physical barrier between traffic moving in opposite directions. A restrictive median (physically prevents vehicles from crossing the median except at designated locations) from SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 3 (non-restrictive median) be revised to an Access Class 5 (restrictive median). An Access Class 5 designation would allow full median openings at signalized intersections and directional median openings at a spacing of no less than 1,320 feet. Please be advised that all access is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Monday, September 13, 2010 to Tuesday, October 5, 2010 at the Martin County Public Library, Hobe Sound Branch, located at 12203 SE Ridge Road, Hobe Sound, Florida 33455 on Monday through Thursday from 10:00 a.m. to 5:30 p.m., on Wednesday from 12 p.m. until 5 p.m., and on Thursday through Saturday from 9:00 a.m. to 5:00 p.m. Project information will also be on display at the Florida Department of Transportation (FDOT), District Four Office, 3400 West Commercial Boulevard, Fort Lauderdale, Florida 33309-3421, Monday through Friday, excluding holidays, between the hours of 8:00 a.m. and 5:00 p.m. These documents will also be on display at the Florida Department of Transportation (FDOT), District Four Office, 3400 West Commercial Boulevard, Fort Lauderdale, Florida 33309-3421, Monday through Friday, excluding holidays, between the hours of 8:00 a.m. and 5:00 p.m. These documents will also be on display at the Martin County Administration Center, 2401 SE Monterey Road, Stuart, Florida 34996, Monday through Friday, excluding holidays, between the hours of 8:00 a.m. and 5:00 p.m. Copies of the documents will be available for review at the public hearing. Comments or other exhibits in place of or in addition to the public hearing may be submitted in writing during the hearing or by mailing them to the FDOT Project Manager, Mr. Patrick Chi, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale, FL 33309-3421 or emailed to patrick.chi@dot.state.fl.us. All comments, questions and correspondence submitted during the public hearing or comment period will be given the same consideration.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special assistance under the Americans with Disabilities Act or persons who require translation services (e.g., sign language, interpreters, etc.) should contact Mr. Patrick Chi at (954) 777-4681 or (800) 432-4844 (Florida only) at least seven days prior to the meeting. Persons who do not have access to a computer may call the above telephone number to request a copy of any of the above information.

Jupiter slayings survivor looks ahead with strength

BY ANDREW MARRA
Palm Beach Post

It could hardly have seemed the stuff of speeches then, the tubes in his throat, his lifeless arms, the vivid recall of gunfire and ambulances.

A week out of his coma, voiceless and all but paralyzed, Patrick Knight prayed with a priest in his hospital room. The priest let slip what seemed then the cruelest phrase: "Let her watch over him."

It was this way that Knight learned, three months after the massacre in Jupiter, that his wife was dead, not pregnant at home with his unborn child.

On Saturday, Knight will be onstage, another speech in another town. For the gathered crowd he will recount how he learned to walk again after the shooting, how he learned to swallow, how he learned to sleep alone.

The speech will be billed "Overcoming Challenges When Tragedy Strikes," a new topic for this motivational speaker. The 37-year-old Miami attorney will not dwell much on the particulars of his tragedy, on the slaughter that Thanksgiving Day in Jupiter, when police say Knight's brother-in-law killed Knight's pregnant wife and three other family members.

What he will do, he says, is describe a journey from that harrowing day, from loss and mourning and near-certain death, to his reclaimed life, less than a year later.

"I just feel so blessed," he says. "I know it feels crazy to say that."

HORRIFIC MEMORIES

When Knight woke in late February he could remember the ambulance well enough. He could remember the helicopter, the emergency room, the attack itself.

Angry and obsessed, Paul Michael Merhige had joined his family at his cousin's Thanksgiving dinner in Jupiter. As the evening was winding down, police say he got a gun from his car and opened fire on his relatives inside.

When the killer had vanished, he left four dead, including Knight's wife, Lisa Knight, 33; her twin sister, Carla Merhige; their aunt, Raymonde Joseph, 76, of Jupiter; and their cousin's daughter, Makayla Sitton, 6.

Shot in the stomach, Knight writhed in pain as the massacre unfolded, watching Merhige finish his work. He didn't know it then, but his wife, shot in another room, was dying.

At St. Mary's Medical Center he was placed into a medically induced coma and did not wake for three months.

No one thought he would live, let alone go on to tell the tale.

In early February, three weeks before he was brought out of the coma, his parents were told to make funeral arrangements. But then, unexpectedly, his drugs began to work. He improved and eventually was revived.

"I cried a lot for a long time," he says. "I could feel it in my stomach and my whole body would convulse with sorrow. I was really at a breaking point."

For weeks he could manage only a Frankenstein walk. Striking the ground heel before toe seemed beyond him. He had to relearn how to write, run and brush his teeth.

He realized that to survive he had to focus on himself, on his recovery, on his own relation to his sense of loss.

"You get to decide how you want to carry it for the rest of your life," he says. "Because you can't get rid of it. You can't make it go away. But you get to choose how to carry it."

'VICTIM MENTALITY' ENDS

He had told himself, over and over, as he lay in bed in St. Mary's intensive care unit, that his story must be the most devastating, the most wrenching, the most horrendous in the entire hospital.

He soon decided he was wrong. He met quadriplegics, victims from Haiti's earthquake and people who had lost entire families and half their limbs.

"In a strange way it helped me," he says. "That is when I stopped the victim mentality."

Since his recovery he has told his story a few times to small groups in South Florida, which greet the account with a mix of wonder and disbelief.

"They just look at me incredulous the entire time I talk," he says.

On Saturday, he will give a speech in Detroit to a Catholic men's group of 500 people. In November, he will tell his story again to an audience of 2,000 at a Junior Chamber conference in Osaka, Japan.

He knows it can seem odd, less than a year into his new life, that he can seem so upbeat. Sometimes he surprises himself. But he says his attitude owes to his central message.

"Basically you have to be your own cheerleader," he says. "At the end of the day it's me who has to get out of bed."

ADVERTISEMENT

PUBLIC NOTICE

HIGHWAY LOCATION AND DESIGN CONCEPT PUBLIC HEARING

SR 710 (Beeline Highway) Project Development and Environment (PD&E) Study From CR 714 (SW Martin Highway) To CR 609 (SW Allapattah Road)
Martin County, Florida
FM#: 419344-1-22-01

The Florida Department of Transportation, District Four, will conduct a public hearing for the proposed improvements to SR 710 (Beeline Highway) in Indiantown, Martin County, Florida, FM #: 419344-1-22-01. The hearing will be held on Tuesday, October 5, 2010, at 6:00 p.m., at the Indiantown Civic Center, 15675 SW Osceola Street in Indiantown, Florida. The hearing will begin as an open house at 6 p.m. with a formal presentation at 6:30 p.m. The proposed improvement involves SR 710 (Beeline Highway) from CR 714 (SW Martin Highway) to CR 609 (SW Allapattah Road), for a distance of approximately 15 miles.

This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed improvements and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway which includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 SW Adams Avenue in Indiantown, on Tuesdays from 10 a.m. to 5:30 p.m., on Wednesdays from 12 p.m. until 8 p.m., and on Thursdays through Saturdays from 10 a.m. to 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard in Fort Lauderdale from 8 a.m. to 5 p.m., Monday through Friday. Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the FDOT Project Manager, Mr. Patrick Glass, P.E., at 3400 West Commercial Boulevard in Fort Lauderdale. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.

Public participation is solicited without regard to race, color, national origin, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Mr. Glass at (954) 777-4681 or toll free at (866) 336-8435 ext. 4681 at least seven days prior to the meeting. Mr. Glass may also be contacted via e-mail at patrick.glass@dot.state.fl.us. For additional project information, you may visit our website, www.sr710beelinepde.com.

PUBLIC HEARING NOTICE
Date: October 5, 2010
Time: 6 p.m.
Place: Indiantown Civic Center
15675 SW Osceola Street
Indiantown, Florida 34956
FLORIDA DEPARTMENT OF TRANSPORTATION

Notice of Meeting/Workshop Hearing

DEPARTMENT OF TRANSPORTATION

The Florida Department of Transportation District Four announces a hearing to which all persons are invited.
DATE AND TIME: Tuesday, October 5, 2010, 6:00 p.m.
PLACE: Indiantown Civic Center, 15675 S. W. Osceola Street, Indiantown, Florida
GENERAL SUBJECT MATTER TO BE CONSIDERED: The Florida Department of Transportation, District Four is holding a public hearing for the State Road (SR) 710 Project Development and Environment (PD&E) Study, Financial Management Number: 419344-1-22-01. This public hearing is being conducted to give interested persons an opportunity to express their views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed widening of SR 710 (Beeline Highway) from CR 714 (S. W. Martin Highway) to CR 609 (S. W. Allapattah Road) for a distance of approximately 15 miles and in accordance with Federal Executive Orders 11990 and 11988. The project consists of replacing the existing two-lane roadway with a new four-lane highway that includes a median divider. Other improvements involve linear swales, which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.
The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median allows vehicles to cross the median at any point, such as a center two-way left-turn lane. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to S. W. Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.
The draft project documents and other information will be available for review from Tuesday, September 14, 2010, to Tuesday, October 5, 2010, at the Elisabeth Lahti Library, 15200 S. W. Adams Avenue, Indiantown, FL. Tuesdays, 10:00 a.m. – 5:30 p.m.; Wednesdays, 12:00 Noon – 8:00 p.m.; Thursdays, Fridays and Saturdays, 10:00 a.m. – 5:30 p.m. The library is closed on Sundays and Mondays. These documents will also be on display at the Florida Department of Transportation (FDOT) District Four Office, 3400 West Commercial Boulevard, Fort Lauderdale, FL, 8:00 a.m. – 5:00 p.m., Monday through Friday.
Persons wishing to submit written statements or other exhibits, in place of or in addition to oral statements, may do so at the hearing or by sending them to the: FDOT Project Manager, Mr. Patrick Glass, P.E., 3400 West Commercial Boulevard, Fort Lauderdale, FL. All exhibits or statements postmarked on or before October 15, 2010, will become a part of the public hearing record.
A copy of the agenda may be obtained by contacting: The FDOT Project Manager, Mr. Patrick Glass, P.E. at (954) 777-4681 or Toll Free at 1(866)336-8435, ext. 4681. Mr. Glass may also be contacted via e-mail: patrick.glass@dot.state.fl.us.
Pursuant to the provisions of the Americans with Disabilities Act, any person requiring special accommodations to participate in this workshop/meeting is asked to advise the agency at least 7 days before the workshop/meeting by contacting: Mr. Glass, either in writing: The FDOT District Four Office, 3400 West Commercial Boulevard, Fort Lauderdale, FL or (954)777-4681 or Toll Free at 1(866)336-8435, ext. 4681. Mr. Glass may also be contacted via email: patrick.glass@dot.state.fl.us. If you are hearing or speech impaired, please contact the agency using the Florida Relay Service, 1(800)955-8771 (TDD) or 1(800)955-8770 (Voice).
For more information, you may contact: Mr. Glass, or visit our project website: www.sr710beelinepde.com.

How can you go Through with all This fall/durcall
everything if we end up wanting the Traffic
steered around The Town with a bypass.
I don't want gas lines Through Indiantown
I don't want main Traffic Through the middle
of Town. I don't want Widening of
Warfield Blvd unless you also ~~not~~ allow
parallel parking on both sides of the road

Is There any gas line easement To S of 710?

You plan sidewalks on all sides of road There needs To be more emergency room at sides of road to avoid accidents if you insist on swales

Can both gas companies combine gas lines?

SR 710 (Beeline Highway) PD&E STUDY
Public Hearing

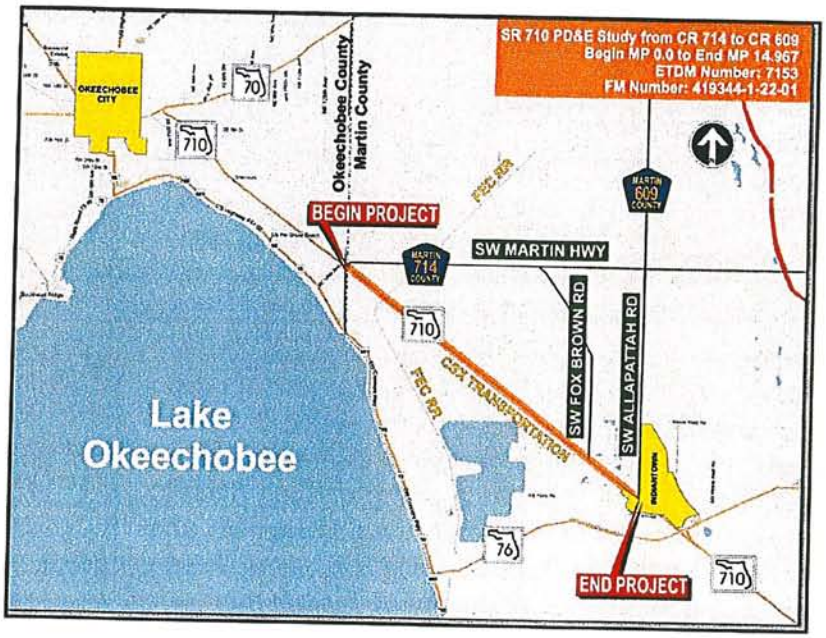

Financial Management No. 419344-1-22-01
October 2010

Hearing Purpose

This Public Hearing is being conducted by the Florida Department of Transportation (FDOT), in cooperation with the Federal Highway Administration (FHWA). The Hearing is being conducted to afford people the opportunity to express their views concerning the location and conceptual design of the proposed improvements that involve the widening and reconstruction of SR 710 from County Road (CR) 714 (S.W. Martin Highway) to CR 609 (S.W. Allapattah Rd) just west of Indiantown in Martin County. The length of the segment is approximately 15 miles.

Project Description

The project entails replacing the existing two-lane roadway with a new four-lane highway that includes a median divider. Other improvements involve linear swales which will provide the water quality and water quantity treatment required by the South Florida Water Management District, and a bicycle and pedestrian facility with a 12-foot shared use path for the entire length of the project. This project will enhance mobility, safety, emergency access and truck movement within and through Martin County.

The public hearing will also address the reclassification of the existing access management classification for SR 710 within the project limits. A restrictive median is being proposed to physically separate opposing lanes of traffic as part of the roadway improvements. The access class must be changed to establish minimum median opening spacings per Rule 14-97.005, F.A.C., and FDOT Procedure 525-030-155-c. A "non-restrictive" median means a median or painted centerline which does not provide a physical barrier between center traffic turning lanes or traffic lanes traveling in opposite directions. A "restrictive" median physically prevents vehicles from crossing the median except at designated locations. From SW Martin Highway to SW Allapattah Road, it is recommended that the existing Access Class 4 for non-restrictive medians be revised to an Access Class 3 for restrictive medians. An Access Class 3 designation would allow full median openings every one-half mile (2,640 feet) and directional median openings every one-quarter mile (1,320 feet). The ability to add these additional features is subject to safety and operational considerations.

The study will consider those engineering services required for location/design studies including consideration of all social, economic and environmental affects, and mitigation as required, along with the required environmental documents, engineering, reports, preliminary plans, and public involvement. These factors and costs were considered in arriving at a preferred alternative.

SR 710 Proyecto de Desarrollo y Estudio del Medio Ambiente
Audiencia Pública

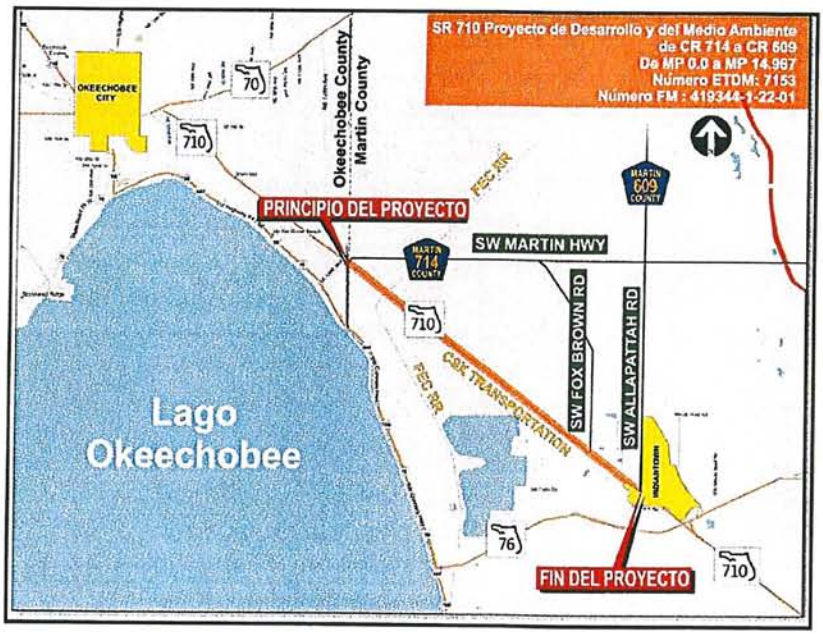

Número FM: 419344-1-22-01
Octubre del 2010

Propósito de la Audiencia Pública

Esta audiencia pública será conducida por el Departamento de Transporte de la Florida (FDOT), en conjunto con la Administración Federal de Carreteras (FHWA). La audiencia pública se llevará a cabo para asegurar la opinión pública acerca de la ubicación y el diseño conceptual de las mejoras propuestas, que incluirán la ampliación y reconstrucción de la carretera estatal SR 710 desde la carretera del condado (CR) 714 (S.W. Martin Highway) hacia CR 609 (S.W. Allapattah Rd), justo al oeste de Indiantown en el Condado de Martin. El proyecto tiene una distancia de aproximadamente 15 millas.

Descripción del Proyecto

El proyecto se trata de reemplazar la carretera existente de dos carriles, con una nueva carretera de cuatro carriles que incluirá un separador de tráfico. Otras mejoras incluirán cunetas lineales que proporcionan la calidad del agua y el tratamiento de la cantidad de agua requerida por el Distrito de Administración del Agua del Sur de la Florida, e instalaciones para ciclistas y peatones de uso compartido de 12 pies a lo largo del proyecto. Este proyecto mejorará la movilidad, seguridad, acceso de emergencia, y el tránsito de camiones dentro y a través del Condado de Martin.

Durante la audiencia pública, también se tratará el tema de la reclasificación de acceso actual para la carretera estatal SR 710 dentro de los límites del proyecto. Como parte de las mejoras, se ha propuesto instalar un separador como barrera para separar físicamente los carriles opuestos de tráfico. La clase de acceso debe ser cambiada para así establecer las distancias mínimas de apertura del separador, de acuerdo con la Regla 14-97.005, F.A.C., y Procedimiento de FDOT 525-030-155-c. Un separador "no restrictivo" significa un separador o línea pintada que no proporciona una barrera física entre carriles de giro o carriles de direcciones opuestas. Un separador "restrictivo" físicamente impide que los vehículos la atraviesen, con la excepción de ciertos puntos designados. Desde SW Martin Highway, hasta SW Allapattah Road, se recomienda el cambio de la actual Clase 4 (separador "no restrictivo") a la Clase 3 (separador "restrictivo"). Este cambio permitiría aperturas completas del separador en cada tramo de media milla (2,640 pies), tanto como aperturas direccionales del separador en cada tramo de un cuarto de milla (1,320 pies). Estas funciones y características adicionales están sujetas a consideraciones de seguridad y operacionales.

El estudio tendrá en cuenta los servicios de ingeniería necesarios para los estudios de localización/diseño, igual que todos los impactos sociales, económicos y ambientales, y la mitigación necesaria, tanto como los documentos requeridos del medio ambiente, ingeniería, informes, planes preliminares, y la participación pública. Estos factores y sus costos fueron tomados en cuenta al llegar a una alternativa preferida.

==========

MR. RICHARD YOUNG: Good evening, ladies and gentlemen. Welcome to the Public Hearing. If you find a seat, we can begin our Public Hearing.

Good evening and welcome. Thanks for attending the Public Hearing. Good evening, ladies and gentlemen. My name is Richard Young. I am the District Project Development Engineer for the Fourth District of the State of Florida Department of Transportation. This hearing is relative to the potential widening of State Road 710 from County Road 714 to County Road 609 in Martin County.

(The following information in Spanish was provided to the court reporter to insert. This court reporter is not fluent in Spanish.)

VOICE OVER: Buenas tardes y bienvenidos a todos a esta audencia. Hay alguna persona en el público que necesite traducción al Español? Por favor levante la mano para proveerles la traducción o para ayudarlos al final de la presentacion.

(The following continued in English.)

MR. RICHARD YOUNG: Here with me tonight are Mr. Patrick Glass, our FDOT project manager and Mr. Robert Linares, our Metric Engineering

Consultant Manager. And we have many other members of our FDOT and consultant staff here with us tonight.

At this time we would like to recognize any Federal Highway Administration, state, county or city officials who may be present and would like to be recognized. Are there any in the audience?

Okay. Then we can begin with our PowerPoint presentation. Thank you.

VOICE OVER: This Public Hearing is being held in accordance with the Federal Aid Highway Act of 1968 as amended with Chapter 23 of the United States Code 128, Title IV, of the Code of Federal Regulations, Parts 1500 through 1508, Title 23 of the Code of Federal Regulations, Part 771, Florida Statute 339.155, and Executive Order 11988, Floodplain Management, and Executive Order 11990, Protection of Wetlands of the Constitution of the United States of America. This Public Hearing was advertised consistent with federal and state requirements and is being conducted consistent with the Americans with Disabilities Act of 1990.

The Florida Department of Transportation is required to comply with various non-discriminating

laws and regulations, including Title VI of the Civil Rights Act of 1964. Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status.

This information is also provided in the project brochure and on a sign displayed at this hearing.

This Public Hearing is being held relative to the State Road 710 Project Development and Environment or PD&E Study financial management number 419344-1-22-01 and Efficient Transportation Decision Making, or ETDM, project number 7153.

This study was conducted by the Florida Department of Transportation District Four and was developed in cooperation with the Federal Highway Administration, Martin County, the community of Indiantown with representation by the Indiantown CRA Neighborhood Advisory Committee and several other agencies.

The purpose of tonight's Public Hearing is to share information with the general public about the proposed improvement, its conceptual design, all alternatives under study and potential beneficial and adverse social, economic and

environmental impacts upon the community. This Hearing will also address the reclassification of the existing access management classification from an Access Class 4 to an Access Class 3 for the entire length of the project which is from SW Martin Highway to SW Allapattah Road.

The Public Hearing also serves as an official forum providing an opportunity for the public to express their opinions and concerns regarding the location, conceptual design, and potential social, economic and environmental effects of the proposed improvement on the community.

The Department is currently in the second phase of the Project Development process which is known as the Project Development and Environment or PD&E phase. This phase involves the preparation of all preliminary engineering and environmental documentation required for federal approval and subsequent funding.

Apart from this PD&E Study, which is highlighted in red in this figure, there are six other studies along the entire length of State Road 710 extending from US 441 in Okeechobee County to the Port of Palm Beach in Palm Beach County.

This project entails the potential widening from two to four lanes from County Road 714, also known as SW Martin Highway, which is just southeast of the Okeechobee/Martin County line, extending southeast approximately 15 miles to County Road 609 known as SW Allapattah Road.

This facility is classified as a rural principal arterial and is designated as a hurricane evacuation route.

State Road 710 has been designated as part of the Florida Intrastate Highway System and Strategic Intermodal System. These systems consist of a network of highway facilities of interregional significance. These facilities are a crucial component of Florida's transportation infrastructure and are considered critical in terms of carrying economic commerce and providing access to our air and seaports, freight rail terminals, passenger rail, waterways and highways.

State Road 710 within the study limits is an undivided two-lane roadway with approximately 56 feet to 126 feet of existing FDOT right of way. Guardrail runs on the north side along the entire corridor shielding a roadside swale which serves for both runoff for State Road 710 and a regional

drainage system for approximately 25,000 acres from the abutting area to the north of State Road 710.

As traffic volumes within the corridor under study increase due to population and employment growth, the corridor deficiencies and the corresponding project needs become critical. Due to the need to correct the safety and geometric deficiencies of the existing facility, the project need for this corridor has been established. Other factors concerning the project need include the importance of this corridor as a hurricane evacuation route and as a Strategic Intermodal System Highway, the lack of adequate pedestrian and bicycle facilities, and the importance of regional connectivity.

As stated in the previous slide, future traffic anticipated due to the population and employment growth in the county and region is a concern. Traffic projects show approximately double the current traffic volumes for the segment from SW Martin Highway to SW Fox Brown Road and approximately six times the current traffic volumes for the segment from SW Fox Brown Road to SW Allapattah Road. There is a noticeable

difference approaching the end of the project due to the change from a rural area to a more urbanized area approaching Indiantown to the southeast of the project limits.

The following constraints are associated with the proposed widening of State Road 710. A CSX Transportation rail line is adjacent to the State Road 710 southern right of way line. This CSX facility creates a parallel corridor with a right of way varying from 100 to 200 feet. Another important feature within this area of the project is the FEC railroad crossing located approximately 2 miles southeast of the western project limits.

Other constraints associated with the project are several existing and proposed utilities. FP&L transmission lines are located approximately 100 feet to the north of the existing State Road 710 facility, extending along the western half of the project for approximately 7.5 miles within their own private easement of 100 feet. There is also an existing Gulfstream Gas 30-inch pipeline within a private easement of 50 feet extending on the north of State Road 710 for approximately 1.5 miles. Another major constraint is a 50-foot easement for a gas pipeline currently being

constructed by Florida Gas Transmission also to the north of State Road 710 from the beginning of the project to Martin Power Plant Road, a distance of approximately 10 miles.

It was critical that the needs of the project be clearly outlined in order to conduct a comprehensive corridor investigation. Thus, the study effort entailed three distinct components; public involvement, engineering analysis, and environment and socioeconomic analysis. This interdisciplinary approach fully adheres to the requirements of the National Environmental Policy Act or NEPA and other related federal and state laws, rules and regulations.

The public involvement process utilized a consensus building approach that used the public input obtained throughout the study process in order to refine our recommendations. As the study progressed, the study outreach plan was implemented. A project website was also developed, not only for this project, but for all the Project Development and Environment Studies along State Road 710.

A multiphase alternative selection process was followed. Various alternatives were

considered starting from a conceptual design analysis to a final segmental evaluation.

A "No Build" alternative, several Transportation System Management Alternatives, or TSM Improvements, and several Build Alternatives were developed. It should be noted that both the "No Build" option, which maintains the existing facility as is, and the TSM Alternatives, which entails minor improvements such as passing lane concepts and or providing operational improvements to high crash segments, would not effectively address the safety and capacity needs associated with this corridor.

The "No Build" alternative is an alternative solution used in PD&E Studies that assumes maintaining all existing conditions. The existing facility of State Road 710 lacks the components required by the Florida Intrastate Highway System and Strategic Intermodal System facilities and the existing conditions will also be inadequate in terms of future capacity. The "No Build" alternative however was maintained as a viable option providing an effective baseline condition by which all other project alternatives were compared throughout the project alternative

selection process.

A segmental breakdown of the project was developed due to the many constraints mentioned earlier and because of unique characteristics within each of the segments. This methodology allows for site specific existing condition assessment along with a segmental evaluation of geometric and operational features.

The development of the typical section concepts was established to minimize wetland and wildlife impacts, right-of-way impacts and cost while also allowing sufficient capacity.

This typical section was used as a starting point in our selection process due to the components meeting all criteria required by the Florida Intrastate Highway System and Strategic Intermodal System facilities. This typical section includes a four-lane, divided SIS rural arterial typical section developed by the Florida Department of Transportation.

As a result of the preliminary evaluation, two alternatives were selected to continue the alternative selection process. The first involves a four-lane roadway with a 40-foot median (Alternative 4E) and the second involves a

four-lane roadway with a 64-foot median (Alternative 4G). Both of these alternatives include a shared use path and the relocation in-kind of the existing ditch to the north of State Road 710. This existing ditch serves the regional drainage system to the north of State Road 710. These alternatives also include swales to treat the roadway runoff.

After further coordination with the Florida Department of Transportation and the public involvement results from the Alternatives Workshop, the preferred alternative is Alternative 4E, which includes a 40-foot median.

The next phase of the alternative selection process involved the alignment of the preferred Alternative 4E. The constraints of the CSX railroad, FP&L transmission lines, and gas pipelines played a major role in determining the final alignment. The bullets in red give you an idea of the potential relocation cost associated with each of these utilities.

Various alignments were evaluated in the final phase of the alternatives selection process. One of the alignments evaluated involved encroachment into CSX right of way. This

alignment involved preparing a memorandum of understanding between CSX Transportation and the Florida Department of Transportation for the potential future right of way purchase of CSX property by the Florida Department of Transportation. However, this alignment cannot be implemented until a formal agreement with CSX for the acquisition of right of way is established.

The final phase of the alternatives selection process resulted with the preferred North alignment which entails aligning Alternative 4E to the north of the CSX right of way.

Within Segment 1, from SW Martin Highway to the FEC railroad crossing, the preferred typical section involves shifting the shared use path and relocated ditch to the north of the relocated FP&L transmission lines to avoid relocation of the gas pipelines.

Within Segment 2, from the FEC railroad crossing to SW Springhaven Avenue, the typical section maintains the same features as Segment 1, however the Gulfstream Gas pipeline is no longer present.

Within Segment 3, from SW Springhaven Avenue to Martin Power Plant Road, the shared use path

and relocated ditch are no longer separated by utilities and the Florida Gas Transmission Line is to the north of the proposed typical section.

Within Segment 4 and 5, from Martin Power Plant Road to SW Allapattah Road, there are no more utility constraints to the north of State Road 710.

After the typical section and alignment were determined, the next step undertaken as part of the engineering analysis for this corridor was a review of the access management conditions. Florida Statute 335.18, regarding Access Management, was adopted in 1988 and revised in 1992 to improve the safety and operation on state highways. The Department of Transportation has instituted Administrative Rule 14-96, regulating the access permitting process and Administrative Rule 14-97, defining the Access Management Classification System and Standards. These rules establish the minimum spacing for driveway connections, median openings and traffic signals.

As a result of this review, an access management reclassification for State Road 710 is proposed as part of the Build Alternative. The existing access classification is Access Class 4

and the proposed access classification is Access Class 3. As you can see from the table, the only change is that a restrictive median is being proposed to separate opposing lanes of traffic.

Another key engineering issue is the proposed intersection improvements. We are introducing acceleration and deceleration lanes to all median openings. The acceleration and deceleration lanes will facilitate the large percentage of truck traffic of over 25 percent to merge onto the mainline after they have accelerated to normal highway operating speeds.

Another component of the engineering analysis is the proposed FEC railroad overpass. The recommended bridge alternative involves the construction of two sets of structures to bridge eastbound and westbound travel lanes over each crossing. Under this alternative, the alignment of the shared use path is shifted to the south at the vicinity of the FEC railroad crossings, allowing the construction of a combined pedestrian and vehicular bridge in the westbound direction. The segment between the two bridges is supported by retaining walls and embankment.

The drainage analysis involves dry detention

swales to convey the runoff from State Road 710 and the relocation of the existing ditch in-kind to avoid impacting the regional drainage system to the north. No ponds will be necessary for the entire project length. The proposed storm water treatment design will improve the water quality by providing treatment to the storm water runoff from the roadway prior to discharging.

The recommended alternatives were evaluated with regard to environmental impacts in four primary categories: Natural, physical, social, and cultural.

Impacted wetlands are generally low to moderate quality with existing disturbances from agricultural activities prevalent. Impacts to surface waters consist primarily of swales and ditches that extend within the FDOT right of way.

State and federal listed species which may be affected by the project include all of the above-mentioned species. Impacts to habitats which supported listed plant and wildlife species will be minimized to the greatest degree possible. Wildlife crossing opportunities were evaluated and were found to be impractical due to lack of adjacent public lands. No long-term impacts to

regional populations of any listed species are expected to occur.

Water quality will be improved by providing storm water treatment within the proposed roadside swales.

The results of the noise study indicated that noise abatement measures are not warranted for this project.

An air quality assessment was conducted and this project meets the standards established by the U.S. Environmental Protection Agency (EPA).

Several contamination sites are located in the vicinity of the proposed alignment, however none of the potential contamination sites will be directly affected by this project.

This project will not have an effect on sites or properties that have historical, cultural, or sacred significance, or that otherwise meet the minimum criteria for the National Register of Historic Places listing.

Context Sensitive Solutions or CSS, is a proactive, collaborative, interdisciplinary approach to transportation decision making, project development, and implementation, taking into account the views of stakeholders, and the

local area where a project will exist, be operated, and be maintained. CSS considers the physical setting in which a project or activity is to be implemented, and seeks to enhance and conserve community-defining features and environmental resources. This approach seeks to balance safety and mobility with local priorities.

As part of the CSS collaboration within our study area, the following are a few of the CSS components that have been included within the proposed improvements:

A shared use path is proposed to accommodate a multimodal connection.

Public information meetings have been held throughout the life of the project including meetings with private owners.

One of the ways to minimize environmental impacts was by providing ample bridge span lengths for the FEC overpass to allow wildlife and recreational crossing opportunities.

And a transit feasibility study was finalized in October of 2009 which addresses the feasible transit technologies and infrastructure needs for short-term and long-term implementation.

One of the unavoidable consequences on a

project such as this is the necessary relocation of families or businesses. On this project there will be no need to relocate businesses and families to other locations. However, three businesses will be impacted and could be accommodated within their parcel.

If you are required to make any type of move as a result of a Department of Transportation project, you can expect to be treated in a fair and helpful manner and in compliance with the Uniform Relocation Assistance Act.

You will be contacted by an appraiser who will inspect your property. We encourage you to be present during the inspection and provide information about the value of your property.

You may also be eligible for relocation advisory services and payment benefits. If you are being moved and you are unsatisfied with the Department's determination of your eligibility for payment or the amount of that payment, you may appeal that determination.

You will be promptly furnished necessary forms and notified of the procedures to be followed in making that appeal.

A special word of caution: If you move

before you receive notification of the relocation benefits that you might be entitled to, your benefits may be jeopardized.

The relocation specialists are available here tonight. They will be happy to answer your questions and will also furnish you with copies of relocation assistance brochures.

The current overall project costs associated with the State Road 710 improvements are approximately $176 million. Estimates include the relocation cost associated with approximately 1.5 miles of Florida Gas Transmission 30-inch gas pipeline and the relocation of the FP&L transmission lines.

The proposed improvements to State Road 710 were documented in the engineering and environmental studies conducted for this project. These documents and preliminary plans showing the proposed roadway construction improvements are available here tonight for anyone who wishes to examine them. Project information will also be available for review at the FDOT District Four office.

Your comments and concerns are solicited tonight.

Thank you. And this concludes our presentation.

MR. RICHARD YOUNG: At this time anyone desiring to make a statement or present written views and or exhibits relative to the location, conceptual design, socioeconomic effects or the impact on the environment as a result of this project will now have the opportunity to do so. This is an opportunity for you to formally present your comments, opinions and ideas about the project for the permanent record. We ask that you limit your comments to three minutes. And if you have additional comments, you may continue after everyone else has had the opportunity to comment. We will have staff available after the period to address any specific questions one-on-one.

If you are holding speakers' cards, please pass the cards to the aisle and our staff will collect them. If you have not received a card and wish to speak, please raise your hand and our staff will provide you with a card. If you would like to speak, just pass the cards up and then bring them up here.

Are there any officials representing federal, state or local governmental agencies who would

like to make a comment at this time?

Okay. I will now call on those who have turned in cards. When you come forward, please state your name and address. And if you represent an organization, municipality or other public entity, we would appreciate that information as well.

Please use the microphone at the podium so we can get a complete record of your comments.

The first card I have is George Sanchez.

MR. SANCHEZ: It's actually "Jorge" Sanchez, for the record, representing St. Lucie LLC. I'm not here to make any comments. I'm here to just ask questions.

MR. RICHARD YOUNG: Okay.

MR. SANCHEZ: Is this a proper time?

MR. RICHARD YOUNG: Sure. If they are easy questions, we can answer them now, and we can get more in-depth later.

MR. SANCHEZ: Sure.

Okay. What studies have you made concerning the foreign runoff, the existing runoff from the east towards the highway?

MR. GLASS: Basically we calculate the area of runoff towards the roadway. We are picking up

the water in an intercepter ditch and running it underneath 710 and the railroad.

MR. SANCHEZ: Okay. So the existing runoff conditions would be honored?

MR. GLASS: Correct. We pick up all the water that comes our way. It's called the circle flow of water and we reroute it in the same direction that it's always run.

MR. SANCHEZ: Okay. As far as the noise and abatement studies, you were saying that it was equal. How can four lanes be equal to the existing two lanes?

MR. RICHARD YOUNG: We did a noise study and, yes, the noise will be louder in the future. But it doesn't reach the level that requires noise abatement. There are specific federal criteria of 66 decibels or higher, and the noise at the affected residences or the -- the nearby residences doesn't reach that level.

MR. SANCHEZ: Okay. So those are studies that have been made and they are public?

MR. RICHARD YOUNG: They are public record and they are here tonight, and you can request them as well.

MR. SANCHEZ: Okay. For this -- for the

funding of this project, what percent is paid by the Federal Highway Administration funds? What percent is state and what percent is federal funds?

MR. RICHARD YOUNG: It's generally undetermined at this time. But typically it's 75 to 80 percent federal and the rest state.

MR. SANCHEZ: Yes. And federal projects always require the looking into alternative studies and less expensive forms of -- with the same results, correct?

MR. RICHARD YOUNG: Yes.

MR. SANCHEZ: What's the price of relocating the FP&L power lines approximately?

MR. GLASS: The FP&L power lines?

MR. SANCHEZ: Right.

MR. LINARES: The estimate that we have been given at this time, that FP&L has given us, is approximately $8 million for the 7.5 miles. So about a little over a million dollars a mile.

MR. SANCHEZ: About a million a mile. Okay. And has -- in your studies have you ever looked into -- instead of having to deal with the FP&L power lines and the gas lines and all of that, instead of moving the road or expanding the road

to the south -- expanding it to the north of the L-64? And, if so, why wasn't it?

MR. RICHARD YOUNG: You mean completely relocating the road somewhere else?

MR. SANCHEZ: No, not somewhere else. Just immediately north of the L-64 canal.

MR. GLASS: We looked at a wide range of alternatives and we have them back here today. So we would be happy to show you what we've done as far as looking at different alternatives and coming up -- we went through an entire selection process to determine the best way to build this road.

MR. SANCHEZ: Well, thank you very much. I appreciate it.

MR. RICHARD YOUNG: Thank you for your comments.

I believe this is Fred van Vonno.

MR. VAN VONNO: Good evening. I'm an attorney in Stuart and I represent Antonio Galvez (phonetic) and potentially several other landowners in this corridor along the north side of 710; and we just finished settling with Florida Gas, and they're going to be putting in pipeline. They probably already started construction; I'm

not really sure. I haven't been out there.

You mentioned that Florida Gas Transmission line could be relocated and also that FP&L's lines could be relocated. Have you identified for -- is there identified corridors that those two utility facilities would be located to? Because basically it would go further into my client's property.

MR. LINARES: Correct. With regards to the gas line, the majority of the corridor of what is being constructed out there, based on the alignments that we are proposing, would not have to be relocated. There is a mile and a half of that 10-mile section of gas pipeline where it's encroaching right up against the existing State Road 710. So for that mile and a half, that relocation would have to take place. And, yes, it would be encroaching further into the properties on the north side.

MR. VAN VONNO: Is that going to be a separate process then of Florida Gas and potentially FP&L obtaining their additional easements that they need?

MR. RICHARD YOUNG: The FDOT would obtain the right of way, and then they would -- we would transfer it to the gas and electric companies.

MR. VAN VONNO: Okay. In terms of the location where the Florida Gas pipeline -- which has not yet been constructed --

MR. RICHARD YOUNG: Right.

MR. VAN VONNO: -- is it going to be relocated? And I wonder about the planning here, that this couldn't have been coordinated earlier on. But you are talking about relocating a gas pipeline that is in the process of being constructed. And I -- I am sorry to be bringing this up. I can see you shaking your head like, "Yeah, we know."

MR. LINARES: Well, from a coordination standpoint over the past two years we have been coordinating with them, and from day 1 we were trying to avoid this scenario. However, they were so far along in their environment documentation and their permits, that this project was already set in place. So that alignment basically was -- had already been established and they were already moving forward with construction.

MR. VAN VONNO: In terms of the mile and a half that has to be relocated, can you tell me approximately where that is, or do I get to go to the study for that?

MR. LINARES: No. We can definitely, if you want, after this forum, I can take you up here and show you in detail where that relocation would take place.

MR. VAN VONNO: All right. Thank you. That's all I have.

MR. RICHARD YOUNG: Thanks for your comments. I don't have anymore cards. Is there anyone else who would like to speak? Even if you don't have a card, just come forward. Come up, and fill out a card later.

Please step to the microphone. We need to get a record.

MS. WILLIAMS: I'm Pauline Williams. And I just wanted to know if there were any gas lines going south of the road? I see the pipes on the south, digging and everything else, south of the road. So I -- I don't know --

MR. LINARES: There is an area where the pipeline is currently being laid out, so north crosses underneath 710. I'm not entirely sure where that extends to. But there will be a crossing to the south, so I'm assuming there will be some -- some impacts on the south as well.

MS. WILLIAMS: So the road -- so the gas

lines are going to go under the road?

MR. LINARES: There is going to be one crossing where it's going to go -- it's going to have a crossing directly underneath 710 at one location.

MS. WILLIAMS: Also, on either side of the roads that you have, like, ditches on either side, is that -- is that going to have water in them? I mean, it's like -- it's like Allapattah is now, with water on both sides.

MR. LINARES: No. They're being designed as dry swales to accommodate the runoff from the proposed roadway.

MS. WILLIAMS: All right. Thank you.

MR. RICHARD YOUNG: If you would please fill out a card before you leave. There is another card there.

MS. WILLIAMS: I got it.

MR. HANNAH: I'm Bill Hannah. I'm with the Indiantown NAC and representing the Indiantown Company, I guess. We have been working with you guys for two, three years, four years. I have gotten to know Pat real well. And apparently we're talking about coordination. There is another map that I don't see up here today about

bypasses at Indiantown; that's a separate job. There is talk about a bridge to the south; that's a separate job. I can see where this project and the bridge project would fit together fine. But if you were going to consider any kind of rerouting of traffic around Indiantown, which is what I believe a majority of the residents here, and I know the NAC has voiced -- we have a few members of the NAC here. I know we voiced at least wanting an answer before too much is done.

Now, what are the odds of -- let's have a bet. What are the odds on the bypass getting coordinated with this project?

MR. RICHARD YOUNG: Well, I'm not going to give odds, but we're definitely coordinating the bypass with these two projects and they will be investigated in the study that is beginning right now. To build a bypass is a much larger degree of action. We have to do an environmental impact statement and it takes a lot longer. So we have to do it in a step-wise fashion.

MR. LINARES: And -- I am sorry. The only thing I would add to that is that these projects by federal mandate have to have what is called independent utilities. So regardless of whether

that bypass takes place or not, this project is being presented on its own merits without necessarily that bypass being in place.

MR. HANNAH: It doesn't make total sense to me because at least a mile or so of this project would be cut off if we had some of the bypasses that we have. And I don't understand -- I do understand. I understand that you have different people working on different projects at different times. But it's, like, we hope the railroads meet and end, and they get one spike at the end.

MR. GLASS: Well, it turns out that I'm the project manager of both the bypass project and this project, so I have to coordinate with myself. And --

MR. HANNAH: That's why I called on you.

MR. GLASS: I will have to meet with you and I will explain to you what we're doing, okay?

MR. HANNAH: Thanks. Thank you.

MR. GLASS: Okay. I will be here.

MR. RICHARD YOUNG: Is there anyone else that would like to speak? Yes, sir.

Please state your name and fill out a card.

MR. FLEWELLING: My name is Greg Flewelling, Indiantown resident. I appreciate all of the help

from yourselves today. You are quite informative. This gentleman here helped us earlier and this lovely lady over here.

What concerns me is the bypass. I just had a couple of questions.

First of all, coming through Indiantown, if we bypassed Indiantown, I think it would kill the town. My wife manages the Seminole Inn for her mother. We have WW Lumber. And if we didn't have any road traffic through Indiantown, it would severely hurt this town. I think it would absolutely kill it. I think that in this economic times, I don't know about recovery or whatever, but it's very brutal being in business. And I think that the economic impact would be devastating. But in life, you know, things happen and change, and everybody realizes that.

But I guess a couple of questions I was going to ask is: Are you considering, as far as a bypass going right by the town and basically all the traffic going by, or are you considering something -- maybe the westbound traffic still coming through Indiantown and the eastbound being the bypass, or perhaps maybe heavy trucks go around the town and local traffic and stuff would

come each way?

MR. RICHARD YOUNG: Right. A variety of those things are being considered, and there are several alternatives that go right through town as well as around the town. So -- and they will be developed further with a lot more input from the public here as well.

MR. FLEWELLING: Yeah. And, like I said, you know, things happen. I realize that -- I would imagine the budget is quite immense for this study; I heard $1 million a mile. Is that out of -- is that about right?

MR. GLASS: That's a bit high.

MR. FLEWELLING: That's a bit high.

MR. GLASS: However, Bill Howell is here with HW Lochner. We brought him here in case there are any questions on the bypass corridor; so you can discuss it with him. He is the one in the back, near the door. Right there. Feel free, if anyone has questions about the bypass alternatives, discuss it with that gentleman.

MR. FLEWELLING: Okay. I appreciate it. I won't take anymore of your time. But as you're doing these discussions and moving things and gas lines and stuff, I just really would wish you

remember there is a lot of people that live in Indiantown. And we love it. You know, I choose to live here. I could live a lot of places. And just remember that all these maps and pictures, you know, a lot of people live in those little squares and those things, and a lot of people have local businesses. And if you do not have traffic coming through a town -- I don't want to be like the movie "Cars." I used to watch that with my grandson. And, I mean, they put Route 69 through there and the town disappeared and -- 66. And that really could happen to a small town like this.

And originally Martin County had a lot of big plans since Solomon Warfield first settled in Indiantown, and it never really developed. And I think things are going to change in the future. Just keep that in mind. I'd appreciate it. Thank you.

MR. RICHARD YOUNG: Thanks for those comments.

Is there anyone else who would like to make a comment? One more.

MR. MATSON: Hi. I'm Art Matson -- is that on? I'm Art Matson of the NAC in town. And I

just want to thank you people. I notice you are very cooperative and listening to the public. I have seen you change things. You have been here many times. I think I feel like we are related anymore. But I just want to thank you for your understanding and your openmindedness and for the work that you're doing. Thank you.

MR. RICHARD YOUNG: Thank you. Anyone else? Okay. Well, if no one else desires to speak, I wish to remind you that written comments and or exhibits may be presented in lieu of, or as support to, oral statements made here tonight. Written statements may be sent to the attention of Mr. Patrick Glass at the Florida Department of Transportation, District Four Office, at 3400 West Commercial Boulevard, Fort Lauderdale, Florida, 33309-3421. And that address is in your handout and on the comment cards. If written statements are received within 10 days after the date of this hearing, they will be included as part of this hearing. The verbatim transcript of tonight's oral proceedings, together with all of the material displayed at this hearing, will be made a part of the project decision-making process and will be available for public review at the

District's office in Fort Lauderdale.

Thank you for attending this Public Hearing and for providing your input into this project.

And at 7:13 this hearing is officially adjourned.

Thank you very much and good night.

(These proceedings concluded at 7:13 p.m.)

STATE OF FLORIDA)

CERTIFICATE

I, Laura E. Melton, a Registered Merit Reporter, do hereby certify that a Public Meeting regarding Florida Department of Transportation SR 710 PD&E Study, SR 710 Project Development & Environment Study from CR 714 to CR-609 in Martin County, Financial Project ID#419344-1-22-01 was held on the 5th day of October, 2010; that I was authorized to and did transcribe the proceedings from said meeting; that the foregoing pages numbered 3 through 37, comprise a true and correct transcript of same.

Laura E. Melton, RMR

Public Involvement Summary for SR 710 (Beeline Highway)
Project Development and Environment Study

A project website, www.sr710beelinepde.com, has been available as an informational resource to the public throughout the entire study. An Elected Officials and Agency Kick-off Meeting and a Public Kick-off Meeting were both held on March 12, 2008. Approximately 13 people attended the Elected Officials and Agency Kick-off. Two comment sheets were submitted. One discussed the safety and wildlife concerns along this corridor, and the other suggested that the team consider expanding the project to the south closer to the FEC railway. Approximately 21 people attended the Public Kick-off. This meeting was advertised in the Scripps Treasure Coast Newspapers, and an article regarding the project was printed on March 13. At the meeting, two comment sheets were submitted. Common concerns related to drainage of property along the north side of SR 710, wildlife and wetland preservation, and access points to private road entrances were discussed.

After a formal PowerPoint presentation was given, Martin County MPO Administrator Ann Perrotta commented that she was excited to see the transit component of the study begin to materialize and also suggested that the project team present to the Martin County Commission and MPO. A representative from the Indiantown Lyons Club asked about the milling and resurfacing project that was set for SR 710 through Indiantown. A member of the Indiantown Neighborhood Advisory Council encouraged residents to attend future meetings for this project. Indiantown resident Catherine Deninger asked whether it would be possible to begin meetings a bit later so those who work can still attend. A property owner requested that FDOT have meetings with the larger landowners along the corridor and asked whether game fencing had been considered. An attendee asked how coordination works between all SR 710 project segments as the improvements can become confusing for residents.

On October 16, 2008, members of the project team met individually with the Stanley family, whose properties coincide with three major ingress/egress points to SR 710.

A Public Alternatives Meeting was held on November 19, 2008. Numerous exhibits and project information was provided for review, including alternative typical sections, access management analysis, drainage and environmental impacts and the vision for transit along the overall SR 710 corridor. Project newsletters and frequently asked question sheets were also available. Approximately 21 people attended the Public Alternatives Meeting. No comment sheets were submitted. This meeting was advertised in the Scripps Treasure Coast Newspapers.

A Public Hearing was held on October 5, 2010. A formal presentation was conducted and project newsletters were available in both English and Spanish. Prior to the Public Hearing, copies of both the English and Spanish project newsletter were distributed in various locations along the corridor, including the Elisabeth Lahti Library, the local YMCA, the Café Los Amigos Mexican Restaurant and the Taqueria Uruapan Mexican Restaurant. The Hearing was advertised in both the Stuart News and the Indiantown News as well as the Florida Administrative Weekly. Approximately 31 people attended the Public Hearing. Four comment sheets were submitted. Common concerns related to gas line placement and future traffic levels were discussed. One commenter specifically requested that the team study the amount of future trips expected for the corridor in conjunction with the Treasure Coast Regional Planning Council's 2035 plan.

At the Hearing, six attendees spoke before the panel of project team members following a formal PowerPoint presentation. Mr. George Sanchez asked a series of questions pertaining to the existing runoff coming from the east toward the highway, noise and abatement studies, and funding sources. Mr. Sanchez also inquired about the price of relocating power lines and the actual road itself. Mr. Fred van Vonno, an attorney from Stuart, Florida, who represents many residents along SR 710, also asked questions regarding power and gas line relocations. Ms. Pauline Williams asked if there would be any gas lines south of the road. Consultant Project Manager Robert Linares stated that there will be a crossing to the south, so impacts can be anticipated. She also asked if the ditches on either side of the roadway would be filled with water, however she was reassured that they would not. Mr. Bill Hannah of the Indiantown Gas Company and the Neighborhood Advisory Committee asked about the chances of a bypass facility being constructed and wanted to make sure all neighboring studies and projects were being carried out in accordance with one another. Mr. Greg Flewelling expressed concern over a bypass route potentially damaging the economic well-being of Indiantown, and he asked that the project team keep the business interests of residents at the forefront of this study. Mr. Art Matson of the Neighborhood Advisory Committee thanked the project team for their open-minded and cooperative nature throughout the life of the project.

On October 4, an email was received from Mark R. Dickman of the US Geological Survey Florida Water Science Center. Mr. Dickman was concerned that a long-term monitoring well located near the intersection of SW Washington Avenue and SW Osceola Street (two blocks northeast of SR 710) will be destroyed due to this project's construction. Mr. Dickman was unable to attend the Hearing, but he asked various questions regarding the potential effects of construction and the actual construction schedule.

State Road 710 (Beeline Highway)
Project Development and Environment (PD&E) Study

Stanley Family Coordination

- Stanley family briefing summary photos

SR 710 (Beeline Highway) PD&E Study
Stanley family briefing
October 16, 2008, at 1 p.m.

Attendees:
Gregor Senger, FDOT
John W. Little III, Brigham Moore LLP
Stanley family members
Robert Gutierrez, Metric
Heather Leslie, MRG

FDOT Project Manager Gregor Senger introduced project team members and thanked the Stanley family for meeting with the team to provide feedback on the project.

Robert Gutierrez reviewed the project limits and provided an overview of the project. He showed the group the two proposed typical sections being studied and explained that no impacts to the CSX railroad are anticipated as a statewide transit study was being conducted and would use the railway.

During the presentation, the Stanley family noted that properties 1, 2, 8, 9 and 10 as identified on the map are actually owned by Patrick Stanley who is not related. The Carol Stanley family owns parcels 3,4,5,6 and 7.

As part of this study, it is anticipated that an additional 70 feet of right of way will be needed north of SR 710. FDOT will also need to replace in kind the drainage ditch that is currently adjacent to the road. Stanley family members informed the project team that the ditch and surrounding ponds are always flooded and showed the team a South Florida Water Management District (SFWMD) aerial photograph taken after a storm in 2004. The family is going to provide a copy of the photograph.

Project team members are currently coordinating with FP&L and other utilities regarding relocation possibilities and necessary easements.

Included in the proposed widening of SR 710 is an access management study that will evaluate where median openings would be appropriate and compliant. There are three ingress/egress points from the Stanley's property to SR 710. As part of the meeting, the project team asked the Stanley family to identify which of the three would be most critical to have an open median. The family asked that all three be fully open median locations as they are all used by trailers, trucks and semi-trucks for freight delivery. Robert Gutierrez said the project team would re-evaluate the median opening locations, but would have to ensure that the locations are compliant with FDOT standards that help ensure safety. There is

currently one opening planned that would allow for U-turn access to the property. This median would have a 64-foot opening to allow for sufficient turning space.

The Stanley family asked whether a pond study was part of this PD&E as proposed pond sites were no longer featured on the corridor map. The family also wanted to know what would be done to drain the water from the ditch, as oftentimes there is standing water to the edge of the asphalt. They asked that the ditch be widened – possibly into a canal. Robert Gutierrez explained that because of new rules by SFWMD, additional pond sites were not anticipated. The draining team would be evaluating the culverts beneath SR 710 and the CSX line as these drains lead to Lake Okeechobee. Gregor Senger said the road may have to be elevated slightly.

Stations 300, 395, 210

The land in that area is zoned to accommodate one unit per 20 acres. The family said they explore that development potential. The two most important items regarding the PD&E Study are maintaining the median openings at their driveways and dealing with the drainage issues.

The meeting adjourned at approximately 1:30 p.m.
