

Request for Research Funding for FY 2019-2020

Requesting Office	Forecasting and Trends	Priority	7 of 7
Proposed Title	TPF-5 (198) Urban Mobility Study		
Justification	Mobility is a key part of the mission of FDOT and analysis of mobility is a growing portion of the planning process at several levels. Texas Transportation Institute continues to be a nation leader in addressing mobility analysis methods and practices especially as new federal requirements for performance management are being implemented.		
Impact	Participation in this study will help FDOT meet its national analysis and reporting requirements as well as influence the national discussion surrounding mobility analysis. In addition, project benefit evaluation tools being developed through the Pooled Fund study are of interest to Forecasting and Trends, Systems Implementation and Environmental Management Offices.		
Affected Offices	Forecasting and Trends, Systems Implementation, Policy Planning, Environmental Management		
Existing Work
