GENERAL NOTES:

1. Special Conditions may be required in accordance with these notes and the following sheets.

A. Railroad Crossings:
   a. If an active railroad crossing is located closer to the Work Area than 300 feet, extend the Buffer Space as shown on Sheet 2.
   b. If the flagging of vehicles across an active railroad crossing cannot be avoided, provide a uniformed traffic control officer or flagger at the highway-rail grade crossing to prevent vehicles from stopping within the grade crossing, even if automatic train warning devices are in place.
   c. If the work area encroaches on the Centerline, use the Layout for Temporary Lane Shift in Sheet 2 only if the Existing Paved Shoulder width is sufficient to provide for an 11' lane between the work area and the edge of Existing Paved Shoulder. Reduce the posted speed when appropriate.

2. Temporary Raised Rumble Strips:
   a. Use when both of the following conditions are met concurrently:
      i. Existing Posted Speed is 55 mph or greater;
      ii. The work operations are 60 minutes or less.
   b. Use a consistent Strip color throughout the work zone.
   c. Place each Rumble Strip Set transversely across the lane at locations shown.
   d. Use Option 1 or Option 2 as shown on Sheet 2. Use only one option throughout work zone.

3. Additional one-way control may be provided by the following means:
   A. Flag-carrying vehicle;
   B. Official vehicle;
   C. Pilot vehicles;
   D. Traffic signals.

When flaggers are the sole means of one-way control, the flaggers must be in sight of each other or in direct communication at all times.

4. When a side road intersects the highway within the TTC zone, place additional TTC devices in accordance with other applicable TCZ Indexes.

5. The two channelizing devices directly in front of the work area may be omitted provided vehicles in the work area have high-intensity rotating, flashing, oscillating, or strobe lights operating.

6. When Buffer Space cannot be attained due to geometric constraints, use additional TTC devices in accordance with other applicable TCZ Indexes.

7. ROAD WORK AHEAD and the BE PREPARED TO STOP signs may be omitted if all of the following conditions are met:
   a. Work operations are 60 minutes or less.
   b. Speed limit is 45 mph or less.
   c. There are no sight obstructions to vehicles approaching the work area for a distance equal to the Buffer Space shown in Table 1.
   d. Vehicles in the work area have high-intensity, rotating, flashing, oscillating, or strobe lights operating.

8. See Index 600 for general TCZ requirements and additional information.

9. Automated Flagger Assistance Devices (AFADs) may be used in accordance with Specifications Section 102, 990 and the APL vendor drawings.

CONDITIONS

WHERE ANY VEHICLE, EQUIPMENT, WORKERS OR THEIR ACTIVITIES ENCROACH THE AREA BETWEEN THE CENTERLINE AND A LINE 2' OUTSIDE THE EDGE OF TRAVEL WAY.

</table>
**SYMBOLS:**
- Work Area
- Channelizing Device (See Index No. 630)
- Work Zone Sign
- Flagger
- Lane Identification + Direction of Traffic

**DESCRIPTION:**
- Temporary Raised Rumble Strip Set (See GENERAL NOTE #2)
- Removable Polymer Stripping Tape
- Molded Engineered Polymer Set

**NOTES:**
- May Be omitted if ROAD WORK AHEAD sign is installed upstream within the project limits.

**WITH TEMPORARY RAISED RUMBLE STRIPS**
(When Required See GENERAL NOTE #2)

**TEMPORARY RAISED RUMBLE STRIPS**

**OPTION - 1**
- Removable Polymer Stripping Tape

**OPTION - 2**
- Molded Engineered Polymer Set
SYMBOLS:
- Work Area
- Channelizing Device (See Index No. 600)
- Work Zone Sign
- Flagger
- Lane Identification + Direction of Traffic

TEMPORARY RAILROAD CROSSING BUFFER SPACE EXTENSION

TEMPORARY LANE SHIFT TO SHOULDER WHEN WORK AREA ENCROACHES ON THE CENTERLINE

SPECIAL CONDITIONS
