**Sheet No.** 1 of 2
FENCING TERMINALS AT RURAL INTERCHANGES

END LA R/W Line & Fence

NOTE: LA R/W along the crossroad will extend a minimum of 500' beyond the end of the acceleration or deceleration taper, establishing the end for both sides of the roadway. In the absence of a taper the radius point of the ramp return will be used with the above criteria.

For interchange quadrants having no ramp the LA R/W will extend along the crossroad to a point opposite the limit of LA R/W established by the ramp taper or radius point as noted above.
