

## **224.16 Path Railings**

Requirements for railings and fences are discussed in **FDM 222.4**.

## **224.17 Typical Sections**

Example typical sections are provided in **FDM 306**.

### **224.17.1 Pavement Design**

See the [FDOT Pavement Management website](#) for guidance on pavement requirements.

Provide a pavement design equivalent to standard shoulder pavement:

- 12-inch Stabilized Subgrade
- Base Group 1
- 1.5-inch Structural Course.

## **224.18 Shade Considerations**

Shade along shared use paths is desired. Consider shade from landscaping and shade from architectural sources such as buildings, pavilions, and shade sails.

To maximize shade and minimize costs:

- Begin coordination between the designer, project manager, utilities, district landscape architect, and the landscape's maintaining agency during Phase I of the design.
- Choose an alignment of the path that can capitalize on shade from existing and proposed trees or architectural sources.

For more information on shade from Landscape Design, refer to **FDM 228**, **FDM 329** and **Work Program Instructions Part 3, Chapter 16**.
