

Rigid Pavement Design Manual Updates for 2022

- **Chapter 2**
 - Updated Figures 2.1 and 2.2 to clarify dimensions.

- **Chapter 4**
 - Updated terminology – we no longer use a treated drainage layer (e.g., Asphalt Treated Permeable Base, Cement Treated Permeable Base). “Draincrete edgedrain” is the correct term. Updated throughout.

- **Chapter 5**
 - Clarified that a longitudinal joint should be placed in the center of the lane on single-lane ramps. This provides clear consistency with ***Standard Plans, Index 350-001***.
