Subgrant Overview

The Florida Department of Transportation (FDOT) State Safety Office awards subgrants to traffic safety partners to undertake priority area programs and activities to improve traffic safety and reduce crashes, serious injuries, and fatalities. A list of traffic safety priority areas along with descriptions is provided on page 8 of this document. Subgrants may be awarded for assisting in addressing traffic safety deficiencies, expansion of an ongoing activity, or development of a new program.

Subgrant Timeline

Subgrants are awarded on a federal fiscal year (FY) basis (October 1–September 30). Below is a timeline of the subgrant process.

- **January 1 – Last day of February** — Entities interested in applying for funding submit concept papers describing their proposed efforts for the next award cycle beginning October 1.
- **August – September** — Entities are notified as to whether or not their concept paper has been selected and additional information on how to complete the Subgrant for Highway Safety Funds application.
- **October 1** — Subgrant fiscal year begins
- **September 30** — Subgrant fiscal year ends

Funding

Agencies Eligible to Receive Funding

Many types of organizations are eligible to receive traffic safety subgrant funding: government agencies, political subdivisions of state, local, city and county government agencies, law enforcement agencies, state colleges and state universities, school districts, fire departments, public emergency service providers, and certain qualified non-profit organizations (e.g., MADD, SADD, foundations, etc.).

Qualified Non-Profit Organizations must provide their “Certificate of Status” from the Florida Department of State, Division of Corporations, verifying their not-for-profit status when submitting their concept paper. The “Consumer’s Certificate of Exemption” from the Florida Department of Revenue or a letter from the Department of the Treasury confirming Section 501(c)(3) status **is not sufficient to meet this requirement.**

If the non-profit organization’s project is selected for funding, it must provide a financial statement showing available funds equal to or greater than the amount of the subgrant award, at the time of award.

Funding Restrictions

Replacement/supplanting of existing program expenditures and/or items are not allowable costs. Examples of unallowable costs include but are not limited to: replacement of vehicles purchased through previous subgrants, program maintenance, rehabilitation, and construction. Other unallowable costs are dealt with on a project-by-project basis.

Funding Cycle

Subgrants are administered and funded on a federal fiscal year basis (October 1 – September 30), however the start date is always contingent upon allocation schedules of the federal dollars. Funding is approved on a yearly basis.

Local subgrants are usually not funded for more than three consecutive years in a given priority area, however evaluation and selection is done on an annual basis, so there is no guarantee that a local subgrant will be funded consecutively or for more than one year. Projects deemed as statewide activities or deemed necessary based on data available by the FDOT State Safety Office may be funded for a longer period of time if funds are available.

Subgrants are intended to provide “seed” money to start new local programs. Projects should become self-sufficient when subgrant funding terminates. To promote self-sufficiency, agencies are expected to provide a local match when funding for personnel (other than overtime) is included in second and third year projects. The local match is normally 25% for second year projects and 50% for third year projects.

Selection Criteria

The FDOT State Safety Office reviews all concept papers for compliance with state and federal regulations. Concept papers that comply with these regulations are prioritized using the following criteria:

- Does the concept paper satisfy a specific traffic safety need identified by the FDOT Safety Office?
- Does the applicant agency serve a city/county ranked in the top 25% of its population group for the priority area in which funds are being requested according to the Florida Highway Safety Matrices?
- Does the crash and/or citation data supplied in the concept paper's "Statement of the Problem" document an existing traffic safety problem?
- Does the concept paper support the Strategic Highway Safety Plan goals and objectives?
- If the agency was funded in the past, did it submit reports, invoices, and financial paperwork on a timely basis and implement the activities that were detailed in the subgrant agreement?
- Does the indirect cost rate requested significantly affect the proposed project's ability to adequately address the traffic safety need?

The FDOT State Safety Office is required by the National Highway Traffic Safety Administration (NHTSA) to evaluate and document the risk for each entity applying for federal subgrant funds prior to making an award. Each applicant is assessed for risk of noncompliance with federal and state statutes, federal and state regulations, terms and conditions of the subgrant as well as the applicant's financial stability, quality of management systems, history of performance, single audit compliance, and prior audit findings, if applicable. This information is used to determine the appropriate level of monitoring if a subgrant is awarded. If the applicant does pose a risk, but the proposal has merit, the FDOT State Safety Office may, as a condition of awarding subgrant funds, impose specific terms or conditions.

Projects that are ultimately selected should provide the greatest impact to the high crash, high fatality, and/or high injury challenges that Florida faces. If concept papers are not received from those areas identified as high crash, high fatality, and/or high injury, the FDOT State Safety Office may directly solicit concepts from agencies within targeted high-risk areas.

Notification

Notification as to whether a concept paper has been selected is sent to the head of each agency between August and September. Agencies that are selected will receive further instructions on how to complete the subgrant application highway safety funds at that time.

Submission Deadline

Concept papers are accepted from January 1 through the last day of February for the next funding cycle. (E.g. Concept papers submitted January 1, 2019 will be for the October 2019 – September 2020 funding cycle.) Concept papers must be submitted through the Florida Highway Traffic Safety Subgrant Management System.

Concept papers cannot be submitted in the system after the last day of February.

Examples

Beginning with FY 2020, concept papers will no longer be submitted in paper form; however, example concept papers from previous years are available on the FDOT State Safety Office website. The format of the example concept papers mimics the online concept paper application.

Traffic Safety Priority Areas

Aging Road Users – Includes traffic safety programs designed to improve aging road user safety awareness, access to alternative transportation, and education. Concept papers can address areas such as education, training, surveys and public information efforts. Items eligible for funding under this category may include but are not limited to: overtime for education, equipment for training, and public information and education materials. Funding for equipment is contingent upon an evidence of need clearly defined in the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Community Traffic Safety Outreach – Includes traffic safety programs identified by local communities that address crash problems, establish priorities, and develop appropriate intervention techniques. Concept papers can address areas such as education, surveys or public information efforts. Items eligible for funding under this category may include but are not limited to: public information and education materials. Subgrants for equipment only are not allowable.

Distracted Driving – Includes traffic safety programs to increase safety awareness, prevention, and education. Concept papers can address areas such as education, training or public information efforts. Items eligible for funding under this category may include but are not limited to: overtime for education, equipment for training, and public information and education materials. Funding for equipment is contingent upon an evidence of need clearly defined within the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Impaired Driving – Includes high visibility enforcement (HVE), youth alcohol programs, community prevention/intervention programs and driving under the influence (DUI) courts. Concept papers can address areas such as specialized enforcement, education, training or public information efforts. Items eligible for funding under this category may include but are not limited to: overtime, alcohol testing equipment, in-car video systems, public information and education materials and DUI checkpoint equipment (including trailers, light towers, traffic cones, arrow boards, and generators). Funding for equipment is contingent upon an evidence of need clearly defined in the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Motorcycle Safety – Includes programs to increase safety awareness and skills among motorcyclists. Concept papers can address areas such as specialized enforcement, education, training and public information efforts. Items eligible for funding under this category may include but are not limited to: overtime, equipment for training and public information and education materials. Funding for equipment is contingent upon an evidence of need clearly defined in the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Occupant Protection and Child Passenger Safety – Includes safety belt use awareness, safety belt and child restraint enforcement, expanding child passenger safety fitting stations, and other occupant protection educational programs. Concept papers can address areas such as training, enforcement, surveys and public information and education materials. Funding for equipment is contingent upon an evidence of need clearly defined in the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Pedestrian and Bicycle Safety – Includes programs to increase safety awareness and skills among pedestrians, bicyclists and motorists sharing the road. Concept papers can address areas such as education, training, enforcement, surveys and public information efforts. Items eligible for funding under this category may include but are not limited to: overtime, public information and education materials, bicycle skills courses and training for professionals involved with all aspects of pedestrian and bicycle safety. Funding for equipment is contingent upon an evidence of need clearly defined in the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Police Traffic Services – Includes programs related to traffic enforcement, crash investigation equipment and general traffic safety equipment. It may also include comprehensive traffic programs (a combination of multiple priority areas in one subgrant). Concept papers should address traffic safety needs. Funding for equipment is contingent upon an evidence of need clearly defined in the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Public Traffic Safety Professionals Training – Includes training for public safety traffic enforcement officers and applicable support staff in the areas such as traffic homicide investigation, traffic crash reconstruction and DUI enforcement detection. Training classes should be designed to improve the skills and abilities of Traffic Enforcement Professionals as well as Crash Investigation personnel and acquaint them with the new technology, theories, and techniques in their areas of practice. Items eligible for funding under this category may include but are not limited to: overtime, registration fees and equipment for training. Subgrants for equipment only are not allowable.

Speed/Aggressive Driving – Includes speeding, aggressive driving, red light running, and other traffic enforcement activities. Concept papers can address areas such as specialized enforcement, education and public information efforts. Items eligible for funding under this category may include but are not limited to: overtime, speed measuring devices, radar display trailers and public information and education materials. Funding for equipment is contingent upon an evidence of need clearly defined within the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Teen Driver Safety – Includes traffic safety programs to increase teen driver safety awareness, prevention, and education. Concept papers can address areas such as specialized enforcement, education, training or public information efforts. Items eligible for funding under this category may include but are not limited to: overtime for education, equipment for training and public information and education materials. Funding for equipment is contingent upon an evidence of need clearly defined within the problem statement and a comprehensive plan that requires the use of the requested equipment. Subgrants for equipment only are not allowable.

Traffic Records – Includes the addition of crash, citation, roadway, and Emergency Medical Service (EMS) data into electronic record management systems, the development of comprehensive highway safety information systems and the automation of analytical processes. Items eligible for funding under this category may include but are not limited to: computer software (other than citation and crash form software) and hardware needed to implement TraCS or traffic records management systems. Support for proprietary crash and citation software activities are not funded because the state provides software that includes the uniform citation form, DUI citation form, DUIPak, long and short form crash reports and the update/continuation form is available at no charge to all Florida law enforcement agencies. However, comprehensive data system updates can be considered.

Traffic Records Coordinating Committee (TRCC) – The National Highway Traffic Safety Association (NHTSA) awards additional funding that can only be used for Traffic Records with the conditions that the distribution of these funds must be made by a Traffic Records Coordinating Committee (TRCC). The review and approval of these subgrants goes through a separate process but everything else is similar to the above Traffic Records priority area.

The funding can be used for projects that improve the accuracy, completeness, timeliness, and uniformity of the state's six traffic records systems (citation/adjudication, crash, driver, EMS/Injury Surveillance system, roadway and vehicle) or that advance the goals and objectives of Florida's TRCC as documented in the Florida Traffic Safety Information System Strategic Plan 2017–2021. Subgrant funding can no longer be used to help purchase hardware/equipment/peripherals needed to use electronic reporting software. Clerk of Court Offices are allowed to use TRCC subgrant funding to purchase third party software to provide an interface with law enforcement agencies. If the funding will be used to purchase a Records Management System, Case Management System, or other type of overall document management system, only the portion of the system related to traffic records (e-crash or e-citation data) can be funded.

Law enforcement agencies that applied and received subgrant funding through the Department of Highway Safety and Motor Vehicles (DHSMV) Safety Data Improvement Project (SaDIP) Subgrant to purchase laptops and mounting hardware to support electronic reporting of commercial motor vehicle crashes to the State, are still eligible to apply for TRCC funding. The DHSMV subgrant funding was specific to commercial motor vehicle crash data improvements.

Agencies are encouraged to apply for both the Traffic Records and TRCC priority areas. Please note: this requires the submission of two separate concept papers!

Work Zone Safety – Includes traffic safety programs to increase work zone awareness, enforcement, and education. Concept papers can address areas such as specialized enforcement, education, training, and/or public information efforts. Items eligible for funding under this category may include but are not limited to: overtime for education, equipment for training, and public information and education materials. Subgrants for equipment only are not allowable.

Highway Traffic Safety Subgrant Management System

Getting Registered in the System

Applying for Federal Highway Safety funds begins with registration in the Highway Traffic Safety Subgrant Management System.

The system link is: <https://fdot.intelligrants.com>

There are two ways to register:

- 1) On the home page, click on the “New User” link located in the “Login” box on the right side of the page. This will take you to the registration page.
- 2) Contact your agency System Administrator to request access.

The screenshot shows the login page of the Highway Traffic Safety Subgrant Management System. At the top left is the FDOT logo and the text "Highway Traffic Safety Subgrant Management System". To the right is a banner image of a highway with cars. Below the banner is a "System Login" button. The main content area has the title "The Florida Department of Transportation's Highway Traffic Safety Subgrant Management System" and a greeting "Greetings,". A welcome message follows, stating the system's purpose and providing a link to the grants page: <http://www.fdot.gov/safety/3-Grants/Grants-Home.shtml>. A bullet point notes that the system is only compatible with Internet Explorer and Firefox. On the right side, there is a "Login" box with fields for "Username" and "Password", a "LOGIN" button, and links for "New User?" and "Forgot Username/Password?". A mouse cursor is pointing at the "New User?" link.

The Florida Department of Transportation's Highway Traffic Safety Subgrant Management System

Greetings,

Welcome to the Florida Department of Transportation's Highway Traffic Safety Subgrant Management System. This system is the gateway to applying for and securing subgrant funding to improve highway safety in your community. If you are not aware of the grant programs we support, please see our website at <http://www.fdot.gov/safety/3-Grants/Grants-Home.shtml>

- This system is only compatible with Internet Explorer and Firefox web browsers. Any other web browsers (Google Chrome, Safari, etc.) will not work correctly and are not supported.

Login

Username

Password

LOGIN

[New User?](#)

[Forgot Username/Password?](#)

On the Registration page, complete all required information fields and click on the “Save” button located at the top right side of the page.

Note: Please be sure to spell out the entire name of your organization!

The screenshot shows a web form titled "Registration" with a "Back" button. A red callout box with the text "Don't forget to Save after completing the required fields!" has a red arrow pointing to a "SAVE" button in the top right corner. The form includes a section for "Contact Information" with the following fields: Name (Prefix, First, Middle, Last, Suffix), Organization, Title, Address, City, State, Zip code, County, Phone #1, Phone #2, Email, Username, Password, and Confirm Password. Required fields are marked with an asterisk (*).

	Prefix	First	Middle	Last	Suffix
Name	<input type="text"/>	<input type="text" value="Jane"/>	<input type="text"/>	<input type="text" value="Doe"/>	<input type="text"/>
Organization	<input type="text" value="Agate Test Organization"/>				
Title	<input type="text"/>				
Address	<input type="text" value="123 W Test Way"/>				
City	<input type="text" value="Orlando"/>		State	<input type="text" value="Florida"/>	Zip code <input type="text" value="12345"/>
County	<input type="text" value="Hillsborough County"/>				
Phone #1	<input type="text" value="1234567891"/>		Phone #2	<input type="text"/>	
Email	<input type="text" value="none@none.com"/>				
Username	<input type="text" value="JDoe1"/>				
Password	<input type="text"/>		Confirm Password	<input type="text"/>	

Once the Registration form is saved, FDOT will be notified of the request. Upon approval of the request, the user will receive an email message that user access has been approved. **Requests will only be processed during normal business hours, Monday through Friday, 8:00 am to 5:00 pm.**

All registration requests will be added to the system as a “Subrecipient Viewer” and may access the system but may make no changes until a Subrecipient System Administrator is delegated by their organization. Each organization must assign, at least one, with a maximum of two, Subrecipient System Administrators to coordinate access to the system and submit documents to the FDOT State Safety Office, on behalf of the agency. Subrecipient System Administrators may add access for other agency individuals to edit or view and/or submit documents. concept papers

A “Subrecipient System Admin Request Form” must be completed and signed by the agency head or delegate (copy of the delegation letter must be provided), to grant authority to allow completion and submission of concept papers. Completed forms should be sent to Danielle King at Danielle.King@dot.state.fl.us for processing.

System Roles

Subrecipient Viewer Role

Authority: “Viewer” has the authority to access the system and view all documents for the agency; however, this role cannot edit or upload anything within the system.

All user requests will be added to the system as a “Subrecipient Viewer” and may access the system but may make no changes until a Subrecipient System Administrator is delegated by their organization. Editor Roles are assigned by the System Administrator.

Subrecipient System Administrator Role

Authority: The “System Admin” Role has the authority to:

- 1) Access the system on behalf of the organization
- 2) Add and delete other user access for the organization
- 3) Edit documents within the system
- 4) Submit final documents to the FDOT State Safety Office via the Highway Traffic Safety Subgrant Management System, on behalf of the organization.

The system allows a maximum of two “System Admin” roles to be assigned to each organization.

System Administrator privilege is assigned by the FDOT State Safety Office upon email receipt of the Subrecipient System Administrator Request Form, signed by the Agency Head. System Administrator(s) will receive instructions on how to add and delete other users to the system and projects with edit capabilities.

Note: If an agency is small and/or one person is handling all aspects of FDOT subgrant programs, that person should be given the “System Admin” role, which will allow every function within the system.

Subrecipient Editor Role

Authority: The “Editor” Role has the authority to:

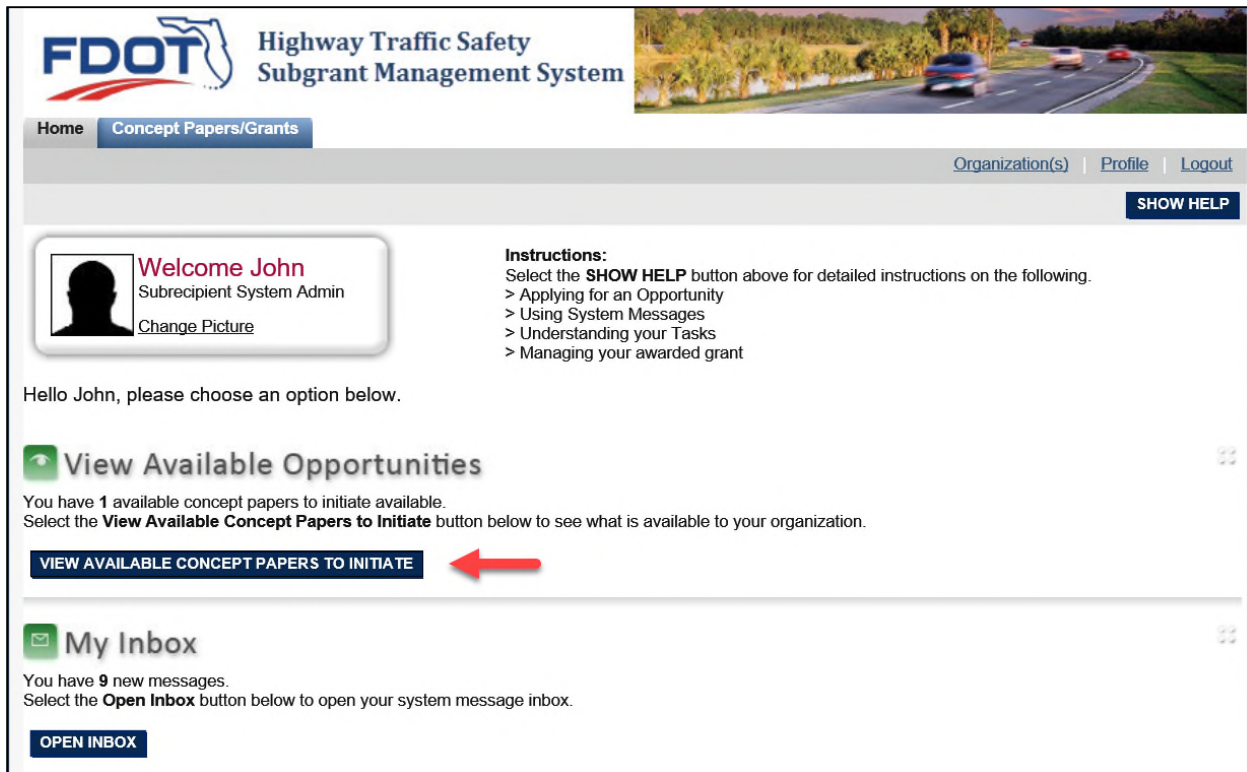

- 1) Access the system on behalf of the organization
- 2) Edit documents within the system
- 3) Submit final documents to the FDOT State Safety Office via the Highway Traffic Safety Subgrant Management System, on behalf of the organization.

The FDOT State Safety Office will not provide “Editor” access to the system through registration requests submitted in the system.

Getting Started

Creating a New Concept Paper

From the home screen, click the “View Available Concept Papers to Initiate” to create a new concept paper. Then Select “Apply Now” from the next screen

The screenshot shows the home interface of the FDOT Highway Traffic Safety Subgrant Management System. At the top, there is a header with the FDOT logo and the system name. Below the header, there are navigation links for Home, Concept Papers/Grants, Organization(s), Profile, and Logout. A 'SHOW HELP' button is also present. The main content area features a welcome message for 'John', a 'Change Picture' link, and a list of instructions. Below this, there is a section titled 'View Available Opportunities' with a green eye icon. It states that there is 1 available concept paper to initiate and provides a button labeled 'VIEW AVAILABLE CONCEPT PAPERS TO INITIATE', which is highlighted with a red arrow. Below this is a 'My Inbox' section with a green envelope icon, indicating 9 new messages and providing an 'OPEN INBOX' button.

Hello John, please choose an option below.

View Available Opportunities

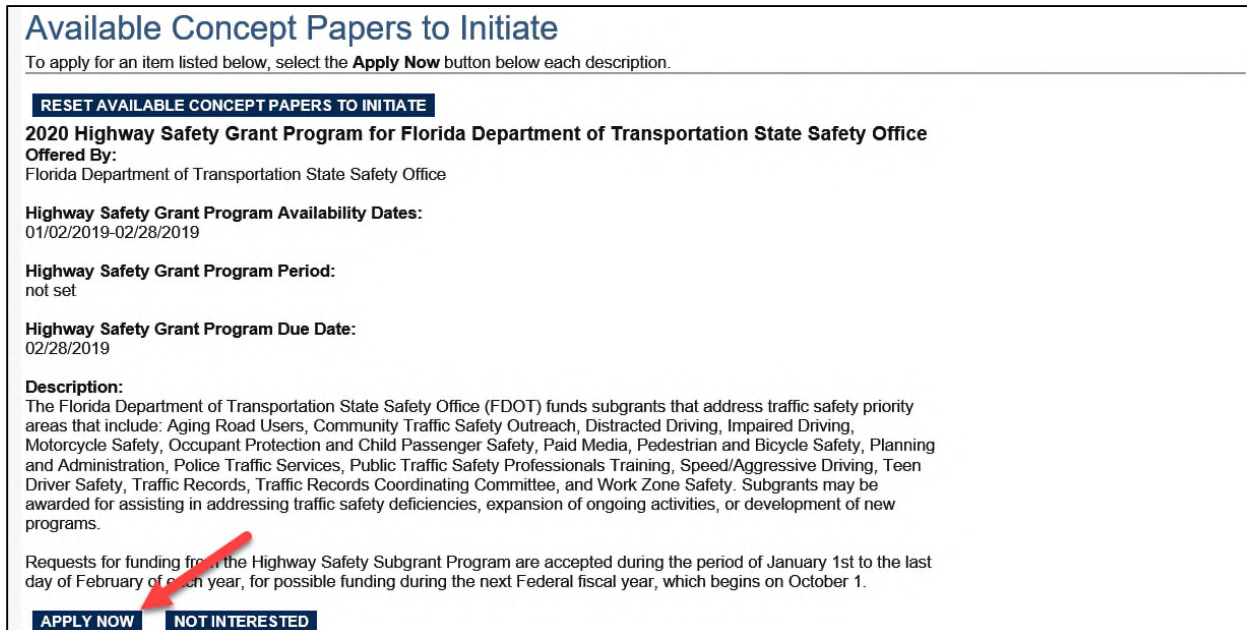

You have **1** available concept papers to initiate available.
Select the **View Available Concept Papers to Initiate** button below to see what is available to your organization.

VIEW AVAILABLE CONCEPT PAPERS TO INITIATE

My Inbox

You have **9** new messages.
Select the **Open Inbox** button below to open your system message inbox.

OPEN INBOX

The screenshot displays the 'Available Concept Papers to Initiate' page. It includes a header with the title and a note to select the 'Apply Now' button for each item. Below this is a button labeled 'RESET AVAILABLE CONCEPT PAPERS TO INITIATE'. The main content area describes the '2020 Highway Safety Grant Program for Florida Department of Transportation State Safety Office', listing the offering organization, availability dates (01/02/2019-02/28/2019), program period (not set), and due date (02/28/2019). A detailed description of the program's focus on traffic safety priority areas is provided. At the bottom, it states that requests for funding are accepted from January 1st to the last day of February of each year. Two buttons, 'APPLY NOW' and 'NOT INTERESTED', are at the bottom, with a red arrow pointing to the 'APPLY NOW' button.

Available Concept Papers to Initiate

To apply for an item listed below, select the **Apply Now** button below each description.

RESET AVAILABLE CONCEPT PAPERS TO INITIATE

2020 Highway Safety Grant Program for Florida Department of Transportation State Safety Office
Offered By:
Florida Department of Transportation State Safety Office

Highway Safety Grant Program Availability Dates:
01/02/2019-02/28/2019

Highway Safety Grant Program Period:
not set

Highway Safety Grant Program Due Date:
02/28/2019

Description:
The Florida Department of Transportation State Safety Office (FDOT) funds subgrants that address traffic safety priority areas that include: Aging Road Users, Community Traffic Safety Outreach, Distracted Driving, Impaired Driving, Motorcycle Safety, Occupant Protection and Child Passenger Safety, Paid Media, Pedestrian and Bicycle Safety, Planning and Administration, Police Traffic Services, Public Traffic Safety Professionals Training, Speed/Aggressive Driving, Teen Driver Safety, Traffic Records, Traffic Records Coordinating Committee, and Work Zone Safety. Subgrants may be awarded for assisting in addressing traffic safety deficiencies, expansion of ongoing activities, or development of new programs.

Requests for funding from the Highway Safety Subgrant Program are accepted during the period of January 1st to the last day of February of each year, for possible funding during the next Federal fiscal year, which begins on October 1.

APPLY NOW **NOT INTERESTED**

Concept Paper Forms

There are two options for accessing the forms of the concept paper.

- 1) Scroll down on the first screen to review the forms overview and to access each form of the concept paper.

[Top of the Page](#)

Powered by IntelliGrants®

© Copyright 2000-2019 Agate Software, Inc.

- 2) Select the "Forms Menu" link from the Document Navigation Menu, at the top of the screen. Individual forms can be selected from the pop-up menu.

The Document Navigation Menu is accessible from any screen within the system.

The name of the form you are working in can be found at the top of each form.

This screenshot shows the FDOT Highway Traffic Safety Subgrant Management System interface, specifically the "Applicant Information" form. The header is the same as the previous screenshot. Below the header, there is a navigation bar with links for Training Materials, Organization(s), Profile, and Logout. A red arrow points to the "Forms Menu" link in the navigation bar. The form title "APPLICANT INFORMATION" is displayed at the top of the form. A red box highlights the "APPLICANT INFORMATION" title. A red arrow points from the text box to the "APPLICANT INFORMATION" title. The text box contains the following text: "The name of the form you are working in can be found at the top of each form." Below the title, there are instructions: "Please complete this page, then click the Save button. Required fields are marked with an *". There are two input fields: "Applicant Agency:" and "Implementing Agency:". The "Applicant Agency:" field is highlighted with a red box.

Form Field Limitations

The system does not recognize formatted text properly. If you are copying and pasting information into form fields, formatting must be removed by first pasting content into Windows Notepad. Windows Notepad will remove all formatting allowing you to copy this text into the system form field.

Images and graphs cannot be inserted into form fields.

Types of Forms

- **REQUIRED FORMS:** The “Applicant Information” and “Project Details” forms are required for all concept papers and must be completed in their entirety.
- **ELECTIVE FORMS:** “Personnel Services”, “Contractual Services”, “Expenses”, “Equipment Costing \$5,000 or More” and “Indirect Costs” forms will only be completed, if needed. (E.g. if you are not requesting contractual services funding, then you would not complete the “Contractual Services” form).
- **FINAL SUBMISSION FORM:** This form will allow the upload of additional required documents (e.g. the letter of support and non-profit certification) if applicable. This is also where a PDF version can be printed for internal circulation and approval, prior to submission in the system. Final submission of the concept paper to the FDOT State Safety Office is executed through this form.

Note: The Concept Paper Summary and Concept Paper Budget Summary forms are system generated to combine the individual concept paper forms for ease of comparison and review. These forms are not manually updated but are updated based on changes to the preceding forms.

Applicant Information

The first form in your concept paper is the “Applicant Information” form. The following explains what you should put in each field of this form.

The screenshot displays the FDOT Highway Traffic Safety Subgrant Management System interface. At the top, the FDOT logo and system name are visible. Navigation links include Home, Concept Papers/Grants, Training Materials, Organization(s), Profile, and Logout. Action buttons for SAVE, SAVE/NEXT, NEXT, and CHECK GLOBAL ERRORS are present. A breadcrumb trail shows the user's path: Menu > Forms Menu > Status Changes > Management Tools > Related Documents and Messages. The current document is identified as CPG-2020-FDOT-Safet-00004. The 'You are here' path is 2020 Highway Safety Grant Program Menu > Forms Menu. The main section is titled 'APPLICANT INFORMATION'. Instructions state: 'Please complete this page, then click the Save button. Required fields are marked with an *'. The form includes input fields for Applicant Agency, Implementing Agency, Concept Paper Title, and Amount Requested. A 'Priority Area for Concept Paper (Select Only One): *' section contains a grid of radio button options: Aging Road Users, Community Traffic Safety Outreach, Distracted Driving, Impaired Driving, Motorcycle Safety, Occupant Protection and Child Passenger Safety, Paid Media (FDOT Only), Pedestrian and Bicycle Safety, Planning and Administration (FDOT Only), Police Traffic Services, Public Traffic Safety Professionals Training, Speed/Aggressive Driving, Teen Driver Safety, Traffic Records, Traffic Records Coordinating Committee (TRCC), and Work Zone Safety.

Applicant Agency	The agency that will receive the subgrant funds. (E.g. City of Tallahassee)
Implementing Agency	The agency that will execute the subgrant tasks and objectives. (E.g. Tallahassee Police Department)
Concept Paper Title	The title for the project. Please do not use acronyms.
Amount Requested	Total funding amount requested for the proposed project.

Priority Area for Concept Paper

You may only select one priority area per concept paper. Agencies applying for multiple subgrants must submit a concept paper for each priority area. An overview of each priority area is provided on page 8 of this document.

Type of Project

Identify if the proposed project is local or statewide.

Type of Request

Identify if the proposed project is new (initial) or if it has been funded in previous years (continuation).

For continuation requests, please include the year that the project is in (e.g. Year 1, Year 2 or Year 3) and the previous year's project number.

Ranking

Local projects must provide their city or county ranking according to the Highway Safety Data Matrices or identify if the proposed project is to address an otherwise identified, data-driven need (must provide detailed data to support the need in the "Supporting Data" section of the "Project Details" form).

Head of Agency

Contact information for the head of the applicant agency. Must include a valid email address to receive electronic submission and selection decision notifications.

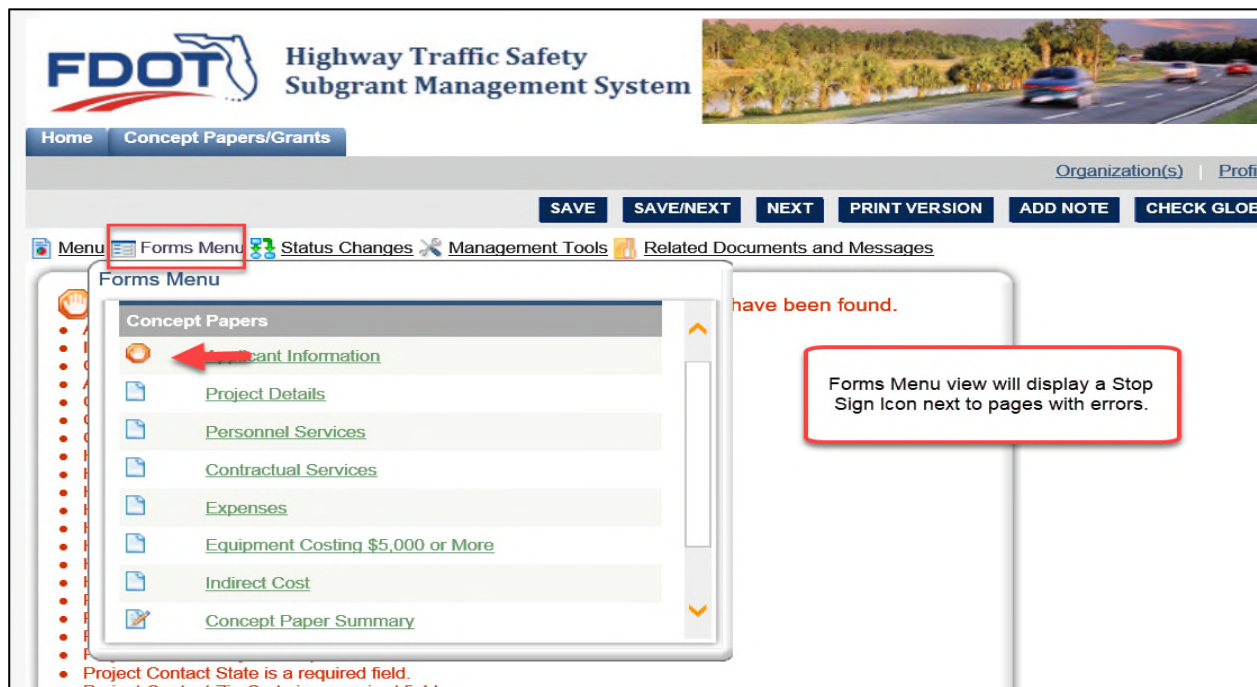

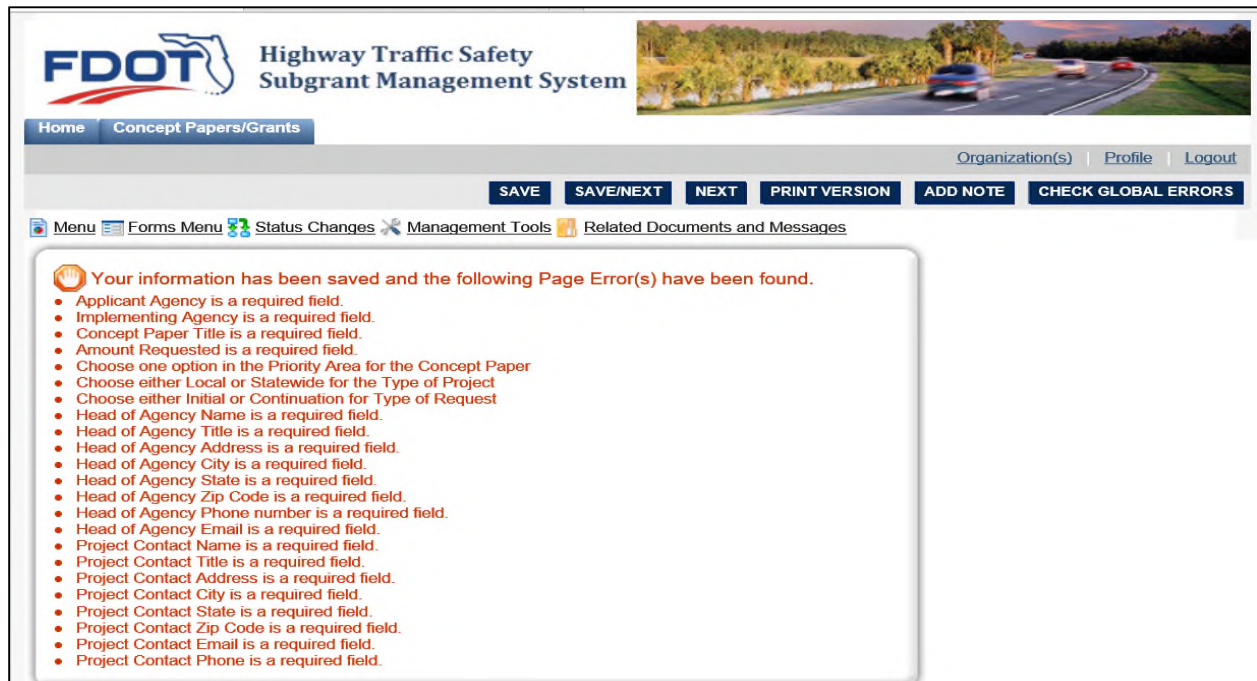

Project Contact

Contact information for the primary project contact. Must include a valid email address to receive electronic submission and selection decision notifications.

Once you've completed all fields in the "Applicant Information" form, click the "Save/Next" button to move onto the next concept paper form. Selecting "Save" will save progress within the form without advancing to the next form.

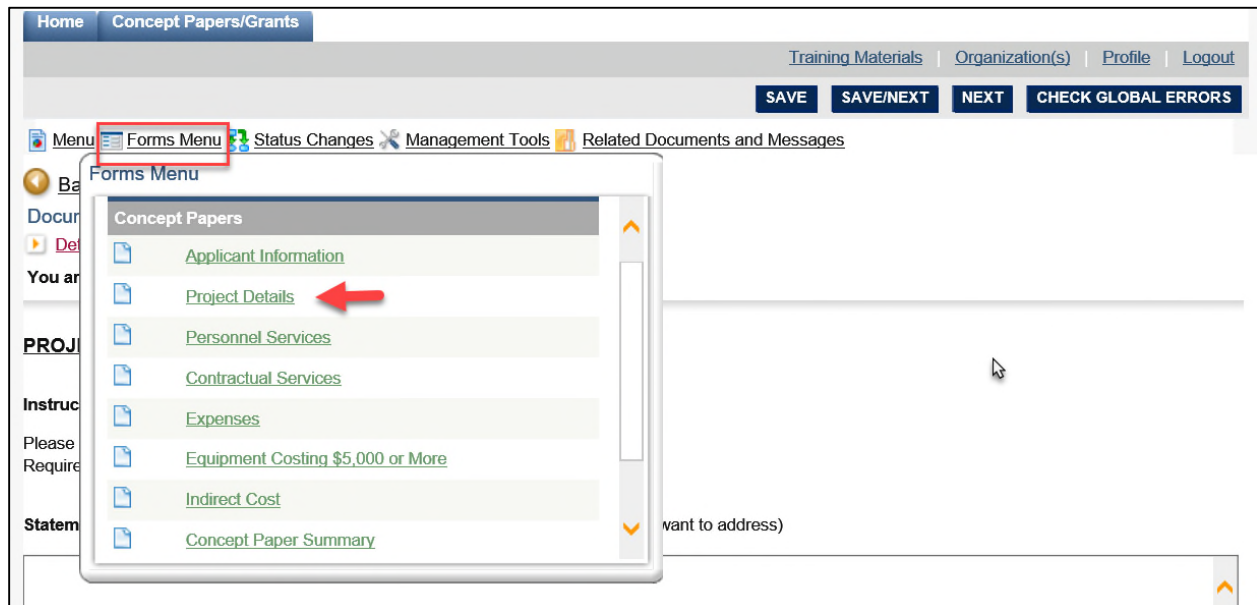

The screenshot shows the 'Applicant Information' form. At the top right, there are four buttons: 'SAVE', 'SAVE/NEXT', 'NEXT', and 'CHECK GLOBAL ERRORS'. The 'SAVE/NEXT' button is highlighted with a red box. Below the buttons, the form contains several sections. The 'Ranking (if Local Project): *' section has two options: 'City - [] of []' and 'County - [] of []', with an 'OR' and 'Identified Need (Data outside of the Fatalities and Injuries)' option. The 'Head of Agency:' section includes fields for Name, Title, Address, Address 2, City, State (with a dropdown arrow), Zip Code, Phone, Extension, and E-mail. Each of these fields has a red asterisk indicating it is required. A red-bordered callout box on the right side of the form contains the text: 'Press "Save" to save your progress on this form. Or Press "Save/Next" to save progress on this form and advance to the next page.'

Every time a form is saved, the system will check for errors. If errors are found, the system will list the errors at the top of the form and as an orange stop icon in the Forms Menu.

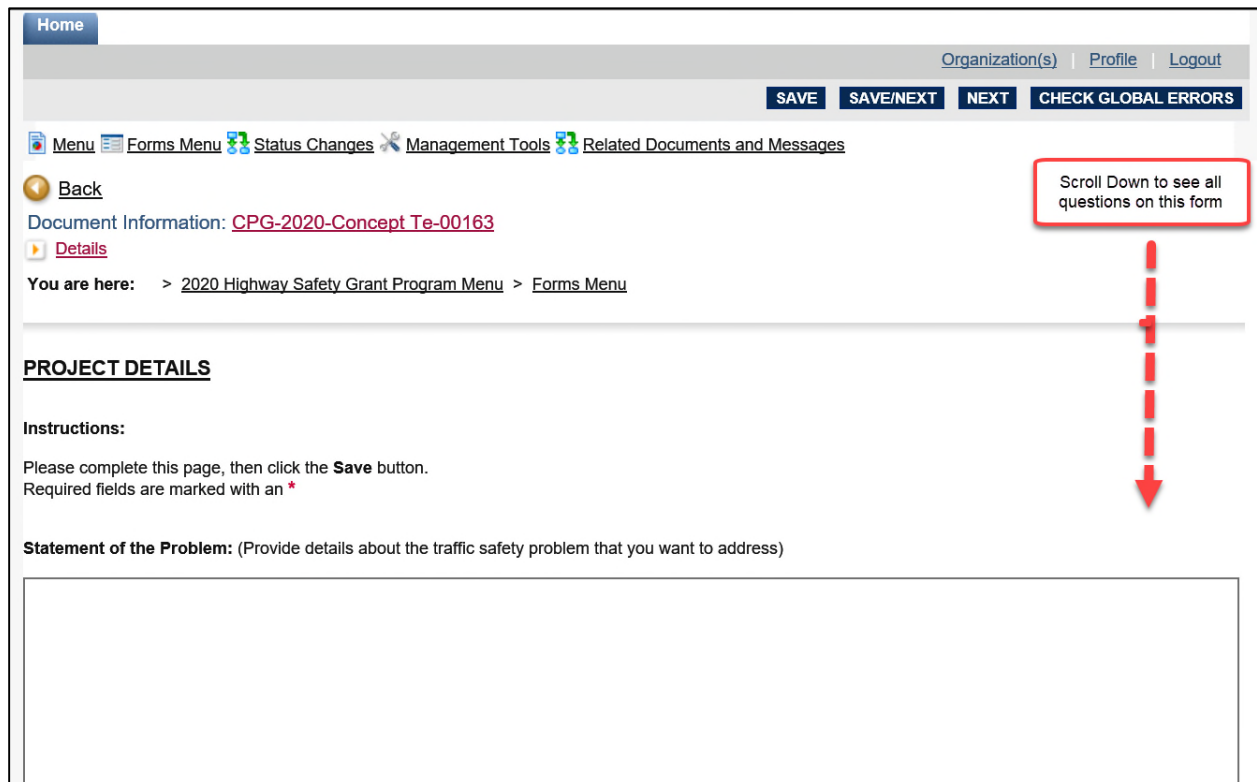

Project Details

The second form in the Forms Menu is "Project Details".

This screenshot shows the top navigation bar of the application. The 'Forms Menu' is highlighted with a red box, and a dropdown menu is open. Within this dropdown, 'Project Details' is highlighted with a red arrow. The dropdown menu lists several options under the 'Concept Papers' section: Applicant Information, Project Details, Personnel Services, Contractual Services, Expenses, Equipment Costing \$5,000 or More, Indirect Cost, and Concept Paper Summary. The main content area of the page is mostly blank, showing only a 'want to address)' label.

This form has several large fields to complete. You will need to scroll down to see all fields on this form. The following describes what information should be included in each field of this form.

This screenshot shows the 'Project Details' form page. The top navigation bar includes links for 'Organization(s)', 'Profile', and 'Logout'. Below the navigation bar, there are buttons for 'SAVE', 'SAVE/NEXT', 'NEXT', and 'CHECK GLOBAL ERRORS'. The 'Forms Menu' is highlighted, and a red box with a red arrow points down to the 'Project Details' section. The 'Project Details' section is titled 'PROJECT DETAILS' and includes instructions: 'Please complete this page, then click the Save button. Required fields are marked with an *'. Below the instructions, there is a large text area for the 'Statement of the Problem: (Provide details about the traffic safety problem that you want to address)'. A red dashed arrow points down from the 'Scroll Down to see all questions on this form' box to the 'Statement of the Problem' text area.

Statement of the Problem

Identify the specific traffic safety-related problem or deficiency that the proposed project is intended to address. Please identify the associated emphasis area of the Strategic Highway Safety Plan (SHSP).

The screenshot shows a web application interface. At the top, there is a navigation bar with a 'Home' button and links for 'Organization(s)', 'Profile', and 'Logout'. Below this are buttons for 'SAVE', 'SAVE/NEXT', 'NEXT', and 'CHECK GLOBAL ERRORS'. A menu bar contains links for 'Menu', 'Forms Menu', 'Status Changes', 'Management Tools', and 'Related Documents and Messages'. A 'Back' button is also present. The document information is 'CPG-2020-Concept Te-00163'. The breadcrumb trail is 'You are here: > 2020 Highway Safety Grant Program Menu > Forms Menu'. The main section is titled 'PROJECT DETAILS'. Under 'Instructions', it says 'Please complete this page, then click the **Save** button. Required fields are marked with an *'. The 'Statement of the Problem' section has a text area with the following text: 'Explanation of your traffic safety issues can be typed in this box. If you are trying to paste information from another application, you will need to first paste the content in Windows Notepad to remove all formatting, prior to pasting into this box. (DO NOT INSERT GRAPHS OR GRAPHICS)'. A red box highlights this text area, and a red arrow points to it from a callout box that says 'Scroll down to see all questions on this form'.

PROJECT DETAILS

Instructions:

Please complete this page, then click the **Save** button.
Required fields are marked with an *

Statement of the Problem: (Provide details about the traffic safety problem that you want to address)

Explanation of your traffic safety issues can be typed in this box.

If you are trying to paste information from another application, you will need to first paste the content in Windows Notepad to remove all formatting, prior to pasting into this box.

(DO NOT INSERT GRAPHS OR GRAPHICS)

Scroll down to see all questions on this form

Supporting Data

Include at least three (3) years of local crash, injury, fatality, and citation data, to show the extent of the problem the proposed project will address. If the city or county is ranked lower than the top 25% in the most recent Highway Safety Data Matrices, provide further details to document the otherwise identified data-driven need. Take into consideration changes or projected changes in population, traffic patterns and other demographic dynamics that may affect traffic safety. Survey data can also be included in this section.

Examples:

- Provide city or county alcohol-related crash statistics (crashes, injuries, and deaths) for the past three (3) years.
- Compare local safety belt use rates to statewide rates.
- Provide three (3) years of enforcement data that reflect the problem. (E.g. show the number of citations, arrests, and special operations for your jurisdiction that reflect the problem.)

Supporting Data: (Include at least three years of crash, injury, fatality and citation data, to show the extent of the problem. If outside the top 25% for your city or county, provide further details to support your identified need)

Supporting Data can be typed in this box.

If you are trying to paste information from another application, you will need to first paste the content in Windows Notepad to remove all formatting, prior to pasting into this box.

Proposed Solution

Provide the specific countermeasure(s), chapter, and section from the Countermeasures That Work guide that the proposed program will implement. Explain how each countermeasure will address the problem and how the requested funding will be used to support those countermeasure(s). If no countermeasure(s) exist, explain the basis of the proposed program strategy and how it will be effective.

Proposed solutions must show a logical relationship to the identified problem. Items listed in the concept paper budget must correlate to the Statement of the Problem and the Proposed Solution. Proposed budget and purchases must also directly relate to solving the identified problem and implementation of the solution.

Proposed Solution: (Provide the specific countermeasure(s), chapter, and section you plan on implementing from the NHTSA Countermeasures That Work guide, found at: <http://www.fdot.gov/safety/3-Grants/CountermeasuresThatWork8th.pdf>. Explain how the countermeasure(s) that you plan to implement will address the problem and how the funding that you have requested will support those countermeasure(s). If no NHTSA countermeasure(s) exist, explain the basis or your selected strategy and how it will be effective)

Proposed Solution can be typed in this box.

If you are trying to paste information from another application, you will need to first paste the content in Windows Notepad to remove all formatting, prior to pasting into this box.

Project Objectives

List the short-term objectives that you have for the project. All objectives must be quantifiable and correlate to the Statement of the Problem and the Proposed Solution. Baseline data should be provided for all objectives.

Examples:

- To reduce the number of crashes by 5% compared to the 3-year average of the most recent data by conducting 12 sobriety checkpoints during the subgrant period.
- To reduce the number of alcohol-related crashes by 5% in 2019 compared to 206 crashes recorded in 2017 through high visibility enforcement.
- To reduce bicycle and pedestrian injuries and fatalities in the city by 5% during 2019 as compared to the 128 injuries reported in 2017 by conducting public awareness programs at local high schools, colleges, and businesses.
- To provide 12 public education outreach events in the community during the subgrant period.
- To conduct at least 60 child passenger fitting station appointments by September 30, 2019.
- To increase the number of speed-related overtime enforcement contacts by 5% compared to the same period in the previous three years.

Project Objectives: (List the short term objectives that you have for the project. All objectives must be quantifiable, such as, "To reduce the number of crashes by 5% compared to the 3 year average of the most recent data by conducting 12 sobriety checkpoints during the sub-grant period; providing 12 public education outreach events in the community during the sub-grant period..")

Project Objectives can be typed in this box.

If you are trying to paste information from another application, you will need to first paste the content in Windows Notepad to remove all formatting, prior to pasting into this box.

ADDITIONAL INFORMATION

Instructions:

Please complete this page, then click the **Save** button.
Required fields are marked with an *

Do you anticipate needing funding for multiple years to complete this project? *

☐ Yes ☐ No

Project will impact the following Traffic Records Information Systems: (check all that apply) *

☐ Citation/Adjudication ☐ Driver ☐ Roadway
☐ Crash ☐ Vehicle ☐ EMS/Injury Surveillance System

Project will impact the following performance area(s): (check all that apply)

☐ Timeliness ☐ Completeness ☐ Accuracy
☐ Uniformity ☐ Accessibility ☐ Integration

Project will advance the following goal(s) for Florida Traffic Safety Information Systems: (Select All That Apply)

☐ Accessibility ☐ DataQuality ☐ Utilization
☐ Coordination ☐ Integration

Goal Support: (Explain how the project will help advance the goal(s) selected above.)

Do you anticipate needing funding for multiple years to complete this project? – Select “Yes” if you anticipate needing funding for multiple years to complete the project. Please provide a projection of how much is expected to be spent in current and each future year(s) to allow a full understanding of the funding needs required.

Project will impact the following Traffic Records Information System(s) – Select which of the state’s six traffic records systems (Citation/Adjudication, Crash, Driver, EMS/Injury Surveillance system, Roadway, and Vehicle) the project will impact.

Project will impact the following performance area(s) – Select which of the six performance areas the project will impact.

Project will advance the following goal(s) for Florida’s Traffic Safety Information Systems – Select which of the state’s five goals of Florida’s TRCC as documented in the Florida Traffic Safety Information System Strategic Plan 2017–2021 the project will impact. The goals are:

Goal 1: Coordination - Provide ongoing coordination in support of multi-agency initiatives and projects which improve traffic records information systems.

Goal 2: Data Quality - Develop and maintain complete, accurate, uniform, and timely traffic records data.

Goal 3: Integration - Provide the ability to link traffic records data.

Goal 4: Accessibility - Facilitate access to traffic records data.

Goal 5: Utilization - Promote the use of traffic records data.

Goal Support – Explain how the project will help advance the goal(s) selected above

Concept Paper Budget

The concept paper budget is entered by completing the “Personnel Services”, “Contractual Services”, “Expenses”, “Equipment Costing \$5,000 or More” and “Indirect Costs” forms. Forms should only be completed, if needed. (E.g. if you are not requesting contractual services funding, then you would not complete the “Contractual Services” form).

On all budget forms, the “Federal Funding” column is used to indicate the funding being requested in the concept paper. “State or Local” match is used to identify the amount of funding the agency is also contributing toward the concept effort, if applicable.

Note: The Total column is automatically calculated from the sum of Federal Funding and Match column amounts.

Care should be taken in estimating costs. Include tax, delivery, shipping, and set-up costs. Attempt to anticipate increases in costs that may occur between the time the subgrant is proposed and the subgrant start date.

Subgrant costs must be reasonable, allowable, and necessary and be directly related to the stated problem and proposed solution.

Equipment purchases should be clearly defined in the problem statement and proposed solution, and describe a clear need for the equipment and how it will be used in the project.

Personnel Services

The Personnel Services Column should include position title and any benefits that will be reimbursed. Do not list an individual's name. Use descriptive titles such as "Law Enforcement Overtime", "Program Coordinator", "Administrative Staff", etc.

If this concept paper is for the "Traffic Records Coordinating Committee (TRCC) priority area, the percentage of time worked on the project should also be included under the Personnel Services Column.

Note: The entire line must be completed. If you have no Match funds, enter "0" in those columns to prevent error.

Ten lines are provided, if you need additional lines, complete the first 10 lines, then press "SAVE". One additional line will be provided each time you save.

One additional row will be provided after saving.

If you need more rows, continue to enter and save until all lines have been completed.

Indirect Costs

Indirect costs are costs that cannot be charged directly to a project. If a subrecipient has a federally negotiated indirect cost rate, it may be applied to the subgrant. If a subrecipient does not have a federally negotiated indirect cost rate, a rate up to the de minimis indirect cost rate of 10% of modified total direct costs may be applied. A subrecipient may opt to request a lower or no indirect costs rate, even if it has a federally negotiated indirect cost rate. Concept papers requesting indirect costs will be awarded based on cost benefit, available funding, and if the indirect cost rate requested significantly affects the proposed project's ability to adequately address the traffic safety need. The FDOT State Safety Office has historically not awarded indirect costs for local projects, law enforcement agencies for enforcement activities, or rates over 10%.

Note: The entire line must be completed. If you have no Match funds, enter "0" in those columns to prevent error.

Use this link to print a copy of your concept paper.

Click the "Print a PDF Copy" hyperlink to print a copy of the concept paper that can be circulated for internal review.

Next Steps

Next, you will need to upload a letter of support, signed by your agency head. Use the upload link below to upload your document. The system will not allow you to submit your concept without uploading a letter of support. Once the required attachment is uploaded, the submit button will be activated and you can complete your submission.

Example Letter of Support

Browse... Use this link to upload a PDF of a letter of support signed by your Agency Head.

Browse... Use this link to upload your non-profit certificate (*non-profit agencies only*)

☐ By checking this box, you confirm that you are satisfied with your concept paper and have included all required elements and are ready to submit. Once submitted, you will not be able to make changes and your concept will be reviewed as submitted. Are you ready to submit?

Additional Required Documents

1. A cover letter signed by the head of the agency or their authorized signatory **is required**. The cover letter must be typed on agency letterhead and state that the agency head fully supports the proposed project.

Examples of an agency head or their authorized signatory includes but is not limited to: Sheriff, Chief of Police, Fire Chief, University President, County Commission Chairperson, Mayor, City Manager, Chief of Staff, or Health Department Director.
2. Not-for-profit agencies must include their “Certificate of Status” from the Florida Department of State with their Highway Safety Concept Paper.

Submitting the Concept Paper

Once you save the form to upload the additional required documents, you will get an error that advises you to verify all details prior to submittal.

The screenshot shows the 'FINAL SUBMISSION FORM' interface. At the top, there are buttons: 'SAVE', 'SAVE/SUBMIT' (highlighted with a red box), 'ADD NOTE', and 'CHECK GLOBAL ERRORS'. Below these is a navigation bar with links: 'Menu', 'Forms Menu', 'Status Changes', 'Management Tools', and 'Related Documents and Messages'. A message box states: 'Your information has been saved and the following Page Error(s) have been found. Please verify all details are correct'. A red arrow points from this message to a red box on the right that says: 'This error will appear after you save to upload required documents. It reminds you to check the box at the bottom prior to submittal.' The document information is 'CPG-2020-Concept Te-00168'. The breadcrumb trail is 'You are here: > 2020 Highway Safety Grant Program Menu > Forms Menu > Concept Papers'. The section 'FINAL SUBMISSION FORM' contains instructions: 'The final step of your application requires you to upload a letter of support, signed by your agency head. You may print a copy of your entire concept paper, using the link below. Once you have uploaded your support letter, you will acknowledge that you are ready to submit by clicking the checkbox, then the "Save/Submit" button to proceed to submission.' There is a link 'Print a PDF Copy of Entire Concept Paper' and a note 'Use this link to print a copy of your concept paper.' The 'Next Steps' section says: 'Next, you will need to upload a letter of support, signed by your agency head document. The system will not allow you to submit your concept without an attachment is uploaded, the submit button will be activated and you can click the "Save/Submit" button to proceed to submission.' There is a link 'Example Letter of Support'. Below this are two file upload fields. The first field has a file named '2459897_1054878-SKM_C36818070211370.pdf' (circled in red) and a 'DELETE' button. The second field is for a non-profit certificate. At the bottom, there is a checkbox (circled in red) with the text: 'By checking this box, you confirm that you are satisfied with your concept paper and have included all required elements and are ready to submit. Once submitted, you will not be able to make changes and your concept will be reviewed as is.' A red arrow points from the message box to this checkbox. A red box on the right contains text: 'Uploaded documents will be displayed below the browser tool. Once you are satisfied with the information entered in the system and have uploaded the required documents, you must check the box to confirm that you are ready to submit. Once checked, you may click the "SAVE/SUBMIT" button.'

Take one last opportunity to ensure that all information has been entered correctly in all previous forms and additional required documents have been uploaded.

Once you have confirmed all information is complete, **check the confirmation box at the bottom of the page**, then select "SAVE AND SUBMIT" at the top of the form page.

You will receive a system message and email that your concept has been submitted to the FDOT State Safety Office for review.
