

102 MAINTENANCE OF TRAFFIC - DETOURS.

(REV 2-12-01) (FA 6-14-01) (1-02)

SUBARTICLE 102-4.2 (Pages 111-112). The following text is inserted after the third paragraph:

Request approval from the Engineer to transport detour bridge components from the current project site directly to a new project location, by submitting a written request containing the following:

- a. Justification for the request,
- b. Company name,
- c. Company phone number,
- d. Location of new project,
- e. Project contact person,
- f. Financial Project Identification Number,
- g. Detour bridge type,
- h. Bridge length,
- i. Span length,
- j. Usage time frame.

The Engineer will respond within 10 calendar days upon receipt of a completed request.

Before assembling or erecting any bridge components at the new location, provide certification from a registered Professional Engineer confirming that the bridge components are not damaged. All needed repairs have been made and the bridge components have not been altered from their original condition. Accept all responsibility and liability for the condition of the bridge components.
