

102-8.6 Safety Warning Transmitter.

(REV 12-11-00) (FA 6-20-01) (1-02)

The number of satisfactory safety warning transmitters actually in place on the project, as authorized by the Engineer on any calendar day or portion thereof within the Contract Time, will be paid for the Contract unit price for safety warning transmitters.

Such price and payment shall be full compensation for furnishing and installing and relocating if required to provide a completely functioning system as described in these specifications. Payment shall include all labor, hardware, accessories, and incidental items necessary for a complete system.

Payment shall include any measurements needed to insure that the transmitter conforms to all specification requirements.

Payment shall include all labor, materials, incidentals, repairs and any actions necessary to operate and maintain the unit at all times during active work activities.

Payment shall be made under:

Item No. 900-102-3- Safety Warning Transmitter - per each per day.

Item No. 2900-102-3- Safety Warning Transmitter - per each per day.
