

SUBLETTING CONTRACTS.

(REV 2-14-94) (7-00)

SUBARTICLE 8-1.1 (Pages 71 and 72) is expanded by the following:

Only firms specifically qualified by the Department to perform Pressure Epoxy Grouting will be allowed to perform the work included under Injecting and Sealing Prestressed Beams. To qualify, firms experienced in this type of work must submit a letter to the Contracts Officer signed by a Department official or a reputable licensed engineering firm, stating that Pressure Epoxy Grouting work was performed under their supervision and equipment and workmanship were satisfactory. Any firm wishing to qualify but unable to furnish such a letter will be required to demonstrate, at a site selected by the Department, their ability to perform such work satisfactorily. Firms desiring to become qualified by the latter method shall contact the Department's Office of Materials and Research in Gainesville, Florida.
