

700 SIGN ASSEMBLY DESIGN REQUIREMENTS – SIGN BACKGROUND.
(REV 2-25-04) (FA 3-22-04) (7-04)

SUBARTICLE 700-2.5 (Page 731) is expanded by the following:

Use fluorescent orange Type VI or VII for all orange work zone signs on interstates. Do not mix work zone signs having fluorescent orange sheeting with signs having orange reflective sheeting.

Mesh signs shall meet the color, daytime luminance and non-reflective property requirements of Section 994, Type VI.

SUBARTICLE 700-3.8 (Page 732) is deleted and the following substituted:

700-3.8 Process Colors: Use transparent and black opaque process colors meeting the requirements of 994-4 on reflective sheeting and non-reflective sheeting.
