

COMMENTS RECEIVED FROM INDUSTRY REVIEW

Ralph Deleon

In response to the change I am in favor of the change, I agree that a Concrete Production Facility Manager should have a CTQP Concrete Laboratory Technician Level I, Concrete Field Technician- Level I, and Batch Plant Operator. I also agree with the alternatives to CTQP qualification. Plus the Three years of QC experience directly related to cement concrete production. Demonstrated proficiency in implementing, supervising, and maintaining surveillance over a QC Program. **Experience and Certification** in performance of required QC tests and statistical evaluation of quality control test results.
